U140294 – Waitata  
U140295 – Richmond  
U140296 – Ngamahau

Steve Ulrich  
Marlborough District Council  
PO Box  
Blenheim

**Compliance with Condition: Odour Management**  
**#48 Waitata, Richmond, Ngamahau**

48. The consent holder shall, prior to the first discharge of feed to the marine farm, have in place, and implement, operational procedures to implement best management practices to:
- a ensure that, as far as practicable, filling of the 'mort' bin (storing dead fish) does not occur during still air conditions;
  - b establish target times for cleaning the grower nets once they have been raised, to minimise the potential for odour from dirty nets;
  - c ensure that, as far as practicable, there is only one grower net being lifted and cleaned at one time, to minimise the potential for odours from this activity.

Can Council please confirm in writing that the 'Residential Amenity Management Plan (Section 5)' complies with condition 48 – Odour Management condition above.

Yours faithfully

Mark Gillard  
Environmental & Compliance Manager
