

BURNING for frost protection or vineyard development?

Burning these materials is

BAD for the Environment
for the Industry
for your Vineyard's Image:

- Tyres
- Spray guards
- Agrichemical containers
- Treated wood
- Hay bales soaked in oil/petrol etc
- Waste oil
- Vehicle fuels
- Plastics, rubber and most other synthetics
- Vegetation that is not completely dry

**If dark smoke is being produced, you are probably burning inappropriate materials.
If thick white smoke is being produced, materials are probably not dry enough.**

Potential Penalties:

Contractors, property owners, managers and staff may all be liable for:

A \$300 infringement notice

A fine of up to \$200 000 or up to two years in prison

A criminal record
