Land Transport Activity Management Plan 2024-27

> PROGRAMME CASE

Like any national investment going forward, our transport network must begin to contribute, not just to physical assets, but also to environmental, social, human and cultural wellbeing aspects. Increasing frequency and intensity of adverse natural events are significantly damaging the network. Emergency responses result in staff re-allocation, affecting delivery of planned businessas-usual activity, let alone any pro-active work.

## How do we maintain ongoing operation AND build a future sustainable network?

#### **Balancing the Priorities**

During the 2021-24 LTAMP cycle, MDC's focus was on recovering the network impacted by storm events. Since then, a major capital improvement business case has been developed to address the shortfall in funding to complete the work.

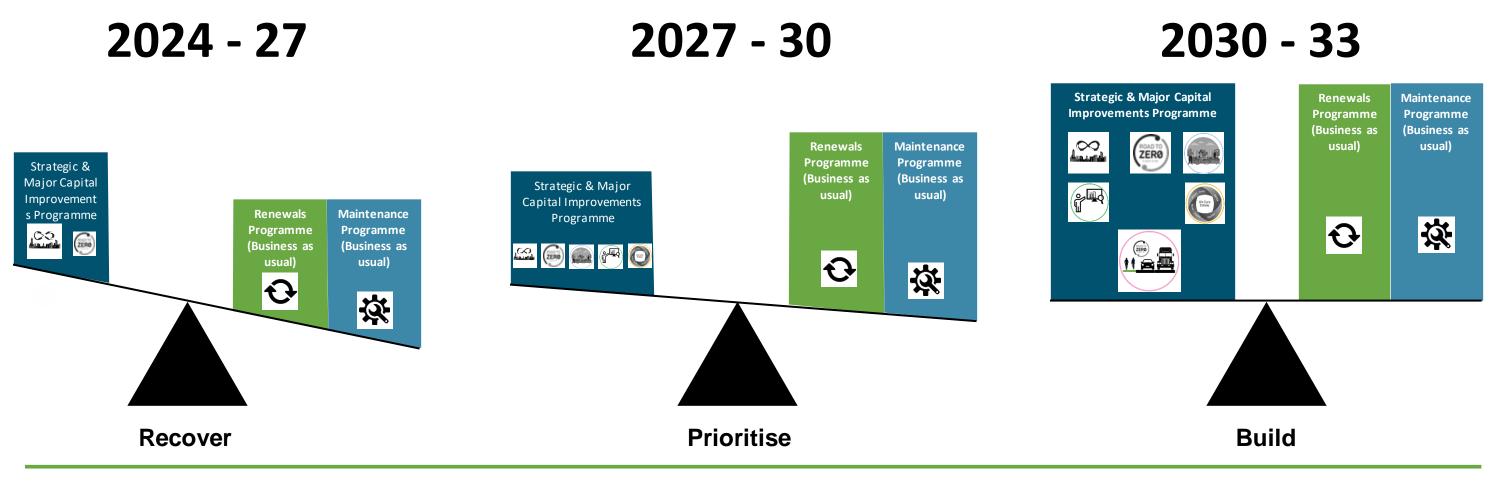

We have re-examined everything as part of the LTAMP review . The ILM process has enabled us to get clear on where we are at, what lies ahead, and what the priorities are.

We must improve the safety and resilience of our transport assets to meet the unpredictable damage caused as a result of climate change. This requires people and our small team is committed to sorting this out. However, we are aware this is going to take time and a new approach involving a longer-term focus than the typical 3-year horizon.

An unintended consequence however due to the reallocation of staff means that we continue to fall short of meeting national / local demands and expectations associated with levels of service and embedding new ways of working to enable better decisions to be made. This is further compounded by rapidly rising construction costs, resulting in us getting less than we had planned for. To respond to these challenges, we need to continue to put our focus in to the recovery, renewal / maintenance work and address the strategic priorities. We have therefore developed this LTAMP to reflect two programmes of work:

- Strategic and Major Capital Improvements
- Renewals and Maintenance

We need to build capability and capacity and intend to undertake a full strategic review of our resources and the impact on operating costs. The outcome will enable us to understand how we best increase resources to build capability and capacity in the short term. If we can secure these

Land Transport Activity Management Plan 2024-2027

Resources then we can develop and implement both programme of works.

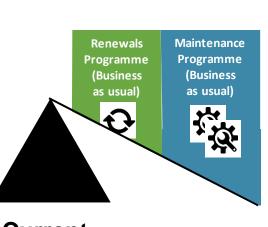

To enable effective re-prioritisation of our available funding, we need to be able to make better decisions faster, we will be enabled to do so by embedding the ONF and improving our asset management practice.

This Programme Case considers the investment level across several options. Risk, levels of service and benefits are assessed for each. It details the assessment framework that we have adopted. Options are explained and assessed, until the preferred way forward becomes clear.

# 2021 - 24

Marlborough Sounds Future Access Programme **Business Case** 

Current

#### **Current 3 Year Budget Allocation**

The existing budgets are summarised in the table below.

Budget Category	MDC Initial 3-Year Budget
Subsidised Maintenance	\$ 28,609,489
Subsidised Renewals	\$ 37,314,783
SUBSIDISED SUB TOTAL	\$ 65,924,272
LOW-COST LOW-RISK SUB TOTAL	\$ 2,946,754
TOTAL TRANSPORT BUDGET	\$ 68,871,026
Council Contribution (minus FAR 51%)	\$ 33,746,803

#### Where we can make savings

The following areas have been identified as opportunities to save money:

- Structures Maintenance
- Environmental Maintenance
- Traffic Services Maintenance
- Network and Asset Management
- Footpath Maintenance by doing CBD cleaning as subsidised work, currently unsubsidised.
- Saying no to customer requests:
  - Dust suppressant
  - Additional signage
  - Sealing accesses
  - · additional line marking etc.

**Reprioritise to** enable Strategic and **Capital Improvements** Programme to also be a focus.

# 2024 - 27

Where we need to spend more		
The following areas have been identified as areas that require more money:	The deve add	
<ul> <li>Lump Sum maintenance escalation.</li> <li>Surfacing Renewals (Sealed &amp; Unsealed).</li> <li>Grading and re-sheeting gravel roads.</li> <li>Drainage Renewals</li> </ul>	• 0 • 0 • 0	
<ul> <li>Safety components – delineation. Awatere Valley Road / Croiselles French Pass Road</li> </ul>	The undo asso	
Existing Budget Review Outcomes	deta • S	
Savings and additional expenditure highlighted have been reviewed in line with the existing budgets. The existing allocated budgets are not enough to cover the current expenditure. Cost escalations due to raising construction costs and inflation are resulting in less work being done for more money.	C • L w S • S ir a • F	

Three investment options have been developed to ascertain what extent of additional funding is affordable to the community.

#### estment Options

e following investment options have been eloped to enable MDC to determine what ditional funding is affordable:

- Option 1 Minimum Budget
- Option 2 Conservative Budget
- Option 3 Best Practice Budget

e next page details the considerations lertaken in assessing the options sessment. The subsequent pages then tail each option and include the following:

- Summary of Investment and
- Outcomes expected.
- List of 2024-27 LTAMP projects associated with the 'Recover Network & Build
- Safety & Resilience' Tranche.
- Subsidised maintenance / renewals
- nvestment summaries for each activity
- and the impacts on levels of service and condition.
- Financial Summaries for all workstreams.

Note - The storm recovery work is included but is funded separately and therefore not reported in the financials.

### **Investment Option Analysis**

Each Investment Option has been considered from a scope, financial, benefits, levels of service and risk perspective to enable a Multi-Criteria Assessment to be undertaken.

### Scope & Financial Analysis

Each option has been scoped and budgets assigned to the individual work categories associated with the LTAMP activities. Detailed Spreadsheets have been developed and are included in the appendices.

#### Levels of Service and Benefit Indicators

A five-point indicator has been established to assess how the option contributes to the levels of service and LTAMP Benefits for each of the options. The criteria for each of the indicator levels is described in the table below.

Indicator	Levels of Service	LTAMP Benefits
.41	Assets in Excellent Condition, meeting or exceeding the Levels of Service expectations of our customers.	Achieves all planned LTAMP Benefits. Performance meets or exceeds targets.
	Assets in Good Condition, meeting the Levels of Service expectations of our customers.	Most planned LTAMP benefits achieved. Performance measures near the target.
	Assets in Good to Fair Condition. Falling slightly below in meeting the Levels of Service expectations of our customers.	Some planned LTAMP Benefits achieved. Performance measures below target.
	Assets in Poor Condition. Critical assets below the Levels of Service expectations of customers; most assets underperform.	Few planned LTAMP benefits achieved. Most performance measures below targets, with some significantly below.
	Deteriorating Asset Condition, failing to meet the Levels of Service expectations of customers.	No realised LTAMP benefits. Performance measures significantly below targets, with some assets seriously damaged.

#### **Risk Analysis**

The risk assessment framework below has been adopted to enable a risk profile for each of the options to be established.

The detailed investment option analysis work to support the following pages can be found in the appendices.

Risk	Reputation	I	Performance	
Rating Scale	Stakeholder	Delivery	Cost	Environmental
Extreme	<ul> <li>No progression of national and regional strategic activity.</li> <li>Loss of route availability of regional arterial roads for all vehicles.</li> </ul>	<ul> <li>Programme slippage resulting in late delivery by more than 180 days</li> </ul>	<ul> <li>Negative financial impact of more than \$20M</li> </ul>	<ul> <li>Permanent pollution danger or other environmental damage</li> </ul>
Severe	<ul> <li>Little progression of national and regional strategic activity.</li> <li>Loss of route availability of regional arterial roads and sever restrictions on HPMV vehicles.</li> </ul>	<ul> <li>Programme slippage resulting in late delivery by between 60 and 180 days</li> </ul>	<ul> <li>Negative financial impact of between \$10M and \$20M</li> </ul>	<ul> <li>Significant widespread pollution or other environmental damage, with long term effects</li> </ul>
Moderate	<ul> <li>Some progression of national and regional strategic activity.</li> <li>Loss of route availability of regional connectors and moderate restrictions on HPMV vehicles.</li> </ul>	<ul> <li>Programme slippage resulting in late delivery by between 30 and 60 days</li> </ul>	<ul> <li>Negative financial impact of between \$2M and \$10M</li> </ul>	<ul> <li>Pollution or other environmental damage at a localised level, with medium- term effects</li> </ul>
Minor	<ul> <li>Good progression of national and regional strategic activity.</li> <li>Loss of route availability of low volume access and low restrictions on HPMV vehicles.</li> </ul>	<ul> <li>Programme slippage resulting in late delivery by between 10 and 30 days</li> </ul>	<ul> <li>Negative financial impact of between \$1M and \$2M</li> </ul>	<ul> <li>Minimum pollution or other environmental damage. Short term effects only</li> </ul>
Insignificant	<ul> <li>Significant progression of national and regional strategic activity.</li> <li>Resilient network with insignificant disruptions and availability of alternative routes.</li> </ul>	<ul> <li>Programme slippage resulting in late delivery by between 0 and 10 days</li> </ul>	<ul> <li>Less than \$1M</li> </ul>	<ul> <li>Small-scale pollution or other environmental damage is localised with no resultant effects. Contained locally</li> </ul>

### **Option 1: Minimum Budget**

Strategic & Capital Programme, Low-Cost Low-Risk: \$603,246 Increase

#### Maintenance: \$18,898,776 Increase

#### **Renewals:** \$119,269 Decrease

#### **Outcomes Expected**

- Increase in budget to meet escalations
- Increase in complaints.
- Failing to meet LoS (DIA measures).
- Costs to meet "commitments of the contract" only just met.
- No budget available for reactive maintenance.
- Will have to say NO to customers maintenance requests (outside of lump sums).
- No improvement on Residents Satisfaction Survey.
- Deteriorating network condition.

#### **Risk Rating – Severe**

#### **Recover Network & Build** Safety & Resilience

#### **Storm Recovery**

Essential work for recovering the sounds area, which is essential to our region's economy. Will ensure safety and accessibility to residents and businesses in the sounds.

#### **Network Improvements**

Minimum works programme to include:

- Kent Street Revocation Works
- Kent Street Footpath Improvements
- Dublin Street Cycle Improvements
- London Quay Shared Space Project

#### **Speed Management**

- Speed Management Plan ٠
- Meet requirements arounds schools
- Complete half of full remaining programme

Recover Network & Build Safety & Resilience	MDC Initial 3-year Budget	Minimum 3-year Budget	Increase Required

### **Option 2: Conservative Budget**

Strategic & Capital Programme, Low-Cost Low-Risk: \$7,878,246 Increase

Maintenance: \$21,619,481 Increase

#### **Renewals:** \$10,946,479 Increase

#### **Outcomes Expected**

- Not improve, only maintain
- Increase in budget to meet escalations
- Same number of complaints.
- Small improvement on Residents Satisfaction Survey.
- Levels of service reducing slightly.
- Deteriorating network condition but not to extent of Minimum Budget.
- Increases in quantities of footpath and cycleway renewals
- Increase in unsealed road metalling to meet network demand
- Small increase in surfacing renewals
- Drainage renewals to improve pavement life
- Replace aging spunlite streetlights.

#### **Risk Rating – Moderate**

Recover Network & Build

### **Recover Network & Build** Safety & Resilience

#### **Storm Recovery**

Essential work for recovering the sounds area, which is essential to our region's economy. Will ensure safety and accessibility to residents and businesses in the sounds.

#### **Network Improvements**

Works programme to include:

- Minimum Budget work
- High/Dublin Street Intersection Improvement
- MSFAS French Pass/Pelorus
- MSFAS Queen Charlotte Drive
- MSFAS Keneperu
- Elmslie Bay Jetty Replacement
- · Waihopai Valley Road seal widening
- Alfred / Seymour Intersection Improvements
- Tourism Route Delineation Improvements
- Urban Whale Trail Connections

#### **Speed Management**

- Speed Management Plan
- Meet requirements arounds schools

Minimum 3-vear

· Complete half of full remaining programme

### **Assessment Criteria**

This investment proposal has a unique set of assessment criteria that were utilised to assess the strategic options and responses.

These were:

1) The defined importance of strategic responses from the ILM

2) Meeting the critical success factors:

- Strategic fit and business needs
- Potential value for money
- Supplier capacity and capability
- Potential affordability
- Potential achievability
- Community satisfaction
- Meeting the Levels of Service
- Confidence in Delivery
- Investment Benefit Realized
- Environmental Outcomes and Sustainability

By identifying these critical success factors, each strategic option has been assessed to identify the preferred investment option.

Assessment Criteria	Description (Key Actions, how you a problem considering the preferred o
Strategic Responses	
Improve the safety and resilience of transport assets.	Increasing number and severity of natural ever our transport assets are safe and resilient.
Increase delivery capability and capacity across the region.	Through regular training and development, ind and externally to deliver the programme of wo

### **Multicriteria Analysis**

A multicriteria analysis workshop was undertaken to establish a preferred investment option.

Each option was assessed against the strategic responses and critical success factors. A weighting was agreed against each to enable a 'weighted score' to be calculated. An impact score was assigned using the ratings established from the Impact Score Criteria.

Any impact score that is below a 'moderately negative' results in the option being discounted.

The minimum budget option was discounted due to not achieving several strategic responses and critical success factors.

The best practice option provides a strong case for being the preferred option but has been discounted because of the feedback from the council in respect to not being affordable.

The conservative option is a slight improvement on the current approach and is affordable. The focus for this LTAMP is to focus efforts on safety and resilience and the work detailed provides foundational work that can be built on over time. The long-term approach will see us eventually move to a best practice option that is affordable.

#### Taking a Conservative Approach......

Vested Assets + Minor Improvements + Sealed Road Resurfacing + Structures Component Replacement + Pavement Rehabilitation + Traffic Services + Unsealed Road Metalling + Environment + Cycle Paths + Drainage + Footpaths + Bridges + Wharves & Jetties

Tranche 3

**Maintenance Programme** 

Asset Management Planning + Concrete footpaths + Cycle paths + Emergency reinstatement + Environmental + Level crossing warning devices + Minor Events + Operational Traffic Management + Network and Asset Management + Regional Land Transport Planning + Routine Drainage + Road Safety Programmes + Sealed footpaths + Sealed pavement + Structure + Traffic services + Unsealed pavements

### Strategic & Major Capital Improvements Programme

### Strategic & Major Capital Improvements Programme

#### Tranche 1.1

**Recover Network & Build Safety & Resilience** 

### Tranche 1.1-1: Storm Recovery

Essential work for recovering the sounds area, which is essential to our region's economy. Will ensure safety and accessibility to residents and businesses in the sounds.

The tranche contributes to the **benefits** as follows:

- Communities have a safe and accessible transport system.
- Improved resilience.
- Improved economic sustainability.
- Increased environmental and social opportunities for people.

Some planned LTAMP Benefits achieved. Performance measures below target:

The level of service of the assets is good to fair Condition. Falling slightly below in meeting the levels of service expectations of our customers.

### **Tranche 1.1-2: Network Improvements**

Promoting multi modal active transport, requires improvement with street design, especially at roundabouts, to make it safe and accessible for the movement of people. Several such potential sites on our network have been identified and developed in planned activity for this LTAMP.

Works programme to include:

- Speed Management Plan
- Kent Street Revocation Works
- Kent Street Footpath Improvements
- Dublin Street Cycle Improvements
- · London Quay Shared Space Project
- High/Dublin Street Intersection Improvement
- MSFAS French Pass/Pelorus
- MSFAS Queen Charlotte Drive
- MSFAS Keneperu
- Elmslie Bay Jetty Replacement
- Waihopai Valley Road seal widening
- Alfred / Seymour Intersection Improvements
- Tourism Route Delineation Improvements
- Urban Whale Trail Connections

The tranche contributes to the **benefits** as follows:

- Communities have a safe and accessible transport system.
- Improved resilience.
- Improved economic sustainability.
- Increased environmental and social opportunities for people.

Some planned LTAMP Benefits achieved. Performance measures below target:

The level of service of the assets is good to fair Condition. Falling slightly below in meeting the levels of service expectations of our customers.

### **Tranche 1.1-3: Speed Management**

The Marlborough regional Speed Management Plan (SMP), produced by MDC, forms a pivotal segment within our LTAMP. Its primary goal is to implement crucial safety measures on our roads. This plan focuses on regulating speed limits, improving road infrastructure, and enforcing road rules.

The tranche contributes to the **benefits** as follows: Communities have a safe and accessible transport •

- system.
- Improved resilience.
- people.

measures below target:

The level of service of the assets is good to fair Condition. Falling slightly below in meeting the levels of service expectations of our customers.

Improved economic sustainability. Increased environmental and social opportunities for

Some planned LTAMP Benefits achieved. Performance

A detailed breakdown of activities and associated work codes are provided in the appendices

### **Renewals Programme**

#### Tranche 2

#### **Renewals Programme**

Vested Assets	Sealed Road Resurfacing	Structures Component Replacement	Pavement Rehabilitation	Traffic Services		
Additions to accommodate changes to the transport network from local development activity.	Covers granular overlays, rip and relay methods, pavement stabilization, and asphaltic overlays.	Include replacing deteriorated structural members, damaged components, bridge decks, gabion baskets, handrails, guardrail components, and crib blocks in retaining structures.	Covers chip reseals, asphaltic surfacing, texturizing seals, and special purpose chip seals	Include activities such as renewal of traffic signs, signals, traffic control systems, road delineation marker posts, pavement markings, sight rails., advanced traffic management systems, variable message signs, local area traffic management.		
Environment	Cycle Paths	Drainage	Footpaths (sealed)	Bridges		
Environmental renewal activities include renewal of existing stock-truck effluent disposal facilities, catch fences and protection planting on carriage way from land movement and slips etc.	Provides for the renewal of existing cycle paths and shared path facilities, associated street lighting and traffic management equipment and facilities.	Includes renewing culverts with a cross-sectional area of less than 3.4 square meters and repairing / replacing kerbs, and channels when their deterioration might adversely affect pavement performance	Provides for the renewal of sealed public footpaths and facilities associated with public footpaths such as pedestrian network connections, including stairs, alleyways and off- road connections.	Involves replacing structurally inadequate bridges, supporting retaining structures (like sea walls), tunnels, and culverts with a cross- sectional area of 3.4 squa meters or greater.		

The programme contributes to the **benefits** as follows:

- Communities have a safe and accessible transport system.
- Improved resilience.
- Improved economic sustainability.
- Increased environmental and social opportunities for people.

Some planned LTAMP **Benefits** achieved. Performance measures below target: The **level of service** of the assets is good to fair Condition. Falling slightly below in meeting the levels of service expectations of our customers.

Includes periodic renewal of pavement layers, including top surface metal

#### Wharves & Jetties (Unsubsidised)

Involves replacing structurally inadequate wharves and jetty structures and supporting infrastructure.

are

A detailed breakdown of activities and associated work codes are provided in the appendices

### **Maintenance Programme**

#### Tranche 3

#### **Maintenance**

Asset Management Planning	Footpaths	Cycle Paths	Emergency Reinstatement	Environmental
Includes for the preparation or updating of regional public transport plans and transport activity management plans, including their component plans; road safety, speed management, demand management and procurement.	Includes for the maintenance of public footpaths and facilities associated with public footpaths, such as pedestrian network connections, including stairs, alleyways and off- road connections.	Provides for the operation and maintenance of cycle and shared path facilities, including the operation of associated lighting.	Enables funding from the National Land Transport Fund (NLTF) in response to a defined, major, short- duration natural event that has reduced customer levels of transport service significantly below those that existed prior and results in unforeseen expenditure.	Includes snow and ice control, vegetation control, litter collection, removal of, and protection removal / protection, stock effluent cleaning, sweeping loose chip seal, etc.
Minor Events	Operational Traffic Management	Network and Asset Management	Regional Land Transport Planning	Routine Drainage Maintenance
Includes small-scale incidents or damages, where the total cost of works doesn't exceed \$100,000 per event. Works typically involve removal of rocks and debris, repairing and reinstating road surfaces, footpaths, and cycleways.	Involves a range of activities for the efficient operation of the network, including various traffic signals, management systems, variable message signs, surveillance and area-wide traffic control.	Incudes management of transport network, operating road asset management systems, regular updates to the activity management plan, conducting surveys and inspections.	Includes overheads, associated with the development and management of RLTPs including consultation, approval, variation, management and reporting.	Includes cleaning kerb water channels, sumps, and urban cesspits, as well as routine maintenance, repair of surface water channels, sub- soil drains, stream clearing, and debris removal to maintain watercourses through culverts.
Sealed Footpaths	Sealed Pavement	Structures	Traffic Services	Unsealed Pavement Maintenance
Includes for the maintenance of public sealed footpaths and facilities associated with public footpaths, such as pedestrian network connections, including stairs, alleyways and off-road connections.	Covers dig-outs, patching, pre-reseal repairs, and road protection against stock damage.	Involves repairs to handrails, guardrails, minor components, cleaning, painting, stream clearing under bridges, and protective works	Includes upkeep of network service and ensuring road safety associated with traffic signs, road delineation marker posts, pavement markings, and power costs associated with carriageway lighting/ control systems.	Includes grading, flanking, spot metaling, restoring correct camber, and running course.

The programme contributes to the **benefits** as follows:

- Communities have a safe and accessible transport system •
- Improved resilience
- Improved economic sustainability
- Increased environmental and social opportunities for people ٠

Some planned LTAMP Benefits achieved. Performance measures below target.

The level of service of the assets is good to fair Condition. Falling slightly below in meeting the levels of service expectations of our customers.

#### Level Crossing Darning Devices

Includes maintenance and renewal of rail barrier and warning devices at rail level crossings.

#### **Road Safety** Programmes

Provides for safety ter promotion, education and an advertising activities that promote the safe use of the network through education, ubadvertising, awareness raising and by public information to users.

A detailed breakdown of activities and associated work codes are provided in the appendices

### How We Manage And Maintain Our Network

In the year 2000 'Marlborough Roads' was created, consisting of Transport Agency staff responsible for the management of both state highways and local roads. The current team is shown opposite.

Value provided through the creation of Marlborough Roads, includes reduced management costs due to no overhead charges to MDC or profit, a very efficient / low staff numbers operation and lower contractor rates.

The Network Outcomes Maintenance Contract is managed by Marlborough Roads as a joint venture between Fulton Hogan and HEB contractors. The team responsible for delivering this contract is shown the bottom right.

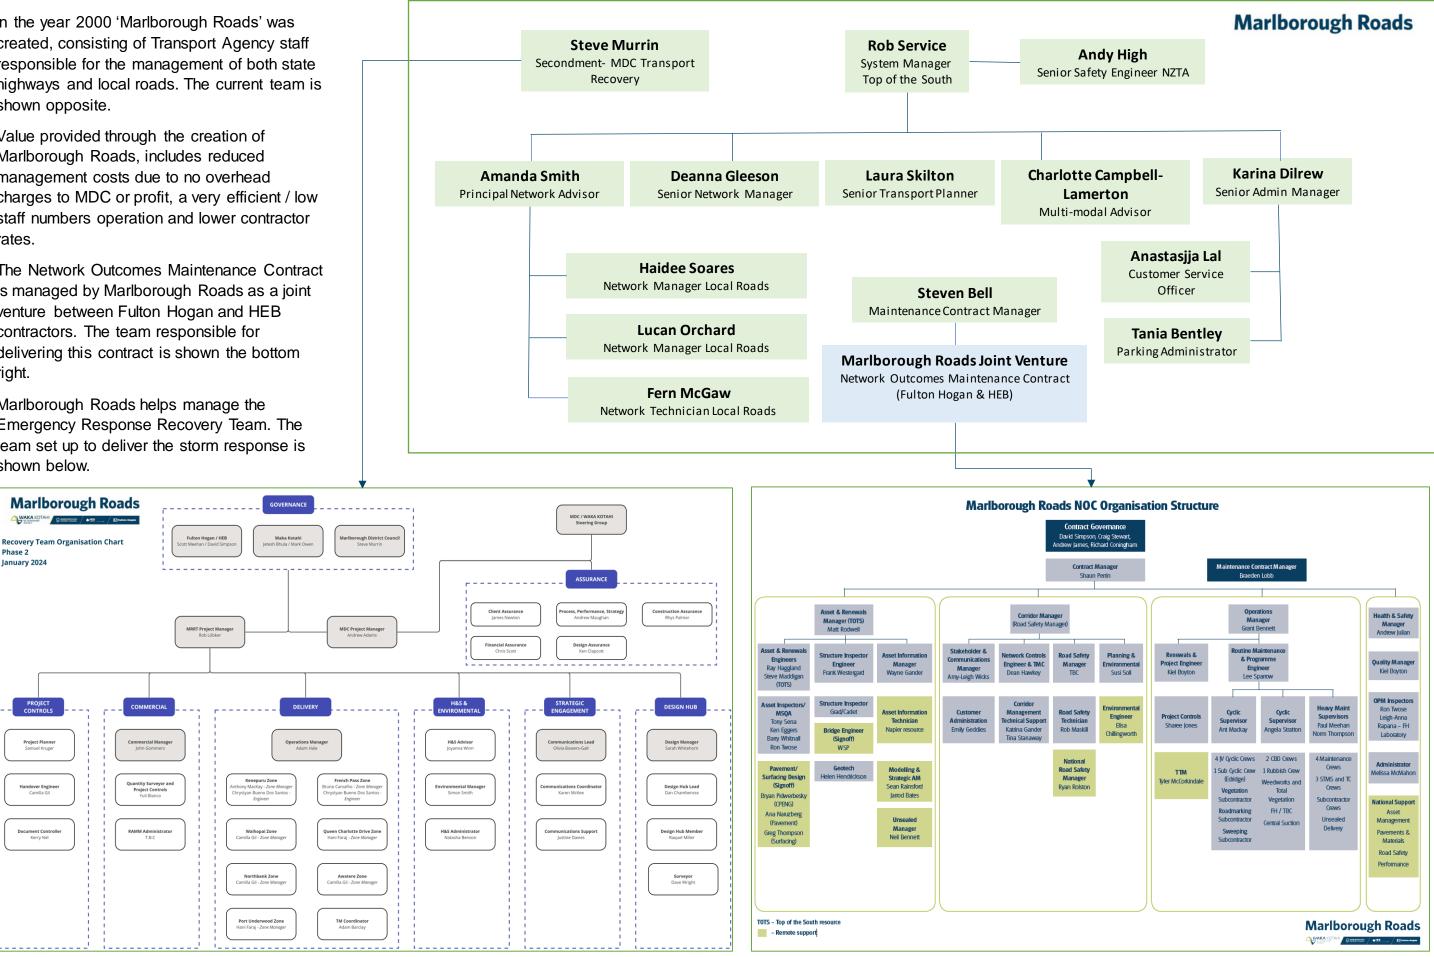

Marlborough Roads helps manage the Emergency Response Recovery Team. The team set up to deliver the storm response is shown below.

Phase 2 January 2024

Project Planner Samuel Kruger

Handover Engineer Camilla Gil

Document Controller Kerry Nel

Land Transport Activity Management Plan 2024-2027

#### Marlborough Roads

Council currently engages Waka Kotahi NZ Transport Agency branded as Marlborough Roads to manage and maintain its road network. Under this contractual arrangement, all procurement is managed by Waka Kotahi using its purchasing framework as prescribed in the Marlborough Transport Activity Procurement Strategy.

Waka Kotahi is committed to the concepts of value for money, maintaining competitive and efficient markets, and fair competition among suppliers.

The Agency's Procurement Manual contains procurement procedures approved by the Agency under s25 of the Land Transport Management Act 2003 (LTMA).

The procurement procedures contained in the manual are approved for use to purchase the goods and services required to deliver the activities that have been funded under s20 of the LTMA.

Council and its suppliers contracted to procure services on its behalf (i.e., Marlborough Roads office of Waka Kotahi) have policies which include handling conflicts of interest in procuring services. Issues that arise are dealt with on an individual basis in line with those policies.

The current contract is in place until 30 June 2026. It is currently anticipated that a contract extension will be negotiated with Waka Kotahi, considering the performance and benefits accrued to date and anticipated to follow.

#### **Network Operations Contract**

A new long-term Network Operations Contract (NOC) was procured on the 1<sup>st</sup>April 2020 and provides contractor services to maintain and operate the network.

The contract also handles all customer enquiries and the Carriageway Access Request (CAR) management system, which involves assessing and approving traffic management plans, auditing and inspecting works, and includes the role of Traffic Management Coordinator (TMC).

Services conducted through the NOC are:

- handling of all customer enquiries using Waka Kotahi's Customer Relationship Management System (CRMS) (the majority of which are for local roads matters)
- Processing of utilities and third-party Carriageway Access Requests (CARS), including an increased focus on auditing of Traffic Management sites as part of the greater industry emphasis on safety
- A dedicated full-time road safety engineering resource to assess road safety issues and conduct investigations and recommend solutions
- A part time 'unsealed roads' resource to improve the asset management of the unsealed road network
- Condition surveys over the full network and in subsequent years trend information will be available, and they are also inspecting drainage systems including every culvert
- There is a lot more performance monitoring and reporting to drive contract performance under NOC III

As a result of these and other enhancements in services provided by the NOC, the professional services fee has increased from approximately \$400,000 per annum to close to \$2 million per annum.

#### **Professional Services**

The goods and services required to deliver the programme are:

- Design and Planning Management •
  - Team (Marlborough Roads)
  - **Project Managers**
  - Investment Specialists
  - Quantity Surveyors
  - Resource Management and Consenting
  - Architecture, Engineering and • Construction Specialists.

#### Delivery

- Construction • services
  - (NOC Contract)

## and HEB Construction

- Contract began 1 April 2020
- Contract period: 7 + 2 years

Design and planning services are agreed on an as required basis using the amended Waka Kotahi ACENZ Short Form agreement. All of Government Panel membership and rates are generally agreed as part of the process.

#### **Recovery Team Contract**

An agreement variation to the Network Operations Contract was developed and agreed on the 21<sup>st</sup> October 2021 to support the recovery work.

## Financial Subsidised Budget Forecast

### **Financial Summary**

Subsidised funding falls within standard work categories and as such is subsidised by rate payers and Waka Kotahi through the national transport fund.

Un-Subsidised funding falls outside of the standard work category descriptions and are a 100% rate payer funded.

The financial summaries for both Subsidised and unsubsidised activity has been provided opposite. For reference the original MDC LTP budgets have been included for comparison with the conservative approach.

Assumptions with the financial summaries are as follows:

#### • Subsidised Budgets

- The current 51% FAR will continue.
- Current Depreciation and DC's are funding the initial 3 years budget
- The effect of increased future depreciation will be neutral

Subsidised Financial Summary:

Budget Category	Original 3-year MDC LTP Budget	Conservative 3-year Budget
Subsidised Maintenance	\$ 28,609,489	\$ 49,928,970
Subsidised Renewals	\$ 37,314,783	\$ 48,261,262
SUBSIDISED SUB TOTAL	\$ 65,924,272	\$ 98,190,232
NETWORK IMPROVEMENTS & SPEED MANAGEMENT	\$ 2,946,754	\$ 10,825,000
TOTAL BUDGET	\$ 68,871,026	\$ 109,015,232
TOTAL INCREASE		\$ 24,387,714
Total Council Contribution (minus FAR 51%)	\$ 33,746,803	\$ 11,949,980

#### Un-Subsidised Financial Summary:

The Te Ringa Maimoa LTAMP Assessment for the previous LTAMP is included in the appendices. A new improvement plan, to be resolved in the next LTAMP cycle, has been developed below:

No	Improvement Item	Te Ringa Maimoa Pillar
1	Integrating the emission reduction plan and local climate strategy in day-to-day operations	System
2	Integrating ONF network classification in planning and decision making.	System
3	The justification for asset expenditure could be improved to support the recommendations.	System
4	Monitoring of all ONRC performance measures to be established.	System
5	Better understanding of Levels of Service and investment to be established.	System
6	Work closely with central government and partners to align emerging priorities.	System
7	Better linkage of ONRC Performance Measures with problems and improvement actions to be compiled	Evidence
8	Better use of dTIMS modelling	Evidence
9	High speed data collection	Evidence
10	Adopting ONF Performance measures	Evidence
11	Stakeholder Consultation programme to be implemented to gather information around customer expectations around ONRC and CLoS.	Communication
12	Risk approach to decision-making to be established	Decision Making
13	Capability and capacity strategy	Service Delivery
14	Take on management of carparks, plans and delivery strategy to be developed	Service Delivery
15	Benefit realisation plan and map to be established using Storm recovery as a basis for development	Benefit Delivery
16	IIMM maturity assessment	Quality Improvement
17	Regularly reviewing improvement plan and documenting actions.	Quality Improvement
18	Use the LTAMP regularly to ensure promises made are monitored and remedial actions documented.	Quality Improvement

### Risks, Constraints, Dependencies and Assumptions

### **Suggested Next Steps**

The incoming government has already announced :

- \$1.2 billion Regional Infrastructure Fund
- A new national infrastructure agency
- A cabinet prioritised 30-year investment pipeline

The next six months offer a clear opportunity for the Marlborough region to proactively engage with the incoming government to influence policy agenda on infrastructure and economic development.

In doing so, it can hopefully also secure budget allocation and gain momentum for

initiatives like this one, whilst opening the conversation on our long-term approach.

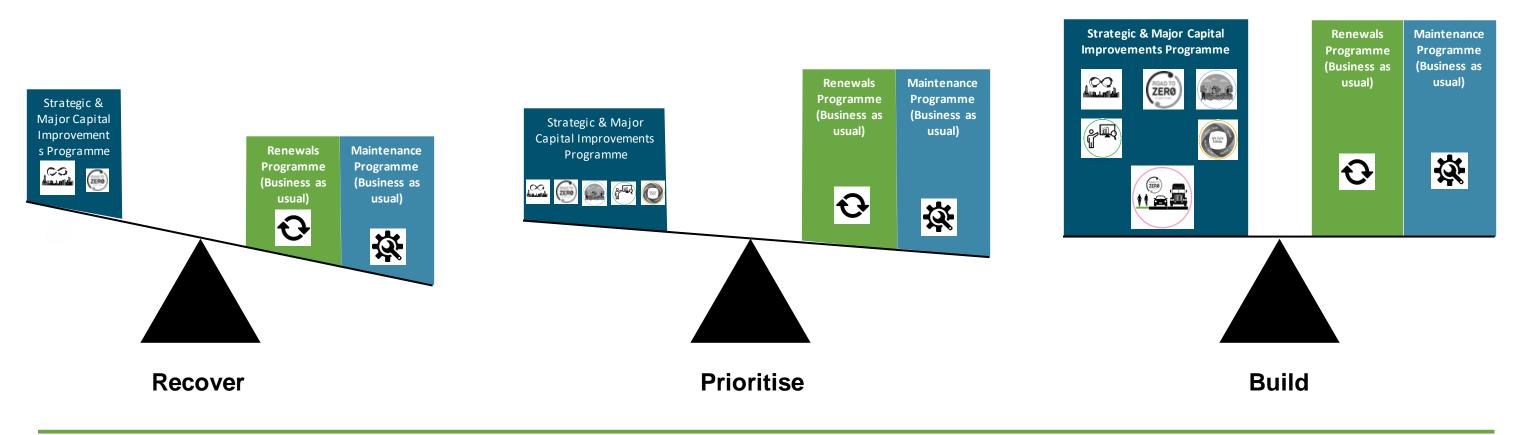

This LTAMP lays the foundation for MDC's 2024 update to its Long-Term Plan to advocate for a place-based partnership between central and local government to spur growth through effective investment and collaboration.

Strategic planning and implementation in a country the size of New Zealand is most appropriate at the regional level, effectively the lowest level of government capable of addressing infrastructure and economic investment issues effectively. In addition, we intend to :

- Partner with business, including lwi and international business, to secure government support and investment for their projects
- Focus on regional specialisation, economic growth drivers, and strategic acuity to identify and capitalise on their regional comparative advantages and needs.
- Do the math to present clear, compelling, and evidence-based strategic rationale and economic analysis for proposals, showing how they align with emerging national goals and standards.

# 2024 - 27

# 2027 - 30

We are clear on the following:

- A long-term strategic plan
- Our immediate priorities safety and resilience
- An understanding of our long-term priorities
- How our transport network is vital to a sustainable local economy

As local leaders, we are ready to act and to embrace the long-term approach established as part of this LTAMP review.

# 2030 - 33
