

Over the last two weeks of September the team has:

- Surveyed, cleared, benched and laid foundation rock on the new pathway on the Outram Street extension
- Worked with the Outward Bound volunteer students to lay and compacted the final surface on pathway below the storage sheds
- Positioned and driven all the bridge and boardwalk piles in the three sites: between Cemetery and Brownlee Close, the wetland area by storage sheds and the estuary area between Wilson St and Mahakipawa Rd

Next Steps

Over the next two months the team will be constructing the support structures and decking on all the boardwalks

Please remember this is a construction site and follow any health and safety instructions
