

# Keep Hazardous Waste Out of Skips

**Explosives Paints Solvents  
Garden & Agrichemical Sprays  
Lab Chemicals  
Antifreeze  
Rechargeable Batteries**

**Gas Cylinders Fuels  
Pool Chemicals Cleaners  
Car Batteries Corrosives PCBs  
Fluorescent Light Bulbs  
Asbestos**

Hazardous waste is accepted in domestic quantities up to 20 kg or litres for free at the Blenheim, Picton, Havelock, Rai Valley and Seddon Transfer Stations.

If you need to dispose of larger quantities of hazardous material, or need any further information please phone JBL Environmental on **03 578 9622** or **027 749 4741**, or email [info@jblenvironmental.co.nz](mailto:info@jblenvironmental.co.nz)

Much of the hazardous waste disposed of through the right channels can actually be recycled, for example: Paint, batteries, solvents, and fuels.

The skip is not the end of the line for rubbish...

**Please remember, other people have to deal with your waste before it gets buried and forgotten about.**

The Waste Sorting Centre receives waste from skips which then goes through the sorting process. All hazardous, recyclable, and reusable items are separated before the rest of the waste heads to the landfill.

Do your part and dispose of your hazardous waste properly to keep others safe, get it out of our environment, and help recycle products instead of sending them to the landfill.
