

### During December the Motuweka Pathway team has:

- Constructed the arch bridge below Wilson Street
- Completed half the decking of the boardwalk leading to Mahakipawa Road
- Started to prepare the baluster posts for the handrails
- Completed the final compacted surfacing of the pathway down Outram Street extension and below Brownlee Close

### Next Steps

The team is taking a well-deserved break till 11 January.

NOTE: Although it appears that the boardwalk and bridges are finished, they still need handrails and a code of compliance before they are safe. Please respect the closed gates and signs saying **Keep Out** until the pathway is open.

Please remember this is a construction site and follow any health and safety instructions
