Decision Requested	Align setbacks to NES standard 5 and 10m thresholds					
351	Helen Mary Ballinger	14	Volume 2	4 Coastal Environment Zone	4.3.6.	Support
Decision Requested	SUPPORT <i>Standards 4.3.6..1(a) and (b) Commercial forestry replanting</i> regarding setbacks from rivers and wetlands.					
351	Helen Mary Ballinger	15	Volume 2	4 Coastal Environment Zone	4.3.6.	Oppose
Decision Requested	SEEK larger setbacks from the coastal marine area, could be related to slope, ie 30m where the slope for a distance of 500m is less than 20 degrees, otherwise 100 metres. This is likely to have benefits in reducing sedimentation as well as landscape benefits. (refer Urlich Report)					
404	Eric Jorgensen	44	Volume 2	4 Coastal Environment Zone	4.3.6.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>As per the summary recommendations in the paper <i>Mitigating Fine Sediment from Forestry</i> the following should be adopted in the MEP:</p> <p>(1) Replanting setbacks from the shoreline: 200 m (a precautionary approach should be adopted). Note that Standard 4.3.8.1(c) uses this 200m setback for planting and harvesting where it is much less likely heavy machinery, tracking and hauling logs would occur.</p> <p>(2) Replanting setback for permanently flowing streams directly coupled to the sea: 5 m for streams less than 3m in width; and 10 m for streams equal to, or greater than, 3m in width.</p> <p>(3) Replanting controls on steep slopes: A mandatory Replanting Management Plan identifying areas at high risk of erosion which require retirement and implementation of buffers, such as gully heads and steep ephemeral gullies. A similar Plan would be required for afforestation.</p> <p>(4) Replanting requirements to reduce the window of vulnerability:</p> <p>a) Replanting of areas harvested within 12 months of harvest.</p> <p>b) Replanting in excess of 1000 stems/hectare.</p> <p>In addition to replanting controls other recommendations were also made, these were:</p> <p>(5) Harvest controls: Remove all woody material >100 mm diameter and > 3metres in length from gullies (>5000m2 or 0.5 hectare) as soon as practicable, but no later than 1 month, after harvest.</p> <p>(6) Earthworks requirements:</p> <p>a) All road design, construction, and maintenance to be certified by a Chartered Professional Engineer (CPENZ) for land stability, and effective erosion and water control.</p> <p>b) All areas of loose fill (soil) to have a grass cover established within 12 months of being created unless covered by natural revegetation.</p> <p>These recommendations apply to the Coastal Environment Zone. However, the other applicable zone for forestry is the Rural Environment Zone (Volume 2: Chapter 3) and they should be equally applicable there.</p>					
424	Michael and Kristen Gerard	147	Volume 2	4 Coastal Environment Zone	4.3.6.	Support
Decision Requested	<p>Add new standard to heading <i>4.3.6 Commercial forestry replanting</i>.</p> <p><i>New Standard 4.3.6.3 - If an area is not going to be re-planted in commercial forest, then it must be actively managed to avoid the regeneration and proliferation of wilding pines (e.g., by spraying).</i></p>					
479	Department of Conservation	221	Volume 2	4 Coastal Environment Zone	4.3.6.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Delete the permitted rule and standards and include this activity as Amend the permitted activity standards under section 4.6 as a discretionary activity; Or alternatively; Amend the activity standards 4.3.6 as follows: 4.3.6. Commercial forestry replanting. 4.3.6.1. Replanting must not be in, or within: (a) 10 metres of a river (except an ephemeral river) or lake; (b) 8m of a Significant Wetland; (c) 200 metres of the coastal marine area. 4.3.6.2. Replanting must not be within such proximity to any abstraction point for a drinking water supply registered under section 69J of the Health Act 1956 as to cause contamination of that water supply. 4.3.6.X Replanting must not occur adjacent to an identified Ecologically Significant Marine Site.

137	Tim Marshall	1	Volume 2	4 Coastal Environment Zone	4.3.8.	Support in Part
Decision Requested	<p>I would like to see the definition of "woodlot forestry harvesting" altered to reflect minimalist non commercial activity so that small scale thinning for private use ie firewood within the coastal zone is a permitted activity. The proposed plan as it stands is written for commercial forestry and doesn't take into account private use scenario's.</p> <p>This may entail adding exceptions to 4.3.8.1 (a)(b)(c) so for example 4.3.8.1 might read "Harvesting must not be in or within:</p> <p>(c) 200m of the coastal marine area (unless the silvicultural treatment is thinning for woodlot health / maintenance or for non commercial use ie firewood for personal use)</p>					
149	PF Olsen Ltd	51	Volume 2	4 Coastal Environment Zone	4.3.8.	Oppose
Decision Requested	Adjust as already submitted in the rural environment zone - eliminate the unjustified 200m setback

Decision Requested	Amend (b) of the Standard as follows - <i>" (b) indigenous vegetation dominated by manuka, kanuka, tauhinu, bracken fern and silver tussock, and which has grown naturally from previously cleared land (i.e. regrowth) and where the regrowth is less than 20 50 years in age;"</i>					
1179	Thomas Robert Stein	25	Volume 2	4 Coastal Environment Zone	4.3.10.2.	Oppose
Decision Requested	I oppose rule 4.3.10.3(a) which allows for indigenous vegetation clearance under or anywhere within 50 metres of commercial or woodlot forest or shelterbelt. Clearance of vegetation growing under forestry is ok but 50 metres allows for large areas to be cleared. For example this would allow 100m wide tongues of native forest to be cleared within a commercial forest or woodlot. Resource consent should be required to achieve this.					
1198	Transpower New Zealand Limited	98	Volume 2	4 Coastal Environment Zone	4.3.10.2.	Oppose
Decision Requested	Amend Standard 4.3.10.2 as follows: <i>"4.3.10.2 The clearance of indigenous vegetation in the following circumstances is exempt from Standards 4.3.10.3 to 4.3.10.6 (inclusive): (x) indigenous vegetation clearance associated with the operation, maintenance, upgrade and development of the National Grid. ..."</i>

Decision Requested	<p>The decision I SEEK is that:</p> <ul style="list-style-type: none"> Livestock should be excluded from the beds of lakes, and Significant Wetlands and suitable setbacks to avoid adverse effects, a minimum of 1 metre from the bank of rivers and a minimum of 3 metres when break feeding practices are in place. All cattle, pigs and deer should all be required to be excluded from rivers, lakes and the coastal marine area on all paddock blocks with an average slope of less than 15 degrees. Sheep should also be excluded where they are being break fed or otherwise very intensively grazed. Exclusion could be through permanent or temporary electric fencing as appropriate. This would capture most of the more intensively farmed lowland areas while not capturing the less intensively farmed hill country areas. Anyone wanting to apply for consent to allow livestock access to waterways could then be required to monitor upstream and downstream of this activity to ensure it is not having adverse effects on water quality, thereby putting the onus for monitoring onto the landowner. Another way to clarify requirements would be to exclude stock from the rivers listed in Volume 1 Chapter 15 as degraded and at risk of degradation (<i>inferred Tables 15.1 and 15.2</i>). This is based on long-term monitoring information and most of these rivers are in areas where livestock access is clearly a contributing factor to the poorer water quality.

1066	Raewyn Heta	6	Volume 2	4 Coastal Environment Zone	4.3.20.	Support in Part
Decision Requested	Livestock should be excluded from the beds of lakes, and Significant Wetlands and suitable setbacks to avoid adverse effects, a minimum of 1 metre from the bank of rivers and a minimum of 3 metres when break feeding practices are in place. All cattle, pigs and deer should all be required to be excluded from rivers, lakes and coastal marine area on all paddock blocks with an average slope of less than 15 degrees.

Decision Requested	Retain Heading 4.3.20.					
1179	Thomas Robert Stein	20	Volume 2	4 Coastal Environment Zone	4.3.20.	Support in Part
Decision Requested	I support the need to exclude stock from waterways however the rule as it stands in 4.3.20.2 and 4.3.20.3 requires a high level of monitoring (presumably from council) and would be difficult to interpret on site by a land manager. Therefore, I seek to exclude all stock from all of the rivers and their tributaries listed in tables 15.1 and 15.2 of Volume 1 of this plan and for other rivers adopt rules similar to other areas that state "no heavy pugging or bare soil due to repeated or intense stock trampling should be obvious alongside or within the beds of rivers".

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Rules 2.7.9, 3.1.21, 3.3.21, 4.1.20 and 4.3.20 to (a) Ensure stock are prevented from accessing the active bed of a river unless as part of a managed crossing (b) Provide for periodic stock crossings as a restricted discretionary activity with controls to ensure effects are not significant. Include a new definition of "active bed of a river" as follows: <u>Means the bed of a river (including any modified river) or artificial watercourse or that is permanently or intermittently flowing and where the bed is predominantly un-vegetated and comprises sand, gravel, boulders or similar material.</u>					
326	Steven and Sarah Leov	3	Volume 2	4 Coastal Environment Zone	4.3.20.1.	Support in Part
Decision Requested	<p>We recommend removing the term river from the listed policies and replacing it with Fonterra's definition of an active bed. This is a standard that dairy farmers have been working with for many years. It means animals are excluded from all major rivers and streams but allows farmers to continue to use their land productively. This is a definition that supports sustainability and allows primary production to continue to operate as per Objective 14.1 "Rural environments are maintained as a resource for primary production activities, enabling these activities to continue contributing to economic well being whilst ensuring the adverse effects of these activities are appropriately managed."</p> <p>Livestock entering onto, or passing across <u>an active bed</u> of a river <u>waterway</u>.</p> <p>Definition of <i>active bed</i>:</p> <p>"The bed of a river (including any modified river) or artificial watercourse that is permanently flowing and where the bed is more than a metre wide, permanently un-vegetated and comprises sand, gravel, boulders or similar material.</p> <p>We also recommend extending the period of time allowed for compliance with 2.9.9, 3.3.21 and 4.3.20.1 to <u>9 June 2022</u>. This is to allow farmers to recover from the financial pressure put on their businesses during recent years when the milk price has been below the cost of production. While fencing materials may seem an insignificant cost, the accumulation of these materials plus concrete and culverts for river crossings, the necessary consents for these crossings and the labour required to complete the work will make compliance a significant expense.</p>					
339	Sharon Parkes	16	Volume 2	4 Coastal Environment Zone	4.3.20.1.	Oppose
Decision Requested	Review the provisions relating to stock exclusion from riverbeds relative to information from the Land and Water Forum and the Accord. (<i>Inferred</i>)

Decision Requested	Add the following heading and standards to the 4.3 Standards that apply to specific permitted activities (Coastal Environment Zone):					
	4.3.x Discharge of human effluent into land through a long drop toilet.					
	4.3.x.x There must not be a Council operated sewerage system designed for that purpose within 60m of the long drop toilet.					
	4.3.x.x The bottom of the long drop is located above the natural groundwater level at all times.					
	4.3.x.x The long drop toilet must not be located:					
	(a) within 50m of a river, lake, Significant Wetland or drainage channel;					
	(b) within 30m of a bore.					
	4.3.x.x The long drop toilet must not be constructed on unconsolidated gravels, coarse or medium sands, fissured rocks or scree.					
	4.3.x.x Once the human effluent reaches within 1m of the original ground level, or the long drop is no longer used, the content of the long drop must be covered with soil to a depth of at least 1m.					
	4.3.x.x The long drop toilet must be constructed so that no surface runoff enters the toilet.

Decision Requested	4.5 Restricted Discretionary Activities					
	The following activities are Restricted Discretionary Activities					
	<u>4.5.3. Dairy farm established after 9 June 2016 including discharge of dairy effluent.</u>					
	<u>Council has restricted its discretion to the following matters:</u>					
	<u>(a) The preparation and implementation of a Farm Management Plan as set out in Appendix X.</u>					
	<u>(b) Measures (including fences, bridges or culverts) to prevent stock entering onto or passing across the bed of any river or lake, significant wetland, or any drain or the Drainage Channel Network;</u>					
	<u>(c) provision of an appropriate, non-grazed buffer along the margins of any river, lake, significant wetland, drain or the Drainage Channel Network, to intercept the runoff of contaminants from grazed pasture, with reference to the values of fresh waterbodies as identified in Appendix 5;</u>					
	<u>(d) Manage nutrient discharges demonstrating appropriate controls with a Nutrient Management Plan.</u>					
	<u>(e) There must be an on-site storage system with a minimum of 3 months storage that must be sealed with an impermeable material and certified by a recognised professional.</u>					
	<u>(f) Any discharge of effluent must not:</u>					
	<u>(i) occur when the soil moisture exceeds field capacity, and</u>					
	<u>(ii) result in ponding that is detectable beyond 24 hours after the discharge, and</u>					
	<u>(iii) result in anaerobic soil conditions, and</u>					
	<u>(iv) be located within:</u>					
	<u>(a) 20m of a river, lake, Significant Wetland, drainage channel or Drainage Channel Network;</u>					
	<u>(b) 20m of the boundary of any adjacent land in different ownership;</u>					
	<u>(c) a Flood Hazard Area.</u>					
	<u>The certification must be provided to the Council prior to effluent entering the storage ponds and any surface waterbodies to ensure contamination of water does not occur (including during flood events).</u>

<u>Receiving Environment</u> <u>(New, relocated or altered)</u>	<u>Laeq, 1 hour</u>	<u>Compliance Distance (no less than)</u>
<u>Residential – Bedrooms</u>	<u>35 dB</u>	<u>100m</u>
<u>Residential – Habitable Spaces</u>	<u>40 dB</u>	<u>100m</u>
<u>Teaching spaces</u>	<u>40 dB</u>	<u>100m</u>
<u>All other sensitive activity</u>		

building spaces e.g.:

- Hospital and Dementia Care Spaces
- Commercial Spaces

To comply with

satisfactory sound

levels AS/NZS

2107:2000

(nearest specified equivalent)

(Refer to hard copy submission for table format of the above)

Where it is necessary to have windows closed to achieve the acoustic design requirements, an alternative ventilation system shall be provided.

A ventilation system installed shall comply with the following:

- i) Consist of an air conditioning unit(s) provided that the noise level generated by the unit(s) must not exceed 40dB Laeq(30s) in the largest habitable room (excluding bedrooms) and 35dB Laeq(30s) in all other habitable rooms, when measured 1 metre away from any grille or diffuser; or
- ii) A system capable of providing at least 15 air changes per hour (ACH) in the largest habitable room (excluding bedrooms) and at least 5 air changes per hour (ACH) in all other habitable rooms; and
- iii) The noise level generated by the system must not exceed 40dB Laeq(30s) in the largest habitable room (excluding bedrooms) and 35dB Laeq(30s) in all other habitable rooms, when measured 1 metre away from any grille or diffuser; and
- iv) The internal air pressure must be no more than 10 Pa above ambient air pressure due to the mechanical ventilation; and
- v) Where a high air flow rate setting is provided, the system shall be controllable by the occupants to be able to alter the ventilation rate with at least three equal progressive stages up to the high setting.

Y Sensitive Activities within 60m of a Rail Network – Ground-borne Noise: Annoyance

New, relocated, or altered sensitive activities/buildings within 60 metres of the rail corridor shall be designed and constructed to ensure the following levels of vibration from trains shall not be exceeded based on the procedures specified in the Norwegian Standard NS 8176E: 2nd edition September 2005

Vibration and Shock Measurement of Vibration in Buildings from Land Based Transport and Guidance to Evaluation of its Effects on Human Beings.

Receiving Environment

(New, relocated or altered)

0.3 mm/s

Class C criterion: Maximum Weighted Velocity.

Decision Requested	That the rules and standards relating to the location of garages be amended to reflect the actual demand for sections in this zone. That standards restricting the location of garages within a property be removed to enable the individual landowners the discretion to place garages within their property (subject to appropriate setback rules).					
66	Karen and John Wills	1	Volume 2	5 Urban Residential 1 and 2 Zone	5.2.1.18.	Oppose
Decision Requested	1. The 90m restriction be removed. 2. In the event of any decision to apply the restriction; this be done in a manner that accommodates residential activities, development and subdivision.					

3. Any restrictions and discretion applied residential activities, development and subdivision not be of a nature that has the practical effect of or specifically preventing or prohibiting residential activities, development or subdivision from being carried out. Use of Controlled Activity classification is requested in the event that any standards required to be applied to Permitted Activities may not be complied with and for the matters over which control will be exercised include consideration of all methods by which the protections and purposes of the restriction can be achieved in a manner that does not prevent or make it impracticable for residential use, development or subdivision of residential zoned land.

4. Provision of a rule or rules that require the location of transmission lines and associated infrastructure to be located so they avoid preventing residential use, development or subdivision of residential zoned land and that include activity status, standards and objectives and policies that prescribe the matters required to be considered and that these include avoidance of adverse effects on residential use, development and subdivision of residential zoned land.

5. Objectives and policies be included in the Plan that recognise effects these provisions may have on residential activities, development and subdivision and amenities and the location of any new or replacement lines and associated equipment, installations or facilities should be such that they do not present restrictions or effects on land used for and zoned or otherwise identified or provided for use, development and subdivision for residential purposes.

6. Rules, objectives and policies be included in the Plan that prescribe that as a pre-requisite to implementation of the restriction of the 90m zone, that the operator of the substation or any line associated with it or any other line or facility presenting the requirement for this restriction, to provide means by which restrictions and costs caused by the restrictions are mitigated.

7. Controls be placed on or volunteered by the operators of the lines and substation that will avoid, remedy or mitigate the need for the restriction.

8. The submitter is willing to discuss means by which the significant impact of this provision may be avoided, remedied or mitigated with both the Council and the line and substation operator and is open to discussion of the full range of options available pursuant to the RMA.

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the following amendments (strike through and bold) are made to 6.323: 6.3.2.1. A building intended for use as a dwelling must have previously been designed, built and used as a dwelling. 6.3.2.2. All work required to reinstate the exterior must be completed within 6 months of the building being delivered to the site. This includes providing connections to all infrastructure services and closing in and ventilation of the foundations. The owner of the land on which the relocated building is to be located must certify to the Council, before the building is relocated, that the reinstatement work will be completed within the 6 month period. 6.3.2.a Any relocated building intended for use as a dwelling must have previously been designed, built and used as a dwelling. 6.3.2.b A building pre-inspection report shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. A suggested pre-inspection report is attached as Schedule 2 in the submission. 6.3.2.c The building shall be located on permanent foundations approved by building consent, no later than 2 months of the building being moved to the site. 6.3.2.d All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. Without limiting 6.3.2.c reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations. 6.3.2.e. The proposed owner of the relocated building must certify to the Council that the reinstatement work will be completed within the 12 month period. 6.3.2.3f The siting of the relocated building must also comply with Standard 6.2.1.4.

Decision Requested	<p>Retain as is without any alteration.</p> <p>The submission does not identify a zone, provision or property number to which the above statement relates to. It is <i>inferred</i> that standard 30.1.3.2.2 in the Sounds Residential Zone of the Marlborough Sounds Resource Management Plan (below and emphasis added) is relevant to the submission.</p> <p><i>Sounds Residential Zone</i></p> <p><i>30.1.3 Amenities</i></p> <p><i>Standard 30.1.3.2.2 Provided that <u>no building may be sited closer than 20 metres from a coastal marine area boundary or 8.0 metres of a foreshore reserve.</u></i></p>					
1276	Anna Caroline Memorial Trust	1	Volume 2	7 Coastal Living Zone	7.2.1.5.	Oppose
Decision Requested	<p>I seek that Council does not alter the current setback of 20m. That other property has only an 8m setback, even 20m can be deemed inequitable. Should this 28m setback be able to be clearly demonstrated to be fair, reasonable and necessary for particular purpose, and benefit to the community at large, I seek that property consultation be undertaken with property owners who have riparian rights; that normally accepted levels of disclosure are undertaken rather than Council taking the laws into their own hands, under cover and passing legislation because someone sees fit. Having demonstrated this, appropriate financial compensation is made available to all land owners with riparian rights who are affected.</p> <p>If the rule does pass, I advise it is my intention to join with others similarly affected and instigate a legal challenge to block it and seek to recover costs.</p>

(Refer to hard copy submission for table format of the above)

Where it is necessary to have windows closed to achieve the acoustic design requirements, an alternative ventilation system shall be provided.

A ventilation system installed shall comply with the following:

- i) Consist of an air conditioning unit(s) provided that the noise level generated by the unit(s) must not exceed 40dB Laeq(30s) in the largest habitable room (excluding bedrooms) and 35dB Laeq(30s) in all other habitable rooms, when measured 1 metre away from any grille or diffuser; or
- ii) A system capable of providing at least 15 air changes per hour (ACH) in the largest habitable room (excluding bedrooms) and at least 5 air changes per hour (ACH) in all other habitable rooms; and
- iii) The noise level generated by the system must not exceed 40dB Laeq(30s) in the largest habitable room (excluding bedrooms) and 35dB Laeq(30s) in all other habitable rooms, when measured 1 metre away from any grille or diffuser; and
- iv) The internal air pressure must be no more than 10 Pa above ambient air pressure due to the mechanical ventilation; and
- v) Where a high air flow rate setting is provided, the system shall be controllable by the occupants to be able to alter the ventilation rate with at least three equal progressive stages up to the high setting.

Y Sensitive Activities within 60m of a Rail Network – Ground-borne Noise: Annoyance

New, relocated, or altered sensitive activities/buildings within 60 metres of the rail corridor shall be designed and constructed to ensure the following levels of vibration from trains shall not be exceeded based on the procedures specified in the Norwegian Standard NS 8176E: 2nd edition September 2005. Vibration and Shock Measurement of Vibration in Buildings from Land Based Transport and Guidance to Evaluation of its Effects on Human Beings.

Receiving Environment

(New, relocated or altered)

Class C criterion: Maximum Weighted Velocity.

401	Aquaculture New Zealand	193	Volume 2	13 Port Zone	13.3.4.	Support in Part
Decision Requested	Amend standard 13.3.4.2 to read "All anti-foul or bio-foul waste, coating waste or other contaminant removed must be captured upon removal. The waste must be stored for disposal in a covered container located in a roofed area."					
479	Department of Conservation	240	Volume 2	13 Port Zone	13.3.4.	Support in Part
Decision Requested	Amend activity standards for Rule 13.3.4 so that the permitted activity provides for the in-water cleaning of the hull of a ship where the release of contaminants is minor and scraping is not required.					
973	Ministry for Primary Industries	3	Volume 2	13 Port Zone	13.3.4.	Oppose
Decision Requested	<p>In-water cleaning of vessel hulls and structures is an important tool for both routine maintenance of early stage biofouling and emergency management of significant biosecurity risk (when using approved recapture technologies and suppliers). It is recognised under the Guidelines that the acceptability of in-water cleaning risk is dependent on factors such as vessel type, level and type of fouling (whether it is established in the location), and whether the capture of biofouling discharge will be achieved to an acceptable extent.</p> <p>MPI therefore requests that Marlborough District Council amend the provisions relating to the removal of biofouling to include provisions for in-water cleaning, with standards that take into consideration the guidance in the Australia and New Zealand Anti-fouling and In-water Cleaning Guidelines, specifically relating to the level, type and origin of fouling (including restricting in-water cleaning of vessels that have become fouled whilst overseas) and the method of in-water cleaning.</p>					
426	Marine Farming Association Incorporated	199	Volume 2	13 Port Zone	13.3.4.1.	Support in Part
Decision Requested	Amend standard 13.2.4.1 to read "...at the port in Picton, Shakespeare Bay, Havelock, Elaine Bay and Oyster Bay are adequately insulated from port noise."

433	Port Marlborough New Zealand Limited	145	Volume 2	14 Port Landing Area Zone	14.1.	Oppose
Decision Requested	Insert a new permitted activity rule, and associated performance standards, to provide for the manual scraping and wet sanding of anti-foul paint for the purpose of removal, and any associated discharge to air.					
433	Port Marlborough New Zealand Limited	147	Volume 2	14 Port Landing Area Zone	14.1.	Oppose
Decision Requested	Insert a new rule to provide for indigenous vegetation clearance in the Port Landing zones. Port Zone Rule 13.1.13 and Standard 13.3.20 could be included in the Port Landing Zone provisions, along with the amendments sought by PMNZ to this standard (refer page 19 of this submission table).					
433	Port Marlborough New Zealand Limited	148	Volume 2	14 Port Landing Area Zone	14.1.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Insert a new rule to provide for dredging in the Port Landing zones: XXX. Dredging, and associated disturbance to the foreshore and seabed, within the Port Landing Zone. Standards XXX. No more than 1,000m ³ of foreshore and seabed material, including but not limited to sand, shell or shingle (except live vegetation), must be removed by any person within a calendar year. XXX. The purpose of the dredging must be to maintain the water depth level of a navigational channel. XXX. At least 10 working days prior to the commencement of dredging activity, Maritime New Zealand and the Council must be advised in writing of the nature and duration of the intended works. XXX. The depth of any seabed disturbance must be limited to the amount necessary to maintain water depth levels. XXX. Dredged material must not be deposited within the coastal marine area. XXX. The activity must not adversely affect navigational safety. XXX. There must be no contaminants released from equipment being used for the activity.					
925	Michelle Gail Harris	12	Volume 2	14 Port Landing Area Zone	14.1.	Oppose
Decision Requested	That the discharge of contaminants to air arising from the burning of materials for the following activities is a permitted activity in the Port Landing Area Zone: <ul style="list-style-type: none"> • creating special smoke and fire effects for the purposes of producing films and • fireworks display or other temporary event involving the use of fireworks. 					
1140	Sanford Limited	64	Volume 2	14 Port Landing Area Zone	14.1.	Support in Part
Decision Requested	Manage all commercial wharfs across the region to the same policies and methods. Amend the maps, descriptive and rules accordingly.

Decision Requested	Insert a new rule to provide for indigenous vegetation clearance in the Marina zone. Port zone Rule 13.1.13 and Standard 13.3.20 could be included in the Marina zone provisions, along with the amendments sought by PMNZ to this standard (refer page 19 of this submission table).					
457	Accolade Wines New Zealand Limited	46	Volume 2	15 Marina Zone	15.3.	Support in Part
Decision Requested	Redraft the objective to read: <i>Where necessary, reduce the potential for nuisance and health effects from the discharge of contaminants into air.</i>					
433	Port Marlborough New Zealand Limited	163	Volume 2	15 Marina Zone	15.3.2.1.	Oppose
Decision Requested	Amend as follows: 15.3.2.1. The activity must not involve any abrasive blasting <u>within the coastal marine area</u> .					
479	Department of Conservation	242	Volume 2	15 Marina Zone	15.3.3.	Support in Part
Decision Requested	Amend the standards of Rule 15.3.3 so that the permitted activity provides for the in- water cleaning of the hull of a ship where the release of contaminants is minimal. Or Amend Rule 15.3.2 to ensure the permitted maintenance includes minor in water hull cleaning of a low risk of contamination.					
973	Ministry for Primary Industries	4	Volume 2	15 Marina Zone	15.3.3.	Oppose
Decision Requested	In-water cleaning of vessel hulls and structures is an important tool for both routine maintenance of early stage biofouling and emergency management of significant biosecurity risk (when using approved recapture technologies and suppliers). It is recognised under the Guidelines that the acceptability of in-water cleaning risk is dependent on factors such as vessel type, level and type of fouling (whether it is established in the location), and whether the capture of biofouling discharge will be achieved to an acceptable extent. MPI therefore requests that Marlborough District Council amend the provisions relating to the removal of biofouling to include provisions for in-water cleaning, with standards that take into consideration the guidance in the Australia and New Zealand Anti-fouling and In-water Cleaning Guidelines, specifically relating to the level, type and origin of fouling (including restricting in-water cleaning of vessels that have become fouled whilst overseas) and the method of in-water cleaning.					
433	Port Marlborough New Zealand Limited	164	Volume 2	15 Marina Zone	15.3.3.1.	Oppose
Decision Requested	Delete clause 15.3.3.1.

Decision Requested	<p>Add a new Permitted Activities, and associated Standards, to apply to areas around d'urville Island and around it's surrounding Islets: Motuiti, Hautai, Puna-a-Tawheke or Scuffle Island, Rahonui Island, Tapararere Island, Te Horo, Anatakapu Island, Te Kurukuru and Kaitaore Islands as follows -</p> <p>as sub parts of 16.1 being 16.1.24 [new permitted activity]</p> <p>16.1.25 permitted activity='kaitiakitanga']</p> <p>16.1.26 Kaitiakitanga - customary/cultural landscape</p> <p>16.1.28 iwi management plans/ kaitiakitanga plans</p> <p>16.1.29 community wellbeing and with all as permitted activities</p> <p>As subset parts of ;16.1.24, 16.1.25, 16.1.26, 16.1.28, 16.1.29</p>					

16.1.24.1 For Durville Island and its surrounding Islets

16.1.24.1.1 permitted activities

16.1.24.1.1.1 unloading/loading of stock,vehicles,machinery,farm produce,goods, wool bales,buildings,materials, by barge, for property owners -Durville Is or it's surrounding Islets

16.1.24.1.1.2 droving of stock O'urville islanici only 16.1.24.1.1.3 boundary fences. D'urville Island,only

16.1.24.1.1.4 launching of boats, where the boat owner is also the adjacent property owner Durville Is only

16.1.24.1.1.5 ensuring options for making 'safe' boats and vessels of local property owners, via moorings, permanent anchoring, a boat ramp, or jetty, adjacent to the owners property D'urville and islets

16.1.24.1.1.6 'anchor-to-shore' small craft/dingy line[d'urville island surrounding Islets] .D'urville

16.1.24.1.1.7 existing use rights, of the RMA

16.1.24.1.1.8 options [16.1.24.1.1.1 - 16.1.24.1.1.7 inclusive] must be managed way, or at a rate, which enables people and communities to provide for their social, economic, and cultural well-being and for their health and safety.

16.1.25.1 1 Kaitiakitanga - Rangitoto ki te tonga/d'urville island and surrounding Islets [kaitiakitanga 16.1.25.1: subject to 16.1.25.1.1.1.a, 16.1.25.1.1.1.b, 16.1.25.1.1.1.c]

16.1.25.1.1 permitted activities

16.1.25.1.1.1 Kaitiakitanga [riparian rights continue to be held in private ownership of whanau] for Durville Island and it's surrounding Islets, as the 'Customary rights' markers & rohe marker for whanau/hapu/lwi of Ngati Koata [coastal area interface -rohe-location]

16.1.25.1.1.2 Kaitiakitanga -cultural activities(coastal area -rohe-location) [subject to criteria 16.1.25.1.1.1.1d] 16.1.25.1.1.3 kaitiakitanga - customary practices [coastal area -rohe-location] (subject to criteria 16.1.25.1.1.1.1d) 16.1.25.1.1.4 kaitiakitanga - Moorings [coastal area -rohe-location]

16.1.25.1.1.5 kaitiakitanga - Maitaitai, taiapure,rahui. (coastal area -rohe-location)

16.1.25.1.1.6 Kaitiakitanga - cultural landscape [subject to criteria 16.1.25.1.1.1.1d]

16.1.25.1.1.1.1 Kaitiakitanga criteria/standards(16.1 .25.1.1.1.1a - 16.1.25.1.1.1.1d inclusive)

16.1.25.1.1.1.1a Kaitiakitanga content ='Traditions and cultural'-Rangatiratanga ,Tikanga' of [whanau/hapu/lwi of Ngati Koata]

16.1.25.1.1.1.1b kaitiakitanga - community = [whanau/hapu/lwi of Ngati Koata]

16.1.25.1.1.1.1c kaitiakitanga - Location = rohe of Durville Is and surrounding Islets and includes, their ancestral lands, sites, waters, waahi tapu, and other taonga

16.1.25.1.1.1.1d under kaitiakitanga 16.1.25.1.1:

16.1.25.1.1.2 must be consistent with 16.1.25.1.1.1.1b, and 16.1.25.1.1.1.1c 16.1.25.1.1.3 must be consistent with 16.1.25.1.1.1.1b, and 16.1.25.1.1.1.1c
16.1.25.1.1.6 must be consistent with 16.1.25.1.1.1.1b, and 16.1.25.1.1.1.1c

else Kaitiakitanga must not happen where the rohe is 'rangitoto ki te tonga'/d'urville island and includes the following blocks Tinui Island, Motuiti, Hautai, Puna-a-Tawheke or Scuffle Island, Araiawa, Rahonui,

Tapararere, Te Horo, Anatakapu, Te Kurukuru and Kaitaore Islands

16.1.25.1.1.7 existing use rights, of the RMA

16.1.25.1.1.8 options (16.1.25.1.1.1 - 16.1.25.1.1.7, inclusive) must be managed way, or at a rate, which enables people and communities to provide for their social, economic, and cultural well-being and for their health and safety.

16.1.29.1. community wellbeing [being owners at d'urville island and surrounding islands; block Motuiti, Hautai, Puna-a-Tawheke or Scuffle Island, Araiawa, Rahonui, Tapararere, Te Horo, Anatakapu, Te Kurukuru and Kaitaore Islands]

16.1.29.1.1 Permitted Activities

16.1.29.1.1.1 right to apply for and occupy the coastal marine area, for use as boat ramp, where the ramp applicant is also the adjacent property owner Durville Is

16.1.29.1.1.2 right to apply for, occupy and use coastal space, for a jetty, adjacent to property, of the jetty owner, for loading and unloading of vessels, for servicing property at Durville Is or surrounding Islet [tinui Island]

16.1.29.1.1.3 permanent anchorage, by owners of adjacent property-Durville Is

16.1.29.1.1.4 right to apply for and operate a mooring, adjacent to property of the mooring owner, or servicing property at Durville Is or Islet [tinui Island]

16.1.29.1.1.5 surveillance equipment

16.1.29.1.1.6 'anchor-to-shore' small craft/dingy line (d'urville island)

16.1.29.1.1.7 moorings, where that site is adjacent to property of the owner - D'urville Island

16.1.29.1.1.8 option to apply for moorings/weka management where no bylaw for managing swing moorings (Durville Is or tinui Island)

16.1.29.1.1.9 'anchor-to-shore' small craft/dingy line Islets surrounding Durville island,

16.1.29.1.2.1 recreational fishing parks, marine management parks (be subject to 16.1.25.1.1 and 16.1.29.1.2.1)

16.1.29.1.2.1 existing use rights, of the RMA

Standards

16.1.29.1.2.2 options (16.1.29.1.1.1 - 16.1.29.1.2.1, inclusive) must be managed way, or at a rate, which enables people and communities to provide for their social, economic, and cultural well-being and for their health and safety

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Retain provisions.					
433	Port Marlborough New Zealand Limited	197	Volume 2	16 Coastal Marine Zone	16.3.1.2.	Support
Decision Requested	Retain provision.					
426	Marine Farming Association Incorporated	228	Volume 2	16 Coastal Marine Zone	16.3.2.	Support in Part
Decision Requested	Amend rule 16.3.2.1, so it expressly does not apply to any ship or barge used in aquaculture.					
401	Aquaculture New Zealand	229	Volume 2	16 Coastal Marine Zone	16.3.2.1.	Oppose
Decision Requested	It is unclear whether the policy is intended to apply to ships and barges used for the purpose of aquaculture. "Ship" is defined in the MEP as having the same meaning as in s 2 of the Maritime Transport Act 1994. The case law suggests that a barge could be captured by that definition. Amend rule 16.3.2.1, so it expressly does not apply to any ship or barge used in aquaculture.					
443	Jones, Annabel Farquar and Goldie, Neville Charles Clarke, Richard Spencer	3	Volume 2	16 Coastal Marine Zone	16.3.2.1.	Support in Part
Decision Requested	Amend the Standard to read as follows (strike out and bold) - " The ship must not be anchored to the foreshore or seabed for more than 60 10 consecutive days or more than 90 days within any 12 month period, within the same embayment, inlet, or estuary, and should be subject to the requirement of the harbour master that such a ship or vessel should be manned when at anchor on a twenty four hour basis. " (Inferred)					
433	Port Marlborough New Zealand Limited	199	Volume 2	16 Coastal Marine Zone	16.3.3.	Support
Decision Requested	Retain provisions.					
1002	New Zealand Transport Agency	205	Volume 2	16 Coastal Marine Zone	16.3.5.	Support

Decision Requested	That the limits applying to discharge of sewage in the Coastal Marine Zone, remain at 500mtrs to seaward of MHWS and 500mtrs of a marine farm.					
248	David Colsell	1	Volume 2	16 Coastal Marine Zone	16.7.2.	Oppose
Decision Requested	<p>1. Leave the ruling as it currently is (at 500m).</p> <p>2. Perhaps a more progressive solution for the unique environment that is the Marlborough Sounds, is to redefine the classification of a "Ship" within the current rules and introduce a tiered system as such:</p> <ul style="list-style-type: none"> - Large commercial ships that regularly enter and exit the Sounds, can reasonably be expected to discharge their sewerage outside of the 1000m mark. - Smaller local commercial operators (taxi's, sight seeing and fishing tours , etc.) could be allowed to use a 500m mark but their vessels should be expected to carry a suitable treatment system (inspected under survey). - Recreational craft >7m must macerate their sewerage prior to discharge via electric toilet or macerator pump. This would eliminate the chances of persistent solids washing ashore and significantly increase the rate of dissipation and degradation. This is a simple enough and relatively inexpensive measure that I believe most boat owner's would consider to be a perfectly reasonable and workable request, in the interests of all. - The remaining untreated discharge from smaller boats would be negligible. 					
276	Ian Gardiner	1	Volume 2	16 Coastal Marine Zone	16.7.2.	Oppose

Decision Requested	Amend the Rule as follows (strike through and bold) - " From 9 June 2022, the discharge of human sewage, except Grade A or B treated sewerage, from a ship within 1000m of MHWS. " "The discharge of untreated human sewage from a ship to the coastal marine area at less than 500m from MHWS (or as amended by any change to the Resource Management (Marine Pollution) Regulations 1998)."					
1246	Pelorus Boating Club Incorporated	11	Volume 2	16 Coastal Marine Zone	16.7.2.	Oppose
Decision Requested	That the following amendment (strike-through) is made to Rule 16.7.2 (<i>inferred</i>): 16.7.2. From 9 June 2022, the discharge of human sewage, except Grade A or B treated sewerage, from a ship within 1000m of MHWS. That the following new rules (bold) are included in 16.7 Prohibited Activities: <ul style="list-style-type: none"> • The discharge of untreated human sewage from a ship to the coastal marine area at less than 500m from MHWS (or as amended by any change to the Resource Management (Marine Pollution) Regulations 1998). • The discharge of untreated human sewage from a ship to the coastal marine area at less than 500m from a marine farm (or as amended by any change to the Resource Management (Marine Pollution) Regulations 1998). • The discharge of Grade A treated sewage from a ship to the coastal marine area except that the discharge is not permitted within 100m of a marine farm (or as amended by any change to the Resource Management (Marine Pollution) Regulations 1998). • The discharge of Grade B treated sewage from a ship to the coastal marine area except that the discharge is not permitted within 500m of a marine farm (or as amended by any change to the Resource Management (Marine Pollution) Regulations 1998). 					
1260	Christopher Robert Webb	1	Volume 2	16 Coastal Marine Zone	16.7.2.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	The status quo until further science has been done to support change. I have no reservation with seeking to maintain clean water but believe we do not have the facilities to have pump stations in place and unless boaters install better fittings the potential for spills at pump stations is significant. I would support a change to a strip of deep water down the centre of the sounds with exclusions around marine farms as the area discharge could take place.					
23	James Turner	2	Volume 2	16 Coastal Marine Zone	16.7.3.	Oppose
Decision Requested	The limits applying to discharge of sewage in the Coastal Marine Zone should remain at 500 metres to seaward of MHWS and 500 metres of a marine farm.					
27	Joseph Maurice Carter	2	Volume 2	16 Coastal Marine Zone	16.7.3.	Oppose
Decision Requested	That there is no change to the current regulations, the limits remaining at 500 metres.					
38	Nicky Jenkins	2	Volume 2	16 Coastal Marine Zone	16.7.3.	Oppose
Decision Requested	Amend the Rule as follows (strike though and bold) - <i>"From 9 June 2022, the discharge of human sewage, except Grade A or B treated sewerage, from a ship within 1000m 500m of a marine farm."</i>					
49	Grant Hutchings	2	Volume 2	16 Coastal Marine Zone	16.7.3.	Oppose
Decision Requested	The limits applying to discharge of sewage in the Coastal Marine Zone remain at 500 metres to seaward of MHWS and 500 metres of a marine farm.					
50	Michael Rattray	2	Volume 2	16 Coastal Marine Zone	16.7.3.	Oppose
Decision Requested	4. Recommendation The limits applying to discharge of sewage in the Coastal Marine Zone remain at 500 metres to seaward of MHWS and 500 metres of a marine farm. Include a no pump-out zone at the Scallop bed (North/West of Definbach Point).					
51	Kerry Kirk	2	Volume 2	16 Coastal Marine Zone	16.7.3.	Oppose

Decision Requested	That the limits applying to discharge of sewage in the Coastal Marine Zone, remain at 500mtrs to seaward of MHWS and 500mtrs of a marine farm.					
248	David Colsell	2	Volume 2	16 Coastal Marine Zone	16.7.3.	Oppose
Decision Requested	<p>1. Leave the ruling as it currently is (at 500m).</p> <p>2. Perhaps a more progressive solution for the unique environment that is the Marlborough Sounds, is to redefine the classification of a "Ship" within the current rules and introduce a tiered system as such:</p> <ul style="list-style-type: none"> - Large commercial ships that regularly enter and exit the Sounds, can reasonably be expected to discharge their sewerage outside of the 1000m mark. - Smaller local commercial operators (taxi's, sight seeing and fishing tours , etc.) could be allowed to use a 500m mark but their vessels should be expected to carry a suitable treatment system (inspected under survey). - Recreational craft >7m must macerate their sewerage prior to discharge via electric toilet or macerator pump. This would eliminate the chances of persistent solids washing ashore and significantly increase the rate of dissipation and degradation. This is a simple enough and relatively inexpensive measure that I believe most boat owner's would consider to be a perfectly reasonable and workable request, in the interests of all. - The remaining untreated discharge from smaller boats would be negligible. 					
276	Ian Gardiner	2	Volume 2	16 Coastal Marine Zone	16.7.3.	Oppose
Decision Requested	The limits applying to discharge of sewage in the Coastal Marine Zone remain at 500 metres to seaward of MHWS and 500 metres of a marine farm.

Decision Requested	That the following amendment (strike-through) is made to Rule 16.7.3 (<i>inferred</i>): 16.7.3. From 9 June 2022, the discharge of human sewage, except Grade A or B treated sewerage, from a ship within 1000m of a marine farm.					
1260	Christopher Robert Webb	2	Volume 2	16 Coastal Marine Zone	16.7.3.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	The status quo until further science has been done to support change. I have no reservation with seeking to maintain clean water but believe we do not have the facilities to have pump stations in place and unless boaters install better fittings the potential for spills at pump stations is significant. I would support a change to a strip of deep water down the centre of the sounds with exclusions around marine farms as the area discharge could take place.					
91	Marlborough District Council	156	Volume 2	16 Coastal Marine Zone	16.7.4.	Support
Decision Requested	The amendment requested is as follows (bold) - " 16.7.4. - <i>Discharge of treated or untreated human sewage from land based activities into the coastal marine area, except for the discharge of treated human sewage from regionally significant infrastructure.</i> "					
127	Mark Altoft	2	Volume 2	16 Coastal Marine Zone	16.7.4.	Oppose
Decision Requested	That clause 16.7.4 is deleted.

Decision Requested	Stop dredging and anchoring in ecologically significant marine sites.					
906	Legacy Fishing Limited	2	Volume 2	16 Coastal Marine Zone	16.7.5.	Oppose
Decision Requested	<p>That Rule 16.7.5 be rewritten to clarify that commercial potting, long lining, drop lining and set netting do not constitute bottom impacting methods.</p> <p>That all references as to what constitutes 'seabed disturbance' be positively defined so as not to impact on industry operators fishing by potting, long lining, drop lining, set netting methods, hand harvest or any other methods employed by the fishing industry.</p> <p>Should bottom impacting fishing methods be considered to include prohibition of potting, long lining, drop lining, set netting methods and hand harvest then I have identified the following sites of significance as identified in the MEP will cause a particular problem for my business and also for the sustainability of some surrounding fisheries:</p> <ol style="list-style-type: none"> a. Glasgow Island (Sites of Significance Map 14) b. West Head Site - Tory Channel (Sites of Significance Maps 11 and 15) c. The Brothers and Awash Rock (Sites of Significance Map 11) d. Cape Campbell (Sites of Significance Map 16) e. Marine Mammal whale and Marine Mammal Dolphin (Sites of Significance Maps 17 and 18) <ul style="list-style-type: none"> • If any of the areas listed above are prohibited to the use of potting, long lining, drop lining or set netting fishing methods this will affect our ability to fish these areas and will create areas of closed fishery for the target species. This in turn will move fishing effort into neighboring areas within the fishery, impacting on the sustainable balance of the remaining fishery. • In creating this situation, the Council may well, even if inadvertently, upset the sustainable biodiversity of the species populating the surrounding closed areas. Any change made to the space allocated to a fishery, such as by closing a portion of productive area within that fishery, will impact on the management and performance of that fishery. This is because existing commercial, recreational and customary catch allocations are set on many years of scientific reporting and monitoring taken across the full fishing area. • If the Council's decision is that the rocky outcrops listed in the 129 Sites of Significance should be protected from all trawling and dredging I recommend these Sites be kept open to potting, long lining, drop lining or set netting fishing methods as these methods do not have an adverse bottom impact effect, nor do they adversely affect biodiversity values. However, the impact of closing many of these areas will have an adverse effect on the sustainability of the remaining fishery and so on biodiversity values of balanced and managed fish populations.

Decision Requested	<p>MPI would like to work with MDC to ensure that we can jointly pursue a more integrated approach to biodiversity protection, and to protect areas from the impacts of fishing under the Fisheries Act. MPI already has various projects underway (including within the Marlborough Sounds) looking at fishing activities that adversely impact the benthos.</p> <p>MPI therefore asks that MDC conduct additional section 32 analysis on proposed Rule 16.7.5 to address the matters raised in this submission.</p> <p>MPI asks that MDC, pending outcome of the additional Section 32 analysis, either:</p> <ol style="list-style-type: none"> Does not proceed with Rule 16.7.5 (and associated policies at this time), or Includes a new policy for Rule 16.7.5, as follows: <p><i>Within 5 years of the Regional Coastal Plan component of the Marlborough Environment Plan becoming operative undertake a review of the effectiveness of other mechanisms (including other legislative regimes) for achieving sustainable management of ecologically significant marine sites.</i></p> <p>MPI would prefer to work with MDC to protect areas from the impacts of fishing under the Fisheries Act. Alternatively, and if a new Marine Protected Areas Act is passed by Parliament, Council objectives in future could potentially be achieved under that legislative framework . Protected areas created in this way would contribute to a representative MPA network and New Zealand's commitments for marine protection under the Convention on Biological Diversity (CBD).</p> <p>The Fisheries Act provides a range of tools to achieve a balance between use and sustainability, and decisions on dealing with environmental impacts must be made while regarding relevant costs, benefits and risks. It ensures that potential environmental impacts of fishing are weighed up against benefits derived from fishing, leading to good fisheries management decisions.</p> <p>Aligning the different pieces of legislation will avoid duplication and result in an integrated, efficient and strategic way to manage marine protection in New Zealand.</p> <p>At a regional level, MPI would prefer to work in partnership with respective authorities to understand key environmental issues and to manage the impacts of fishing utilising the Fisheries Act.</p>					
999	New Zealand Sport Fishing Council	7	Volume 2	16 Coastal Marine Zone	16.7.5.	Support
Decision Requested	<ol style="list-style-type: none"> Clarify how the standards for permitted activities, discussed in Rule 16.2, apply to large scale bottom contact fishing methods. The Marlborough District Council ensure further reference highlighting the ecologically significant sights affected by Rule 16.7.5 to be made available. The Marlborough District Council change or append Rule 16.7.5 to clarify methods that are deemed to cause disturbance. Increase the ecologically significant sites, creating a buffer zone to adequately protect from sedimentation arising from the use of destructive fishing methods on the margins/outside the Ecologically Significant Sites.

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	It is therefore requested that provision be made in the Marlborough Environment Plan for organised Guiding and Scouting camp fires to be an authorised activity. It is fully appreciated that this would most likely be a Restricted Activity hence allowing permits/safeguards to be put in place. A mandatory fire permit per camp fire/or per location is considered entirely reasonable to enable MDC/Fire Service spot checks to be made on the location, safety and burn cleanliness of the fire - hence satisfying the intent of the act around air quality while teaching our future adults their responsibilities for the environment.					
Please don't allow the Marlborough girls to miss out and not get the chance to learn fire safety, care of the environment and the wider values of Girl Guiding.						
208	Girl Guiding NZ	1	Volume 2	18 Open Space 2 Zone	18.5.2.	Oppose
Decision Requested	That MDC make provision for organisations such as GirlGuidingNZ to have fires for campfire and fire related activities where the fire is not used solely for cooking. This may be in the form of exemptions or the need to obtain a permit.					
614	Churchward Park Scout Group	1	Volume 2	18 Open Space 2 Zone	18.5.2.	Oppose
Decision Requested	Delete Rule.					
91	Marlborough District Council	153	Volume 2	19 Open Space 3 Zone		Support
Decision Requested	Add new heading under 19.3 as follows - <i>"Livestock entering onto, or passing across, the bed of any river."</i> and standards as follows - <i>1. "The entering onto or passing across the bed of a river of livestock must not involve intensively farmed livestock if there is water flowing in the river." 2. "After reasonable mixing, the entering onto or passing across the bed of a river by livestock must not cause any conspicuous change in the colour or visual clarity of a flowing river, measured as follows: (a) hue must not be changed by more than 10 points on the Munsell scale; (b) the natural clarity must not be conspicuously changed due to sediment or sediment laden discharge originating from the activity site; (c) the change in reflectance must be <50%." 3. "After reasonable mixing, the entering onto or passing across the bed of a river by livestock must not result in a change in concentration of following: (a) daily average carbonaceous BOD5 due to dissolved organic compounds (i.e. those passing a GF/C filter); (b) dissolved reactive phosphorus; (c) dissolved inorganic nitrogen; (d) Escherichia coli (E. coli)."</i>					
91	Marlborough District Council	154	Volume 2	19 Open Space 3 Zone		Support
Decision Requested	Add a new Permitted Activity rule under 19.1 to as follows - <i>"Livestock entering onto, or passing across, the bed of any river."</i>

Decision Requested	<p>Allow the provision in part and amend as follows:.</p> <p>In 22.2.2.2. replace "at the boundary ", with "on another site within the Zone" and remove the comma after last occurrence of "within".</p> <p>Replace "dBA LAeq" with "dB LAeq" here and THROUGHOUT THE PLAN.</p> <p>Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.</p>					
91	Marlborough District Council	41	Volume 2	21 Floodway Zone	21.2.2.3.	Oppose
Decision Requested	<p>Delete Standard 21.2.2.3(b) - "(b) a fixed motor or equipment, frost fan or gas gun, milling or processing forestry activity, static irrigation pump; or motorbike that is being used for recreational purposes."</p>					
91	Marlborough District Council	230	Volume 2	21 Floodway Zone	21.2.2.3.	Support
Decision Requested	<p>Amend Standard 21.2.2.3(a) as follows (strike through) - "The following activities are excluded from having to comply with the noise limits: (a) mobile machinery used for a limited duration as part of farming activity occurring in the Floodway Zone."</p>					
280	Nelson Marlborough District Health Board	185	Volume 2	21 Floodway Zone	21.2.2.4.	Support in Part
Decision Requested	<p>Allow the provision in part and amend as follows:.</p> <p>Insert at the beginning of first clause in these sections "Except as provided elsewhere,"</p> <p>Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.</p>					
280	Nelson Marlborough District Health Board	186	Volume 2	21 Floodway Zone	21.2.2.5.	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Allow the provision in part and amend as follows: Insert at the beginning of first clause in these sections "Except as provided elsewhere," Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.					
1186	Te Atiawa o Te Waka-a-Maui	211	Volume 2	21 Floodway Zone	21.3.1.	Support in Part
Decision Requested	Amend the 'standards that apply to all permitted activities' in the Floodway Zone, to account for cultural matters and protect cultural sites, areas and resources (specifically standards 21.3.1, 21.3.3, 21.3.6, 21.3.7, 21.3.8, 21.3.9, and 21.3.14).					
91	Marlborough District Council	229	Volume 2	21 Floodway Zone	21.3.1.2.	Support
Decision Requested	Amend Standard 21.3.1.2 as follows (bold) - " <i>Works must be undertaken outside of the wet part of the riverbed, where possible.</i> "					
172	Davidson Group Ltd	12	Volume 2	21 Floodway Zone	21.3.1.2.	Oppose
Decision Requested	Change this Provision to be more enabling of stopbank maintenance works both by Council and private stopbank owners.					
91	Marlborough District Council	125	Volume 2	21 Floodway Zone	21.3.2.	Support
Decision Requested	Amend Heading 21.3.2 as follows (bold) - " <i>Rock, concrete block or gabion structural bank protection works.</i> "					
307	Tasman District Council	2	Volume 2	21 Floodway Zone	21.3.2.	Oppose
Decision Requested	Any rock walling activity should submit a plan, even if it is for scrutiny by the Regulatory Department, to ensure environmental effects are properly considered. If a rock wall is proposed to extend through inanga spawning zones they should require a resource consent. Such consents would consider that the design includes grassed benches so there is continued provision of whitebait spawning.					
479	Department of Conservation	263	Volume 2	21 Floodway Zone	21.3.2.	Support in Part
Decision Requested	Include a further activity standard 21.3.2.X as follows: The protection works shall not disturb an inanga spawning habitat.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
91	Marlborough District Council	231	Volume 2	21 Floodway Zone	21.3.5.	Support
Decision Requested	Amend heading 21.3.5 as follows (strike through and bold) - " Replacement or Mmaintenance of a culvert or floodgate. "					
994	New Zealand Fish Passage Advisory Group	27	Volume 2	21 Floodway Zone	21.3.5.	Support in Part
Decision Requested	<p>Add conditions for culvert installation including:</p> <ul style="list-style-type: none"> - Alignment shall be as close as possible to the existing stream alignment - Bed material should be assessed to determine the potential for erosion. If erosion is likely then a weir or series of weirs should be provided downstream of the outlet. These weirs must also provide fish passage. <p>Reword along the following lines: The design, placement, and maintenance of any structure does not impede the passage of fish, except that is respect of culverts, fords, and tidal flood gates existing as at [date plan is notified], and except for short periods during maintenance, this condition does not have legal effect until five years from its operative date.</p>					
479	Department of Conservation	265	Volume 2	21 Floodway Zone	21.3.6.	Support in Part
Decision Requested	<p>Include a further activity standard 21.3.6.X as follows: <i>During the period of 1 September to 31 December in any year no works shall occur within 50m of nesting birds on the riverbed.</i></p>					
359	WilkesRM Limited	12	Volume 2	21 Floodway Zone	21.3.6.5.	Support in Part

66	Karen and John Wills	2	Volume 2	24 Subdivision	24.3.1.5.	Oppose
Decision Requested	1. The 90m restriction be removed.					

2. In the event of any decision to apply the restriction; this be done in a manner that accommodates residential activities, development and subdivision.
3. Any restrictions and discretion applied residential activities, development and subdivision not be of a nature that has the practical effect of or specifically preventing or prohibiting residential activities, development or subdivision from being carried out. Use of Controlled Activity classification is requested in the event that any standards required to be applied to Permitted Activities may not be complied with and for the matters over which control will be exercised include consideration of all methods by which the protections and purposes of the restriction can be achieved in a manner that does not prevent or make it impracticable for residential use, development or subdivision of residential zoned land.
4. Provision of a rule or rules that require the location of transmission lines and associated infrastructure to be located so they avoid preventing residential use, development or subdivision of residential zoned land and that include activity status, standards and objectives and policies that prescribe the matters required to be considered and that these include avoidance of adverse effects on residential use, development and subdivision of residential zoned land.
5. Objectives and policies be included in the Plan that recognise effects these provisions may have on residential activities, development and subdivision and amenities and the location of any new or replacement lines and associated equipment, installations or facilities should be such that they do not present restrictions or effects on land used for and zoned or otherwise identified or provided for use, development and subdivision for residential purposes.
6. Rules, objectives and policies be included in the Plan that prescribe that as a pre-requisite to implementation of the restriction of the 90m zone, that the operator of the substation or any line associated with it or any other line or facility presenting the requirement for this restriction, to provide means by which restrictions and costs caused by the restrictions are mitigated.
7. Controls be placed on or volunteered by the operators of the lines and substation that will avoid, remedy or mitigate the need for the restriction.
8. The submitter is willing to discuss means by which the significant impact of this provision may be avoided, remedied or mitigated with both the Council and the line and substation operator and is open to discussion of the full range of options available pursuant to the RMA.

256	Justin Stevens	2	Volume 2	25 Definitions	25.	Support in Part
Decision Requested	<p>1. I believe this definition needs to be clearer as the current wording is open to an individuals interpretation. An example would be that the " Hog Swamp Creek" may not be considered " intermittently flowing " as it has not flowed for the last two years. My assumption would be that it is not an intermittently flowing creek and would not be subject to the current Marlborough Environment Plan.</p> <p>2. I believe that the Marlborough District Council need's to be clear and concise on each and every River ,Stream and Creek or body of water and to have a " catchment-specific plan "(Volume 1 page 15-12) for every River, Stream and Creek or body of water so as to remove any miss interpretation of rules and definition's.</p>					
256	Justin Stevens	3	Volume 2	25 Definitions	25.	Oppose
Decision Requested	<p>Remove the word Deer from the definition of " Intensively Farmed Livestock " due to the fact that deer move quicker and less often than other classes of livestock.</p> <p>Why have sheep been left out as they would create a greater impact when moving through a wet bed of a water body ?</p>

Decision Requested	Amend the definition of Minor Upgrading as follows: Minor Upgrading means an increase in the carrying capacity, efficiency or security of electricity (for the purpose of utilities) lines, telecommunication lines and radio communication facilities, using the existing support structures or structures of a similar scale and character, and includes: (a) The replacement, reconfiguration, relocation or addition of lines , circuits and conductors; (b) The re-conductoring of the line with higher capacity conductors; (c) The re-sagging of conductors; (d) The addition of longer or more efficient insulators; (e) The addition of earthwires which may contain telecommunication lines , earthpeaks and lightning rods; (f) Foundation works associated with the minor upgrading; (g) The replacement of a pole, provided that: (i) the replacement pole must not have a diameter that is more than the existing pole's diameter at its largest point plus 50 per cent; and (ii) The replacement pole must not have a height greater than 25m or the height of pole it is replacing, whichever is the greater; and (iii) The replacement pole must be located within 3m from the existing pole. Minor upgrading does not include an increase in the voltage of the line unless the line was originally constructed to operate at the higher voltage but has been operating at a reduced voltage. Minor Upgrading also includes the replacement of existing antennas, provided the replacement antenna size is no greater than 20 percent of the existing antenna being replaced.

1002	New Zealand Transport Agency	257	Volume 2	25 Definitions	25.	Support in Part
Decision Requested	Add a definition for safety and hazard sign.					
1002	New Zealand Transport Agency	258	Volume 2	25 Definitions	25.	Support in Part
Decision Requested	Add a definition for sign as follows: <i>Sign means any name, figure, character, outline, display, notice, placard, poster, banner of any kind, advertising device or appliance, or any other thing of a similar nature intended to attract attention; and</i> <i>(a) includes all materials composing the sign, together with the frame, background, structure and support or anchorage of the sign;</i> <i>(b) includes any of the above listed things when fixed or mounted on any vehicle that is parked on a State Highway for the purpose of displaying that sign;</i> <i>(c) includes road safety billboards, sandwich boards and temporary local banners; but</i> <i>(d) does not include any official road sign or traffic sign.</i>					
1002	New Zealand Transport Agency	259	Volume 2	25 Definitions	25.	Support in Part
Decision Requested	Add a definition for State Highway buffer area as follows: <i>The area on overlay maps titled "State Highway buffer area", and used to promote separation between noise sensitive activities and the State Highway. The buffer extends up to 40 m from the edge of the traffic lane and typically incorporates shoulder areas, stormwater drains, stormwater treatment, utility corridors, cycle and foot paths and other non-noise sensitive activities.</i>					
1002	New Zealand Transport Agency	260	Volume 2	25 Definitions	25.	Support in Part
Decision Requested	Add a definition for State Highway effects area as follows: <i>The area on overlay maps titled "State Highway effects area", and used to implement design standards on new buildings within this area to achieve reasonable indoor acoustic amenity. The effects area extends up to 100 m from the edge of the traffic lane.</i>					
1002	New Zealand Transport Agency	261	Volume 2	25 Definitions	25.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Replace the definition for stormwater as follows: <i>Rainfall runoff from land, including constructed impervious areas such as roads, pavement, roofs and urban areas which may contain dissolved or entrained contaminants, and which is diverted and discharged to land and water.</i> means rainfall that runs off land and for which specific drainage channels or pipes have been constructed.					
1002	New Zealand Transport Agency	262	Volume 2	25 Definitions	25.	Support
Decision Requested	Retain the definition for temporary sign.					
1002	New Zealand Transport Agency	263	Volume 2	25 Definitions	25.	Support in Part
Decision Requested	Retain definition for Tree Protection Zone.					
1002	New Zealand Transport Agency	264	Volume 2	25 Definitions	25.	Oppose
Decision Requested	Amend or replace the definition for vegetation.					
1002	New Zealand Transport Agency	265	Volume 2	25 Definitions	25.	Oppose
Decision Requested	Amend or replace the definition for vegetation clearance					
1002	New Zealand Transport Agency	300	Volume 2	25 Definitions	25.	Support in Part
Decision Requested	Amend the explanation of the term 'avoid' to be consistent with its ordinary meaning and that established by case law. Ensure each of the RMA terms explained in this section adequately relate to all instances of use in the MEP. Insert a definition for these terms in Chapter 25.					
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	11	Volume 2	25 Definitions	25.	Support
Decision Requested	Retain the definition for 'Heavy Industrial Activities' as notified.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	12	Volume 2	25 Definitions	25.	Support
Decision Requested	Retain the definition for 'Light Industrial Activities' as notified.					
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	43	Volume 2	25 Definitions	25.	Support in Part
Decision Requested	<p>Add a new definition of Sign, which excludes warning signs, directional signs, instructional signs or signs required by other legislation. This could be achieved by adding a definition of sign along the following lines:</p> <p><u>Any display or device whether or not placed on land or affixed to a building, stationary vehicle or structure, intended to attract attention for the purposes of directing, identifying, informing, or advertising, and which is visible from a public place. The area of a sign shall be a measurement of that sign's face or total message visible from a public place and warning signs, directional signs, instructional signs or signs required by other legislation shall be excluded from the definition of sign.</u></p>					
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	49	Volume 2	25 Definitions	25.	Support
Decision Requested	Retain the definition of Bore as notified.					
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	50	Volume 2	25 Definitions	25.	Support
Decision Requested	Retain the definition of Dewatering as notified.					
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	51	Volume 2	25 Definitions	25.	Support
Decision Requested	Retain the definition of Excavation as notified.					
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	52	Volume 2	25 Definitions	25.	Support
Decision Requested	Retain the definition of Fill, filling and Fill Material as notified.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	53	Volume 2	25 Definitions	25.	Support
Decision Requested	Retain the definition of Service Station as notified.					
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	54	Volume 2	25 Definitions	25.	Support
Decision Requested	Retain the definition of Vehicle Oriented Activities as notified.					
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	55	Volume 2	25 Definitions	25.	Support
Decision Requested	That a new definition for 'drive through facility' that excludes Service Stations is included in the MEP.					
1017	Peter Gilford Gilbert	1	Volume 2	25 Definitions	25.	Support in Part
Decision Requested	<p>That the following amendments (strike-through and bold) are made to the definitions of <i>Commercial forestry planting</i> and <i>Commercial forestry replanting</i>:</p> <p><i>Commercial forestry planting means means indigenous or exotic tree species deliberately established for wood production. Includes the planting, management and replanting of trees, and the preparation of land for planting.</i></p> <p>A decision requested is also included in Item Fourteen. Access tracks and roads for Commercial forestry planting of the submission (page 19).</p> <p><i>Commercial forestry planting means indigenous or exotic tree species deliberately established for wood production. Includes the planting, management and replanting of trees, and the preparation of land for planting and the excavation or filling, or both, to prepare the land for planting or replanting (for example forestry road or forestry track construction or maintenance).</i></p> <p><i>Commercial forestry replanting means indigenous or exotic tree species deliberately planted for wood production to replace trees previously lawfully planted for the same purpose and subsequently harvested. This definition pertains only to the Coastal Environment Zone.</i></p>					
1017	Peter Gilford Gilbert	2	Volume 2	25 Definitions	25.	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>That the following amendments (strike-through and bold) are made to the definition of <i>Commercial forestry harvesting</i>.</p> <p><i>Commercial forestry harvesting means the felling and removal from the land of trees, for the purposes of commercial forestry, and includes:</i></p> <p><i>(a) excavation or filling, or both, to prepare the land for harvesting (for example, skid, forestry road or forestry track construction or maintenance);</i></p> <p><i>(b) de-limbing, trimming, cutting to length, and sorting and grading of felled trees;</i></p> <p><i>(c) recovery of windfall and other fallen trees;</i></p> <p><i>(d) the transportation of trees from the land.</i></p> <p><i>but does not include the transportation of the trees from the land or the processing of timber on the land.</i></p> <p>Alternatively, as provided in Item Ten. Transportation of submission (page 15), the same exclusion to all other activities on the land that have a transportation component could be applied. For example, farming, winery and marine farming activities are defined but do not include the transportation of the associated production from the land.</p>					
1035	Pieter Wilhelmus and Ormond Aquaculture Limited	2	Volume 2	25 Definitions	25.	Support
Decision Requested	Retain the definition of intensively farmed livestock as proposed.					
1039	Pernod Ricard Winemakers New Zealand Limited	130	Volume 2	25 Definitions	25.	Support
Decision Requested	<p>Retain Agrichemical definition, subject to amendment as follows:</p> <p><i>"This includes agricultural compounds, but excludes fertilisers, <u>compost</u>, vertebrate pest control products and organ nutrition compounds."</i></p>					
1039	Pernod Ricard Winemakers New Zealand Limited	131	Volume 2	25 Definitions	25.	Support

Decision Requested	That a new Appendix is included in the MEP that details the matters to be included in a Farm Environment Plan. In particular, Ravensdown adopts the Appendix proposed by FANZ in its submission on the MEP.					
1192	The Fertiliser Association of New Zealand	98	Volume 3	All		Support in Part
Decision Requested	<p>Appendix X - Farm Management Plan Requirements</p> <p>Part A - Farm Management Plans</p>					

A Farm Management Plan can be based on either of:

1. The material set out in Part B below;

OR

2. Industry prepared Farm Management Plan templates and guidance material that:

(a) Include the following minimum components:

(i) The matters set out in 1, 2, and 3 of Part B below;

(ii) Contains a methodology that will enable development of a plan that will identify actual and potential environmental effects and risks specific to the property, addresses those effects and risks and has a high likelihood of appropriately avoiding, remedying or mitigating those effects;

(iii) Performance measures that are capable of being audited; and

(b) Has been approved as meeting the criteria in (a) and being acceptable to the Marlborough District Council by the Chief Executive of the Marlborough District Council.

Part B - Farm Management Plan Default Content

The plan requirements will apply to:

1. a plan prepared for an individual property or farm enterprise; or

2. a plan prepared for an individual property which is part of a collective of properties, including an irrigation scheme, principal water supplier, or an Industry Certification Scheme.

The plan shall contain as a minimum:

1. Property or farm enterprise details

(a) Physical address

(b) Description of the ownership and name of a contact person

(c) Legal description of the land and farm identifier

2. A map(s) or aerial photograph at a scale that clearly shows:

(a) The boundaries of the property or land areas comprising the farm enterprise.

(b) The boundaries of the main land management units on the property or within the farm enterprise.

- (c) The location of permanent or intermittent rivers, streams, lakes, drains, ponds or wetlands.
 - (d) The location of riparian vegetation and fences adjacent to water bodies.
 - (e) The location on all waterways where stock access or crossings occurs.
 - (f) The location of any areas within or adjoining the property that are identified in a District Plan as "significant indigenous biodiversity".
3. A list of all Marlborough District Council resource consents held for the property or farm enterprise.
4. An assessment of the adverse environmental effects and risks associated with the farming activities and how the identified effects and risks will be managed, including irrigation, application of nutrients, effluent application, stock exclusion from waterways, offal pits and farm rubbish pits.
5. A description of how each of the following objectives will, where relevant, be met.
- (a) Nutrient management: To provide for sustainable production while minimising nutrient losses to water
 - (b) Irrigation management: To operate irrigation systems efficiently and ensuring that the actual use of water is monitored and is efficient.
 - (c) Soils management: To maintain or improve the physical and biological condition of the soils in order to minimise the movement of sediment, phosphorus and other contaminants to waterways.
 - (d) Collected animal effluent management: To manage the risks associated with the operation of effluent systems are compliant 365 days of the year.
 - (e) Livestock management: To manage wetlands and water bodies so that livestock are excluded as far as practicable from water, to avoid damage to the bed and margins of a waterbody, and to avoid the direct input of nutrients, sediment, and microbial pathogens.
 - (f) Offal pits: To manage the numbers and locations of pits to minimise risks to health and water quality.

The plan shall include for each objective in 5 above:

- (a) detail commensurate with the scale of the environmental effects and risks;
- (b) defined measurable targets that clearly set a pathway and timeframe for achievement;
- (c) a description of the good management practices together with actions required;
- (d) the records required to be kept for measuring performance and achievement of the target.

Part C - Farming Information

Information to inform development of the Farm Management Plan includes the following:

1. Information detailing:

- (a) The site area to which the farming activity relates;
- (b) Monthly stocking rates (numbers, types and classes) including breakdown by stock class;
- (c) Annual yield of arable or horticultural produce;
- (d) A description of the farm management practices used on each block including:
 - (i) Ground cover - pasture, crops, fodder crops, non-grazed areas (including forestry, riparian and tree areas) and any crop rotation;
 - (ii) Stock management - lambing/calving/fawning dates and percentages, any purchases and sales and associated dates, types and age of stock;
 - (iii) Fertiliser application - types and quantities per hectare for each identified block, taking into account any crop rotation;
 - (iv) Quantities of introduced or exported feed;
- (e) Farm animal effluent, pig farm effluent, feed pad and stand-off pad effluent management including:
 - (i) Area of land used for effluent application;
 - (ii) Annual nitrogen loading rate and nitrogen load rate per application;
 - (iii) Instantaneous application rate;
- (f) Irrigation - areas, rates, monthly volumes and system type.

This information is to be collected for the period 1 July to 30 June.

100	East Bay Conservation Society	28	Volume 3	Appendix 1 Landscape Schedule of Values		Support
Decision Requested	EBCS requests that The outer sounds Landscape is used to reassess the whole of East bay as ONFL					
100	East Bay Conservation Society	29	Volume 3	Appendix 1 Landscape Schedule of Values		Support
Decision Requested	The limited number of modifications in East Bay compared with the values that remain reinforce how important it is to ensure these values are protected for future generations and not further degraded.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
100	East Bay Conservation Society	30	Volume 3	Appendix 1 Landscape Schedule of Values		Support
Decision Requested	<p>No Change.</p> <p>However EBCS requests that MDC take these values into account when assessing the Natural Character and Features and Landscapes of East Bay</p>					
218	Salvador Delgado Oro Laprida	3	Volume 3	Appendix 1 Landscape Schedule of Values		Support in Part
Decision Requested	<p>For each area where there is an existing salmon farm may include an express statement to the following effect (following the approach in the proposed Auckland Unitary Plan at Chapter L, Schedule 7): "Some bays contain existing salmon farms, but this does not compromise [relevant area's name] current natural values."</p>					
261	Lynette and Kevin Oldham	7	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose
Decision Requested	<ol style="list-style-type: none"> 1. Move the seaward facing slopes of Arapawa Island into the Exposed Eastern Coastline assessment unit and re-asses Northern Arapawa landscape values 2. Remove proposed ONFL classifications in MEP Volume 4 from the areas on the southern and eastern slopes of East Bay covering from the waters edge to the ridgeline and from Manawa Point through to Matiere Point 3. Amend Section 32 Report 7 and supporting documents accordingly, and. 4. Remove the comment "The waters around East Bay have nationally significant ecological values, particularly for Hector's dolphin." from the Boffa Miskell report <i>Marlborough Landscape Study 2015. Landscape Characterisation and Evaluation.</i> 5. Retain the exclusion of the waters of East Bay from the ONFL classification

Decision Requested	<p>Appendix 1 #21 - Te Parinui o Whiti/White Bluffs ONF</p> <p>Inclusion of White Bluffs in coastal access priorities.</p>					
401	Aquaculture New Zealand	244	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	The entirety of Appendix 1 needs to be re-written, so that it is consistent with the definition in Policy 7.1.1 and the requirement in Policy 7.1.4; This potential methodological flaw has resulted in incorrect mapping, meaning the landscape overlay maps should be redrafted accordingly; and Where existing marine farms are present, there should be an express statement that those farms do not affect landscape values.					
425	Federated Farmers of New Zealand	108	Volume 3	Appendix 1 Landscape Schedule of Values		Support in Part
Decision Requested	Under the section in this Appendix headed "Areas with high amenity landscape values" and the sub-section headed "B. Wairau Dry Hills Landscape", add an additional value to the list of values as follows (if Policy 7.2.2 is amended as per a separate submission) - " Farming and rural activities positively contribute to the values and attributes of the Wairau Dry Hills. "					
425	Federated Farmers of New Zealand	110	Volume 3	Appendix 1 Landscape Schedule of Values		Support in Part
Decision Requested	Under the section in this Appendix headed "Areas with high amenity landscape values" and the sub-section headed "A. Marlborough Sounds Coastal Landscape", add an additional value to the list of values as follows - " Farming and rural activities positively contribute to the values and attributes of the Marlborough Sounds Coastal Landscape. "					
425	Federated Farmers of New Zealand	767	Volume 3	Appendix 1 Landscape Schedule of Values		Support in Part
Decision Requested	<ul style="list-style-type: none"> • That recognition of farm related modifications are retained in the schedule of values in Appendix 1. • That Appendix 1 is amended so that the values include the primary production activities that have actively contributed to shaping the landscape. • That the areas of high amenity value are deleted from the Appendix, and associated policies deleted from the Plan. • That the maps contained within Appendix 1 are made clearer. 					
426	Marine Farming Association Incorporated	68	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose
Decision Requested	<p>a) Amend policy 7.1.2 - by deleting the word "significant" and only using the visual catchment approach (I.e. a bay, reach or valley approach); and</p> <p>b) Delete Map 2 from Vol 3, Appendix 1 and replace with a map that reflects the visual catchment approach.</p>					
426	Marine Farming Association Incorporated	70	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	a) Add new Policy 7.1.2A - "Define boundaries of a feature as a coherent land and sea type"; and b) Map those features and describe their values in Vol 3, Appendix 1.					
426	Marine Farming Association Incorporated	73	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose
Decision Requested	Support the identification of outstanding natural landscapes (ONL), but oppose the methodology in the MEP. Delete reference to "high" amenity values; Delete "where those values are more sensitive to change"; and In relation to Policy 7.1.4(b), Appendix 1, Volume 3 tends to describe or characterise. Very few values are identified. The entirety of Appendix 1 needs to be re-written, so that it is consistent with the definition in 7.1.1. This methodological flaw has resulted in incorrect mapping.					
426	Marine Farming Association Incorporated	76	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose
Decision Requested	a) Delete Policy 7.2.3 - amenity should not be in the landscape policies chapter; and b) Delete Map 4 at Vol 3, Appendix 1, page 32.					
426	Marine Farming Association Incorporated	240	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose
Decision Requested	(a) The entirety of Appendix 1 needs to be re-written, so that it is consistent with the definition in Policy 7.1.1 and the requirement in Policy 7.1.4; (b) This potential methodological flaw has resulted in incorrect mapping, meaning the landscape overlay maps should be redrafted accordingly; and (c) Where existing marine farms are present, there should be an express statement that those farms do not affect landscape values. This reflects the approach taken in Northland, the Bay of Plenty and Auckland.					
479	Department of Conservation	268	Volume 3	Appendix 1 Landscape Schedule of Values		Support
Decision Requested	Retain as notified.

1147	Shand Enterprises Limited	6	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	In general, to weight the level of natural character of landscapes which have been highly modified by ongoing human activity as less than the level of natural character of landscapes which are pristine or only slightly modified. In particular, to amend the relevant planning map to remove the Outstanding Natural Landscape designations over the Port Ligar area objected to.					
1148	Shand Trust Partnership	6	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose
Decision Requested	In general, to weight the level of natural character of landscapes which have been highly modified by ongoing human activity as less than the level of natural character of landscapes which are pristine or only slightly modified. In particular, to amend the relevant planning map to remove the Outstanding Natural Landscape designations over the Port Ligar area objected to. Alternatively, if the Port Ligar area objected to is finally determined to be having Outstanding Natural Landscape, then to implement policies, methods and rules that equally protect all elements of natural character (including modified elements such as terrestrial and marine farming within that landscape designation, or which contribute to it) such that adverse effects on those activities contributing to natural character are avoided (or mitigated) in future in accordance with the NZCPS. In such cases it may still be appropriate to amend the designated area of Outstanding Natural Landscape boundaries.					
1150	Shellfish Marine Farms Limited	1	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose
Decision Requested	For each area where there is an existing marine farm include an express statement to the following effect (following the approach in the proposed Auckland Unitary Plan at Chapter L, Schedule 7): <i>"Some bays contain existing marine farms, but this does not compromise [relevant area's name] current natural values."</i>					
1150	Shellfish Marine Farms Limited	8	Volume 3	Appendix 1 Landscape Schedule of Values		Support in Part
Decision Requested	Retain the ONL mapping as proposed in the northeastern part of Waitata Bay; AND Remove the ONL overlay from Port Ligar; OR The MEP should expressly recognise that marine farms do not adversely impact the values that lead to that classification, by amending the values at Vol 3, Appendix 1, as per separate submission.					
1150	Shellfish Marine Farms Limited	10	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Remove the ONL overlay from the northern extreme of Tennyson Inlet; OR The MEP should expressly recognise that marine farms do not adversely impact the values that lead to that classification, by amending the values at Vol 3, Appendix 1, as per separate submission.					
1154	Sounds Fun Mussel Company	4	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose
Decision Requested	Remove outstanding natural feature and landscape overlay from the vicinity of marine farm 8346 in Yncyca Bay; or record that aquaculture will not affect the relevant values.					
1156	Southern Crown Limited	6	Volume 3	Appendix 1 Landscape Schedule of Values		Oppose
Decision Requested	Remove outstanding natural feature and landscape overlay from the vicinity of marine farm 8108 in Forsyth Bay, Pelorus Sound; or record that aquaculture will not affect the relevant values.

Decision Requested	Remove outstanding natural feature and landscape overlay from the vicinity of marine farms 8431, 8436 and 8448 in Port Underwood; or record that aquaculture will not affect the relevant values.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
100	East Bay Conservation Society	31	Volume 3	Appendix 2 Coastal Natural Character Schedule of Values		Support in Part
Decision Requested	Remove the exclude areas of East Bay or bubble zone the marine farms to prevent even more subdivision of the marine environment further degrading the outstanding natural character of East bay					
218	Salvador Delgado Oro Laprida	4	Volume 3	Appendix 2 Coastal Natural Character Schedule of Values		Support in Part
Decision Requested	For each area where there is an existing salmon farm, include an express statement to the following effect (following the approach in the proposed Auckland Unitary Plan at Chapter L, Schedule 8): "Although salmon farms occupy part of the [area], they do not compromise the overall 'naturalness' of the coastal environment".					
218	Salvador Delgado Oro Laprida	6	Volume 3	Appendix 2 Coastal Natural Character Schedule of Values		Oppose
Decision Requested	I propouse to remove the natural character overlay from Ruakaka & Otanerau Bays and the natural character of Tory Channel should be accurately mapped; The MEP should expressly recognise that salmon farms do not adversely impact the values that lead to that classification, by amending the values at Vol 3, Appendix 2.					
261	Lynette and Kevin Oldham	5	Volume 3	Appendix 2 Coastal Natural Character Schedule of Values		Oppose
Decision Requested	<ol style="list-style-type: none"> 1. remove proposed very high natural values classification in MEP Volume 4 from the areas on the southern and eastern slopes of East Bay covering from the watersedge to the ridgeline and from Manawa Point through to Matiere Point 2. expand the zone of no ONFL classification of the southern waters of East Bay so as to be at least 500m from the outer edge of any existing marine farm 3. amend Appendix 2, Section 32 Report 6 and supporting documents accordingly. 					
291	Chris Kirk	1	Volume 3	Appendix 2 Coastal Natural Character Schedule of Values		Support in Part
Decision Requested	Change the Appendices to reflect that there ARE effects from Commercial inshore fishing. Begin dialogue with the commercial operators and request 'Code of Practice' documentation and supporting scientific studies to support the MEP 'High Remote Values' status.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
401	Aquaculture New Zealand	245	Volume 3	Appendix 2 Coastal Natural Character Schedule of Values		Oppose
Decision Requested	<p>The entirety of Appendix 2 needs to be re-written, so that it is consistent with the definition in Policy 6.1.1 and the requirement in Policy 6.1.4;</p> <p>This potential methodological flaw has resulted in incorrect mapping, meaning the coastal natural character overlay maps should be redrafted accordingly; and</p> <p>Where existing marine farms are present, there should be an express statement that those farms do not affect natural character values.</p>					
425	Federated Farmers of New Zealand	768	Volume 3	Appendix 2 Coastal Natural Character Schedule of Values		Support in Part
Decision Requested	<ul style="list-style-type: none"> That Appendix 1 is amended so that primary production is recognised as an asset and contributor to coastal natural character, and is identified in the Appendix where it has actively shaped the landscape. That the maps contained within Appendix 1 are clarified, and show each sub area, and provided in the same detail as provided in the Boffa Miskell report. 					
426	Marine Farming Association Incorporated	241	Volume 3	Appendix 2 Coastal Natural Character Schedule of Values		Oppose
Decision Requested	<p>(a) The entirety of Appendix 2 needs to be re-written, so that it is consistent with the definition in Policy 6.1.1 and the requirement in Policy 6.1.4;</p> <p>(b) This potential methodological flaw has resulted in incorrect mapping, meaning the coastal natural character overlay maps should be redrafted accordingly; and</p> <p>(c) Where existing marine farms are present, there should be an express statement that those farms do not affect natural character values. This reflects the approach taken in Northland, the Bay of Plenty and Auckland.</p>					
468	Port Gore Group	3	Volume 3	Appendix 2 Coastal Natural Character Schedule of Values		Oppose
Decision Requested	<p>Include land on southern side of Port Gore to the sea, the ridge and eastern side of it between Puzzle Peak and Cape Lambert (and back to Hunia), the eastern side of the Alligator headland, all the waters of Waitui Bay and Port Gore except Melville Cove, all of East Bay and northern Arapawa Island as Outstanding Natural Character.</p> <p>Melville Cove should be "very high".</p>

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Amend the Appendix 6 Ecological Significance Criteria as follows and to make changes to ensure the ranking criteria capture the sub criteria values to ensure the significance of all these values are considered in determining significance using the ranking system:</p> <p><i>Ecological Significance Criteria for terrestrial, wetland and coastal <u>marine</u> environments</i></p> <p><i>1. Indigenous vegetation or habitat of indigenous fauna that is representative, typical or characteristic of the natural diversity of the relevant ecological district or <u>biogeographic</u> area. This can include degraded examples where they are some of the best remaining examples of their type, or represent all that remains of indigenous biodiversity in some areas.</i></p> <p><i>Distinctiveness</i></p> <p><i>H: The site contains any ecological feature that is unique nationally, in the region or in the ecological district or <u>biogeographic</u> area; or it contains several such features that are outstanding regionally or in the ecological district or biogeographic area.</i></p> <p><i>Size and shape</i></p> <p><i>H: The site is large in size for the region or ecological district and is compact in shape <u>or cohesive</u>.</i></p> <p><i>M: The site is moderate in size for the region or ecological district and is compact in shape <u>or cohesive</u>; or the site is relatively large but not very compact or cohesive.</i></p>					
629	Clifford Bay Marine Farms Limited	4	Volume 3	Appendix 3 Biodiversity Criteria for Significance		Oppose
Decision Requested	Remove the marine mammal site (dolphins) from the vicinity of the marine farm 8001 in Clifford Bay; or record that aquaculture will not affect the relevant values.					
648	D C Hemphill	48	Volume 3	Appendix 3 Biodiversity Criteria for Significance		Support in Part
Decision Requested	Re-format and revise. <i>(It is not clear from the Submission the specific changes sought to the Appendix)</i>					
698	Environmental Defence Society Incorporated	109	Volume 3	Appendix 3 Biodiversity Criteria for Significance		Support in Part
Decision Requested	<p>Amend Appendix 3 to read:</p> <p>Ecological Significance Criteria for terrestrial, wetland, <u>freshwater, marine</u> and coastal environments.</p> <p>The following provides explanations or guidelines for the application of ecological significance criteria in the assessment of sites.</p> <p>Rankings within each criterion are: H = High; M = Medium; L = Low. They collectively contribute to an overall ranking, indicating the degree of significance. For a site to be considered significant, one of the first four criteria (representativeness, rarity, diversity and pattern or distinctiveness) must rank M or H.</p>					

The scale at which significance is to be determined depends on the type of environment:

a. Terrestrial environment: the scale of assessment is at the ecological district level. [MDC: Insert an explanation of ecological district].

b. Marine environment: the scale of assessment is at the coastal biographic region level. This a region that is defined and classified according to visible ecological patterns and the physical characteristics or a geographic or hydrographic area. New Zealand's coastal biographic regions have been identified and mapped by the Ministry for the Environment. Marlborough falls within the South Cook Strait Region.

c. Freshwater environment: [MDC: Insert assessment classification scale]

Representativeness

1. Indigenous vegetation or habitat of indigenous fauna that is representative, typical or characteristic of the natural diversity of the relevant ecological district, **coastal biographic region or freshwater environment**. This can include degraded examples where they are some of the best remaining examples of their type, or represent all that remains of indigenous biodiversity in some areas.
2. Indigenous vegetation or habitat of indigenous fauna that is a relatively large example of its type within the relevant ecological district, **coastal biographic region or freshwater environment**.
3. Additionally for the coastal marine area the site is significant if it contains biological features (habitat, species, community) that represent a good example within the biogeographic area.

H: The site contains one of the best examples of the characteristic ecosystem types in the region or ecological district or **coastal** biogeographic **area region or freshwater environment for sites within the coastal marine area**.

M: The site contains one of the better examples, but not the best, of the characteristic ecosystem types in the region or ecological district or **coastal** biogeographic **area region or freshwater environment for sites within the coastal marine area**.

L: The site contains an example, but not one of the better or best, of the characteristic ecosystem types in the region or ecological district or **coastal**

biogeographic **area region or freshwater environment** for sites within the coastal marine area.

Rarity

4. Indigenous vegetation or habitat of indigenous fauna that has been reduced to less than 20% of its former extent in Marlborough, or relevant ~~land-~~**environment**, ecological district or **coastal biogeographic region**, or freshwater environment.

5. Indigenous vegetation or habitat of indigenous fauna that supports an indigenous species that is threatened, at risk, or uncommon, nationally or within the relevant ecological district or **coastal** biogeographic **area region, or freshwater environment** ~~for sites within the coastal marine area~~.

6. The site contains indigenous vegetation or an indigenous species that is endemic to Marlborough or that are at distributional limits within Marlborough.

H: The site contains nationally threatened or rare flora, fauna or communities; or the site contains several examples of regionally or locally threatened or rare flora, fauna or communities.

M: The site contains one or a few regionally or locally (but not nationally) threatened or rare flora, fauna or communities.

L: The site is not known to contain flora, fauna or communities that are threatened or rare in the ecological district or **coastal** biogeographic **area region or freshwater environment**, regionally or nationally.

Diversity and pattern

7. Indigenous vegetation or habitat of indigenous fauna that contains a high diversity of indigenous ecosystem or habitat types, indigenous taxa, or has changes in species composition reflecting the existence of diverse natural features or ecological gradients.

H: The site contains an unusually high diversity of species and ecosystem types.

M: The site contains a moderate diversity of species and ecosystem types.

L: The site contains a relatively low diversity of species and ecosystem types.

Distinctiveness

8. Indigenous vegetation or an association of indigenous species that is distinctive, of restricted occurrence, occurs within an originally rare ecosystem, or has developed as a result of an unusual environmental factor or combinations of factors.

H: The site contains any ecological feature that is unique nationally, in the region or in the ecological district **or coastal biogeographic region or freshwater environment**; or it contains several such features that are outstanding regionally or in the ecological district or **coastal** biogeographic **area region or freshwater environment**.

M: The site contains ecological features that are notable or unusual but not outstanding or unique nationally, in the region or in the ecological district or **coastal** biogeographic **region or freshwater environment area**.

L: The site contains no ecological features that are outstanding or unique nationally, in the region or in the ecological district or **coastal** biogeographic **area region or freshwater environment**; i.e. the ecological features are typical rather than distinctive or special.

Size and shape

9. The site is significant if it is moderate to large in size and is physically compact or cohesive.

H: The site is large in size for the region or ecological district **or coastal biogeographic region or freshwater environment and is compact in shape**.

M: The site is moderate in size for the region or ecological district **or coastal biogeographic region or freshwater environment and is compact in shape; or the site is relatively large but not very compact or cohesive**.

L: The site is small in size for the region or ecological district, **or coastal biogeographic region or freshwater environment or the site is moderate in size but not at all compact or cohesive**.

Connectivity/ecological context

10. ~~1~~Vegetation or habitat of indigenous fauna that provides or contributes to an important ecological linkage or network, or provides an important buffering function.
11. A wetland which plays an important hydrological, biological or ecological role in the natural functioning of a river or coastal system.
12. Indigenous vegetation or habitat of indigenous fauna that provides important habitat (including refuges from predation, or key habitat for feeding, breeding, or resting) for indigenous species, either seasonally or permanently.

H: The site is close or well connected to a large natural area or several other natural areas.

M: The site is in the vicinity of other natural areas but only partially connected to them or at an appreciable distance.

L: The site is very isolated from other natural areas.

Sustainability

13. The site is significant if it is ecologically resilient, i.e. its natural ecological integrity and processes (functioning) are largely self-sustaining.

H: The site can maintain its ecological integrity and processes with minimal human assistance.

M: The site requires some but not much human assistance to maintain its ecological integrity and processes.

L: The site requires much human assistance to maintain its ecological integrity and processes.

Adjacent catchment modification in respect of significant sites within the coastal marine area

14. Catchments that drain large tracts of land can lead to high sediment loading into adjacent marine areas. A site in the coastal marine area is significant if the adjacent catchment is >400 ha and clad in relatively mature native vegetative cover resulting in a long term stable environment with markedly reduced sediment and contaminant run-off compared to developed or modified catchments.

H: The site is dominated by an adjacent land catchment area with stable and relatively mature native vegetation (>400ha) that is legally protected.

M: The site is dominated by an adjacent land catchment area with stable and relatively mature native vegetation (>400ha) with partial or no legal protection.

L: The site is surrounded by an adjacent land catchment area (>400ha) that is farmed, highly modified or has limited relatively mature vegetative cover.

715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	427	Volume 3	Appendix 3 Biodiversity Criteria for Significance		Support in Part
Decision Requested	Add the Wairau Dry Hills landscape and the Wairau River as Outstanding landscapes					
716	Friends of Nelson Haven and Tasman Bay Incorporated	212	Volume 3	Appendix 3 Biodiversity Criteria for Significance		Oppose
Decision Requested	That the following criteria (bold) is added under the heading <i>Diversity and pattern</i> (page App 3-2): <i>The site is an important feeding area for indigenous species.</i>					
401	Aquaculture New Zealand	248	Volume 3	Appendix 4 Determining Significant Adverse Effects		Oppose
Decision Requested	Delete Appendix 4; or Use appropriate quantitative measure to define significance.

425	Federated Farmers of New Zealand	772	Volume 3	Appendix 5 Water Resource Unit Values and Water Quality Classification Standards		Support in Part
Decision Requested	<p>That amendments are made to the Schedule as follows (strike through and bold) -</p> <p><u>Standard/Parameter - Biological growths</u></p> <p>Interpretation of Standard/Parameter</p> <ul style="list-style-type: none"> <i>Bacterial and/or fungal slime growths must not be visible to the naked eye as obvious plumose growths or mats.</i> <i>The daily average carbonaceous BOD5 due to dissolved organic compounds (i.e. those passing a GF/C filter) must not exceed 2mg/l.</i> <i>Dissolved reactive phosphorus (DRP) must be <0.015mg/l when rivers are at < median flow.</i> <i>Dissolved inorganic nitrogen (DIN) must be <0.444mg/l when rivers are at < median flow.</i> <p><u>Standard/Parameter - Turbidity</u></p> <p>Interpretation of Standard/Parameter</p> <ul style="list-style-type: none"> <i>Turbidity must be no greater than 5.6 Nephelometric Turbidity Units when rivers are at < median flow.</i> <i>The Awatere River is excluded from this standard.</i> <p><u>Standard/Parameter - Deposited Fine Sediment (DFS) Stony Bottom Streams</u></p> <p>Delete Standard/Parameter.</p> <p><u>Standard/Parameter - Suitability for consumption by farm animals</u></p> <p>Interpretation of Standard/Parameter</p> <ul style="list-style-type: none"> <i>Water must not be rendered unsuitable for farm animals.</i> 					

- ***E.coli levels must be <1000/100mL.***

Standard Parameter - Macroinvertebrate Community Index (MCI) – Stoney Bottom Streams

Interpretation of Standard/Parameter

- *Must be >10 **80** when river flow is < median **flow**.*

Standard Parameter - Escherichia coli (E. coli)

Interpretation of Standard/Parameter

- *Between 1 November and 30 April of the following year ~~mean~~ **median** E. coli levels must be <~~126~~ **260**/100mL when rivers are at < median flow.*
- *At all other times ~~mean~~ **median** E. coli levels must be <260/100mL when rivers are at < median flow.*
- *Between 1 November and 30 April of the following year ~~maximum~~ **the 95th percentile** E. coli levels must be <~~260~~ **540**/100mL when rivers are at < median flow.*
- *~~Between 1 November and 30 April of the following year maximum E. coli levels must be <260/100mL when rivers are at < median flow.~~*

Standard Parameter - Colour or visual clarity

Interpretation of Standard/Parameter

Measurements are to be made immediately upstream of the discharge and below the discharge after reasonable mixing.

- *Hue must not be changed by more than 5 points on the Munsell scale.*
- *Turbidity must ~~be no greater~~ **not change more** than 1.5 Nephelometric Turbidity Units.*

473	Delegat Limited	69	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support
Decision Requested	Retain schedule 1. (inferred)					
475	Jamie Timms Timms (Timms Family)	9	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support
Decision Requested	Retain the provisions as proposed.					
479	Department of Conservation	272	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support
Decision Requested	Retain the zero allocations within the Schedule for specific catchments to compliment prohibited activity Rule 2.6.4.					
484	Clintondale Trust, Whyte Trustee Company Limited	73	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support in Part
Decision Requested	That the quantity allocations and water takes detailed in Schedule (1) have specifically no greater negative impact upon water availability, allocation and access than the quantities currently imposed.					
491	Peter Winston James	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Oppose
Decision Requested	<p>1. That an early warning system advises property owners restrictions are imminent and will be applied progressively.</p> <p>This will allow farmers/grape growers etc to take measures to protect the health and safety of their animals and crops.</p> <p>2. Council to provide multi well level recordings in order to achieve an accurate over view of water levels in the Northern Springs Sector.</p>					
492	Stephanie Joan and Luke Peter Radich	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Oppose
Decision Requested	The Submitters request that the property be re-categorised as falling within the Wairau Aquifer Freshwater Management Unit and that the boundary be adjusted accordingly.					
509	Nelson Marlborough Fish and Game	13	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Clarify the relationship between water resource availability and the allocation limits set to ensure that limits set are actually within a realistic standard and align with the requirements of the draft National Environmental Standard on Flow Setting (2008). Introduce new objectives, policies, and rules to underpin freshwater management, environmental flow and level setting, and surface and groundwater allocation in the Marlborough Region.					
509	Nelson Marlborough Fish and Game	369	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support in Part
Decision Requested	All waterbodies in the Region need to be within a defined and/or described Freshwater Management Unit. The Plan needs to be amended to ensure that there are no FMU's that are not specifically defined on either the Freshwater Management Unit Maps or described in the Schedules or both to ensure that the NPSFM is appropriately given effect to.					
509	Nelson Marlborough Fish and Game	370	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support in Part
Decision Requested	Fish and Game seek to ensure that all minimum flows and allocation volumes are measured at the same point(s) in each Freshwater Management Unit and Water Resource Unit.					
509	Nelson Marlborough Fish and Game	372	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support in Part
Decision Requested	Fish and Game seek to amend Appendix 6 for each FMU so that it clearly identifies which monitoring site or sites are used and what allocation limit applies to each FMU to ensure that the relationship of allocations between rivers and their tributaries is clear, and the relationship between the allocations of different tributaries are clear.					
509	Nelson Marlborough Fish and Game	373	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support in Part
Decision Requested	Provide further explanation over the intended application of allocation limits in Schedule 1 of Appendix 6.					
509	Nelson Marlborough Fish and Game	374	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend quantity allocations for water takes as follows: For Freshwater Management Units dominated by streams and rivers with flows less than or equal to 5m ³ /s, an allocation limit of 30% of MALF as calculated by the Council or the total allocation from the catchment, less any resource consents surrendered, lapsed, cancelled or not replaced. For Freshwater Management Units dominated by streams and rivers with mean flows greater than 5m ³ /s, an allocation limit of 50% of MALF as calculated by the Council or the total allocation from the catchment, less any resource consents surrendered, lapsed, cancelled or not replaced or where studies indicate a higher or lower (than that proposed in the NES) percentage allocation is necessary to preserve values, this should instead be adopted. For Freshwater Management Units dominated by shallow, coastal aquifers, an allocation limit of 15% of the average annual recharge as calculated by the Council or the total allocation from the catchment, less any resource consents surrendered, lapsed, cancelled or not replaced. For Freshwater Management Units dominated by other aquifers, an allocation limit of 35% of the average annual recharge as calculated by the Council or the total allocation from the catchment, less any resource consents surrendered, lapsed, cancelled or not replaced.					
509	Nelson Marlborough Fish and Game	375	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support in Part
Decision Requested	Fish and Game seek, as an alternative allocation mechanism, flow sharing between the river and out of stream uses ensuring that 20% of the instantaneous flow is allocated at any one time or one for one flow sharing and applied to all Freshwater Management Units.					
509	Nelson Marlborough Fish and Game	376	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support in Part
Decision Requested	Amend Schedule 1 of Appendix 6 to include instantaneous rate of take for all allocations rather than using a volume-based method for allocation.					
509	Nelson Marlborough Fish and Game	377	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Support in Part
Decision Requested	Awaterere Freshwater Management Unit Reduce allocation limits to ensure a total allocation of no greater than 30% of MALF.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
509	Nelson Marlborough Fish and Game	378	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Oppose
Decision Requested	Kaituna Freshwater Management Unit Remove the additional proposed 8,640m ³ /day Class B allocation in the Kaituna FMU. Remove controlled short-term irrigation consents from the allocation limits for Class A in the Kaituna FMU to reduce the Class A allocation to no greater than 20% of MALF.					
509	Nelson Marlborough Fish and Game	379	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Oppose
Decision Requested	Opouri Freshwater Management Unit MALF data is required for this FMU. Remove the additional proposed 17,280m ³ /day Class B allocation in the Opouri FMU and replace the flows with a minimum flow of 80% of MALF.					
509	Nelson Marlborough Fish and Game	380	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Oppose
Decision Requested	Pelorus (Lower) freshwater Management Unit MALF data required for this FMU. Remove temporary (emergency) water permits from the allocation limits for Class A in the Pelorus (Lower) FMU to reduce it to less than 20% of MALF. Remove the additional proposed 45,000m ³ /day Class B allocation in the Pelorus (Lower) FMU.					
509	Nelson Marlborough Fish and Game	381	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Oppose
Decision Requested	Amend the allocation volume to align with the draft NES to reduce it to less than 30% of MALF. Remove controlled short-term irrigation consents from the allocation limits for Class A in the Rai FMU.					
509	Nelson Marlborough Fish and Game	382	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 1	Oppose

Decision Requested	Retain Appendix 6 - Schedule 2.					
3	Nicola Wood	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p>The decision I seek from council is:</p> <p>Identify the A and B class of water consent in MEP Vol 3 Appendix 6 for Southern Springs recognising the obligations associated with those currently on A class water and remove the restrictions for A Class consent holders associated with the limits the MEP is introducing.</p> <p>Continue to manage the A class right as best practice for the vineyard volume of water, as was implemented with us recently when we renewed our consent, with the release of water historically unused. This water should not be reallocated but used to boost the water in the Southern Springs aquifer benefiting those on B class restrictions. Because this was historically the case, any reallocation of this water will result in a net increase of water use and subsequently negatively impact on the volume of water measured in Southern Springs.</p> <p>Cancel all consents transferring water out of the Southern Springs areas. Any ongoing MDC support of these activities, while limiting those within this area, is highly questionable.</p> <p>Remove the immediate implementation effect of restrictions for A Class consent holders as identified in Vol 2 Chap 2.</p>					
91	Marlborough District Council	257	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Support in Part
Decision Requested	<p>Amend the table row for the Taylor River FMU in Schedule 3 of Appendix 6 as follows (strike through and bold) -</p> <p>Class column "A"; Minimum Flow column - "Minimum of 1.000m3/s at Hutcheson Street"; Monitoring Site column "Hutcheson Street"; Management Flow column "Minimum of Fully restricted below 1.000m3/s".</p> <p>Class column "C"; Minimum Flow column - "Minimum of 0.300m3/s at Borough Weir"; Monitoring Site column "Borough Weir"; Management Flow column "Fully restricted below 0.300m3/s".</p>

Decision Requested	Remove the 100% blanket cut off to Spring Creek sector water users.					
169	Grapelands Marl Limited	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	We are asking for water decisions to be based on sound science and be fairly applied to all Wairau aquifer permit holders.					
171	Christopher and Philippa Vickers	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	We oppose the changes as put forward by the council					
173	Thymebank	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	We are asking fro the Council to remove the Appendix 6 clause proposing water cut offs to the Springs area in the Wairau Catchment. We are asking that any water decisions are made based on sound science, take into account the impact all users/permit holders have on the Wairau catchment. I would also ask that the Council consider the current allocations of water permit holders have been given and concession or dispensation be made for those that have a very small take in comparison to other users, or those that already operate in a manner that maximises efficiency and minimises water need.					
174	Palmer Vineyards Ltd	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	Remove the limits for the Northern, Central and Urban Springs from Appendix 6 (inferred).					
175	Welton Vineyards Ltd	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	Remove the limits for the Northern, Central and Urban Springs from Appendix 6 (inferred).					
176	Stembridge Vineyards Limited	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	Remove the 100% blanket cut-off to Springs sector water users. Before implementing a blanket restriction further scientific evidence of the complex aquifer/springs recharge process is required. A better understanding of the long term trend of the aquifer levels is essential before setting lower limits and cut-off thresholds.					
202	Giesen Wines	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	Remove the provisions until proper consultation, assessment of the impact and explanation of the change has been made.					
204	Stephen and Kristen Dempster	2	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	To implement a graduated restriction system to avoid the cut off level being reached. To have this as a condition of all new and renewed water permits					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
206	Melynda Bentley	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p><i>Decision Requested</i></p> <p>We would like to see accurate and reliable data and evidence that support these proposed guidelines. A public meeting for all those concerned.</p> <p>Remove the 100% blanket cut-off to Springs sector water users.</p> <p>Treat all Wairau Aquifer groundwater users equally and consider implementing a rationing restriction when the monitor wells drop below a set level. This would give all Wairau Aquifer groundwater users the opportunity to prioritise where their reduced volume of allocated water is utilised.</p>					
209	O'Dwyers Farm Partnership Jones	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p>Our request is that common sense prevails with the removal of the 100% blanket cut off to springs sector water users.</p>					
212	O'Dwyers Farm Partnership Jones	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p>Our request is that common sense prevails with the removal of the 100% blanket cut off to springs sector water users.</p>					
213	Christopher Vickers	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p>I wish the proposed provision to be deleted.</p> <p>This idea could usefully be discussed by all affected land owners.</p>					
223	Alistair Sutherland	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p>Remove the limits for taking water from the Northern Springs Sector (inferred).</p>					
226	Murphy Horticulture	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Remove the 100% blanket cut-off to Springs sector water users. There are significantly better options available to protect water than a 100% cut-off. Nelson has a significantly better system that includes stepped reductions in water use rather than the sledge hammer approach of 100% cut-off. This would allow the people of Marlborough to manage their water use in times of drought to ensure their businesses can survive</p> <p>Water users west of the 3 proposed areas use significantly more water per hectare than the 3 proposed area's so need to be included in any water protection measures. A better understanding of how water restrictions on certain areas will affect the aquifer is needed. We also need a better understanding of long term trends of the aquifer levels before setting lower limits and cut-off thresholds.</p>					
234	Cherrybank Orchard	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p>We request more information and clarity around scientific and historical data before a decision is made.</p>					
249	James Jones	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p>Remove the 100% blanket cut-off to Springs sector water users based on the minimum well levels.</p> <p>Treat all Wairau Aquifer groundwater users equally and consider implementing a rationing restriction (example - restricted all Wairau Aquifer groundwater users to 50% allocation when the monitor wells drop below the set level). This would give all Wairau Aquifer groundwater users the opportunity to prioritise where their reduced volume of allocated water is utilised and help maintain minimum flow levels in Springs.</p> <p>Before implementing a blanket restriction further information and knowledge is required of the complex aquifer/springs recharge process. A better understanding of the long term trend of the Wairau Aquifer levels is essential before setting lower limits and cut-off thresholds.</p>					
253	James Collett	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That all Wairau River surface water takes are considered equal (both below and above The Narrows) and therefore have the same minimum flow level cut off of 8m ³ /s at Barnett's Bank. This is effectively the current situation, however it is noted that a portion of consents do have a condition relating to the Wash bridge flow which has never been implemented. With the current management flow of 8m ³ /s for full restriction for all Wairau River users, it has shown that there are no adverse effects on instream values. Whereas any changes will have a significant negative economic and social impact on those consent holders currently above The Narrows.					
254	Scott MacKenzie	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Support in Part

271	Caythorpe Trustees Ltd	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p>Remove the 100% blanket cut-off to Springs sector water users.</p> <p>Before implementing a blanket restriction further scientific evidence of the complex aquifer/springs recharge process is required. A better understanding of the long term trend of the aquifer levels is essential before setting lower limits and cut-off thresholds.</p>					
275	Myra Sandall	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	Restricted water use rather than total ban.					
288	Mike Croad	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	Remove cut off for Springs Area (inferred).					
288	Mike Croad	2	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Support
Decision Requested	Support in favour of current cut off flows in the Awatere and Wairau Rivers.					
295	Caythorpe Farm Ltd	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p>Remove the 100% Blanket Cut-off to Southern Springs sector water users.</p> <p>We propose that the Blanket trigger level/flow of surface water of 0.010m³ at Batty's Road Bridge for the whole of the Southern Springs is unjustified. Instead if a surface water trigger flow/level must be imposed, then it should be graduated, i.e. 0.010m³ trigger for wells within 500m of Doctors Creek, and a lesser level for those wells outside 500m of Doctors Creek.</p>					
296	Kilravock Trust - Vineyards	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	Reconsider minimum flow levels that are set outside of subject aquifers, more information and data required.

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Delete the Management Flow of 7.320m ³ /s for the Wairau River Freshwater Management Unit (above The Narrows) monitored at Dip Flat from the Schedule.					
315	Nicholas Winter	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Support in Part
Decision Requested	Decision Requested That all Wairau River surface water takes are considered equal(both below and above The Narrows) and therefore have the same minimum flow level cut off of 8m ³ /s at Barnett's Bank. This is effectively the current situation, however it is noted that a portion of consents do have a condition relating to the Wash bridge flow which has never been implemented. With the current management flow of 8m ³ /s for full restriction for all Wairau River users, it has shown that there are no adverse effects on instream values. Whereas any changes will have a significant negative economic and social impact on those consent holders currently above The Narrows.					
341	Neylon Vineyards	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	Reject the proposal in its entirety. Until MDC has produced scientific evidence to support their proposal and demonstrate a fair policy on restrictions.

992	New Zealand Defence Force	99	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Support in Part
Decision Requested	<p>This table requires further investigation and review to confirm the content is correct.</p> <p>NZDF has assumed that "fully restricted" means all water takes are stopped. NZDF suggests that instead, rationing occurs when the Tyntesfield Gorge is below 0.067m³/s (67L/s), rather than restrictions being placed at this level.</p> <p>NZDF is happy to discuss these matters with Council prior to a hearing.</p>					
1124	Steve MacKenzie	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Support in Part
Decision Requested	<p>Retain the flow restriction on Class A water for the Wairau River (above the narrows) FMU to be fully restricted at 8m³/s according to the Barnetts Bank monitoring site, and delete the restriction at Dip Flat for class A water in the same FMU.</p>					
1142	Save the Wairau River Incorporated	7	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p>In the absence of sound scientific assessment and flow modelling the Council follow the NES guidelines in setting minimum flows. For the Wairau River we seek the adoption of the Cawthron Report as the priority.</p>					
1159	Spring Creek Vintners	3	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	<p>That the minimum levels for aquifers be independently reviewed to demonstrate the appropriateness of such levels as they have the potential to seriously impact upon aquifer based viticulture.</p>

Decision Requested	Trustpower seeks the following relief from the Marlborough District Council: 1. Retain as notified.					
1218	Villa Maria	81	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Support in Part
Decision Requested	That the minimum levels for aquifers be independently reviewed to demonstrate the appropriateness of such levels as they have the potential to seriously impact upon aquifer based viticulture.					
1231	Waihopai Valley Vineyards Limited	2	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Support
Decision Requested	Retain provision as proposed.					
1248	James Simon Fowler	2	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Support
Decision Requested	Retain provisions as proposed.					
1267	Patrick Clifford	1	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 3	Oppose
Decision Requested	We are not asking for an increase or an unreasonable amount of water to operate, we are asking for it to continue to be available when we, and others in the area need it. We are asking for any water decisions to be based on sound science and applied fairly to all Wairau Aquifer permit holders.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
509	Nelson Marlborough Fish and Game	404	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 4	Support in Part
Decision Requested	<p>Branch River</p> <p>Fish and Game seek higher minimum and management flow levels for the Branch River. Currently the minimum flow is 0.700m³/s at State Highway 63 Road Bridge and Management flows – fully restricted below 1.200m³/s . These flows are insufficient to support fish passage and therefore need to be increased to retain 80% of naturalised MALF7. Fish and Game support the monitoring location at the State highway bridge.</p>					
1201	Trustpower Limited	164	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 4	Oppose
Decision Requested	<p>Trustpower seeks the following relief from the Marlborough District Council:</p> <p>1. Amend the table as follows: <i>"0.700 m³/s at State Highway Road Bridge 1.2 m³/s at the Branch Weir."</i></p>					
268	Chris Kirk	2	Volume 3	Appendix 6 Environmental Flows and Levels	Schedule 5	Support in Part
Decision Requested	<p>Retain the proposed conductivity levels for water takes, but also add a conductivity level for the Rarangi Shallow Aquifer North (inferred).</p>

504	Queen Charlotte Sound Residents Association	28	Volume 3	Appendix 22 Commercial Forestry Harvest Plan		Oppose
Decision Requested	<p>That a compulsory monitoring clause, at the applicants cost, should be introduced <i>(inferred)</i>.</p>					
504	Queen Charlotte Sound Residents Association	93	Volume 3	Appendix 22 Commercial Forestry Harvest Plan		Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Within the area of the Marlborough Sounds compulsory monitoring, by independent approved persons shall at the applicants cost at a period of 1 and then 5 years after each harvesting stage be a condition of any consent granted. Major issues re sedimentation as per the CMA, local streams and the potential for future adverse effects need to be addressed. Forestry Harvest applications should be "notified" to all potentially affected parties via a resource consent application.					
688	Judy and John Hellstrom	174	Volume 3	Appendix 22 Commercial Forestry Harvest Plan		Support
Decision Requested	Retain Appendix 22 Commercial Forestry Harvest Plan.					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	428	Volume 3	Appendix 22 Commercial Forestry Harvest Plan		Support in Part
Decision Requested	Amend to address submission					
845	Kenneth R and Sara M Roush	22	Volume 3	Appendix 22 Commercial Forestry Harvest Plan		Support in Part
Decision Requested	That the following is included in the matters that must be addressed in any Commercial Forestry Harvest Plan: <i>New point X. The method and routing to be used for transport of establishment equipment and transport of cut logs and materials.</i>					
869	Kenepuru and Central Sounds Residents Association Incorporated	34	Volume 3	Appendix 22 Commercial Forestry Harvest Plan		Support in Part
Decision Requested	Amend Appendix 22 to be clearly stated as a standard for Discretionary Commercial forestry harvesting activities and one that a Registered Forestry Consultant prepares. Amend Appendix 22 with more focus on the applicant identifying key erosion prone areas such as gully heads and a clear requirement as to how they will then be protected.					
1002	New Zealand Transport Agency	271	Volume 3	Appendix 22 Commercial Forestry Harvest Plan		Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Add new matters that must be addressed in any Commercial Forestry Harvest Plan: <u>10. The route(s) that forestry trucks will travel on the public road network.</u> <u>11. The expected number of daily truck movements to and from the forestry site over the duration of the harvesting operation.</u> <u>12. A road surface monitoring and reinstatement plan that demonstrates how any damage to the surface of the road carriageway resulting from the harvesting operation will be identified and remediated to the satisfaction of the road controlling authority.</u> <u>13. Evidence that the Commercial Forestry Harvest Plan has been developed in consultation with the New Zealand Transport Agency and the Council.</u>					
1042	Port Underwood Association	21	Volume 3	Appendix 22 Commercial Forestry Harvest Plan		Support in Part
Decision Requested	Add additional point to Commercial Forestry Harvest Plan: <u>10. The method and route to be used to convey forest development and maintenance equipment, and the transport of harvested logs from the boundary of the forest to the location of processing or disposal, including provisions for the protection of wider community amenity values and the integrity of the roading network.</u>					
1140	Sanford Limited	32	Volume 3	Appendix 22 Commercial Forestry Harvest Plan		Support in Part
Decision Requested	Amend point 5 to include the Location map of CMA to include the presence of marine farms downstream of the planting.					
1198	Transpower New Zealand Limited	165	Volume 3	Appendix 22 Commercial Forestry Harvest Plan		Support in Part
Decision Requested	Amend Appendix 22 'Commercial Forestry Harvest Plan' to include the following: <u>"x. When harvesting in the vicinity of a National Grid transmission line, the methods to be used to ensure the operation of the National Grid is not compromised and compliance with NZECP 34:2001 is achieved at all times."</u>					
1201	Trustpower Limited	152	Volume 3	Appendix 22 Commercial Forestry Harvest Plan		Support
Decision Requested	Trustpower seeks the following relief from the Marlborough District Council: 1. Retain Appendix 22 as notified in the PMEP.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
255	Warwick Lissaman	23	Volume 3	Appendix 24 Worker Accommodation Exclusion Area		Oppose

Decision Requested	Remove natural feature and landscape overlay from the vicinity of the farms or bays listed above; or record that aquaculture will not affect the relevant values. Note that no list has been provided in the submission other than reference to Landscape maps. ?					
578	Pinder Family Trust	51	Volume 4	Overlay Maps		Support
Decision Requested	Retain Ecologically Significant Marine Sites Overlays.					
716	Friends of Nelson Haven and Tasman Bay Incorporated	202	Volume 4	Overlay Maps		Oppose
Decision Requested	<p>Coastal Natural Character, general That the colour palette is changed to more clearly show the coastal marine area boundary.</p> <p>Coastal Natural Character That the MEP is amended to appropriately address the criticisms and recommendations of Dr Steven for a more valid and robust ranking template.</p> <p>The submission includes three figures that identify additional areas to be expanded for:</p> <ul style="list-style-type: none"> • Coastal Marine Areas Natural Character Rating (page 42), • Coastal Marine Areas of Outstanding Natural Character Rating (page 43) and • Outstanding Natural Features and Landscapes of the Marlborough Sounds (page 44). 					
716	Friends of Nelson Haven and Tasman Bay Incorporated	205	Volume 4	Overlay Maps		Oppose
Decision Requested	That the criticisms and recommendations of Dr Steven be fully recognised and that the MEP is amended accordingly. If analysis is retained, extent of the outstanding natural feature and landscape overlay to be increased and extension of ONL seascape to be at least 750m from MHWM.					
752	Guardians of the Sounds	52	Volume 4	Overlay Maps		Support
Decision Requested	Retain Ecologically Significant Marine Sites Overlays.					
808	Kroon, Hanneke and Jansen, Joop	5	Volume 4	Overlay Maps		Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p data-bbox="170 193 499 225">Marlborough Sounds areas.</p> <ol data-bbox="170 225 2032 975" style="list-style-type: none"> <li data-bbox="170 225 2032 288">1. We submit that the Landscape overlays cannot be evaluated without the notified coastal marine farming provisions and marine farming zoning maps for coastal Marlborough. <li data-bbox="170 312 2032 408">2. We submit that as part of the submission process for the Coastal Marine Farming Provisions and Zoning Maps after their notification, another round of submissions has to be allowed for all related parts of the MEP, such as Chapter 6 Natural Character, Chapter 7 Landscape, Chapter 8 Biodiversity and Chapter 13 Use of the Coastal Environment. The whole MEP is interrelated and one part cannot be considered in isolation. <li data-bbox="170 432 2032 496">3. We submit that large areas of the Marlborough Sounds are zoned as Outstanding Natural Feature, which is clearly done to avoid having to include the adjacent seascape. This is not in keeping with the definitions of Outstanding Natural Landscape and Outstanding Natural Feature. <li data-bbox="170 520 2032 616">4. We submit that the landscape classification of the Outstanding Natural Features in the Marlborough Sounds should be reviewed. Many of these ONF areas should be classified as Outstanding Natural Landscape and thus include the Seascape that is left out in most places in the Inner Sounds and some locations of the Outer Sounds. <li data-bbox="170 639 2032 679">5. We submit that the anomalies where a "not ONL water hole" is surrounded by ONFL land or sea area should be reviewed and changed to ONL. <li data-bbox="170 703 2032 863">6. We submit that more importance should be given to the presence of ecologically significant marine sites in the classification of an area as a ONF as opposed to ONL, as they should also be protected according to the NZ CPS. A seascape is not only the watersurface. Descriptions are: "Landscapes with views of the coast or seas, and coasts and the adjacent marine environment" (Landscape Institute/ IEMA 2013, pl 7) and "An area of sea, coastline and land, as perceived by people, whose character results from the actions and interactions of land with sea, by natural and/ or human factors" (Natural England 2012, p8). <li data-bbox="170 887 2032 959">7. As a final conclusion we submit that the Outstanding Natural Features and Landscape (including seascape) identification done for the Marlborough Sounds is falling short of what is expected by NZCPS Policy 15 (d) and should be redone completely. <p data-bbox="170 991 569 1023">Crail Bay and the Central Pelorus.</p> <ol data-bbox="170 1023 2032 1262" style="list-style-type: none"> <li data-bbox="170 1023 2032 1054">1. We submit that Bobbery Bay should be added to the ONFL overlay in the MEP including the seascape of this bay. <li data-bbox="170 1078 2032 1142">2. We submit that the little Bay Between Hopai Bay and Elie Bay should be classified as ONFL, including the seascape of this bay and added to the ONFL overlay in the MEP. <li data-bbox="170 1166 2032 1206">3. We submit that Grant Bay should keep its classification as Outstanding Natural landscape and be added to the ONFL overlay in the MEP plan as such. <li data-bbox="170 1230 2032 1262">4. We submit that the ONFL classification of Tawero Point should include the ecologically significant marine site skirting it. 					
992	New Zealand Defence Force	103	Volume 4	Overlay Maps		Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p><i>Coastal Natural Character (Maps 1-5)</i></p> <p>The 2014 Natural Character of the Marlborough Coast study does not separate characteristics from values. It uses a different set of definitions than that contained in the MEP at Policy 6.1.1. Adoption of a different methodology means that the maps contained in the MEP (derived from the 2014 Study) are inconsistent with the policy approach in the MEP. The Coastal Natural Character maps and/or the policies in the MEP need to be redrafted accordingly.</p>					
401	Aquaculture New Zealand	252	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose
Decision Requested	<p>Submit that there is insufficient justification for the seaward extent of the outstanding/very high/high natural character ratings extending so far offshore into Cook Strait.</p> <p>Redraft the Coastal Natural Character maps to show a reduction in the seaward extent of the outstanding/very high/high natural character areas.</p>					
401	Aquaculture New Zealand	257	Volume 4	Overlay Maps	Coastal Natural Character 1	Support in Part
Decision Requested	<p>Support the natural character mapping in respect of Waihinau Bay.</p> <p>Oppose the mapping of the waters of Fitzroy Bay as high natural character and the surrounding land as very high natural character.</p> <p>Amend the natural character mapping in those locations where the mapping is opposed; or</p> <p>If Fitzroy Bay rating is correct, the MEP should expressly recognise that the presence of marine farming does not affect the values that lead to that classification.</p>					
426	Marine Farming Association Incorporated	246	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose

Decision Requested	Remove natural character overlay from the vicinity of Squally Cove; or record that aquaculture will not affect the relevant values.					
1098	Sandra Ann King	1	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose
Decision Requested	Remove natural character overlay from the vicinity of marine farms 8204, 8573, 8043 and 8188; or record that aquaculture will not affect the relevant values.					
1118	Shane Gerard Thomas McCarthy	2	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Modify the plan to recongise the presence of aquaculture is the area and that there is no impact of the farms on Natural Character.					
1118	Shane Gerard Thomas McCarthy	5	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose
Decision Requested	Modify the plan to reflect the presence of aquaculture as present in the area as they are culturally and economically significant.					
1126	Shane Gerard Thomas McCarthy	2	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose
Decision Requested	Modify the plan to reflect the presence of aquaculture as they are present in the area and are culturally and economically significant.					
1140	Sanford Limited	74	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose
Decision Requested	(i) Delete the coastal Natural Characte[r] overlays from the planning maps, or (ii) amend as proposed in Part 3 of our submission (the table setting out changes to boundaries) which are relatively minor and will ensure that existing marine farms are not unnecessary incumbered.					
1140	Sanford Limited	79	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose
Decision Requested	(i) Delete the Coastal Natural Character overlays, or (ii) redraw the seaward boundary as set o[u]t in the Sanford submission, see table provided with the submission.					
1140	Sanford Limited	110	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose
Decision Requested	<p>Pelorus Sound</p> <p>- Delete the VHNC zone as it extends seaward from Kitira [Kaitira] (East Entry Point), up to Paparoa, White horse Rock and around Yellow Cliffs and Reef Point.</p> <p>Squally Cove</p> <p>- Delete the HNC around Oyster bay (both sides) and Matarau Point.</p>					

- Draw a straight [straight] line in the HNC so that it does not include the two tongues [tongues] down to the foreshore by ML's 8271, 8272, 8273.

Waitata Reach

- Delete the HNC and VHNC around that [around that] includes Horseshoe Bay, Ketu Bay and Richmond Bay etc.
- Delete HNC above Hamilton Cove.
- Delete HNC at Burnt Point including White Rock.

Forsyth [Forsyth] Bay

- Delete HNC from Duffers Reef to just below Kaitira (East Entry Point).
- Delete VHNC below Forsyth Bay and west of Anakoha Bay.

Beatrix Bay

- Delete the HNC overlay around Richmond Bay, Horseshoe Bay and Beatrix Bay - parts of which are also ONL.
- Delete the VHNC at Kauauroa Bay as no discernable [discernible] difference with surrounding landscape.

Current Basin

- Delete the VHNC so that it does not extend into Waikawa Bay (i.e. ends at Two Island Point and crosses over in a straight line to the northern tip of Malven Hill Point).

Waikawa Bay

- Delete the HNC landscapes as they extend over bays of Fitzroy.
- Delete the VHNC west of Woodlands, around Canoe Bay and Camel Point and around , west of Elaine Bay.

1147	Shand Enterprises Limited	1	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose
Decision Requested	<p>In general, to weight the level of natural character of landscapes which have been highly modified by ongoing human activity as less than the level of natural character of landscapes which are pristine or only slightly modified.</p> <p>In particular, to amend the relevant planning map to remove the High Natural Character designations over the Port Ligar area objected to.</p>					
1148	Shand Trust Partnership	1	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose
Decision Requested	<p>In general, to weight the level of natural character of landscapes which have been highly modified by ongoing human activity as less than the level of natural character of landscapes which are pristine or only slightly modified.</p> <p>In particular, to amend the relevant planning map to remove the High Natural Character designations over the Port Ligar area objected to.</p> <p>Alternatively, if the Port Ligar area objected to is finally determined to be having High Natural Character, then to implement policies, methods and rules that equally protect all elements of natural character (including modified elements such as terrestrial and marine farming within that landscape designation, or which contribute to it) such that adverse effects on those activities contributing to natural character are avoided (or mitigated) in future in accordance with the NZCPS. In such cases it may still be appropriate to amend the designated area of High Natural Character boundaries.</p>					
1150	Shellfish Marine Farms Limited	3	Volume 4	Overlay Maps	Coastal Natural Character 1	Support in Part
Decision Requested	<p>Retain the absence of a natural character overlay in Port Ligar; AND Remove the natural character overlay from the northeastern headland at the entrance to Waitata Bay; OR The MEP should expressly recognise that marine farms do not adversely impact the values that lead to that classification, by amending the values at Vol 3, Appendix 2, as per separate submission.</p>					
1152	Slade, King and King Limited and Port Gore Marine Farm Partnership	1	Volume 4	Overlay Maps	Coastal Natural Character 1	Oppose
Decision Requested	<p>That the Natural Character Maps be updated to include the missing section and affected parties be given adequate time to make a submission.</p>

Decision Requested	Modify the plan to reflect the presence of aquaculture as they are present in the area and are culturally and economically significant.					
1140	Sanford Limited	90	Volume 4	Overlay Maps	Landscapes 1	Oppose
Decision Requested	Withdraw the layer from the Plan, or amend according to the Sanford submission, refer to the table.					
1140	Sanford Limited	105	Volume 4	Overlay Maps	Landscapes 1	Oppose
Decision Requested	Pelorus Sound					

- Requested
- Delete the ONL at Waihinau Bay, Homestead Bay and Waterfall Bay around Cape Horn and down to Te Akaroa (West Entry Point).
 - Delete the ONL around Kaitira (East Entry Pint [Point]) where it is 400m from ML 8109.
 - Delete the inclusion of the water space around:
 - * Pipitawai
 - * Harding Point
 - * Paparoa
 - * Blow Hole Point.

Waitata Reach

- Delete the OND overlay on the northern side of Hamilton Cove so that it follows the bush line out to Yellow Cliffs in a straight [straight] line.

Waitata Bay including Horseshoe, Richmond and Ketu Bays

- Delete the ONL at the southern end of Kaitira (East Entry Point).

Forysth [Forsyth] Bay

- Delete the ONL at the southern end of Kaitira (East Entry Point).

Admiralty Bay

- Amend the ONL around coastal boundary [boundary] at Clayface Point so that it includes the inner bays and does not extent seaward. This appears to make no difference to the ONL and recognises ML 8014.
- Amend the boundary of the ONL in Waikawa Bay by pulling the northern boundary up to Two Island Point.

Waikawa Bay

- Delete the seaward extent of ONL in savill bay, Game Bay and pull back to MHWS.

1147	Shand Enterprises Limited	4	Volume 4	Overlay Maps	Landscapes 1	Oppose
Decision Requested	<p>In general, to weight the level of natural character of landscapes which have been highly modified by ongoing human activity as less than the level of natural character of landscapes which are pristine or only slightly modified.</p> <p>In particular, to amend the relevant planning map to remove the Outstanding Natural Landscape designations over the Port Ligar area objected to.</p>					
1148	Shand Trust Partnership	4	Volume 4	Overlay Maps	Landscapes 1	Oppose
Decision Requested	<p>In general, to weight the level of natural character of landscapes which have been highly modified by ongoing human activity as less than the level of natural character of landscapes which are pristine or only slightly modified.</p> <p>In particular, to amend the relevant planning map to remove the Outstanding Natural Landscape designations over the Port Ligar area objected to. Alternatively, if the Port Ligar area objected to is finally determined to be having Outstanding Natural Landscape, then to implement policies, methods and rules that equally protect all elements of natural character (including modified elements such as terrestrial and marine farming within that landscape designation, or which contribute to it) such that adverse effects on those activities contributing to natural character are avoided (or mitigated) in future in accordance with the NZCPS. In such cases it may still be appropriate to amend the designated area of Outstanding Natural Landscape boundaries.</p>

726	Canantor Mussels Limited and N. I Buchanan-Brown	16	Volume 4	Overlay Maps	Landscapes 4	Oppose
Decision Requested	<p>Yncyca Bay has commercial forestry and native bush within it. The area supports industry and employment within the sounds and Marlborough with forestry and tourism. It co-exists with our marine farm. Both Yncyca and Fairy Bay have housing areas with mixed density. The impacts of sewage leaching from these settlements and affecting water quality would be a great significant to our operation.</p> <p>Recently the Fairy Bay farm came up for renewal and reports were tabled showing the marine farm had negligible impact on the marine and landscape environments.</p> <p>I request that the MDC undertake a review of these areas and provide appropriate justification for their extent and definition. I specifically seek acknowledgement within the schedules to these natural character and landscape areas that my existing marine farms are not causing adverse effects.</p>

Decision Requested	<p>Pelorus Sound</p> <ul style="list-style-type: none"> - Delete the seaward extent of the ONL above (north) of Hikapu Reach and above Maori Reach. - Delete ONL at or on the Putanui Point. 					

- Amend the ONL that extends into Nydia Bay and Fairy Bay so that the seaward boundary abuts the MHWS.
- Amend the OHL at Yncyca Bay so that it is at least 500m from ML 8343 and abuts MHWS.
- Delete corner of ONL by ML 8343.
- Delete the OHL at Hopai Bay.
- Delete the OHL of Waimaru Bay.

Kenepura Sound

- Delete the OML at Gold Reef by drawing the line at the Kenepuru Road.

Squally Cove

- Amend the ONL so that it stretches from Lone Rock to Kakoho Point (west of Squally Cove).

Tawhitinui Reach

- Delete the ONL at Tawe Point
- Move the ONL boundary at Cregoe so that it follows the creek line to the west.

Waitata Reach

- Delete the ONL around Horseshoe Bay and
- Delete the so that it follows the bush line [sentence incomplete].

Waitata Bay including Horseshoe, Richmond and Ketu Bays

- Delete the ONL at Tapapa Point.

Beatrix Bay

- Delete the ONL at:

* Kauauroa Bay

* Tawhitinui Bay

* Te Purakia Point [Te Puraka Point]

* Waimaru Bay and Tuhitarata Bay by drawing the boundary below MT Kiwi.

* Tawero Point

Waikawa Bay

- Delete seaward extent of the ONL in Savill Bay, Game Bay and pull back to MHWS.

- Delete ONL from Cregoe Rock that extends in a north west line and includes ML 8203 and is 400m from ML 8301.

1186	Te Atiawa o Te Waka-a-Maui	14	Volume 4	Overlay Maps	Ecologically Significant Marine Sites 15	Support
Decision Requested	Te Atiawa seeks that there be an appropriate buffer provided around these sites within the Queen Charlotte Sound, Tory Channel, and Port Gore so that no further destruction can occur and some restoration/expansion within these sites can occur. Further, the Trustees seek preservation of customary practices and processes within these sites (specifically around Arapaoa Island).					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
401	Aquaculture New Zealand	281	Volume 4	Overlay Maps	Ecologically Significant Marine Sites 16	Support in Part
Decision Requested	<p>The MFA acknowledges the work carried out in the Davidson 2011 Significant Sites report, and does not object per se to the mapping of these sites. However, the MFA opposes the policies implemented in respect of these sites.</p> <p>The mapped sites do not apply the significance criteria in Policy 8.1.1 MEP, but adopt the Davidson 2011 criteria. The 2011 significant sites work is a regional assessment, and was not intended to mirror the approach in Policy 11 of the NZCPS. It is unclear whether the mapped sites are 11(a) or 11(b) NZCPS sites. Overall, the mapping lacks consistency with policy, and the intended outcome is unclear.</p> <p>Seek changes to Chapter 8 Policies and Appendix 3 Significance Criteria, as proposed elsewhere.</p>					
426	Marine Farming Association Incorporated	272	Volume 4	Overlay Maps	Ecologically Significant Marine Sites 16	Oppose
Decision Requested	Changes to Chapter 8 Policies and Appendix 3 Significance Criteria, as proposed elsewhere.

401	Aquaculture New Zealand	283	Volume 4	Overlay Maps	Ecologically Significant Marine Sites 18	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>The Marine Mammal (Dolphin) map is based on the Davidson 2011 Significant Sites report. The authors of that report were asked to identify regionally, rather than nationally significant sites. The 2011 report does not mirror the approach taken in Policy 11 of the NZCPS.</p> <p>Arguably only site 8.1 of Map 18 is a nationally significant site (for Hector's dolphins). However, Hector's dolphins are not necessarily seen regularly throughout the full extent of that area. Area 4.17 is not a nationally significant site, and arguably area 2.17 (Admiralty Bay) is significant habitat for Dusky dolphins (as opposed to nationally significant habitat in terms of Policy 11(a) of the NZCPS. For example, the <i>Admiralty Bay Consortium</i> Environment Court decision noted that the site was significant in terms of s6(c), rather than under NZCPS Policy 11(a)).</p> <p>An avoid policy is not, therefore, justified in respect of these sites, or at least not an area including the side bays.</p> <p>The MEP should be amended:</p> <p>So that a strict avoidance approach is not adopted in respect of these sites, consistent with the proposed changes to the policies at Chapter 8;</p> <p>To specify which species of dolphin are relevant to each of the mapped areas; and</p> <p>Maps should be updated in light of recent population research: http://www.stuff.co.nz/environment/82818673/research-shows-hectors-dolphin-population-bigger-than-previously-realised.</p>					
426	Marine Farming Association Incorporated	274	Volume 4	Overlay Maps	Ecologically Significant Marine Sites 18	Oppose
Decision Requested	<p>The MEP should be amended:</p> <p>(a) So that a strict avoidance approach is not adopted in respect of these sites, consistent with the proposed changes to the policies at Chapter 8;</p> <p>(b) To specify which species of dolphin are relevant to each of the mapped areas; and</p> <p>(c) Maps should be updated in light of recent population research: http://www.stuff.co.nz/environment/82818673/research-shows-hectors-dolphin-population-bigger-than-previously-realised.</p>

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the following amendments are made to Map 61 (map attached to submission that highlights the delineation of the township, with boundaries as described below and clearly shown with a blue line): East: The eastern extremities of those properties on the eastern side of Church Lane and directly fronting Church Lane but excluding the vineyard that goes down to the Wairau River with a frontage on the lower part of Church Lane. West: The centre of Keith Coleman Lane. South: The southernmost borders of the lifestyle properties that currently exist, as shown on the map. North: The northern boundary would include properties on Morse Street and Fishtail Vue and properties along State Highway 63 as far as Church Lane and also take in those properties on the western side of Church Lane. All the surrounding vineyards are to be excluded from being part of the township.

Decision Requested	I wish that the area shown on accompanying map (attached) be removed from this zone. Part of the area includes private land and the other part is subject to a long term lease and is highly modified agricultural land.					
1089	Rarangi District Residents Association	5	Volume 4	Zoning Maps	Zoning Map 82	Oppose
Decision Requested	That Edgewater Estate subdivision is re-zoned to Rural Living Zone (not Coastal Living Zone).					
873	KiwiRail Holdings Limited	196	Volume 4	Zoning Maps	Zoning Map 83	Oppose
Decision Requested	The Spring Creek Depot has an underlying zoning of Rural. The underlying zoning at these sites is requested to be changed to be consistent with the remainder of the rail corridor – e.g. unzoned.					
1303	A E Sadd Limited	1	Volume 4	Zoning Maps	Zoning Map 84	Oppose
Decision Requested	<p>The decision we seek from Council is:</p> <p>Remove W48 from the Proposed Marlborough Environment Plan as it has never been a significant wetland and is in fact a 'man made pond' built in the 1990's, by Mr Mahon for his birds and aviaries.</p> <p>Alter the boundary outline of W47, so that the area parallel to Stream Wharf Road (and located on our four property boundaries) is excluded from W47. We believe that this area has never been a significant wetland and is actually used as part of Council's drainage network for Grovetown.</p> <p>We have no problem with wetlands and their benefit to the environment, but creating wetlands from a Council 'desktop activity', not supported by the property owner or neighbours, is imposing unacceptable conditions and affecting what individuals can do on their own private properties. It is also trying to rewrite the history of a specific area of land and its usage.</p>					
374	Talley's Group Limited (Land Operations)	1	Volume 4	Zoning Maps	Zoning Map 85	Oppose
Decision Requested	Change the zoning of Lot 1 DP 4415 from Rural Environment Zone to Industrial Zone (<i>not stipulated if Industrial Zone 1 or Industrial Zone 2</i>).

Decision Requested	General relief sought					
	(a) That a Port Zone at Clifford Bay and related objectives, policies, methods and explanatory text is retained, in recognition of Its potential national, regional and local benefits;					
	(b) That the boundaries of the Port Zone at Clifford Bay on the Planning Maps be amended, as shown in Appendix A attached to and forming part of this submission, to reflect the smaller port concept, and that any other zoning or overlay which impedes or conflicts with the purpose of the Port Zone is removed;					
	(c) In acknowledgement of (a) above, all objectives, polices, methods and explanatory text relating to activities within the Port Zone recognise and provide for those activities to occur, to the extent appropriate, in a permissive manner;					
	(d) That the objectives, policies, methods and any explanatory texts be amended to give effect to the decisions sought in this submission (including the relief sought in the table annexed as Appendix B and forming part of this submission) or such other words to address the concerns raised; and					
	(e) Any consequential changes necessary to the objectives, policies, methods and any other explanatory text necessary to give full effect to the decisions sought.
