

Once we had built our Kids Edible Gardens we decided that we needed compost for them - this is our fruit and vege scraps bin. We collect scraps each lunchtime.

Room 2 painted images around our school's storm water drains to remind us to take care of our waterways.

Room 5 took on the project to develop an open orchard. We have got lots of fruit trees planted so far. We are looking forward to their first fruiting.

The end point for Room 1's water unit was to redesign and fix our old water feature.

Our school gardening group has been busy growing rengarenga lily seeds, and been busy planting other native trees around our school.

At the beginning of 2011 we started to develop our school vegetable gardens and made little plastic houses for the winter season.

Every Thursday we have Nude Food Thursday as part of our school day. It is to make our community more aware of the amount of packaging in our environment.
