

## How to read the data

# Weekly Consumption

Note: The above graph illustrates the water consumption in litres per week for each household with four or six people. The *trial property reference* number for each group refers to the consumption for a specific property, and is used for owners to identify their individual consumption over a seven day period.

When calculating your possible charges, 1000L (Litres) = 1m<sup>3</sup> (cubic metre).
