

AGRECOVERY

## → PEST AND GARDEN SPRAY CONTAINER COLLECTION

FREE

Did you know you **cannot** put your pest and garden spray containers in your kerbside recycling?

But you can recycle them **FOR FREE** at our drop-off locations in the Marlborough region!\*

Don't send them to landfill - we will take both your clean, empty containers and ones with a small amount of residual product leftover.

\* This is strictly for households. Not commercial operators.

See how to get involved overleaf →

## → Pest and garden spray container collection

---

### CONTAINERS THAT CAN BE RECYCLED

- Weed killer
- Insect control
- Fungicides

**No** aerosols. These can't be recycled.

### PREPARE YOUR CONTAINERS

To properly prepare your containers for recycling, try and use up all the product first. Once empty, triple-rinse containers with water, disposing of the rinse water according to manufacturer guidelines.\*

Once empty and clean, please remove and dispose of:

- lids/bungs
- metal handles or triggers

If you have leftover, expired or unwanted residual product in your containers that can't be used up, please keep lids on and fasten tightly to ensure there is no leaking. These can still be dropped off at the collection sites.

### WHERE TO DROP OFF YOUR CONTAINERS

Drop off your containers at any of these sites in the Marlborough region:

**Marlborough Hazardous Waste Centre:**

Wither Road Extension, Blenheim

**Picton Transfer Station:** Gravesend Place, near Queen Charlotte Drive

**Havelock Transfer Station:** Queen Charlotte Drive, beside Kaituna River

A bin is available specifically for dropping off these products.

### WHY ARE WE DOING THIS?

Agrecovery is a not-for-profit charitable trust. Alongside our partners, we want to take responsibility for the pest and garden spray containers that are put into the market – to minimise their risks to the environment and recycle the left-over plastic.

\*Please wear appropriate protective equipment and follow manufacturer health and safety guidelines when rinsing containers. DO NOT dispose of rinse water where it can contaminate waterways.
