Subject: RE: Updated Biosecurity Management Plan

Hi Karen,

Further to my email below. I have received feedback from Council biosecurity stating that the biosecurity management plan could be improved by adding more in the protocols about ensuring that vessels and equipment are free from biofouling before moving both between zones and to/from the key servicing hubs. If you could consider this for addition in the biosecurity management plan that would be appreciated.

Please let me know your view or intended course of action in regards to this feedback.

Regards,

Reuben Fergusson
