

SESSIONS & RESOURCES FOR SCHOOLS

PLANT DETECTIVE

Learn about native plants in an outdoor space. Students become plant detectives, using their observation skills to draw and describe a native plant and then identify it.

BECOME KAITIAKI

Classroom-based activities lead students to create a care code for natural spaces in their school. What is kaitiakitanga? What do special places need? Who looks after them?

WHENUA | SOIL

Explore the world beneath your feet. Investigate why soil is the key to a healthy environment in this hands-on session.

INSECT HUNT

Students embark on a treasure hunt to find some of the smallest creatures we share our environment with, identifying what they find.

LIVING LANDSCAPES KIT

Borrow our kit full of all the equipment & information that you need to explore your living landscape with your students.

PEST DETECTIVE

Use footprints, bite marks & poo to identify pests. Learn how introduced species harm our native plants, insects and birds.

CONTACT

Sessions can be tailored to meet your needs. Please contact me to discuss your requirements and make a booking.
