1187	Te Runanga a Rangitane o Wairau	6	Volume 1	13 Use of the Coastal Environment	Policy 13.2.5	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>The decision we seek from Council is:</p> <ul style="list-style-type: none"> • More monitoring of the Wairau Lagoon, putting systems in place to replenish this important resource. • A more sustainable approach to fresh water systems. • Alternatives to the current sewage output, work on this needs to start now for a cleaner greener way for sewage disposal, promoting the health of the Wairau river is paramount, producing water to world health standards for gathering of Kai, swimming and recreational activities on the Wairau River especially the mouth of the Wairau is of utmost importance. • Water quality standards need to be higher set my MEP, new ideas need to be looked at so the treated sewage does not continue to flow into the Wairau, if the outflow pipe has to remain, there needs to be a new implementation put in place to assure the quality of outgoing flow is clean/pure enough to enhance the river into becoming a river suitable for food gathering and recreational activities. • Keeping the Marlborough Bar area clean and green, having a stance on no Commercial Buildings to be consented for around the Wairau Bar area. • Keeping in line with Report 2741 State of the Environmental Monitoring of Wairau Estuary-August 2015 and recommendations of that report to MDC. • Keeping updated monitoring on the waterways, drains/creeks that flow into the Wairau Lagoons and Wairau River so any potential contamination from these creeks is quickly averted. • Water Quality needs to be a priority for MDC, our rivers have a mauri, mana and tapu of their own; our rivers are our taonga and are an indicator of environmental health we want more emphasis on this and more effective outcomes from our Council. 					
1244	Z Energy Limited	33	Volume 1	13 Use of the Coastal Environment	Policy 13.2.5	Oppose
Decision Requested	<p>Remove reference to avoiding the establishment of activities resulting in high traffic generation from policy 13.2.5 as follows:</p> <p>Delete policy 13.2.5(j) as follows:</p> <p>Policy 13.2.5 – Amenity values of the coastal environment can be maintained and enhanced by:</p> <p>.....</p> <p>(j) – avoiding the establishment of activities resulting in high traffic generation.</p>					
152	Clova Bay Residents Association Inc	29	Volume 1	13 Use of the Coastal Environment	Policy 13.2.6	Support in Part
Decision Requested	<p>That a further paragraph be added to Policy 13.2.5 as follows:</p> <p>“Recognising that there are adverse visual amenity effects of surface structures in the coastal marine environment (including cumulative) and ensuring that visual amenity is maintained and enhanced through the setting of guidelines, standards or limits around the amount of surface structures that may be accommodated within the visual perspective of any given area”</p>					
364	Ian Balfour Mitchell	94	Volume 1	13 Use of the Coastal Environment	Policy 13.2.6	Support
Decision Requested	<p>Retain Policy 13.2.6</p>					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
401	Aquaculture New Zealand	134	Volume 1	13 Use of the Coastal Environment	Policy 13.2.6	Oppose
Decision Requested	In conjunction with amendment suggested to policy 13.2.4, delete this policy. Single reference needed to definition of amenity in the RMA.					
404	Eric Jorgensen	20	Volume 1	13 Use of the Coastal Environment	Policy 13.2.6	Support
Decision Requested	Retain Policy 13.2.6 but these values <i>(coastal amenity, individual and communities values - inferred)</i> need to be agreed upfront <i>(e.g., in a Schedule (inferred))</i> .

710	The Fishing Industry Submitters	30	Volume 1	13 Use of the Coastal Environment	Issue 13C	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Delete Issue 13C and replace it with new Issue 13C as follows: <i>Fishing is a significant activity in Marlborough's coastal marine area, but the sustainability of fisheries resource is threatened by various uses and activities.</i> Amend the explanatory text beneath the Issue 13C, as follows: <i>Maintenance of traditional access to fisheries is of particular importance to Marlborough's tangata whenua iwi. There is particular concern that traditional fisheries are being depleted. Under fisheries legislation, taiapure, rahui and mataitai are three mechanisms by which tangata whenua can seek greater control of the management of local customary fisheries. Though the Council has no statutory role in either the establishment or management of these mechanisms, it may choose to support an application after consultation with interested parties.</i> <i>Although the number of commercial fishers has decreased over the years, fishers with quota for various species still operate from Picton, Havelock and other ports and the region produces seafood products that are exported to global markets. As a result of the settlement of Maori fishing claims, iwi own at least 10 -20 percent of all fishing quota in Marlborough. While numbers can fluctuate in response to economic circumstances, recreational fishing and diving are important recreational pursuits for Marlborough residents and visitors to the Marlborough Sounds. For a number of years there has been <i>Although fish stocks are managed at levels that ensure sustainability under the Fisheries Act, some stocks have become depleted in localised areas, leading to ongoing community concern over the state of fish and shellfish stocks in the Marlborough Sounds and the sustainability of the recreational fisheries that they support.</i> <i>The causes of localised depletion are multiple and include intensive local fishing pressure as well as fisheries habitat degradation caused by coastal works and structures, and sediment and contaminants entering coastal waters from land-based activities in catchments.</i></i>

Decision Requested	Amend to clarify if there are fisheries issues for areas outside the Marlborough sounds and whether this plan provide any policy guidance outside Marlborough Sounds.					
757	Hugh Shields	1	Volume 1	13 Use of the Coastal Environment	Issue 13C	Oppose
Decision Requested	That the entire section on Fishing (pages 13-11 to 13-12) is deleted and re-written with a view to placing emphasis on protecting and enhancing the marine environment, which is something the Marlborough District Council has both the authority and statutory obligation to do. The submission includes a draft of the proposed new section, which is provided below in italics. <i>Marine Environment Protection, Restoration and Enhancement</i> <i>A healthy Marlborough Sounds marine environment is important for a number of reasons:</i> <ul style="list-style-type: none"> <i>Is cultural significant and provides an on-going source of kai moana for Marlborough's tangata whenua iwi</i> 					

- *Provides economic gain for commercial fishers*
- *Supports a thriving aquaculture industry*
- *Has an amenity value and cultural value for recreational users*
- *Is of economic importance to the tourism industry and the region*
- *Supports the complex biodiversity of the Sounds and therefore the health of marine ecosystems*

Under the Resource Management Act the Council is responsible for protecting habitats of indigenous fauna and maintaining indigenous biological diversity.

By managing any adverse effects on marine environmental habitats, caused by activities over which it does have direct control, the Council can meet its statutory obligations under the RMA and Coastal Protection Act.

The Council can take a lead role in supporting and encouraging marine environment protection, restoration and enhancement projects and in doing so will directly help to maintain and enhance healthy marine biodiversity in the Marlborough Sounds, which will support the cultural, spiritual and economic well-being of tangata whenua, Commercial and Recreational stakeholders, the tourism industry and the wider community.

The depletion of the marine habitat in the Marlborough Sounds is an area of concern. This was highlighted in Davidson Environmental Limited report prepared in 2011, Ecologically Significant Marine Sites in Marlborough and by others.

Maintaining a healthy marine environment is of particular importance to Marlborough's tangata whenua iwi.

I believe the Council has an advocacy role in ensuring a healthy marine environment is maintained in the Marlborough Sounds. Through environment thrive which will support abundant fisheries and aquaculture for future generations which will contribute to the economic, social, cultural and general community wellbeing of Marlborough's residents and visitors.

Objective - To ensure a healthy marine environment is maintained, protected, resorted and enhanced in the Marlborough Sounds.

Policy- That the recommendations of Davidson Environmental Limited report 2011, Ecologically Significant Marine Sites in Marlborough and the Expert Review Panel, be acted on and implemented with urgency to protect marine sites of significance with a 200 metre buffer zone.

Policy - That the disposition of mussel shells (whole or crushed) and other naturally occurring fouling organisms extracted as part of the factory processing of green shell mussel, to seawater, within designated buffer zones around Ecologically Significant Marine Sites, (and other appropriate sites as may be identified) for the purpose of benthic habitat protection, restoration or enhancement, become a permitted activity, subject to compliance with Council approval, guidelines and practices etc.

Policy - That the disposition of small, undersized, live mussels and other naturally occurring fouling organisms extracted as part of the factory processing of green shell mussel, to seawater, within designated buffer zones around Ecologically Significant Marine Sites, (and other appropriate sites as may be identified) for the purpose of benthic habitat protection, restoration or enhancement, become a permitted activity, subject to compliance with Council approval, guidelines and practices etc.

Policy- That the disposition of suitability graded, screened and washed, coarse sands, gravel, shingle, rock and shell to seawater, within designated buffer zones around Ecologically Significant Marine Sites, (and other appropriate sites as may be identified) for the purpose of benthic habitat protection, restoration or enhancement, become a permitted activity, subject to prior Council approval, and compliance with Council instructions, guidelines and practices etc.

Policy - Support community groups working towards ensuring a healthy marine environment is maintained in the Marlborough Sounds. Often local community

groups provide the initial impetus for responding to issues and it is important to support these groups where possible.

Methods of implementation:

- Follow the recommendation contained in Davidson Environmental Limited report 2011, *Ecologically Significant Marine Sites in Marlborough* and act urgently to protect marine sites of significance.
- Create 'buffer zones' of 100 to 200 metres around the protected marine sites of significance.
- Support initiatives of community groups working towards a healthy marine environment in the Marlborough Sounds by providing advice and financial support.
- Engage in dialogue with the Mussel Industry to: develop a strategy to enhance the buffer zones (and other areas as may become apparent) by the controlled placement of discarded crushed or whole mussel shells and other marine material which is a waste bi-product of mussel processing.
- Engage with Contractors involved in dredging operations either in the Sounds, estuaries or river mouths to assess the suitability of screened washed material to be placed in the buffer zones of protected marine sites of significance.
- Engage with Community Groups and Science to explore and implement habitat restoration and enhancement through the harvesting of healthy sea grass from areas of abundance and replanting in areas where sea grasses have become depleted.

868	Kenepuru and Central Sounds Residents Association Incorporated	50	Volume 1	13 Use of the Coastal Environment	Issue 13C	Support
Decision Requested	Retain Issue 13C [<i>inferred</i>].					
906	Legacy Fishing Limited	3	Volume 1	13 Use of the Coastal Environment	Issue 13C	Oppose
Decision Requested	<p>That this issue is rewritten as set out in the submission of 'the fishing industry submitters' to reflect the appropriate roles of the Council in relation to fishing - i.e., to achieve integrated management and to avoid, remedy or mitigate adverse effects on fisheries resources.</p> <p>That this clause be extended to be more balanced and to also include a reference to the importance of the commercial fishing industry and commercial fishing exporters to the local economies, employment and communities of Picton, Port Underwood, French Pass, D'Urville Island and Ward. In order to acknowledge the economic contribution of this significant industry and to balance the incorrect messaging perpetuated throughout this clause and document that the importance of fishing is limited to its role as a "recreational pursuit."</p>					
1038	PauaMAC 7 Industry Association Incorporated	3	Volume 1	13 Use of the Coastal Environment	Issue 13C	Oppose
Decision Requested	We recommend that these provisions should be rewritten (as set out in the submission of 'the fishing industry submitters') to reflect the appropriate roles of the Council in relation to fishing, i.e., to achieve integrated management and to avoid, remedy or mitigate adverse effects on fisheries resources.

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
1186	Te Atiawa o Te Waka-a-Maui	74	Volume 1	13 Use of the Coastal Environment	Policy 13.9.1	Support in Part
Decision Requested	Add further bullets to the list requiring consideration of alternative mooring designs and systems to be considered; the impact of continual seabed disturbance of the structure(s); and contribution to the quality of the environment.					
100	East Bay Conservation Society	24	Volume 1	13 Use of the Coastal Environment	Policy 13.9.2	Support in Part
Decision Requested	EBCS believes that this is one policy that needs to recognise that there is a significant difference between small tightly clustered properties close to Picton where resources such as moorings are common and there is competition for space and large remote properties with up to a kilometre between titles, EBCS believes that there is justification for this policy in the Coastal living zone but no justification whatsoever for this policy in the coastal environment zone where at least two moorings should be permitted.					
203	Thomas Norton Te Awaiti Ltd	2	Volume 1	13 Use of the Coastal Environment	Policy 13.9.2	Oppose
Decision Requested	Remove the proposed section completely of land linking and one mooring per parcel of land. The bays where new mooring are creating an over crowding may need to look at sharing moorings or pushing out moorings to slightly deeper water and having to row a bit further. In the old days some of our deceased family members rowed from Tory Channel to Picton and back so 150 meter row in a bay is not too far.					
231	Jono Wilson	1	Volume 1	13 Use of the Coastal Environment	Policy 13.9.2	Oppose
Decision Requested	a Private property owners may continue to have more than one mooring per Computer Register or Computer Unit Title Register should they have no objection from neighbours nor any conflict with the swing circle of their moorings. b Where the applicant does not own land in the vicinity of the proposed mooring the MDC will accept a proposal for such a mooring if the vessel has a holding tank and there are no objections from private land owners .

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Policy 13.10.10 as follows: <i>"Policy 13.10.10 – Coastal structures shall <u>may</u> be required to be removed from the coastal marine area in the following circumstances: (a) where there is no longer a need for the structure; (b) when a coastal permit for a structure expires and no new permit has been sought; or (c) where consent to authorise an existing structure is refused.</i> <i>There may be circumstances where coastal structures are no longer required or are not granted new resource consents in terms of (b) or (c). Where this is the case it is appropriate for the structure to be removed from the coastal marine area. This will help to achieve Policy 6(2)(e) of the NZCPS by promoting the efficient use of the coastal marine area. This policy will be achieved through conditions imposed on resource consents granted. <u>There are circumstances where the removal of structures in the coastal marine area is not preferred because the removal may not be practicable or the potential adverse effect of the removal may be significant.</u>"</i>

688	Judy and John Hellstrom	126	Volume 1	13 Use of the Coastal Environment	Policy 13.10.16	Oppose
Decision Requested	We submit that the last sentence of this policy should be amended to make it clear that it does not provide for routine "free-loading" by local residents who may have declined to pay a share of maintenance or consent costs, or commercial users who will not take responsibility for a share of repairing damage resulting from their (regular) use. We accept that all jetties must be available for public access in principle (examples are for emergencies, and for visitors arriving to a specific location), but that this provision will be taken advantage of, if this policy is retained, with no ability for consent holders to seek redress or contribution for the <u>regular</u> use of jetties by others.

Decision Requested	That the Policy is retained as notified.					
640	Douglas and Colleen Robbins	8	Volume 1	13 Use of the Coastal Environment	Policy 13.10.27	Support in Part
Decision Requested	That the following amendments (strike-through) are made to Policy 13.10.27 (inferred) : <i>Policy 13.10.27 – Discourage the use of concrete slab retaining walls, sheet piling, car tyres or similar for coastal protection measures and encourage instead the use of materials similar to those found naturally occurring in the area or that can be locally sourced.</i>					
688	Judy and John Hellstrom	138	Volume 1	13 Use of the Coastal Environment	Policy 13.10.27	Support in Part
Decision Requested	We submit that, with rising sea-level, existing sea-wall structures that have either been consented, or which have been in place for 20-60 years (in some cases) should not retrospectively be required to seek consents. Any requirement to take them down could result in even more damage to beachfronts. The exception to this could be those constructed out of old car tyres: there have already been issues in Endeavour Inlet requiring clean-up of abandoned or badly-maintained tyre structures.

Decision Requested	Retain Policy 13.11.5					
716	Friends of Nelson Haven and Tasman Bay Incorporated	169	Volume 1	13 Use of the Coastal Environment	Policy 13.11.5	Support in Part
Decision Requested	<p>That the following amendment (bold) is made to the explanation of Policy 13.11.5:</p> <p><i>Policy 13.11.5 Reclamations shall be designed taking into account relevant dynamic coastal processes, including sea level rise. This policy helps to give effect to the provisions of the NZCPS regarding coastal hazards. It is important that reclamations are designed by appropriately qualified experts to ensure these matters are taken into account.</i></p> <p><i>If the sea-level rise is not too rapid, high value habitats that are particularly under threat from sea level rise (e.g. Saltmarsh, seagrass, intertidal rocky shore communities and dune land) could re-establish if they are able to migrate inland into areas where the slope of the newly inundated habitat is the same or greater than that in the existing habitat. This requires there to be no barriers to prevent inland migration. To facilitate targeted planning for such events, a more comprehensive assessment based on site specific survey is required.</i></p>					
479	Department of Conservation	113	Volume 1	13 Use of the Coastal Environment	Policy 13.11.6	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend as follows: Issue 13J – It is important that Marlborough’s existing ports, port landing areas and marinas continue to contribute to community economic and social wellbeing. The ports and marinas at Havelock, Waikawa and Picton (as they exist or as they have been approved at the time the MEP becomes operative) have been identified as regionally significant infrastructure in Chapter 4 - Use of Natural and Physical Resources. This reflects the function of the strategic integration of infrastructure with land use given to the Council in Section 30 of the RMA.

712	Flaxbourne Settlers Association	48	Volume 1	14 Use of the Rural Environment	14.	Support in Part
Decision Requested	That an additional policy be included in Volume 1, Chapter 14, which seeks to recognise that subdivision creating an allotment smaller than 20ha may be more efficient use of the Rural Environment Zone in certain solutions and that consent may be granted for this.					
717	Fulton Hogan Limited	42	Volume 1	14 Use of the Rural Environment	14.	Oppose
Decision Requested	Amend the plan to ensure that it recognises and provides for uses of the rural resource and the rural environment other than primary production.					
961	Marlborough Chamber of Commerce	46	Volume 1	14 Use of the Rural Environment	14.	Support in Part
Decision Requested	Add new Issue 14D – To recognise that farming, forestry, mineral extraction and processing, renewable energy generation, industrial and commercial activities and network utilities that enable people and communities to provide for their social, economic and cultural wellbeing.					
961	Marlborough Chamber of Commerce	47	Volume 1	14 Use of the Rural Environment	14.	Support in Part
Decision Requested	Add new Issue 14E – To provide for a range of activities in the Rural zone which are located, designed and operated in such a way to avoid, remedy or mitigate the adverse effects on existing land use in the vicinity.					
961	Marlborough Chamber of Commerce	48	Volume 1	14 Use of the Rural Environment	14.	Support in Part
Decision Requested	Add new Issue 14F - Recognition that the growth of vineyards and /or other agricultural activities rely predominantly on seasonal workers. As such seasonal worker accommodation needs to be provided where it can be integrated into the rural character.					
994	New Zealand Fish Passage Advisory Group	5	Volume 1	14 Use of the Rural Environment	14.	Support in Part

Decision Requested

Add to these policies so they apply more broadly to include all structures in waterways. Add to these policies with respect to consent renewal and delaying the legal effect of the rules to allow time to remediate the in-stream structures:

Policy (a): To assess the need to provide for the passage of fish at existing structures when renewing consents or when setting priorities for remedial or enforcement action, by taking into account:

- (a) quantity of habitat upstream of the barrier;
- (b) whether the stream is continuously flowing or ephemeral, and the extent to which the barrier affects fish passage at a range of stream flows;
- (c) significance and quality of the habitat, including presence of threatened species or effects of predator species on indigenous species;
- (d) proximity of barrier to the sea;
- (e) costs associated with any works required to provide fish passage at a site or several sites on the same river and including any likely adverse effects of the retrofit on adjacent landowners and any adverse effects on hydraulic efficiency;
- (f) proximity and effects of other fish barriers, including natural barriers in the same stream;
- (g) whether the structure is still used or the time until any programmed replacement;
- (h) whether there are alternative methods of providing for the passage of fish.

Policy (b): To delay the legal effect of the rules regulating culverts, fords and tidal flood gates existing as at [plan notification date] until five years from the operative date and to:

- (a) require resource consents or
- (b) take enforcement action for structures that do not provide for fish passage at that time unless:
 - (i) the structure has been assessed against policy (a) as not requiring provision of fish passage or
 - (ii) a plan is prepared which includes:
 - (-) a description of the works required to provide for fish passage;
 - (-) a target completion date for the required work.
- (e) the works have been completed by the specified date.

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
994	New Zealand Fish Passage Advisory Group	9	Volume 1	14 Use of the Rural Environment	14.	Support in Part
Decision Requested	<p>There needs to be Anticipated Environmental Results and Monitoring Effectiveness Requirements to back up these policies. This should include:</p> <p>AER: Maintenance of fish passage.</p> <p>Monitoring: All structures in waterways shall be assessed for their ability to provide for fish passage.</p>					
995	New Zealand Forest Products Holdings Limited	19	Volume 1	14 Use of the Rural Environment	14.	Oppose
Decision Requested	<p>Without limiting the generality of the foregoing, to address matters the Submitter also seeks the following relief:</p> <p>(a) The objectives and policies, particularly (but not limited to) Objective 14.1 and its associated policies in this chapter are retained so far as they encourage safeguard, support and encourage the use of Marlborough's rural land for primary production, specifically commercial forestry;</p> <p>(b) That new policies are inserted under Objective 14 that prioritise the use of the rural environment for primary production and intensification of primary production on land where primary production is already occurring;</p> <p>(c) That new objectives and policies are inserted that prioritise the objectives, policies and methods in this chapter over those in other chapters to the extent that primary production activities such as commercial forestry are prioritised in the rural environment; and</p> <p>(d) Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.</p>

Decision Requested	That the following amendment (bold) is made to the explanation of Policy 14.1.1: <i>Currently, a wide range of primary productive land uses are undertaken in Marlborough's rural environments, from viticulture to extensive forestry, pastoral farming, dairy farming, intensive farming and cropping. This policy provides for those uses to continue, which will assist in achieving Objective 14.1, although the management regime in the MEP will include controls to manage adverse effects. At times there may be a change in land use or management practices for primary production to enhance the efficient use of land resources and the MEP does not intend to unduly curtail any opportunity for this to occur. However, the management framework for rural environments, which includes rural areas within the Marlborough Sounds and elsewhere in the District, does include standards to maintain environmental quality, character and amenity values.</i>

501	Te Runanga O Ngati Kuia	68	Volume 1	14 Use of the Rural Environment	Policy 14.3.1	Support in Part
Decision Requested	Amend the Policy as follows (bold) - <i>"Enable small scale and/or low intensity activities not relying on the primary production potential of Marlborough's rural environments, where the adverse effects on the environment are minor and the activity is one of the following: (a) outdoor recreation; or (b) events of a limited duration; (c) home occupations."</i>					
962	Marlborough Forest Industry Association Incorporated	80	Volume 1	14 Use of the Rural Environment	Policy 14.3.1	Support in Part
Decision Requested	The risks of fire to property including plantation forest and life need to be considered and provided for in the assessment of adverse effects.					
974	Ministry of Education	10	Volume 1	14 Use of the Rural Environment	Policy 14.3.1	Support in Part
Decision Requested	Amend Policy 14.3.1 to recognise educational and community facilities serving the rural community.					
990	Nelson Forests Limited	227	Volume 1	14 Use of the Rural Environment	Policy 14.3.1	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend the explanation to the Policy to state as follows (bold) - <i>"Some activities, while not relying on the primary production potential of rural resources, are nonetheless closely linked with the rural environment. This includes outdoor recreation that frequently takes place in rural environments, whether organised through clubs or informally by individuals. Additionally, there are occasionally events of a limited duration that can occur within rural environments. Some flexibility is needed for the operation of these activities as they can provide for an important element in the economic and social wellbeing of the community. In both cases permitted activity standards will establish a framework to enable these activities to occur while managing the risks associated with the activities."</i> Also refer to the direction taken by the Tasman District Council, which has recently held hearings in association with this issue.					
998	New Zealand Pork Industry Board	21	Volume 1	14 Use of the Rural Environment	Policy 14.3.1	Support in Part
Decision Requested	Amend policy so that adverse effects on rural production activities are avoided. The submission does not include details of amendments in terms of how adverse effects are to be avoided.					
1186	Te Atiawa o Te Waka-a-Maui	85	Volume 1	14 Use of the Rural Environment	Policy 14.3.1	Support in Part

1201	Trustpower Limited	97	Volume 1	14 Use of the Rural Environment	Policy 14.3.2	Support in Part
Decision Requested	Trustpower seeks the following relief from the Marlborough District Council: 1. Amend Policy 14.3.2 as follows: <i>"Where an activity is not related to primary production and is not otherwise provided for as a permitted activity, a resource consent will be required and the following matters must be determined by decision makers in assessing the impacts on primary production before any assessment of other effects is undertaken:</i> <i>(a) the extent to which the activity is related to primary production activities occurring at the site;</i> <i>(a) the functional or technical need for the activity to be located within a rural zone and why it is not more appropriately located within another zone;</i> <i>(b) whether the proposed activity will result in a loss of land with primary production potential and the extent of this loss when considered in combination with other non-rural based activities; and</i> <i>(c) the extent to which the proposed activity supports primary production activities, including the processing of agricultural, viticultural or horticultural produce."</i> 2. Any similar or consequential amendments to the PMEP that stem from the submission and relief sought.					
1218	Villa Maria	65	Volume 1	14 Use of the Rural Environment	Policy 14.3.2	Support in Part
Decision Requested	Retain, with an additional clause (e): <i>The extent to which the proposed activity is likely to have reverse sensitivity effects on primary production activities.</i>					
1251	Fonterra Co-operative Group Limited	101	Volume 1	14 Use of the Rural Environment	Policy 14.3.2	Support in Part
Decision Requested	Retain Policy 14.3.2 as notified					
280	Nelson Marlborough District Health Board	70	Volume 1	14 Use of the Rural Environment	Issue 14B	Support
Decision Requested	Allow the provision.. Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.					
348	Murray Chapman	17	Volume 1	14 Use of the Rural Environment	Issue 14B	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend the Issue to acknowledge and address that it does not reflect the values of a working rural environment but reflects to a great degree the values of an urban retreat. Most of the farm fragmentation into parcels of barely economic blocks has arisen through farms being financially marginalised by rules and regulations amongst other issues resulting in subdivision to supplement income. <i>(Inferred)</i>					
351	Helen Mary Ballinger	39	Volume 1	14 Use of the Rural Environment	Issue 14B	Support in Part
Decision Requested	<p>Add the following Objective or words to similar effect;</p> <p><i>Maintain, preserve and, enhance and increase the amenities of [refer to the headings of chapter 14] ... provided in road environments.</i></p> <p>Add the following policy or words to similar effect;</p> <p><i>Rules within each zone applying to public roadways and reserves and other areas of public land and thoroughfares shall include requirements for existing trees to be retained and resource consent for their removal, applications for subdivision consent will be required to provide landscape plans, pruning or removal of any trees within street, reserves and other areas of public thoroughfare shall require resource consent and where telecommunication or lines for similar purpose and electricity lines are being installed or replaced these shall be installed underground.</i></p> <p><i>Inferred that the new Objective and policy is under Issue 14B</i></p>					
717	Fulton Hogan Limited	49	Volume 1	14 Use of the Rural Environment	Issue 14B	Support in Part
Decision Requested	Recognise within Issue 14B that rural character is influenced heavily by the activities that occur within it and that perception is not always reality.					
769	Horticulture New Zealand	50	Volume 1	14 Use of the Rural Environment	Issue 14B	Support in Part
Decision Requested	Amend Issue 14B by deleting 'increased' with 'potential'.					
961	Marlborough Chamber of Commerce	32	Volume 1	14 Use of the Rural Environment	Issue 14B	Oppose
Decision Requested	Amend to: To encourage innovative development and integrated management of effects between subdivision and land use which results in better environmental outcomes than more conventional or traditional subdivision, use or development.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
961	Marlborough Chamber of Commerce	40	Volume 1	14 Use of the Rural Environment	Issue 14B	Support in Part
Decision Requested	Add new objective 14.5 By allowing greater intensity of subdivision or development in the Rural zone where this is offset by protection, restoration, enhancement or establishment of natural features, vegetation and open spaces, where they significantly contribute to the natural environment values, coastal environment and amenity.					
961	Marlborough Chamber of Commerce	41	Volume 1	14 Use of the Rural Environment	Issue 14B	Support in Part
Decision Requested	Add new objective 14.6 By providing for more intensive and innovative site specific subdivision where this results in better environmental outcomes.					
961	Marlborough Chamber of Commerce	42	Volume 1	14 Use of the Rural Environment	Issue 14B	Support in Part
Decision Requested	Add new objective 14.7 By avoiding, remedying or mitigating the adverse effects of subdivision (including ribbon development) on the natural environment values of the rural area.					
961	Marlborough Chamber of Commerce	43	Volume 1	14 Use of the Rural Environment	Issue 14B	Support in Part
Decision Requested	Add new Objective 14.8 By requiring all subdivision to contribute to the retention of rural character and amenity					
961	Marlborough Chamber of Commerce	44	Volume 1	14 Use of the Rural Environment	Issue 14B	Support in Part
Decision Requested	Add new objective 14.9 By promoting the integration of subdivision, use or development with the protection, enhancement or establishment of natural features, vegetation and open space					
961	Marlborough Chamber of Commerce	45	Volume 1	14 Use of the Rural Environment	Issue 14B	Support in Part
Decision Requested	Add new objective 14.10 To ensure that the servicing of new subdivision and development does not adversely affect the environment, in particular sensitive receiving environments.					
996	New Zealand Institute of Surveyors	7	Volume 1	14 Use of the Rural Environment	Issue 14B	Support in Part
Decision Requested	The submission does not clearly identify the decision requested.

Decision Requested	That an additional policy be included in Volume 1, Chapter 14, which seeks to recognise that subdivision creating an allotment smaller than 20ha may be more efficient use of the Rural Environment Zone in certain solutions and that consent may be granted for this.					
717	Fulton Hogan Limited	51	Volume 1	14 Use of the Rural Environment	Policy 14.4.1	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Amend Policy 14.4.1 to consider all contributing elements to rural character and amenity. For example:</p> <p>Policy 14.4.1 - Subdivision, use and development of Marlborough's rural environments should be of a density, scale, intensity and location that individually and cumulatively recognises that rural character and amenity values vary across the region resulting from the combination of natural and physical resources present, including the location and extent of established and permitted activities. Therefore subdivision, use and development should be of a density, scale, intensity and location that individually and cumulatively recognises the following elements:</p> <ul style="list-style-type: none"> (a) a lack of buildings and structures; (b) a very high ratio of open space in relation to areas covered by buildings; (c) open space areas in pasture, trees, vineyards, crops or indigenous vegetation; (d) areas with regenerating indigenous vegetation, particularly in the Marlborough Sounds; (e) tracts of unmodified natural features, indigenous vegetation, streams, rivers and wetlands; (f) farm animals and wildlife; (g) noises, smells and sights of agriculture, viticulture, horticulture, quarrying and forestry <u>and a working rural environment</u>; (h) post and wire fences, purpose-built farm buildings and scattered dwellings; (i) low population density; (j) the presence of Blenheim, Omaka and Koromiko airports; (k) generally narrow carriageways within wide road reserves, often unsealed with open drains, low-speed geometry and low traffic volumes; and (l) a general absence of urban-scale and urban-type infrastructure, such as roads with kerb and channel, footpaths, mown berms, street lights or advertising signs. 					
769	Horticulture New Zealand	52	Volume 1	14 Use of the Rural Environment	Policy 14.4.1	Support in Part
Decision Requested	<p>Amend Policy 14.4.1 a) Presence of buildings and structures necessary for primary production</p>

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That (<i>inferred</i>):					
	<ul style="list-style-type: none"> Primary production is recognised, particularly larger farms with livestock production, as a vitally important part of Marlborough's diverse income and employment base. History has shown that to focus on a monoculture is a dangerous proposition. Council has to somehow achieve consistency in how it interprets RMA issues and policies. At present the Omaka Valley has large houses above ridge lines and many roads leading to subdivision which are unsightly and unplanted. Consistency with subdivision so that one party doesn't feel favoured over another. Selective single housing for areas larger than 20 ha is allowed if placed below main ridges, professionally landscaped and well placed to suit the land form and thereby not being visually intrusive. Under current 8 ha subdivision requirements, smaller allotment sizes have been granted for housing. There seems to be a lack of consistency in how council interprets the understood guidelines of the RMA. Of concern is the amount of land subdivided only to end up grazing a pet sheep and a calf or two, with that goes the total loss of production from what is often very productive land.

	<ul style="list-style-type: none"> • Primary production is recognised, particularly larger farms with livestock production, as a vitally important part of Marlborough's diverse income and employment base. History has shown that to focus on a monoculture is a dangerous proposition. • Council has to somehow achieve consistency in how it interprets RMA issues and policies. At present the Omaka Valley has large houses above ridge lines and many roads leading to subdivision which are unsightly and unplanted. • Consistency with subdivision so that one party doesn't feel favoured over another. • Selective single housing for areas larger than 20 ha is allowed if placed below main ridges, professionally landscaped and well placed to suit the land form and thereby not being visually intrusive. • Under current 8 ha subdivision requirements, smaller allotment sizes have been granted for housing. There seems to be a lack of consistency in how council interprets the understood guidelines of the RMA. Of concern is the amount of land subdivided only to end up grazing a pet sheep and a calf or two, with that goes the total loss of production from what is often very productive land.

91	Marlborough District Council	136	Volume 1	14 Use of the Rural Environment	14.M.7	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amendments to 14.M.7 are requested as follows (strike through and bold) - " <i>14.M.7 Council works - The Council has historically maintained the Drainage Channel Network drainage network on the Wairau Plain in a hydraulically efficient state to ensure primary production activities can continue to occur. The works involved include the following: (a) establishing a range of acceptable water levels for the drains and small rivers that make up the Council administered Drainage Channel Network drainage network; (b) as necessary, removing aquatic vegetation and sediment from the drains and small rivers to achieve the acceptable water levels; and (c) where necessary, installing and using pumps to assist with the removal of excess water. The determination of acceptable water levels for each of the drains and small rivers allows for more efficient control of water levels. This will effectively provide triggers for active intervention and in doing so minimise the cost of drainage maintenance work. The use of acceptable water levels will also provide criteria for determining when further intervention such as pumping is required to control water levels. The drains and small rivers that make up the Drainage Channel Network drainage network also provide habitat for indigenous flora and fauna and provide opportunities for the development of ecological corridors. The development and use of triggers for drain maintenance will help to mitigate the impact of the works on the habitat that the Drainage Channel Network drainage network provides. It may also be appropriate to undertake drain maintenance works in a certain manner to further mitigate any adverse effect on habitat values; see Chapter 8 - Indigenous Biodiversity for further details.</i> "

425	Federated Farmers of New Zealand	272	Volume 1	15 Resource Quality (Water, Air, Soil)	15.	Support in Part
Decision						

Requested That the Introduction is amended to read as follows (strike through and bold) -

*"We are fortunate in Marlborough to generally enjoy good water quality in our coastal waters, rivers, lakes, wetlands and aquifers. **State of the environment reporting shows that:***

- ***The quality of Marlborough's groundwater remains high in terms of nitrate content***
- ***For median nitrate concentrations across the 14 unconfined aquifer sites, all meet the drinking water standard;***
- ***Historically there have been hotspots in areas on the southern margin of the main aquifer where less dilution occurs;***
- ***Nitrate leaching rates are likely to have decreased over time;***
- ***Seasonal patterns appear stable suggesting current land uses are in equilibrium with water resources;***
- ***95% of sites monitored for macro-invertebrates are fair to excellent, only 3 out of 51 sites are graded "poor";***
- ***95% of sites are in the A band for secondary contact recreation, with 2 out of 34 sites in the B band;***
- ***95% of sites meet the proposed DRP standard, with 2 out of 34 sites at higher levels;***
- ***Around 80% of sites meet the proposed SIN standard, with around 6 out of 34 sites at higher levels;***
- ***Trend analysis shows a reduction in SIN concentrations for some of the sites with the highest concentrations.***

Monitoring has shown that the quality of water in these waterbodies is sufficient to support a wide range of natural and human use values. These include healthy freshwater and marine ecosystems, comprising native fish, plants, algae and invertebrates, trout and salmon; stock and domestic water supplies; commercial uses of water in industry, agriculture, viticulture, marine farming and commercial fishing; and recreational uses such as swimming, shellfish gathering and fishing, scenic and tourism purposes. Water is of considerable cultural and spiritual importance to Marlborough's tangata whenua iwi.

The contribution that these uses and values make to the community's social and economic wellbeing and to public health means that maintaining the quality of water in Marlborough's coastal waters, rivers, lakes, wetlands and aquifers is essential. Any reduction in water quality is therefore a significant issue in Marlborough.

Water quality can be adversely affected by discharges of contaminants resulting from human activities on land or water. Contaminants are those things that have the ability to change the physical, chemical or biological condition of the water. There are two types of contaminant discharge that can affect water quality: "point source" discharges (those that enter water at a definable point, often through a pipe or drain) and "non-point source" discharges (those that enter water from a diffuse source, such as land run-off or infiltration through soils).

*The generally good state of water quality in Marlborough reflects the low number of point source discharges into waterbodies and coastal waters, good land management practices and lack of intensive land uses that can impact on water quality (e.g. dairying). It should also be acknowledged that over time, resource users have also taken action to reduce the impact of discharges on water quality. **Significant progress has been made working in partnership with landowners, organisations and the community through catchment programmes. Marlborough has a proud history of examples in this regard, including the Rai Valley.**~~However, there is always the potential that point source and/or non-point source discharges will occur and adversely affect the life supporting capacity and community use of Marlborough's rivers, lakes, wetlands, aquifers and coastal waters.~~*

*Unfortunately, water quality in some rivers has been degraded as a result of point source and non-point source discharges, impacting upon the uses and values that were once supported by the rivers and coastal waters. **In Marlborough most of the rivers and streams have good or fair water quality. The main management aim for water quality is on improving waterways currently classed as poor, in particular where this impacts on swimming values or the health of indigenous aquatic ecosystems.***

*The management of water quality has a strong regulatory focus. ~~This is because the Resource Management Act 1991 (RMA) stipulates that the discharge of contaminants into water, or into or onto land in circumstances where it may enter water, is prohibited unless allowed by resource consent or a rule in a regional plan or a regulation~~ **non-regulatory focus, consistent with the MEP principles, the approach for indigenous biodiversity and building***

forward from earlier successful catchment programmes.

*In addition, the National Policy Statement for Freshwater Management 2014 (NPSFM) sets out objectives and policies that direct the steps that must be taken to manage water in a sustainable manner. In particular, there is a requirement to set objectives for water resources and ~~subsequently~~ to set water quantity and quality limits **in an iterative process informed by costs and achievability** to achieve those objectives. The NPSFM sets as an objective that the overall state of water quality within any region must be maintained or improved.*

*A key component of the NPSFM is the National Objectives Framework (NOF). The NOF is designed to assist the process of establishing appropriate freshwater quality objectives in a nationally consistent manner. It is based on the identification of values supported by waterbodies and the setting of objectives to protect those values. The NOF contains two compulsory national values: ecosystem health and human health for recreation. **The NOF allows for regions and local communities to determine other important values that they also seek to recognise.** Attributes, or measurable physical, chemical and biological characteristics are identified with respect to these values."*

425	Federated Farmers of New Zealand	292	Volume 1	15 Resource Quality (Water, Air, Soil)	15.	Support
Decision Requested	That a new policy is included in the Plan which reads as follows - "Enable land use activities to enable the community to provide for it's economic, social and cultural wellbeing, while maintaining or improving water quality."					
425	Federated Farmers of New Zealand	306	Volume 1	15 Resource Quality (Water, Air, Soil)	15.	Support
Decision Requested	Add a new Policy to replace Policies 15.1.33 and 15.1.34 as follows - "Enable the establishment and operation of any new dairy farm where a farm environment plan is developed with industry."					
425	Federated Farmers of New Zealand	309	Volume 1	15 Resource Quality (Water, Air, Soil)	15.	Support
Decision Requested	That a new policy is included in the Plan which reads as follows - "Marlborough District Council will work to drive engagement and collaboration with landowners, iwi and communities through the planning and management of freshwater, including and in particular in the priority catchment investigations and action plans."					
426	Marine Farming Association Incorporated	182	Volume 1	15 Resource Quality (Water, Air, Soil)	15.	Support
Decision Requested	(a) Add new Policy 15.1.19A - "Avoid the discharge of human sewage to land where it may contaminate coastal water within the marine farm protection overlay, or areas used for fishing or shellfish gathering"; (b) Add new Policy 15.1.19B – "Require any accidental discharge to be notified to the Marlborough District Council immediately. The Marlborough District Council will then advise potential affected persons"; and (c) Add new Method of Implementation 15.M.15A - Create a new marine farm protection overlay within 1000m of the boundary of any marine farm.

425	Federated Farmers of New Zealand	273	Volume 1	15 Resource Quality (Water, Air, Soil)	Issue 15A	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>That the issue is deleted and replaced as follows (strike through and bold) - "The discharge of contaminants to water can adversely affect the life supporting capacity and the community's use of Marlborough's coastal waters, rivers, lakes, wetlands and aquifers. Meeting the needs of Marlborough's urban and rural economy whilst ensuring activities do not have adverse effects on water values and uses."</p> <p>That the first paragraph of explanatory text is deleted and replaced as follows (strike through and bold) - "The good state of water quality in Marlborough's coastal waters, rivers, lakes, wetlands and aquifers makes them more vulnerable to point source and non-point source discharges. Any deterioration in water quality would have dramatic implications for Marlborough's social, economic and cultural wellbeing, as good water quality is essential for a wide range of consumptive and non-consumptive uses. A reduction in water quality could also adversely affect freshwater and marine habitats. The main threats to water quality in Marlborough are described below. Urban and rural activities contribute to the social, economic and cultural well-being of people. Inappropriate landuse and development can detract from the values and uses of water, including marine habitats. The MEP seeks to provide an enabling framework for development while prioritising and progressively reducing the adverse effects of discharges to water."</p> <p>That the last paragraph of the "Rural activities" section is deleted as follows (strike through) - "There is the potential for rural activities to change and intensify in the future. For example, in many other regions there has been a change from traditional pastoral farming to dairy farming. This has led to water quality degradation, especially in lowland streams and for groundwater."</p> <p>That the final paragraph of the explanatory text is amended as follows (bold) - "There has been a strong preference for discharges to land since the first Marlborough Regional Policy Statement (MRPS) became operative in 1995. This has resulted in a reduction in the number of point source discharges to water. Consequently, the greatest risk to water quality is probably associated with non-point source discharges. Non-point source discharges are difficult to manage as there is no discrete point to which management can be applied. This situation does not justify inaction, but means that the management of non-point source discharges is challenging and will require innovative approaches. It is important that the MEP provides a framework to deal with the point source and non-point source discharges to maintain and enhance water quality in Marlborough's coastal waters, rivers, lakes, wetlands and aquifers through a framework which enables catchment communities to target sources and develop innovations tailored to the specific catchment situation."</p>

Decision Requested	Include use of non-regulatory methods.					
990	Nelson Forests Limited	230	Volume 1	15 Resource Quality (Water, Air, Soil)	Issue 15A	Oppose
Decision Requested	Amend the first paragraph of the explanation for the Issue as follows (strike through and bold) - <i>"The good state of water quality in Marlborough's coastal waters, rivers, lakes, wetlands and aquifers makes them more vulnerable to point source and non-point source discharges. Any deterioration Deterioration in water quality would have dramatic implications for Marlborough's social, economic and cultural wellbeing, as good water quality is essential for a wide range of consumptive and non-consumptive uses. A reduction in water quality could also adversely affect freshwater and marine habitats. The main threats to water quality in Marlborough are described below."</i>					
990	Nelson Forests Limited	231	Volume 1	15 Resource Quality (Water, Air, Soil)	Issue 15A	Oppose
Decision Requested	Amend the first and second paragraphs under the heading "Natural processes" as follows - <i>"In the context of the above, it is also important to note that natural processes may influence water quality. For example, groundwater quality often reflects the mineralogy of the aquifer it originated from, especially if the groundwater has high residence time. This means that some Marlborough groundwaters have high levels of naturally occurring contaminants such as salt, iron and arsenic. There is also potential for bacteria from the faeces of feral animals (e.g. goats, pigs and possums) and other wildlife to contaminate fresh and coastal waters.</i> <i>Occasionally, Natural processes will result in sediment reaching both fresh and coastal water, particularly during rainfall events. This affects the clarity and turbidity of water and the resulting dirty discoloured waters can have an impact on freshwater and marine life."</i>					
990	Nelson Forests Limited	232	Volume 1	15 Resource Quality (Water, Air, Soil)	Issue 15A	Oppose
Decision Requested	Review the Issue. If the issue is non-point source discharges, then make this clear. If it is not an issue of no-point source discharges, then delete this sentence and review the provisions that apply to the non-issue.

Decision Requested	<p>Amend Issue 15A Stormwater Reticulation and Disposal to recognise in this discussion that stormwater discharges into the reticulated network are not controlled by the regional rules in the MEP, and otherwise retain the Issue. This could be achieved by making the following changes:</p> <p><i>Stormwater reticulation and disposal</i> <i>Most of Marlborough's towns are serviced by reticulated stormwater systems, with the inputs into those systems not being controlled by regional rules. Urban stormwater will pick up contaminants including sediment, solids, organic matter, nutrients, heavy metals and petroleum and product residues as it runs over impervious surfaces. Given the volume of water created by rainfall events, the stormwater receives little or no treatment prior to discharge into the receiving waters.</i></p> <p><i>Monitoring of fresh and coastal water quality has demonstrated that stormwater discharges do sometimes degrade the quality of receiving waters. Periods of contamination tend to be episodic and are associated with rainfall events. The exception is when contaminants are deliberately washed or poured into the road kerb or stormwater drains.</i></p> <p><i>Stormwater can also pick up sewage through cross-connections between sewerage and stormwater pipes. This has been a particular problem in Picton and has caused periodic contamination of coastal water during rainfall events.</i></p>					
1090	Ravensdown Limited	27	Volume 1	15 Resource Quality (Water, Air, Soil)	Issue 15A	Oppose
Decision Requested	<p>That the intent of Issue 15A is retained but that the following amendment (strike-through) to the last paragraph explanation under the heading <i>Rural Activities</i> is made:</p> <p><i>There is the potential for rural activities to change and intensify in the future. For example, in many other regions there has been a change from traditional pastoral farming to dairy farming. This has led to water quality degradation, especially in lowland streams and for groundwater.</i></p>					
1187	Te Runanga a Rangitane o Wairau	8	Volume 1	15 Resource Quality (Water, Air, Soil)	Issue 15A	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	The decision we seek from Council is: <ul style="list-style-type: none"> • More monitoring of the Wairau Lagoon, putting systems in place to replenish this important resource. • A more sustainable approach to fresh water systems. • Alternatives to the current sewage output, work on this needs to start now for a cleaner greener way for sewage disposal, promoting the health of the Wairau river is paramount, producing water to world health standards for gathering of Kai, swimming and recreational activities on the Wairau River especially the mouth of the Wairau is of utmost importance. • Water quality standards need to be higher set my MEP, new ideas need to be looked at so the treated sewage does not continue to flow into the Wairau, if the outflow pipe has to remain, there needs to be a new implementation put in place to assure the quality of outgoing flow is clean/pure enough to enhance the river into becoming a river suitable for food gathering and recreational activities. • Keeping the Marlborough Bar area clean and green, having a stance on no Commercial Buildings to be consented for around the Wairau Bar area. • Keeping in line with Report 2741 State of the Environmental Monitoring of Wairau Estuary-August 2015 and recommendations of that report to MDC. • Keeping updated monitoring on the waterways, drains/creeks that flow into the Wairau Lagoons and Wairau River so any potential contamination from these creeks is quickly averted. • Water Quality needs to be a priority for MDC, our rivers have a mauri, mana and tapu of their own; our rivers are our taonga and are an indicator of environmental health we want more emphasis on this and more effective outcomes from our Council.

496	Royal Forest and Bird Protection Society NZ {Forest & Bird}	40	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.2	Support
Decision Requested	Retain policy 15.1.1 where it ensures active engagement to improve water quality within the wider Pelorus catchment as a whole, including the Ronga, Opouri, Rai and lower Pelorus.					
509	Nelson Marlborough Fish and Game	173	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.2	Support in Part
Decision Requested	Clarify the relationship between Water Resource Units and Freshwater Management Units so that it is clear how the two data sets relate to each other.					
676	Dairy NZ	74	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.2	Support in Part
Decision Requested	<p>That the following amendment (bold) is made after the 5th sentence of the first paragraph of Policy 15.1.2:</p> <p><i>Water quality classifications will be applied through the MEP to all water and coastal waters. The classifications will, as a minimum, reflect the management purposes set out in Policy 15.1.1. However, particular waterbodies and coastal waters may support other natural and human use values and it is appropriate for these values to be reflected in any classification. This means that many waterbodies and coastal waters will have multiple classifications. For those waterbodies or coastal water experiencing degraded water quality, the classifications will reflect the natural and human use values that are to be restored. These values will be form a part of Catchment Enhancement Plans. Water quality standards will apply to each classification.</i></p>					
698	Environmental Defence Society Incorporated	96	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.2	Support in Part
Decision Requested	<p>Amend Policy 15.1.2 to specify:</p> <ol style="list-style-type: none"> The difference and relationship between quality classifications and standards. The level and which standards will be applied: water resource unit, FMU etc. 					
698	Environmental Defence Society Incorporated	102	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.2	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Policy 15.1.12 to read: Policy 15.1.12 – After considering Policies 15.1.10 and 15.1.11, approve discharge permit applications to discharge contaminants into water only where : (a) the discharge in combination with all other discharges complies with the water quality classification standards set for the waterbody, after reasonable mixing; or (b) in FMUs where a contaminant(s) is over-allocated: (a) (i) only in situations where the discharge is associated with an existing use; and (ii) how discharge of that contaminant will be progressively reduced over the term of the permit. (b) in the case of non-compliance with the water quality classification standards set for the waterbody: (i) the consent holder for an existing discharge can demonstrate a reduction in the concentration of contaminants and a commitment to a staged approach for achieving the water quality classification standards within a period of no longer than five years from the date the consent is granted; and (ii) the degree of non-compliance will not give rise to significant adverse effects.					
769	Horticulture New Zealand	63	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.2	Oppose
Decision Requested	Amend Policy 15.1.2 b) all values identified for the waterbody					
1090	Ravensdown Limited	33	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.2	Support in Part
Decision Requested	That the following amendment (bold) is made to Policy 15.1.2(c): <i>Policy 15.1.2 – Apply water quality classifications (and water quality standards) to all surface water, groundwater and coastal water resources, which reflect:</i> <i>(c) where water quality has already been degraded by human activities, the uses and values that are to be restored.</i>					
1189	Te Runanga o Kaikoura and Te Runanga o Ngai Tahu	104	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.2	Support in Part
Decision Requested	Accept with amendments Apply water quality classifications (and water quality standards) to all surface water, groundwater and coastal water resources, which reflect: (a) the management purposes specified in Policy 15.1.1; and (b) other uses and values, including Tangata Whenua Iwi values , supported by the waterbody or coastal waters; or (c) where water quality has already been degraded, the uses and values that are to be restored					
1192	The Fertiliser Association of New Zealand	21	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.2	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Policy 15.1.2 as follows: Apply water quality classification (and water quality standards) to all surface water, groundwater and coastal water resources, which reflect: (c) where water quality has already been degraded <u>by human activities to the point of being over-allocated</u> , the uses and values that are to be restored <u>to meet the FMU Objectives</u> .					
1201	Trustpower Limited	102	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.2	Support
Decision Requested	Trustpower seeks the following relief from the Marlborough District Council: 1. Retain Policy 15.1.2 as notified.					
425	Federated Farmers of New Zealand	284	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.3	Support in Part
Decision Requested	That the second last paragraph of the explanatory text is amended to read as follows (strike through and bold) - <i>"This policy establishes a commitment to commence collecting and analysing resource use and environmental data required to establish cumulative contaminant limits. The use of limits could constrain the land uses that could occur in a catchment (existing and potential) or at least the way in which those land uses are managed. For these reasons, care needs to be exercised in establishing cumulative contaminant limits in respect of water quality. It is also important that the limits reflect the management purposes established by Policy 15.1.1, otherwise Objectives 15.1a to 15.1e will not be achieved and that communities review MEP objectives and standards based on catchment specific values and information. The cumulative limits and any catchment-specific revisions to values, objectives or standards will be added to the MEP by plan change or upon review."</i>					
479	Department of Conservation	127	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.3	Support
Decision Requested	Retain as notified.					
496	Royal Forest and Bird Protection Society NZ {Forest & Bird}	41	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.3	Support
Decision Requested	Retain policy 15.1.3 where it ensures active engagement to improve water quality within the wider Pelorus catchment as a whole, including the Ronga, Opouri, Rai and lower Pelorus.					
509	Nelson Marlborough Fish and Game	174	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.3	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Retain the policy with amendments to reflect that water quality standards are set as in-stream limits and these limits are to be achieved, through the implementation of rules by 2030.					
676	Dairy NZ	75	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.3	Support in Part
Decision Requested	<p>That the following amendments (bold) are made to the explanation for Policy 15.1.3:</p> <p>After paragraph 2 of the explanation: Key stakeholders will be given the opportunity to be kept informed or participate in this investigation process.</p> <p>After paragraph 4 of the explanation: The date for implementation of cumulative catchment limits has been set at 2024. However, this date may be extended where Catchment Enhancement Groups agree it is necessary to allow resource users sufficient time to implement any changes in land use practices.</p>					
698	Environmental Defence Society Incorporated	97	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.3	Support in Part
Decision Requested	The PMEP should identify and include interim cumulative contaminant limits set (at) a precautionary level to achieve ecosystem health, to ensure that contaminants are appropriately managed in the interregnum between instigation of the 2012 programme and its completion.					
769	Horticulture New Zealand	64	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.3	Support in Part
Decision Requested	Retain Policy 15.1.3 but add that method 15.M.1 will be used as the first stage on implementing Policy 15.1.3.ts in place a process for limits to be set. This process includes the identification of values supported by freshwater resources. (Method 15.M.1).					
961	Marlborough Chamber of Commerce	51	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.3	Support

509	Nelson Marlborough Fish and Game	178	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.7	Support in Part
Decision Requested	Retain the policy with amendments to ensure that the objectives are achieved within the stated timeframes.					
676	Dairy NZ	16	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.7	Support in Part
Decision Requested	Policy 15.1.7 should be amended to include a stronger focus on empowering local communities to determine objectives and timeframes for water management in their relevant catchments. The explanations to these policies should note that the outcomes of catchment-level collaboration will dovetail with an accompanying formal RMA process.					
1090	Ravensdown Limited	39	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.7	Support in Part
Decision Requested	That the following amendment (strike-through and bold) is made to Policy 15.1.7: <i>Policy 15.1.7 – Take action to eEnhance water quality in the rivers identified in Tables 15.1 and 15.2 so that water quality is suitable for the purposes specified in Policy 15.1.1 within ten years of the Marlborough Environment Plan becoming operative.</i>					
1192	The Fertiliser Association of New Zealand	29	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.7	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Policy 15.1.5 as follows: <u>Where specified water quality attributes are not being met, t</u> Take action to enhance water quality in the rivers identified in Tables 15.1 and 15.2 (except where specifically identified in Policies 15.1.4, 15.1.5 and 15.1.6) so that water quality is suitable for the purposes specified in Policy 15.1.1 within ten years of the Marlborough Environment Plan becoming operative.					
1251	Fonterra Co-operative Group Limited	44	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.7	Support
Decision Requested	Amend Policy 15.1.7 to refer to catchment specific plans setting the scale of any improvement in water quality needed and the appropriate timeframes to achieve this. Such a policy should reflect a cost benefit analysis (s32 report) of the change and timeframes set.					
397	Heather Collins	6	Volume 1	15 Resource Quality (Water, Air, Soil)	15.M.5	Support in Part
Decision Requested	Council adopts a community collaboration and engagement rather than a community consultation process.					
425	Federated Farmers of New Zealand	291	Volume 1	15 Resource Quality (Water, Air, Soil)	15.M.5	Support in Part
Decision Requested	That the Method is amended to read as follows (strike through and bold) - " <i>Catchment Enhancement Plans will be developed as a priority for rivers that have degraded water quality, as identified in Policies 15.1.4 to 15.1.7.</i> Catchment Enhancement Groups will be established within each catchment. The methods to be used to enhance water quality will be determined following an assessment of the cause and effect of degraded water quality. Possible methods will be modelled to determine the costs and benefits, and decisions made by the Group regarding preferred pathways forward. This and will be clearly identified within the Plans. It may take time to establish the nature of the cause, which may delay the completion of the Plans. Other methods may be used in the interim to reduce the effects of non-point source discharges on water quality. Each Catchment Enhancement Plan will be developed in consultation partnership with land owners and community members resource users in the catchment, and industry through the Catchment Enhancement Groups. and other affected parties."					
676	Dairy NZ	12	Volume 1	15 Resource Quality (Water, Air, Soil)	15.M.5	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>That the following amendments (strike-through and bold) are made to 15.M.5:</p> <p><i>15.M.5 Catchment Enhancement Plans will be developed as a priority for rivers that have degraded water quality, as identified in Policies 15.1.4 to 15.1.7. Catchment Enhancement Groups will also be formed for each of these catchments. These groups will be involved at each step in the catchment planning processes. The methods to be used to enhance water quality will be determined following an assessment of the cause and effect of degraded water quality and the costs and benefits of achieving modelled water quality enhancement scenarios over various timeframes, and will be clearly identified within the Plans. It may take time to establish the nature of the cause, which may delay the completion of the Plans. Other methods may be used in the interim to reduce the effects of non-point source discharges on water quality. Each Catchment Enhancement Plan will be developed in consultation partnership with resource users in the catchment and other affected parties.</i></p> <p>The Plan contains several provisions relating to limit-setting. These provisions should be amended to allow for the close involvement of the communities most interested in, and affected by, limit-setting in their respective catchments.</p>					
961	Marlborough Chamber of Commerce	55	Volume 1	15 Resource Quality (Water, Air, Soil)	15.M.5	Support
Decision Requested	No decision requested - none able to be inferred from submission.

1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	21	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.16	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Q. Amend policy 15.1.16 as follows:</p> <p>[R, C] Policy 15.1.16 – The duration of any new discharge permit will be either:</p> <p>(a) Up to 35 years where the quality and/or nature of the discharge is such that the risk associated with the discharge is low, or</p> <p>(ab) Up to a maximum of 15 years for discharges into waterbodies or coastal waters where the discharge will comply with water quality classification standards for the waterbody or coastal waters; or</p> <p>(bc) up to ten years for discharges into rivers identified in Policies 15.1.4, 15.1.5, 15.1.6 or 15.1.7 (where the water quality is to be enhanced) and the discharge will comply with water quality classification standards for the waterbody or coastal waters; or</p> <p>(ed) no more than five years where the existing discharge will not comply with water quality classification standards for the waterbody or coastal waters.</p> <p><i>With the exception of regionally significant infrastructure, no discharge permit will be granted subsequent to the one granted under (c), if the discharge still does not meet the water quality classification standards for the waterbody or coastal waters.</i></p> <p>To provide greater certainty to resource users, the policy identifies the appropriate duration for discharge permit applications if they are to be granted. The duration varies depending on a risk assessment determined by compliance water quality classification standards and the state of water quality in the waterbody or coastal waters <i>or by the standard of the discharge, which could be measured by, for example, industry codes of practice or Ministry for the environment Guidelines.</i> Longer durations are warranted where compliance with water quality classification standards will be achieved and there is currently no water quality issue, <i>or where the quality of and/or nature of the discharge presents an acceptable and low risk to water quality.</i> While short term consents will occur where water quality classification standards cannot be met. In the latter case, Policy 15.1.12 identifies that consent holders only have five years to achieve compliance with water quality classification standards, hence the requirement in (c) above.</p> <p><i>This policy gives effect to Policy A3 of the NPSFM.</i></p>					
1201	Trustpower Limited	106	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.16	Support in Part
Decision Requested	<p>Trustpower seeks the following relief from the Marlborough District Council:</p> <p>1. Amend Policy 15.1.16 as follows:</p> <p><i>“With the exception of regionally significant infrastructure the duration of any new discharge permit will be either: ...”</i></p> <p>2. Any similar or consequential amendments to the PMEP that stem from the submission and relief sought.</p>					
479	Department of Conservation	136	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.17	Support
Decision Requested	Retain as notified.					
496	Royal Forest and Bird Protection Society NZ {Forest & Bird}	55	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.17	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Retain policy 15.1.17 where it ensures active engagement to improve water quality within the wider Pelorus catchment as a whole, including the Ronga, Opouri, Rai and lower Pelorus.					
509	Nelson Marlborough Fish and Game	186	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.17	Support in Part
Decision Requested	Retain the policy with amendments to ensure that all existing discharge permits are reviewed where conditions requiring monitoring are not already included.					
961	Marlborough Chamber of Commerce	58	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.17	Support in Part
Decision Requested	<ul style="list-style-type: none"> · For those permits already in place should this policy not be used to require the consent holder to commence monitoring the effects of the discharge? · Any new discharge permit applications to continue discharging the contaminants, should then be able to provide monitoring records on the effects with the application, rather than starting the monitoring process from time of application being granted. 					
1201	Trustpower Limited	107	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.17	Support in Part
Decision Requested	<p>Trustpower seeks the following relief from the Marlborough District Council:</p> <ol style="list-style-type: none"> 1. Amend Policy 15.1.17 as follows: <i>"Review, where appropriate, the conditions of existing discharge permits which directly affect water quality, to impose new conditions requiring the monitoring of the discharge effects to determine compliance with the water classification standards."</i> 2. Any similar or consequential amendments to the PMEP that stem from the submission and relief sought.

Decision Requested	Retain Policy 15.1.23 – Avoid the discharge of animal effluent to fresh waterbodies and stock disturbance of river beds to the extent necessary to meet the management purposes established by Policy 15.1.1, by:					
	(a) preventing the direct discharge of collected animal effluent to water; and					
	(b) avoiding the access of intensively farmed stock to rivers.					
397	Heather Collins	2	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.23	Support
Decision Requested	Retain Policy 15.1.23					
425	Federated Farmers of New Zealand	298	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.23	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>That the Policy is amended to read as follows (strike through and bold) - "Avoid Reduce the discharge of animal effluent to fresh waterbodies and stock disturbance of river beds to the extent necessary to meet the management purposes established by Policy 15.1.1, policy 15.1.5, and policy 15.1.6 by: (a) assessing causes of elevated E. coli levels and identifying the most appropriate and cost-effective solutions for restricting stock access; and (a) (b) preventing the direct discharge of collected animal effluent to water; and (b) (c) avoiding managing the access of intensively farmed stock to rivers to support achievement of Policy 15.1.5, and Policy 15.1.6."</p> <p>That the explanatory text for the Policy is amended to read as follows (strike through and bold) - "Animal effluent can be discharged directly into rivers and wetlands through either the point source discharge of collected animal effluent (e.g. farm dairy effluent) or through stock access to waterbodies. At the date of notification of the MEP, there were no authorised discharges of animal effluent into water. This policy seeks to avoid the significant risk posed to surface water quality by discharges of collected animal effluent. This will be implemented through a prohibited activity rule. Stock can also access rivers when grazing riparian margins. In such circumstances, it is likely that there may will be a discharge of animal effluent to water and the river bed may will be physically disturbed. The resulting increase in bacteria and turbidity in the receiving waters have the potential to reduce water quality. The adverse effects of casual access on water quality are dependent on a number of factors, including the type and density of stock. Intensively farmed stock such as dairy cattle, pigs, or cattle or deer grazed on irrigated pasture or breakfed on winter crops create a significant risk of adverse effects on water quality. For this reason, the policy seeks to avoid stock access where stock is farmed intensively. This policy seeks to understand the cause of elevated E. coli level and identify the most appropriate and cost effective solutions for restricting access in catchments where there is an identified problem. This work will be completed through the Catchment Enhancement Plans, working collaboratively with landowners, industry, the community and Council to explore options. Due to the practical difficulties in some situations of fencing stock out of waterbodies, particularly where stock are grazed extensively, or where rainfall events can cause ephemeral rivers to flow, and in situations where the costs of fencing and designing stock crossings are prohibitive for limited use, the Council has also adopted an approach of using permitted activity rules for managing the adverse effects of stock access not covered by this policy. The permitted activity rules will require compliance with any relevant water quality standard set for the affected waterbody that good management practice is followed to manage adverse effects on colour and visual clarity."</p> <p>That a new method is included in the Plan which provides for the assessment of causes of elevated E. coli levels and identification of the most appropriate and cost effective solutions for restricting stock access; and</p> <p>That a new method is included in the Plan which involves working with landowners and industry to implement good management practice around stock access to waterways, through Catchment Enhancement Groups, based on a better understanding of the causes and solutions.</p>

462	Blind River Irrigation Limited	31	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.32	Oppose

Decision
Requested

Policy 15.1.32 – In considering any resource consent application for the disturbance of a river or lake bed, or the seabed, or land in close proximity to any waterbody, regard will be had to:

(a) whether the disturbance is likely to result in non-compliance with the clarity standards set for the waterbody, after reasonable mixing;

(b) in the event of possible non-compliance with the clarity standards set for the waterbody, after reasonable mixing:

(i) the purpose for undertaking the disturbance and any positive effects accruing from the disturbance;

(ii)

the economic consequences of not undertaking the disturbance

;

(iii) the scale, duration and frequency of the disturbance;

(iv) the extent to which the bed disturbance is necessary and adverse water quality effects caused by the disturbance are mitigated

by way of site specific management plans that set out how potential adverse effects from such activities are to be avoided, minimised or mitigated; and

(v) for freshwater, the potential effects of increased turbidity on the values of the waterbody set out in Schedule 1 of Appendix 5 of the Marlborough Environment Plan or on the natural character values of the coastal environment in relation to water quality as set out in Appendix 2 of the Marlborough Environment Plan.

473	Delegat Limited	33	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.32	Support

496	Royal Forest and Bird Protection Society NZ {Forest & Bird}	72	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.34	Support
Decision Requested	Retain policy 15.1.34 where it ensures active engagement to improve water quality within the wider Pelorus catchment as a whole, including the Ronga, Opouri, Rai and lower Pelorus.					
509	Nelson Marlborough Fish and Game	198	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.34	Support in Part
Decision Requested	Retain the policy with amendments that specify appropriate limits for dairy farming, including maximum nitrogen leaching standards, management practices to avoid loss of phosphorus and sediment and faecal contamination.					
698	Environmental Defence Society Incorporated	108	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.34	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Policy 15.1.34 to read: Policy 15.1.34 – Approve land use consent applications for new dairy farms where the proposed farming would have no more than minor adverse effects on ground or surface water quality or on significant wetlands . A land use consent application must identify <u>(as part of and in combination with the requirements in Schedule 1 RMA)</u> the risks of new dairy farming and provide measures to address those risks, including as a minimum: (a) measures (including fences, bridges or culverts) to prevent stock entering onto or passing across the bed of any river or lake, significant wetland, or any drain or the Drainage Channel Network; (b) provision of an appropriate, non-grazed buffer along the margins of any river, lake, significant wetland, drain or the Drainage Channel Network, to intercept the runoff of contaminants from grazed pasture, with reference to the values of fresh waterbodies as identified in Appendix 5; (c) provision for storage of dairy effluent, with all storage ponds sufficiently sized to enable deferral of application to land until soil conditions are such that surface runoff and/or drainage do not occur; (d) demonstration of appropriate separation distances between effluent storage ponds and any surface waterbodies to ensure contamination of water does not occur (including during flood events); -and (e) a nutrient management plan that includes nutrient inputs from dairy effluent, animal discharges, fertiliser and any other nutrient input <u>and the discharge outputs;</u> <u>(f) assessment of the effects of any discharges, in combination with all other discharges to the FMU on the receiving environment and identifying how and why the adverse effects are no more than minor; and</u> <u>(e)(g) measures in place to ensure that leaching maxims are met or for existing farms measures in place to reduce leaching down to the maxim by a specified date.</u>					
961	Marlborough Chamber of Commerce	70	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.34	Support in Part
Decision Requested	No decision requested - none able to be inferred from submission.					
1090	Ravensdown Limited	45	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.34	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>That the following amendments (strike-through and bold) are made to Policy 15.1.34:</p> <p><i>Policy 15.1.34 - Approve land use consent applications for new dairy farms and intensive farming activities where the proposed farming activity would have no more than minor adverse effects on can identify potential risks to ground or surface water quality or on significant wetlands. A land use consent application must identify the risks of new dairy farming and provide measures to address those risks, including as a minimum:</i></p> <p><i>(a) measures (including fences, bridges or culverts) to prevent stock entering onto or passing across the bed of any river or lake, significant wetland, or any drain or the Drainage Channel Network;</i></p> <p><i>(b) provision of an appropriate, non-grazed buffer along the margins of any river, lake, significant wetland, drain or the Drainage Channel Network, to intercept the runoff of contaminants from grazed pasture, with reference to the values of fresh waterbodies as identified in Appendix 5;</i></p> <p><i>(c) provision for storage of dairy effluent, with all storage ponds sufficiently sized to enable deferral of application to land until soil conditions are such that surface runoff and/or drainage do not occur;</i></p> <p><i>(d) demonstration of appropriate separation distances between effluent storage ponds and any surface waterbodies to ensure contamination of water does not occur (including during flood events); and</i></p> <p><i>(e) a nutrient management plan that includes nutrient inputs from dairy effluent, animal discharges, fertiliser and any other nutrient input.</i></p> <p>preparing and implementing a Farm Environment Plan as set out in Appendix X, made available to Marlborough District Council upon request is a Permitted Activity.</p> <p>It is noted that the submission does not include details for the content of Appendix X.</p>					
1189	Te Runanga o Kaikoura and Te Runanga o Ngai Tahu	111	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.34	Support in Part
Decision Requested	<p>Accept with amendments</p> <p>Point (e) should be amended so that there is a standard that needs to be met, as opposed to the standard being the provision of a nutrient management plan, of which the contents may not be acceptable, but nonetheless the requirement would be met through the provision of the plan itself.</p>					
1192	The Fertiliser Association of New Zealand	35	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.34	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Policy 15.1.34 as follows: Approve land use consent applications for new dairy farms <u>and intensive farms</u> where the proposed farming would have no more than minor adverse effects on <u>can identify potential risks</u> to ground or surface water quality or on significant wetlands. A land use consent application must identify the risks of new dairy farming and provide measures to address those risks, including as a minimum: (a) measures (including fences, bridges or culverts) to prevent stock entering onto or passing across the bed of any river or lake, significant wetland, or any drain or the Drainage Channel Network; (b) provision of an appropriate, non-grazed buffer along the margins of any river, lake, significant wetland, drain or the Drainage Channel Network, to intercept the runoff of contaminants from grazed pasture, with reference to the values of fresh waterbodies as identified in Appendix 5; (c) provision for storage of dairy effluent, with all storage ponds sufficiently sized to enable deferral of application to land until soil conditions are such that surface runoff and/or drainage do not occur; (d) demonstration of appropriate separation distances between effluent storage ponds and any surface waterbodies to ensure contamination of water does not occur (including during flood events); and (e) a nutrient management plan that includes nutrient inputs from dairy effluent, animal discharges, fertiliser and any other nutrient input. <u>preparing and implementing a Farm Management Plan as set out in Appendix X.</u>					
1193	The Marlborough Environment Centre Incorporated	77	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.34	Support in Part
Decision Requested	That a requirement that dairy farms, all farms with high nutrient leaching risk and those with non-compliance issues write a Farm Environment Plan (FEP) (including a nutrient management plan) which is regularly audited with a requirement for practices identified as risking damage to the environment to be corrected within a designated timeframe. The FEP must include an assessment of the adverse environmental effects, risks associated with the farming activities and how those effects and risks will be managed, including irrigation, application of nutrients, effluent application, stock exclusion from waterways, offal pits and farm rubbish pits. FEP should be audited annually then less often if practices consistently reach a high standard.					
1251	Fonterra Co-operative Group Limited	50	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.1.34	Support

Decision Requested	<p>Wish to:</p> <p>(i) include chimney flue cowling devices such as The FlueCube Chimney Cowl which also eliminates smoke emissions down to the levels required</p> <p>(ii) extend the expiry date for installing a clean burning device to 12 or 18 months from the Plans operative date</p> <p>(iii) provide financial incentive assistance to residents to make the changes required.</p>					
573	Blenheim Residents and Ratepayers Association Incorporated	1	Volume 1	15 Resource Quality (Water, Air, Soil)	Objective 15.2	Support in Part
Decision Requested	<p>That Council:</p> <ul style="list-style-type: none"> Increases the provision of education in relation to environmentally sound burning practices in Marlborough. Considers the impact of restricting the use of certain fireplaces on low/middle income families, and how Council might support a transition to cleaner energy solutions. Considers options that improve the affordable access to green waste disposal facilities in Marlborough. Considers restrictions of green waste burning on the outskirts of Blenheim. <p>The submission does not identify an issue, objective, policy or provision to which the decision requested relates to.</p>					
1262	EnviroNZ Limited	1	Volume 1	15 Resource Quality (Water, Air, Soil)	Objective 15.2	Support
Decision Requested	Retain Objective 15.2 [<i>inferred</i>].					
52	Anthony Armstrong	1	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.2.1	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>I submit that 'outdoor fires' should not be banned.</p> <p>I have incinerated tree waste, after it has completely dried, for the last forty years with never a complaint. This has always been done in spring or summer, when convection takes the smoke, which only occurs on lighting, high above the city. This is not a detriment to the environment.</p> <p>I have never seen in Blenheim, garden fires that pollute. This is a minor problem, if indeed it is a problem at all. During my three times weekly walks up the Wither Hills, I see no smoke coming from Blenheim residences. Thus outdoor fires are infrequent.</p> <p>The outdoor fires do not add to pollution if burnt on a warm summer's day. If you consider they do, where is your proof?</p> <p>I submit that either you ditch this proposal, or you limit fires to a specific timeframe, say April to October. This is what happened in Christchurch.</p> <p>Trusting you give this submission your earnest consideration.</p>					
109	Raupo Cafe	1	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.2.1	Oppose

Decision Requested	Retain Policy 15.3.4 [<i>inferred</i>].					
769	Horticulture New Zealand	70	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.3.4	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Policy 15.3.4 Manage the use of agrichemicals to avoid adverse effects of spraydrift by adopting best practice methods of application to minimise the potential for off-target drift. Include in the Explanation: Best practice for agrichemical use is set out in NZS8409:2004 Management of Agrichemicals. Appropriate training is required to ensure that users are competent in undertaking applications of agrichemicals to minimise potential for off target spray drift.					
909	Longfield Farm Limited	70	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.3.4	Support
Decision Requested	Redraft the policy to reflect the following amendment: <i>Manage the use of agrichemicals to avoid spray drift <u>as far as practicable.</u></i>					
962	Marlborough Forest Industry Association Incorporated	97	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.3.4	Support in Part

909	Longfield Farm Limited	84	Volume 1	15 Resource Quality (Water, Air, Soil)	Issue 15F	Support in Part
Decision Requested	Longfield submit that the MEP should include as a method the ongoing commitment of Council toward the further refining of the Soils Sensitive Areas and boundaries.					
1002	New Zealand Transport Agency	80	Volume 1	15 Resource Quality (Water, Air, Soil)	Issue 15F	Support
Decision Requested	Retain Issue 15F.					
1090	Ravensdown Limited	51	Volume 1	15 Resource Quality (Water, Air, Soil)	Issue 15F	Oppose
Decision Requested	That the following amendments (bold) are made to the 4th paragraph of the explanation for Issue 15F: <i>Soil contains essential mineral elements required by plants and animals. An inevitable consequence of the productive use of soil is that, at some time in the future, soils will become unable to sustain high levels of production unless those nutrients are replaced. Soil depletion refers to the reduction of soil nutrients to a level where their potential to sustain primary production is adversely affected. Although fertiliser use has decreased over time in Marlborough, many primary producers still apply it to maintain the nutrient status of the soil and therefore soil productivity. Excessive fertiliser application creates the potential for nutrients such as nitrogen and phosphate to runoff into adjoining rivers and wetlands or leach into underlying groundwater. Council will encourage the application of fertiliser in accordance with the Code of Practice for Nutrient Management and Good Management Practices for farming activities to reduce the risk of nutrients entering surface and groundwater resources.</i>					
1192	The Fertiliser Association of New Zealand	41	Volume 1	15 Resource Quality (Water, Air, Soil)	Issue 15F	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Amend Issue 15F Explanation:</p> <p>Although fertiliser use has decreased over time in Marlborough, many primary producers still apply it to maintain the nutrient status of the soil and therefore soil productivity. Excessive fertiliser application creates the potential for nutrients such as nitrogen and phosphate to runoff into adjoining rivers and wetlands or leach into underlying groundwater.</p> <p><u>Healthy productive soils are a finite natural resource and essential for the social, cultural and economic well-being of people and communities. It is important to manage the potential for adverse effects of land uses on soil health and function and practices including vegetation clearance, earthworks and forestry harvesting where they adversely affect soil quality or induce or exacerbate soil erosion.</u></p> <p><u>In addition, accelerated erosion from land use resulting in additional deposition of sediment in rivers and lakes can have a major impact on aquatic ecosystems and instream values.</u></p>					
769	Horticulture New Zealand	71	Volume 1	15 Resource Quality (Water, Air, Soil)	Objective 15.4	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Retain Policy 15.5.1 but amend to include (D).					
990	Nelson Forests Limited	250	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.5.1	Oppose
Decision Requested	<p>Amend the explanation to the Policy as follows (strike through) -</p> <p><i>"The Hazardous Substances and New Organisms Act 1996 (HSNO) states the minimum controls for the use, storage, transportation and disposal of all hazardous substances throughout New Zealand. Although the Council is able to impose additional and/or more stringent requirements, it is satisfied that the requirements imposed by HSNO regulations are sufficient to minimise the potential for inadvertent release of hazardous substances into the environment.</i></p> <p><i>Exceptions to this policy include:</i></p> <p><i>(a) the use and storage of hazardous substances in groundwater protection areas and on river beds, due to the vulnerability of the aquifers and rivers to contamination; and</i></p> <p><i>(b) the discharge of hazardous waste to land or water.</i></p> <p><i>In these circumstances, the Council will use its powers under the RMA to impose controls more stringent than the HSNO regulations."</i></p>					
1039	Pernod Ricard Winemakers New Zealand Limited	102	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.5.1	Support
Decision Requested	Support Policy 15.5.1.					
1090	Ravensdown Limited	55	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.5.1	Support
Decision Requested	Retain Policy 15.5.1.					
1192	The Fertiliser Association of New Zealand	46	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.5.1	Support
Decision Requested	Retain Policy 15.5.1 as notified.					
1192	The Fertiliser Association of New Zealand	47	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.5.2	Support
Decision Requested	Retain Policy 15.5.2.					
990	Nelson Forests Limited	251	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.5.3	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend the explanation to the Policy to state as follows (or with words of similar effect) (bold) - <i>"A majority of the sites on the Register are identified as potentially contaminated and are included on the basis of HAIL. However, the risk of human health effects or adverse effects on the environment is unclear. For this reason, the Council will engage and work with affected parties to progressively screen those sites on the Register to determine the likely risk that the contaminants pose to human health and/or the surrounding environment. The degree of risk and the reasons will be recorded on the Register and shared with the affected parties."</i>					
1192	The Fertiliser Association of New Zealand	48	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.5.3	Support
Decision Requested	Retain Policy 15.5.3.					
962	Marlborough Forest Industry Association Incorporated	107	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.5.4	Support
Decision Requested	Clarify as to what is/is not significant.					
1192	The Fertiliser Association of New Zealand	49	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.5.4	Support
Decision Requested	Retain Policy 15.5.4.					
1002	New Zealand Transport Agency	84	Volume 1	15 Resource Quality (Water, Air, Soil)	Policy 15.5.5	Support in Part
Decision Requested	Amend Policy 15.5.5 as follows: <i>[...] Several agencies are potentially involved in any spill event, including the Council, Fire Service, Police, <u>the New Zealand Transport Agency road controlling authorities</u> and (in the coastal marine area) Maritime Safety. An ad hoc response from each agency creates the potential for ineffective containment and for soil contamination to occur over a wider area than if the spill was effectively contained. It is important therefore that the actions of each agency in responding to a spill are co-ordinated. This is especially the case considering the risks posed by the volume of goods transported to and through Marlborough on <u>the State Highway 4 network</u>.</i>					
91	Marlborough District Council	70	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.1	Support
Decision Requested	Add a new Indicator associated with 15.AER.1 (although partly an amendment of deleted part of previous indicator) as follows - " Increase in the number of catchment enhancement plans developed and implemented for waterbodies deemed degraded. "					
91	Marlborough District Council	123	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.1	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend the eight indicator for 15.AER.1 as follows (strike through) - " <i>Water quality which was degraded is enhanced so that the waterbodies can support natural and human use values. Catchment enhancement plans are developed and implemented.</i> "					
91	Marlborough District Council	159	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.1	Support
Decision Requested	An amendment is requested to the Indicator for 15.AER.1 as follows (bold) - " <i>Stormwater Management Area Plans are developed and implemented for all stormwater catchments that discharge into waterbodies and coastal waters with degraded water quality.</i> "					
91	Marlborough District Council	161	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.1	Support
Decision Requested	Add a new Indicator for 15.AER.1 as follows - " <i>The number of complaints about unlawful discharges of contaminants to water or discharges to land in circumstances where contaminants may reach water.</i> "					
1002	New Zealand Transport Agency	71	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.1	Support
Decision Requested	Retain Anticipated Environmental Result 15.AER.1.					
91	Marlborough District Council	158	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.2	Support
Decision Requested	To provide greater clarity to Plan users, an amendment is requested to the Indicator for 15.AER.2 as follows (bold) - " <i>With the exception of regionally significant infrastructure, there are no discharges of human sewage from land-based activities into the coastal waters of the Marlborough Sounds.</i> "					
710	The Fishing Industry Submitters	53	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.2	Oppose
Decision Requested	Amend 15.AER.2 as follows: <i>Water quality in Marlborough's coastal waters is suitable to support and sustain swimming, food gathering, <u>seafood harvesting and marine farming,</u> and marine ecosystems <u>and fisheries resources.</u></i> Amend 15.AER.2 by adding a new mechanism for monitoring effectiveness, as follows: <u><i>The number, duration and location of incidences in which seafood harvesting is prohibited or restricted for public health reasons.</i></u>					
716	Friends of Nelson Haven and Tasman Bay Incorporated	175	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.2	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Retain 15.AER.2.					
1089	Rarangi District Residents Association	9	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.3	Support in Part
Decision Requested	<p>That a new AER and two new Monitoring effectiveness criteria are added:</p> <p>15.AER.X Water quality in Rarangi is suitable for drinking, domestic use and sustaining aquatic ecosystems.</p> <p>Monitoring effectiveness:</p> <ol style="list-style-type: none"> 1. Water is tested annually at Wells 3668, 3711, 1634 and 4442 to ensure chrome, copper and arsenic levels are within health standards. 2. Water is tested annually at Wells 3668, 3711, 1634 and 4442 to ensure agrichemical residues are within health standards. 					
91	Marlborough District Council	68	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.5	Oppose
Decision Requested	Delete the second Indicator for 15.AER.5 as follows - " The average winter concentration of PM10 at Middle Renwick Road is 27 mg/m3 or less. "					
91	Marlborough District Council	69	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.5	Oppose
Decision Requested	Delete the first Indicator for 15.AER.5 as follows - " The average winter concentration of PM10 at Redwoodtown is 37 mg/m3 or less. "					
91	Marlborough District Council	67	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.7	Support
Decision Requested	Delete the first bullet point of the Indicator associated with 15.AER.7 as follows (strike through) - " Ambient monitoring of air pollutants throughout Marlborough, including: background concentrations of PM10 in Picton are established; "					
91	Marlborough District Council	66	Volume 1	15 Resource Quality (Water, Air, Soil)	15.AER.9	Oppose
Decision Requested	Delete the second Indicator associated with 15.AER.9 as follows - " The state of Marlborough's soil resource is reported on an annual basis. "					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
869	Kenepuru and Central Sounds Residents Association Incorporated	41	Volume 1	16 Waste	16.	Support in Part
Decision Requested	Insert an express policy to review and improve waste disposal and recycling opportunities for residents and visitors in the Sounds and other more remote areas.					
961	Marlborough Chamber of Commerce	85	Volume 1	16 Waste	16.	Support in Part
Decision Requested	No decision requested - none able to be inferred from submission.					
1186	Te Atiawa o Te Waka-a-Maui	95	Volume 1	16 Waste	16.	Support in Part
Decision Requested	Amend the AER to include specific goals and monitoring criteria for cultural values.					
962	Marlborough Forest Industry Association Incorporated	108	Volume 1	16 Waste	Issue 16A	Support in Part
Decision Requested	Provide policies or methods to address issue on private and public land.					
990	Nelson Forests Limited	252	Volume 1	16 Waste	Issue 16A	Oppose
Decision Requested	Develop policies and methods to address the issue of illegal dumping of solid waste – whether it is on public or private land.					
424	Michael and Kristen Gerard	130	Volume 1	16 Waste	Objective 16.1	Support
Decision Requested	Retain Objective 16.1					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
425	Federated Farmers of New Zealand	322	Volume 1	16 Waste	Policy 16.1.1	Support in Part
Decision Requested	Amend the Policy as follows: "Encourage waste minimisation practices by establishing a waste management hierarchy that ensures waste is managed in the following order of priority: (a) promoting lower levels of solid waste generation; then (b) promoting higher levels of reuse, recycling and recovery of solid waste; then and (c) disposing disposal of residual solid waste."					
255	Warwick Lissaman	9	Volume 1	16 Waste	Policy 16.1.2	Support
Decision Requested	Retain the policy (inferred).					
717	Fulton Hogan Limited	59	Volume 1	16 Waste	Policy 16.1.2	Support
Decision Requested	Retain Policy 16.1.2.					
425	Federated Farmers of New Zealand	323	Volume 1	16 Waste	16.M.1	Support
Decision Requested	Retain the Method.					
717	Fulton Hogan Limited	60	Volume 1	16 Waste	16.M.1	Support
Decision Requested	Retain 16.M.1 Regional rules.					
348	Murray Chapman	42	Volume 1	16 Waste	Objective 16.2	Support in Part
Decision Requested	Add provisions requiring the provisions of a centralized transfer station for rural rubbish in each major rural valley. (<i>Inferred</i>)					
425	Federated Farmers of New Zealand	324	Volume 1	16 Waste	Objective 16.2	Support in Part
Decision Requested	Amend Objective as follows (strike through and bold) - " Avoid, remedy or mitigate Manage actual or potential adverse effects arising from solid waste management activities."					
425	Federated Farmers of New Zealand	326	Volume 1	16 Waste	Objective 16.2	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That a new policy is added under this Objective which reads as follows - "Increase access for remote communities to solid waste disposal through the operation of landfill and associated transfer stations, and permissive on-farm waste disposal rules."					
425	Federated Farmers of New Zealand	325	Volume 1	16 Waste	Policy 16.2.1	Support in Part
Decision Requested	Retain Policy. <i>(Inferred)</i>					
425	Federated Farmers of New Zealand	327	Volume 1	16 Waste	Policy 16.2.3	Oppose
Decision Requested	That the Policy is amended to read as follows (bold) - <i>"Require resource consent for the establishment of cleanfills, excluding on-farm cleanfills that meet permitted activity standards, to ensure the appropriate disposal of waste."</i>					
348	Murray Chapman	15	Volume 1	16 Waste	Policy 16.2.4	Support in Part
Decision Requested	Delete the part of this policy relating to the disposal of biodegradable material in farm rubbish pits. <i>(Inferred)</i>					
425	Federated Farmers of New Zealand	328	Volume 1	16 Waste	Policy 16.2.4	Support in Part
Decision Requested	That the policy is amended as follows (strike through and bold) - <i>"Enable the application of solid waste to land from the processing of primary products, primary production activities, including the disposal of animal waste in offal pits, the disposal of biodegradable material in farm rubbish pits or the processing/storage of compost or silage, while avoiding or mitigating adverse effects: (a) this does not occur within a Groundwater Protection Area or into or onto soils identified as a Soil Sensitive Area as being at risk; and (b) standards for permitted activities are met."</i>					
1251	Fonterra Co-operative Group Limited	51	Volume 1	16 Waste	Policy 16.2.4	Oppose
Decision Requested	Amend Policy 16.2.4 as follows: <i>Enable the application of solid waste to land from the processing of primary products, the disposal of animal waste in offal pits, the disposal of biodegradable material in farm rubbish pits or the processing/storage of compost or silage, where:...</i>					
425	Federated Farmers of New Zealand	329	Volume 1	16 Waste	Policy 16.2.5	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the Policy is amended as follows (strike through) - "Where resource consent is required for the following adverse effects being avoided or mitigated, decision makers shall consider the following matters in deciding whether or not to grant consent and whether conditions can be imposed to avoid or mitigate any adverse effects on the environment:- (a) the soil characteristics at the discharge location and whether the nature and volume of waste to be discharged will adversely affect soil structure;- (b) where the discharge is within a Groundwater Protection Area or into or onto soil identified as a Soil Sensitive Area, the risks to groundwater, surface waterbodies or soil quality;- (c) contamination of freshwater resulting from nutrient (nitrogen and phosphorus) and organic nutrients (BOD) through leaching, runoff and/or direct discharge;- (d) the proximity of the discharge location to waterbodies with a high natural character or to waterbodies identified as having degraded water quality that needs to be enhanced through Policies 15.1.4 to 15.1.7 in Chapter 15 - Resource Quality (Water, Air, Soil); and- (e) the potential for reduced amenity values due to odour, vermin or visual effects from the discharge, particularly where this occurs in close proximity to residentially zoned land."					
280	Nelson Marlborough District Health Board	34	Volume 1	16 Waste	Policy 16.2.6	Support in Part
Decision Requested	Amend the wording of Policy 16.2.6 to the following: <i>'In deciding whether to grant resource consent for any discharge of solid waste to land and the need to impose consent conditions to avoid, remedy or mitigate adverse effects, decision makers need to determine whether there will be:</i> <i>(a) soil or groundwater contamination from the accumulation or leaching of heavy metals and other, hazardous substances or other contaminants</i> <i>(b) contamination of waterbodies through runoff of sediment or leachate</i> <i>(c) erosion, land instability and/or run-off of sediment into waterbodies due to land disturbance activities associated with the activity</i> <i>(d) adverse effects on public health or amenity</i> (e) reduced amenity values due to disposal of unauthorised material resulting in odours, rubbish accumulation and vermin <i>(f) adverse effects to the mauri of ecosystems, waahi tapu sites and other sites of cultural significance by discharges of sediment or leachate onto or into land.</i>					
1235	Wairau Valley Ratepayers and Residents' Association	9	Volume 1	16 Waste	Policy 16.2.7	Support
Decision Requested	Research is needed urgently into a safe way to dispose of these posts. Even if wine growers gradually change to non-treated posts over time there is a "mountain" of these posts that will require safe disposal. Clear guidelines must be available on safe methods of storing these posts until a suitable disposal method is developed.					
424	Michael and Kristen Gerard	131	Volume 1	16 Waste	Policy 16.2.8	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Retain Policy 16.2.8 Council should work with the community to achieve this outcome.					
425	Federated Farmers of New Zealand	330	Volume 1	16 Waste	Policy 16.2.8	Support in Part
Decision Requested	Amend the Policy as follows (strike through and bold) - "The Council to provide accessible waste disposal options to enable encourage the responsible disposal of solid waste from remote locations, while also enabling on-farm waste disposal." <i>(Inferred)</i>					
425	Federated Farmers of New Zealand	331	Volume 1	16 Waste	16.M.9	Support in Part
Decision Requested	That on-farm waste disposal remains a permitted activity. <i>(It is not clear in the submission what amendment is sought to the wording of the Method.)</i>					
676	Dairy NZ	78	Volume 1	16 Waste	Issue 16B	Oppose
Decision Requested	Amend Issue 16B to delete the reference to "domestic wastewater" and add a new provision(s) dealing with domestic wastewater issues.					
992	New Zealand Defence Force	16	Volume 1	16 Waste	Issue 16B	Oppose
Decision Requested	Amend provisions to improve clarity and direction in relation to stormwater discharges district wide, including to land.					
1251	Fonterra Co-operative Group Limited	114	Volume 1	16 Waste	Issue 16B	Support in Part
Decision Requested	Add a fifth bullet point to Issue 16B explanation as follows: <i>A strong rural economy and a prevalence of residential living in rural and coastal environments mean that a wide variety of liquid wastes are created in Marlborough. These include:</i> <ul style="list-style-type: none"> • <i>domestic wastewater;</i> • <i>dairy shed effluent;</i> • <i>winery wastewater; and</i> • <i>vegetable and shellfish processing wastewater</i> • <i>industrial and trade process wastewater</i> 					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
425	Federated Farmers of New Zealand	332	Volume 1	16 Waste	Objective 16.3	Oppose
Decision Requested	That the Policy is amended to read as follows (strike through and bold) - "The discharge of liquid wastes onto or into land is managed in a way that avoids, mitigates, or remedies adverse effects on water and soil quality, land and water ecosystems, slope stability and cultural and amenity values."					
998	New Zealand Pork Industry Board	39	Volume 1	16 Waste	Objective 16.3	Support
Decision Requested	Retain Objective 16.3.					
1090	Ravensdown Limited	56	Volume 1	16 Waste	Objective 16.3	Support
Decision Requested	Retain Objective 16.3.					
1251	Fonterra Co-operative Group Limited	52	Volume 1	16 Waste	Objective 16.3	Oppose
Decision Requested	Amend Objective 16.3 as follows: <i>The discharge of liquid wastes onto or into land is managed in a way that avoids <u>significant</u> adverse effects on water and soil quality, land and water ecosystems, slope stability and cultural and amenity values.</i>					
631	Constellation Brands New Zealand Limited	48	Volume 1	16 Waste	Policy 16.3.1	Support in Part
Decision Requested	Amend Policy 16.3.1 to the following (or similar): <i><u>Where necessary to avoid, remedy or mitigate effects on the receiving environment, ensure that wastewater management systems, including the consideration of measures to minimise waste quantities and contaminants, are designed, located and installed to effectively treat and/or contain the contaminant present in wastewater.</u></i>					
1251	Fonterra Co-operative Group Limited	115	Volume 1	16 Waste	Policy 16.3.1	Support in Part
Decision Requested	Amend Policy 16.3.1 as follows: <i>Ensure that wastewater management systems are designed, located and installed <u>to achieve the best practicable option and</u> effectively treat and/or contain the contaminants present in wastewater</i>					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
218	Salvador Delgado Oro Laprida	2	Volume 1	16 Waste	Policy 16.3.2	Support in Part
Decision Requested	Exclude any ship or barge used in aquaculture from the ambit of standard					
631	Constellation Brands New Zealand Limited	49	Volume 1	16 Waste	Policy 16.3.2	Support in Part
Decision Requested	Amend Policy 16.3.2 to the following (or similar): <i>Require discharge permits for the discharge of contaminants onto or into land where there are significant environmental constraints to ensure effective wastewater management <u>in accordance with Policy 16.3.1.</u></i>					
676	Dairy NZ	79	Volume 1	16 Waste	Policy 16.3.2	Oppose
Decision Requested	The submission does not include a decision requested, rather it requests information as to the decision to include these soil types in the MEP.					
776	Indevin Estates Limited	43	Volume 1	16 Waste	Policy 16.3.2	Support in Part
Decision Requested	Indevin submit that the MEP should include as a method the ongoing commitment of Council toward the further refining of the Soils Sensitive Areas and boundaries.					
998	New Zealand Pork Industry Board	40	Volume 1	16 Waste	Policy 16.3.2	Support
Decision Requested	Where there are significant environmental constraints to effective wastewater management the discharge of contaminants onto or into land should be permitted.					
425	Federated Farmers of New Zealand	333	Volume 1	16 Waste	Policy 16.3.3	Support in Part
Decision Requested	That the Policy is combined with Policy 16.3.4 and point (a) within Policy 16.3.3 is amended as follows (bold) - " (a) the discharge is within the ability of the land to treat and/or contain contaminants present in the liquid waste, taking into account where relevant: "					
501	Te Runanga O Ngati Kuia	81	Volume 1	16 Waste	Policy 16.3.3	Oppose
Decision Requested	Delete Policy. (<i>Inferred</i>)					
631	Constellation Brands New Zealand Limited	50	Volume 1	16 Waste	Policy 16.3.3	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend clause (c) of Policy 16.3.3 to read as follows (or similar) <i>(c) The land application area is located is located as far as practicable from any surface waterbody or coastal water; and the land application system is managed, such that the discharge of wastewater directly or via overland flow to a surface waterbody or coastal water is avoided.</i>					
1090	Ravensdown Limited	57	Volume 1	16 Waste	Policy 16.3.3	Support
Decision Requested	Retain Policy 16.3.3.					
1251	Fonterra Co-operative Group Limited	53	Volume 1	16 Waste	Policy 16.3.3	Oppose
Decision Requested	That Policy 16.3.3 be amended to offer protection for groundwater water such that it can continue to meet Drinking Water standards (without treatment) in the localities and at the depths that groundwater is taken for drinking water purposes. For example, amend Policy 16.3.3 (b) as follows: <i><u>Where groundwater is suitable for drinking, the discharge does not adversely affect the drinking water quality of groundwater adjacent to or down gradient of the discharge, either alone or in combination with any other discharge;</u></i>					
1251	Fonterra Co-operative Group Limited	116	Volume 1	16 Waste	Policy 16.3.3	Support in Part
Decision Requested	Amend Policy 16.3.3 as follows: <i>Approve discharge permit applications to discharge contaminants onto or into land where <u>they demonstrate best practicable option and where:...</u></i>					
425	Federated Farmers of New Zealand	334	Volume 1	16 Waste	Policy 16.3.4	Support in Part
Decision Requested	That the Policy is combined with Policy 16.3.3 and the first sentence of Policy 16.3.4 is amended as follows (bold) - <i>"When considering discharge permit applications to discharge contaminants onto or into land, have regard where relevant to:"</i>					
631	Constellation Brands New Zealand Limited	51	Volume 1	16 Waste	Policy 16.3.4	Support in Part
Decision Requested	Amend clause (a) of Policy 16.3.4 to read as follows (or similar) <i>(a) The extent of treatment prior to discharge to which the treatment prior to discharge is appropriate for the land application area and receiving environment.</i>					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
1090	Ravensdown Limited	58	Volume 1	16 Waste	Policy 16.3.4	Support
Decision Requested	Retain Policy 16.3.4.					
1251	Fonterra Co-operative Group Limited	117	Volume 1	16 Waste	Policy 16.3.4	Support in Part
Decision Requested	Amend Policy 16.3.4 as follows: <i>When considering discharge permit applications to discharge contaminants onto or into land, have regard <u>best practicable option and</u> to:</i>					
425	Federated Farmers of New Zealand	335	Volume 1	16 Waste	Policy 16.3.5	Support in Part
Decision Requested	That the Policy is amended to read as follows (strike through and bold) - <i>"When considering discharge permit applications to discharge contaminants onto or into land, have regard to sites of spiritual and/or cultural significance the cultural values of Marlborough's tangata whenua iwi."</i> And, that sites of spiritual and cultural significance are included in the Plan by way of reference to waahi tapu sites.					
1186	Te Atiawa o Te Waka-a-Maui	94	Volume 1	16 Waste	Policy 16.3.5	Support in Part
Decision Requested	Amend the Policy by deleting 'have regard' and replace with either, 'shall recognise and provide for' or 'shall have particular regard'.					
425	Federated Farmers of New Zealand	336	Volume 1	16 Waste	Policy 16.3.6	Oppose
Decision Requested	That the Policy is amended to read as follows (strike through and bold) - <i>"Avoid Discourage the use of soak pits for the disposal of contaminants in liquid waste."</i>					
631	Constellation Brands New Zealand Limited	22	Volume 1	16 Waste	Policy 16.3.7	Support
Decision Requested	Retain Policy 16.3.7					
425	Federated Farmers of New Zealand	337	Volume 1	16 Waste	Policy 16.3.8	Oppose
Decision Requested	That the Policy is deleted from the Plan.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
631	Constellation Brands New Zealand Limited	52	Volume 1	16 Waste	Policy 16.3.8	Support in Part
Decision Requested	Amend policy 16.3.8 to read as follows (or similar) <i>Monitor the operational performance of existing wastewater management systems and require poorly performing systems which are not providing sufficient treatment to avoid significant adverse environmental effects to be upgraded to or replaced with systems that effectively treat and contain all wastewater to the discharge site provide a suitable quality of treated wastewater to avoid adverse effects on the discharge area and receiving environment.</i>					
424	Michael and Kristen Gerard	133	Volume 1	16 Waste	Policy 16.3.9	Support
Decision Requested	Retain Policy 16.3.9					
425	Federated Farmers of New Zealand	338	Volume 1	16 Waste	Policy 16.3.9	Support
Decision Requested	That the Policy is retained as notified. And, that a new method is included which sets out Council's role in working with landowners in encouraging artificial wetlands.					
631	Constellation Brands New Zealand Limited	53	Volume 1	16 Waste	Policy 16.3.9	Oppose
Decision Requested	Delete Policy 16.3.9.					
592	Clifford John Smith	11	Volume 1	16 Waste	16.M.19	Support in Part
Decision Requested	That area guidelines (multiple vineyards operating adjacent to or in the same Township or residential area) should be formulated by MDC.					
269	Okiwi Bay Ratepayers Assn Inc	1	Volume 1	16 Waste	16.M.20	Oppose
Decision Requested	The relief we seek is that the MEP provides for existing properties which cannot meet the requirements, without requiring further upgrade, provided the systems are working within their initial design capabilities and no further load is added to the system, i.e. addition bedrooms.					
425	Federated Farmers of New Zealand	339	Volume 1	16 Waste	16.M.20	Oppose
Decision Requested	That the Method is deleted from the Plan.					
504	Queen Charlotte Sound Residents Association	74	Volume 1	16 Waste	16.M.20	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Discuss with effected communities and allow 7 years to design same. Also requires cooperation with Building division as per stand alone buildings of up to 10 cubic metres being allowed to be connected to existing systems without addressing capacity of same.					
515	Mt Zion Charitable Trust	1	Volume 1	16 Waste	16.M.20	Oppose
Decision Requested	Delete 16.M.20.					
424	Michael and Kristen Gerard	132	Volume 1	16 Waste	16.M.21	Support
Decision Requested	Retain 16.M.21

962	Marlborough Forest Industry Association Incorporated	110	Volume 1	17 Transportation	Policy 17.4.1	Support in Part
Decision Requested	Re-classify public roads to forest boundaries as arterial roads in the 5 year before and during harvest.					
990	Nelson Forests Limited	253	Volume 1	17 Transportation	Policy 17.4.1	Support in Part
Decision Requested	<p>Amend the explanation to the Policy as follows (or with words of similar effect) (bold) -</p> <p><i>"A major method in the MEP for managing the efficiency of the road network is through identification of a road's function, which is established by the road hierarchy. It is important that subdivision or activities that generate traffic (whether on land or in the coastal marine area) are managed so that their location, density and/or scale does not impair the function of a particular road. The functions of the roads (and hierarchy) must equally provide for expected rural/coastal industry transport needs. Management will occur through district rules that describe where there is a need to consider the impacts of activities on the function of a road through the a Controlled Activity resource consent process."</i></p>					
1002	New Zealand Transport Agency	91	Volume 1	17 Transportation	Policy 17.4.1	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Amend Policy 17.4.1 as follows: <i>Manage the density, scale, <u>design</u>, and location of subdivision and/or activities to maintain, <u>protect or improve</u> the planned function of the roading network, including through the avoidance of cumulative effects.</i></p> <p>Amend the reason for Policy 17.4.1 as follows: <i>A major method in the MEP for managing the efficiency of the road network is through identification of a road's function, which is established by the road hierarchy (set out in Appendix 17 and Policy 17.3.2). It is important that subdivision or and activities that generate traffic (whether on land or in the coastal marine area) are managed so that their location, density, <u>design</u>, and/or scale does not impair the function of a particular road, <u>including as a result of cumulative or reverse sensitivity effects</u>. Management will occur through district rules that describe where there is a need to consider the impacts of activities on the function of a road through the resource consent process, <u>and by overlay maps identifying limited access roads, Transport Cumulative Effects Areas, and State Highway effects and buffer areas.</u></i></p>					
1002	New Zealand Transport Agency	92	Volume 1	17 Transportation	Policy 17.4.2	Support in Part
Decision Requested	<p>Amend Policy 17.4.2 as follows: <i>Avoid the spread of residential, industrial or commercial development fronting national routes <u>State Highways</u> and arterial roads extending outwards from urban settlements or towns <u>to avoid cumulative effects on the road network</u>.</i></p> <p>Amend the Policy 17.4.2 reason as follows: <i>Avoiding the outward spread of urban areas (for residential, commercial or industrial development) along national <u>State Highways</u> or arterial routes and limited access roads will help protect the safety and efficiency of roading networks <u>including from cumulative effects</u>.</i></p>					
1002	New Zealand Transport Agency	93	Volume 1	17 Transportation	Policy 17.4.3	Support
Decision Requested	Retain Policy 17.4.3.					
1002	New Zealand Transport Agency	94	Volume 1	17 Transportation	Policy 17.4.4	Support
Decision Requested	Retain Policy 17.4.4.					
717	Fulton Hogan Limited	61	Volume 1	17 Transportation	Policy 17.4.5	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Policy 17.4.5 to remove the reference to locating activities on specific properties and to shift the focus to the access and include reference to minimising effects on amenity values associated with secondary routes. For example: Policy 17.4.5 - Commercial and industrial activities with potential to adversely affect the arterial road network should preferably be located on properties with access to secondary arterial and collector routes unless this will cause an adverse effect on the amenity of this road.					
1002	New Zealand Transport Agency	95	Volume 1	17 Transportation	Policy 17.4.5	Support
Decision Requested	Retain Policy 17.4.5.					
210	Kevin Wilson	9	Volume 1	17 Transportation	Policy 17.4.8	Support
Decision Requested	Retain the policy (inferred).					
471	Bike Walk Marlborough Trust	6	Volume 1	17 Transportation	Policy 17.4.8	Support in Part
Decision Requested	Amendments are requested that when rail corridors are not available and developed for the use of cycling or walking facilities along State Highway 1 that appropriate alternative cycling and walking infrastructure is developed to ensure both walkers and cyclists are provided well defined and safe transportation routes along State Highway 1. For example: Grovetown Shared pathway currently ends at the Opawa Bridge and cyclists heading south are expected to share the road with heavy traffic along Grove Road. As discussed in Policy 17.4.8 "although people do cycle this section of the state highway, the environment is not conducive to the activity." While a 50 km/hr speed limit is in place along Grove Road, and therefore reducing the risk of injuries as a result of collision, Bike Walk Marlborough requests that investigation and installation of appropriate facilities that not only alleviate safety concerns on State Highway 1 but actively encourage methods of active transport. Alternatively, a cycle crossing and route could be provided for to connect with and along Hutcheson Street, being a significantly lower volume road. It is also requested that inclusion of the proposed Opawa bridge be made and the proposal for a separate bike walk bridge and potential for installing an underpass connecting the east and west of Grove Road. Bike Walk Marlborough also advocates that well defined cycling infrastructure (e.g. cycle lanes) would create more cycle aware drivers and would therefore help to alleviate current risks at roundabouts {please note that the MDC 2016 'Crash or near miss reports' indicate 57% of issues are at intersections}.					
481	New Zealand Walking Access Commission	23	Volume 1	17 Transportation	Policy 17.4.8	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amendments are requested that when rail corridors are not available and developed for the use of cycling or walking facilities along State Highway 1 that appropriate alternative cycling and walking infrastructure is developed to ensure both walkers and cyclists are provided well defined and safe transportation routes along State Highway 1.					
873	KiwiRail Holdings Limited	74	Volume 1	17 Transportation	Policy 17.4.8	Support
Decision Requested	Retain as notified					
1002	New Zealand Transport Agency	96	Volume 1	17 Transportation	Objective 17.5	Support in Part
Decision Requested	<p>Amend Objective 17.5 to clarify its intent, for example: <i>The safety and accessibility of roads for <u>all users as they travel along the road network</u> pedestrians, cyclists and vehicle movement in general is maintained and/or improved.</i></p> <p>Amend the reason under Objective 17.5 as follows: <i>Important components in a sustainable land transport network are ensuring it can be used safely and is accessible for a range of uses <u>and users, including pedestrians, cyclists, and motor vehicles.</u></i></p>					
1235	Wairau Valley Ratepayers and Residents' Association	11	Volume 1	17 Transportation	Objective 17.5	Support
Decision Requested	Bearing the above in mind and considering proposed zone changes for some properties fronting the state highway from Township Residential or Rural 4 to Urban Residential 2 we feel there is a case to be made for lowering the speed limit to 50 kms per hour, such as is the case in Boyce Street, Renwick, which is used by many trucks.					
1002	New Zealand Transport Agency	97	Volume 1	17 Transportation	Policy 17.5.1	Support in Part
Decision Requested	<p>Amend Policy 17.5.1 as follows: Maintain road safety and accessibility by ensuring <i>Ensure that standards of road design, vehicle access, vehicle crossings, loading and parking are related to the intended planned function of the adjoining road in terms of the roading hierarchy in Policy 17.3.2 to maintain road safety and accessibility.</i></p> <p>Amend the reason under Policy 17.5.1 to better align with the policy.</p>

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	The decisions I seek from Council are:					
	1. Replace Section 19 with 'Section 1' and place it at the beginning of Vol !					
	2. Issue19A on page 1. Replace the heading "Climate change has the potential to affect..." with "Climate change will affect..."					
	3. In the 6 paragraphs following the above heading insert "will" in place of "could"and "may".					
	4. Issue19B (page 5): Replace the heading "Climate change could affect..." with "Climate change will affect..."					
	5. Create a MDC permanent full time Climate Change Advisor and establish a Climate Change Advisory Group as outlined in the Climate Karanga Marlborough submission.					
280	Nelson Marlborough District Health Board	37	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	That the Introduction to Chapter 19 recognises that climate change is the biggest global health threat of the 21st century and that MDC encourages action being taken towards decreasing carbon emissions.					
309	Pamela Nicholls	1	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	Make climate change a much higher priority throughout the MEP as detailed in the submission of the Climate Karanga Marlborough group.					
351	Helen Mary Ballinger	44	Volume 1	19 Climate Change	19.	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Include the following statement to the start of Line 1, Paragraph 1 of the Introduction:</p> <p><i>"Society currently relies on fossil fuels as an energy source but needs to find alternatives as quickly as possible. The consumption of these fuels and livestock farming are the two major contributors to the large increase in the release of carbon dioxide and other greenhouse gases into the atmosphere over the last 150 years."</i></p> <p>Re-word Line 5, Paragraph 1 of the Introduction to read:</p> <p><i>"Global temperatures are approximately 1.2°C higher than pre-industrial levels and 0.6°C higher now than they were in the early 1990s. To prevent dangerous and potentially irreversible impacts of climate change global temperatures must be kept well below 2°C above preindustrial levels."</i></p> <p>Re-word Line 6, Paragraph 1 of the Introduction by deleting "While there is not unanimous agreement" and start sentence with "There is now strong evidence..."</p> <p>Re-word Line 1, Paragraph 2 of the Introduction to read "In Marlborough, NWA predicts it is predicted that the mean temperature will increase by approximately 4 degree 1.8 degrees C by 2040 and 2 2.8 degrees C 2.8 degrees C by 2090 above the pre-industrial mean."</p> <p>Line 4, Paragraph 3 of the Introduction Adverse long term effects of global warming are likely to outweigh any regional short term benefits that may occur and should be reflected in this statement.</p>					
351	Helen Mary Ballinger	58	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	<p>Add a new Method of Implementation 19.M.X Tree Planting</p> <p>Council to assist to improve co-ordination between community-based groups and industry groups and help to provide an overall strategy around what tree species are planted and where, and simply encourage the planting of trees in this way, and also through Council's operations.</p>					
351	Helen Mary Ballinger	67	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	<p>Add the following AER to Chapter 19 Climate Change</p> <p>19.AER.4 <i>"There is a significant reduction in the carbon footprint of the Marlborough District".</i></p>					
378	Roger (Budyong) Edward and Leslie Janis Hill	1	Volume 1	19 Climate Change	19.	Support
Decision Requested	<p>The decision we seek from Council is that planning for the effects of Disruptive Climate Change needs to be high on the list of priorities for MDC and in recognition of that importance it should be reclassified as Section 1 in the MEP rather than relegated to the bottom of the list as if it is an afterthought.</p>					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
401	Aquaculture New Zealand	182	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	Amend chapter 19 title to read "Climate Change and Ocean Acidification."					
426	Marine Farming Association Incorporated	190	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	Amend chapter 19 title to read "Climate Change and Ocean Acidification."					
427	Hugh Walter Royston Steadman	1	Volume 1	19 Climate Change	19.	Oppose
Decision Requested	Chapter 19 should be renumbered Chapter 1. A 'Plan B' for Marlborough's continued functioning in the face of accelerated climate destabilisation, should be prepared and updated more frequently than once every decade.					
478	Birte Flatt	1	Volume 1	19 Climate Change	19.	Oppose
Decision Requested	The Council accepts in full the reality of the exponential changes being wrought by Climate Change and raises the profile of global warming and climate disruption within their Environment Plan. That Council appoints a permanent Clime Change Adviser and establishes a regional Climate Change Advisory Group.					
501	Te Runanga O Ngati Kuia	80	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	Addition of policies as follows (<i>specific wording and applicable Objectives not identified in Submission</i>) - - Enable the installation, operation and utilisation of alternative energy sources that do not release greenhouse gasses. - Promote and enable afforestation both commercial and conservation planting. (<i>Inferred</i>)					
515	Mt Zion Charitable Trust	7	Volume 1	19 Climate Change	19.	Oppose
Decision Requested	Delete Chapter 19.					
716	Friends of Nelson Haven and Tasman Bay Incorporated	176	Volume 1	19 Climate Change	19.	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the following amendments (strike-through and bold) are made to the first sentence of the second paragraph: Introduction <i>In Marlborough, NIWA predicts that the mean temperature will increase by approximately 1 degree by 2040 2066 and 2 degrees by 2090 2116. Increases in temperatures are likely to increase past these dates. The climate is likely to become drier and the frequency of droughts is expected to increase. There is also a predicted increase in westerly winds, especially in winter and spring.</i>					
768	Heritage New Zealand Pouhere Taonga	23	Volume 1	19 Climate Change	19.	Oppose
Decision Requested	Council develop an appropriate anticipated environmental result to address Objective 9.4. Heritage New Zealand recommends the following monitoring clauses to address cultural and historic heritage values: <ul style="list-style-type: none"> • The condition, of Heritage Resources as defined in Volume 2, is maintained or improved • The instances of archaeological site damage recorded by Heritage New Zealand decreases or is maintained at zero, and the instances of site avoidance increase. 					
869	Kenepuru and Central Sounds Residents Association Incorporated	42	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	Insert a clear Policy in Chapter 19 requiring Council to review existing Council infrastructure such as roads in the context of this issue and report as to what measures/ steps need to be taken to either protect it and/or replace it [<i>inferred</i>].					
934	M J H and R L Davison Family Trust	1	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	Amend the Introduction. (<i>Submitter has not identified the specific changes sought to the Introduction.</i>)					
961	Marlborough Chamber of Commerce	96	Volume 1	19 Climate Change	19.	Oppose
Decision Requested	No decision requested - none able to be inferred from submission.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
990	Nelson Forests Limited	259	Volume 1	19 Climate Change	19.	Oppose
Decision Requested	<p>Insert the following policy (or words with similar effect) into the Climate Change Section -</p> <p>"Establishing both plantation forests and carbon sequestration forests is a matter of national priority and will be supported by rules and other methods in the MEP."</p>					
1059	Climate Karanga Marlborough	1	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	<p>Amend the Introduction as follows (strike through and bold) -</p> <p><i>"Society will continue to rely currently relies on fossil fuels as an energy source for the foreseeable future but needs to find alternatives as quickly as possible. The consumption of these fuels results and livestock farming are the two major contributors to the large increase in the release of carbon dioxide and other greenhouse gases into the atmosphere over the last 150 years. The general consensus of scientific opinion is that the world is getting warmer, causing its climate to change. Global temperatures are approximately 0.6 degrees Celsius 1.2°C higher than pre-industrial levels and 0.6°C higher now than they were in the early 1990s. To prevent dangerous and potentially irreversible impacts of climate change global temperatures must be kept well below 2°C above pre-industrial levels. While there is not unanimous agreement, There is now strong evidence that most of the warming observed is attributable to increased concentrations of greenhouse gases produced by human activities. As more gases accumulate in the atmosphere, the Earth gets warmer, resulting in rising sea temperatures and levels, the melting of glaciers and ice caps and greater extremes in weather patterns, such as more storms of greater intensity and longer droughts.</i></p> <p><i>In Marlborough, NHWA predicts it is predicted that the mean temperature will increase by approximately 1 1.8 degrees C by 2040 and 2 2.8 degrees C by 2090 above the pre-industrial mean. The climate is likely to become drier and the frequency of droughts is expected to increase. There is also a predicted increase in westerly winds, especially in winter and spring.</i></p> <p><i>Section 7 of the Resource Management Act 1991 (RMA) requires the Council to have regard to the effects of these predicted climatic changes in exercising its functions under the RMA. Uncertainty about the nature of these effects at international, national and local level makes this a difficult task. Most projections are also long term and certainly beyond the ten year life of the Marlborough Environment Plan (MEP). Taking all of this into account, the provisions of this chapter focus on applying the best available information to enable people and communities to respond to the adverse and positive effects created by climate change. It is noted that the adverse long term effects of global warming are likely to outweigh any regional short term benefits that may occur. (Inferred)"</i></p>					
1059	Climate Karanga Marlborough	13	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	<p>Add a new Method of Implementation as follows -</p> <p>"Advisory group - An advisory group be established of science, industry, business and community representatives to work with Council in a collaborative way on identifying climate change threats in Marlborough and on devising appropriate responses."</p>					
1059	Climate Karanga Marlborough	18	Volume 1	19 Climate Change	19.	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Add an additional Anticipated Environmental Result as follows - <i>"There is a significant reduction in the carbon footprint of the Marlborough District".</i>					
1059	Climate Karanga Marlborough	20	Volume 1	19 Climate Change	19.	Support in Part
Decision Requested	Affitiate MDC with the Global Covenant of Mayors for Climate and Energy, in order to ensure Council keeps abreast of the latest strategies for tackling climate change at regional/city level and is at the forefront of supporting innovations to de-carbonise the Marlborough economy.					
89	Peter Deacon	2	Volume 1	19 Climate Change	Issue 19A	Support in Part
Decision Requested	Amend Chapter 19 - Issue 19A in accordance with my submission above.					
230	Marion Harvey	1	Volume 1	19 Climate Change	Issue 19A	Support in Part
Decision Requested	<p>1. Make changes to the wording of the plan to acknowledge and give due weight to the seriousness of the threats posed by climate change, currently these are downplayed (see submission).</p> <p>2. Strengthen emphasis on the importance of research and acknowledge the sources of information that are available. While there are still elements of uncertainty, these do not reduce the ability of the Council to take action on climate change and make effective decisions as the plan currently implies.</p> <p>3. Focus on reducing regional greenhouse gas emissions, not on offsetting.</p> <p>4. Give climate change its proper place at the forefront of this Environmental Plan, designed to carry through until 2026 or later, Chapter 1 not Chapter 19.</p>					
280	Nelson Marlborough District Health Board	38	Volume 1	19 Climate Change	Issue 19A	Support in Part
Decision Requested	That the explanation to Issue 19A is expanded to recognise other serious public health effects such injury or stress related mental health effects from extreme weather events (e.g. floods, droughts or fires) and changing insect born disease patterns such as certain mosquito species becoming established.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
351	Helen Mary Ballinger	45	Volume 1	19 Climate Change	Issue 19A	Support in Part
Decision Requested	<p>Issue 19A Paragraph 4 explanation Recognition of the far greater likelihood of adverse effects from global warming <u>should be put last in this section.</u></p> <p>Issue 19A Paragraph 7 explanation "The predictions of climate change at a national level involve significant uncertainty and little work has been undertaken to apply these national predictions to Marlborough's climate. This makes the task of responding to the effects of climate change in Marlborough difficult. This situation is complicated further by the fact that New Zealand and Marlborough are subject to natural climate variations associated with La-Nina/El Nino and the Interdecadal Pacific oscillation. These natural variations will be superimposed on human-induced long term climate changes." Delete this paragraph as it adds nothing of value to the plan.</p>					
716	Friends of Nelson Haven and Tasman Bay Incorporated	177	Volume 1	19 Climate Change	Issue 19A	Support in Part
Decision Requested	That reference in is added to the issues statement that any decrease in water availability will also increase competition between existing water users and values, both extractive and in-stream.					
1059	Climate Karanga Marlborough	19	Volume 1	19 Climate Change	Issue 19A	Support in Part
Decision Requested	<ul style="list-style-type: none"> Paragraph 4 under this Issue should be moved to the end of the section. Recognise the likely adverse effects on mental health in Paragraph 5 under this Issue. Delete the final paragraph under this Issue. <p>(Inferred)</p>					
89	Peter Deacon	3	Volume 1	19 Climate Change	Objective 19.1	Support in Part
Decision Requested	Amend Chapter 19 - Objective 19.1 in accordance with my submission above.					
351	Helen Mary Ballinger	46	Volume 1	19 Climate Change	Objective 19.1	Oppose

Decision Requested	Retain as notified. (Inferred)					
1016	Philip Erwin Hunnisett	1	Volume 1	19 Climate Change	Policy 19.1.1	Support in Part
Decision Requested	Council need to take a strong precautionary approach to any activity that promotes fossil fuel burning and instead promote drastic cut backs on carbon emissions. Marlborough District Council is urged to participate in the "Global Covenant of Mayors for Climate Change and Energy". This is a global initiative committed to climate leadership.					
1059	Climate Karanga Marlborough	3	Volume 1	19 Climate Change	Policy 19.1.1	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Amend the Policy as follows (strike through) - <i>"Promote actions within Marlborough to reduce or offset carbon emissions."</i></p> <p>And, the explanatory text to the Policy be amended as follows (strike through and bold) - <i>"Climate change is a global issue that New Zealand's central government is addressing at an international and national level. The RMA effectively excludes regional councils from the role of regulating emissions for climate change purposes (Sections 70A and 104E of the RMA). However, the Council can explore opportunities for supporting national policies and where appropriate promote methods that address climate change problems within New Zealand's national policy framework for climate change. For example, the Council could will assess and then address the carbon footprint of delivering its own services to the community and encourage businesses to do likewise. This is one of many actions the Council could undertake to enable Marlborough's people and communities to play their part in responding to this global issue."</i></p>					
89	Peter Deacon	5	Volume 1	19 Climate Change	Policy 19.1.2	Support in Part
Decision Requested	<p>The Council should decide to take actions that will actually achieve the stated intent of this objective and not just pay it lip service. Council should:-</p> <p>1) Establish a new permanent position of 'MDC Climate Change Adviser'. The purpose of this appointment would be to provide expert advice, information, training, education and support to Council and local residents/businesses, to help them better understand and respond to climate change. This is the greatest environmental challenge we face as a species and probably the greatest threat to civilisation since the second world war. If we are to respond to it with the scale and urgency required then a lot more resources are going to be needed and having someone on the Council team with the right knowledge and expertise will be essential.</p> <p>2) Publish a clear action plan of measures the Council intends to take in the short and medium term to achieve the stated intent of this objective - i.e. to actually improve the community's understanding of climate change - rather than leaving ratepayers in blissful ignorance, as most of them are currently.</p>					
250	Don Miller	1	Volume 1	19 Climate Change	Policy 19.1.2	Support
Decision Requested	<p>The MDC must make the actions of Policy 19.1.2 of the utmost importance now to overcome past misconceptions of the impacts of climate change</p>					
351	Helen Mary Ballinger	48	Volume 1	19 Climate Change	Policy 19.1.2	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Include in the explanatory paragraph and the Anticipated Environmental Result 19.AER.1 on how this policy is to be achieved in practice. Inclusion of public outreach or education programme or consultative process in the AERs to get local people and businesses up to speed with the environmental changes, how to prepare for them and take actions to mitigate them (<i>inferred</i>).					
401	Aquaculture New Zealand	180	Volume 1	19 Climate Change	Policy 19.1.2	Support in Part
Decision Requested	Amend Policy 19.1.2 to read "...potential effects of climate change and ocean acidification..."					
426	Marine Farming Association Incorporated	188	Volume 1	19 Climate Change	Policy 19.1.2	Support in Part
Decision Requested	Amend Policy 19.1.2 to read "...potential effects of climate change and ocean acidification..."					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	371	Volume 1	19 Climate Change	Policy 19.1.2	Support
Decision Requested	Retain Policy 19.1.2					
716	Friends of Nelson Haven and Tasman Bay Incorporated	179	Volume 1	19 Climate Change	Policy 19.1.2	Support
Decision Requested	Retain Policy 19.1.2.					
1059	Climate Karanga Marlborough	4	Volume 1	19 Climate Change	Policy 19.1.2	Support in Part
Decision Requested	Amend the explanatory text for the Policy to explain how the Policy is going to be achieved in practice. There is no mention of any public outreach or education programme or consultative process to get local people and businesses up to speed with the environmental changes we are facing and how to prepare for them and take actions to mitigate them. And, we recommend that Council establishes a new permanent position of 'MDC Climate Change Advisor'.					
89	Peter Deacon	6	Volume 1	19 Climate Change	Policy 19.1.3	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>The penultimate sentence in the supporting paragraph to Policy 19.1.3 should be removed as it is completely incorrect. There will be no opportunities for aquaculture as a result of increasing water temperatures - quite the reverse - increasing sea temperatures will destroy aquaculture in the Marlborough region.</p> <p>MDC needs to employ people with the necessary expertise to advise them properly on Climate Change and its impacts on marine and terrestrial biology. MDC should urgently appoint a Climate Change Adviser.</p>					
351	Helen Mary Ballinger	49	Volume 1	19 Climate Change	Policy 19.1.3	Oppose
Decision Requested	Include any moves towards diversification of the primary industries <i>(inferred)</i> .					
401	Aquaculture New Zealand	181	Volume 1	19 Climate Change	Policy 19.1.3	Support in Part
Decision Requested	Amend Policy 19.1.3 to read "Enable primary industries to adapt to the effects of climate change and ocean acidification."					
425	Federated Farmers of New Zealand	342	Volume 1	19 Climate Change	Policy 19.1.3	Support
Decision Requested	That the Policy is retained as notified.					
426	Marine Farming Association Incorporated	189	Volume 1	19 Climate Change	Policy 19.1.3	Support in Part
Decision Requested	Amend Policy 19.1.3 to read "Enable primary industries to adapt to the effects of climate change and ocean acidification."					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
716	Friends of Nelson Haven and Tasman Bay Incorporated	180	Volume 1	19 Climate Change	Policy 19.1.3	Support in Part
Decision Requested	That the following amendment (bold) is made to Policy 19.1.3: <i>Policy 19.1.3 Enable primary industries to adapt to the effects of climate change by ensuring that plan rules are sufficiently flexible whilst ensuring land uses continue to be consistent with the purpose of the RMA.</i>					
1059	Climate Karanga Marlborough	5	Volume 1	19 Climate Change	Policy 19.1.3	Support in Part
Decision Requested	Amend the explanatory text for the Policy, particular the sentence, " <i>Similar opportunities could exist for the aquaculture industry as a result of increasing sea water temperatures.</i> " The text should also identify the much greater threat of adverse effects.					
1251	Fonterra Co-operative Group Limited	54	Volume 1	19 Climate Change	Policy 19.1.3	Support
Decision Requested	Retail Policy 19.1.3					
351	Helen Mary Ballinger	50	Volume 1	19 Climate Change	Policy 19.1.4	Support
Decision Requested	Retain Policy 19.1.4					
425	Federated Farmers of New Zealand	343	Volume 1	19 Climate Change	Policy 19.1.4	Oppose
Decision Requested	That the Policy is deleted.					
716	Friends of Nelson Haven and Tasman Bay Incorporated	181	Volume 1	19 Climate Change	Policy 19.1.4	Support in Part
Decision Requested	That the following amendment (bold) is made to Policy 19.1.4: <i>Policy 19.1.4 Take a precautionary approach to the allocation of additional freshwater resources and where freshwater has already been allocated, ensure that the allocation reflects the status of the resource and the effects on both extractive and instream uses and values.</i>					
1059	Climate Karanga Marlborough	6	Volume 1	19 Climate Change	Policy 19.1.4	Support
Decision Requested	Retain Policy. (<i>Inferred</i>)					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type

1201	Trustpower Limited	115	Volume 1	19 Climate Change	Policy 19.1.5	Oppose
Decision Requested	Trustpower seeks the following relief from the Marlborough District Council: 1. Delete Policy 19.1.5. 2. Any similar or consequential amendments to the PMEP that stem from the submission and relief sought.					
1251	Fonterra Co-operative Group Limited	56	Volume 1	19 Climate Change	Policy 19.1.5	Support in Part
Decision Requested	Amend Policy 19.1.5 to remove duplication with other policies on the allocation of water in the pMEP.					
89	Peter Deacon	7	Volume 1	19 Climate Change	19.M.1	Support in Part
Decision Requested	Amend Chapter 19 - Method 19.M.1 of the Proposed Plan in accordance with my submission above The method should therefore read - " <i>Investigate Council operations to establish their carbon footprint, set goals for reducing carbon emissions in accordance with New Zealand's national emissions reduction targets, and develop an action plan to reach those goals</i> " It is of imperative that the entire Marlborough region takes action to lower carbon emissions, not just Council, and we therefore encourage MDC to promote regional initiatives such as electrification of transport, conversion of waste biomass to energy which could support a thriving local renewable energy industry, regeneration of native forests to act as carbon sinks and increasing carbon sequestration in soils by encouraging farms and vineyards to incorporate more use of biochar and composting in their production systems.					
351	Helen Mary Ballinger	52	Volume 1	19 Climate Change	19.M.1	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Make the following changes (strikethrough) to 19.M.1 Council carbon footprint: " <i>Investigate Council operations to establish their carbon footprint, set goals for reducing carbon emissions in accordance with New Zealand's national emissions reduction targets, and develop an action plan to reach those goals</i> ".					
1059	Climate Karanga Marlborough	8	Volume 1	19 Climate Change	19.M.1	Support in Part
Decision Requested	Amend the Method explanatory text as follows (bold) - " <i>Investigate Council operations to establish their carbon footprint; set goals for reducing carbon emissions in accordance with New Zealand's national emissions reduction targets, and develop an action plan to reach those goals.</i> "					
89	Peter Deacon	8	Volume 1	19 Climate Change	19.M.2	Support in Part
Decision Requested	<p><u>19.M.2Marlborough Regional Land Transport</u></p> <p>Council should be more positive in this paragraph and instead of just '<i>considering</i>' provisions to reduce GHG emissions this statement should read "<i>In the review of the Marlborough Regional Land Transport Plan, Council will include provisions to reduce emissions of greenhouse gases</i>".</p> <p>This is crucial since transport accounts for 20% of New Zealand's GHG emissions and there is huge potential for these emissions to be reduced. All indications are that uptake of electric cars will explode over the next decade and MDC should be proactive in this area by installing rapid charging facilities in the main Marlborough towns, promoting the electrification of local public transport and introducing electric cars to its fleet as soon as possible.</p>					
351	Helen Mary Ballinger	53	Volume 1	19 Climate Change	19.M.2	Support in Part
Decision Requested	Make the following changes (strikethrough and underlined) to 19.M.2 Marlborough Regional Land Transport Plan: Consider , <i>In the review of the Marlborough Regional Land Transport Plan, <u>Council will include</u> provisions to reduce emissions of greenhouse gases.</i>					
1059	Climate Karanga Marlborough	9	Volume 1	19 Climate Change	19.M.2	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend the explanatory text to the Method as follows - " Consider , In the review of the Marlborough Regional Land Transport Plan, Council will include provisions to reduce emissions of greenhouse gases."					
351	Helen Mary Ballinger	54	Volume 1	19 Climate Change	19.M.4	Support in Part
Decision Requested	Make the following changes (underlined) to 19.M.4 Research: <i>Apply the findings of international and national climate change research to Marlborough's environment to the extent that is possible <u>and support research in Marlborough</u>. The findings can then be applied to determine and better understand the implications of climate change.</i>					
1059	Climate Karanga Marlborough	10	Volume 1	19 Climate Change	19.M.4	Support in Part
Decision Requested	Amend the explanatory text to the Method as follows (bold) - " <i>Apply the findings of international and national climate change research to Marlborough's environment to the extent that is possible and support research in Marlborough. The findings can then be applied to determine and better understand the implications of climate change.</i> "					
89	Peter Deacon	9	Volume 1	19 Climate Change	19.M.5	Support
Decision Requested	Council should ensure this provision remains in the Marlborough Environment Plan.					
351	Helen Mary Ballinger	55	Volume 1	19 Climate Change	19.M.5	Support
Decision Requested	Retain Method of Implementation 19.M.5 Information.					
1059	Climate Karanga Marlborough	11	Volume 1	19 Climate Change	19.M.5	Support in Part
Decision Requested	Retain Method. (<i>Inferred</i>)					
89	Peter Deacon	10	Volume 1	19 Climate Change	19.M.7	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Council should ensure this provision remains in the Marlborough Environment Plan.					
	In addition Council should add another Method of Implementation as follows:-					
	<u>19.M.8 Regional Climate Change Advisory Group</u>					
	"Council will establish a Climate Change Advisory Group comprising representatives from science, industry, business and the local community to work with Council in a collaborative way to identify regional climate change threats in Marlborough and devise appropriate adaptation and mitigation responses."					
351	Helen Mary Ballinger	56	Volume 1	19 Climate Change	19.M.7	Support
Decision Requested	Retain Method of Implementation 19.M.7 District rules.					
1059	Climate Karanga Marlborough	12	Volume 1	19 Climate Change	19.M.7	Support
Decision Requested	Retain Method. (<i>Inferred</i>)					
89	Peter Deacon	11	Volume 1	19 Climate Change	Issue 19B	Support in Part
Decision Requested	<u>Page 19-5 Issue 19B – Climate change could affect natural hazards and create a coastal inundation hazard associated with sea level rise</u>					
	Paragraph 3					
	The word ' <i>potentially</i> ' should be removed from the sentence ' <i>This rise potentially increases the risk of inundation at the coast.</i> ' Inundation will happen due to sea level rise, particularly during storm events, it is only a matter of how soon this happens as the seas are not going to stop rising for centuries possible millenia.					
351	Helen Mary Ballinger	59	Volume 1	19 Climate Change	Issue 19B	Support in Part
Decision Requested	Make the following change (strikethrough) to Line 3 Paragraph 3 Issue 19B <i>This rise potentially increases the risk of inundation at the coast.</i>					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
688	Judy and John Hellstrom	173	Volume 1	19 Climate Change	Issue 19B	Support in Part
Decision Requested	That Issue 19B refers to land subsidence in the Sounds as it currently significantly adds to the rate of sea-level rise here.					
716	Friends of Nelson Haven and Tasman Bay Incorporated	183	Volume 1	19 Climate Change	Issue 19B	Oppose
Decision Requested	<p>That the following amendment (strike-through) is made to Issue 19B:</p> <p><i>Issue 19B – Climate change could affect natural hazards and create a coastal inundation hazard associated with sea level rise.</i></p> <p>Add a further issue statement, objective and policies relating to addressing climate change that give effect to NZCPS policies 14 and 26.</p>					
1059	Climate Karanga Marlborough	14	Volume 1	19 Climate Change	Issue 19B	Support in Part
Decision Requested	<p>Amend paragraph three of the explanatory text to the Issue as follows -</p> <p><i>"Global warming is expected to result in a rise in sea level due to thermal expansion of ocean water and melting of glacial and polar ice. Sea level is predicted to rise around 0.18 to 0.59 metres by 2090. This rise potentially increases the risk of inundation at the coast. Coastal erosion could also become more prevalent, increasing the need for coastal protection measures. Along the coastal margin of the Wairau Plain, the level of the Wairau River bar and river mouth efficiency has far greater influence on the potential for inundation than the projected sea level rise. Further south, the topography and lack of settlement minimises any inundation risk. However, the risks are far greater in the Marlborough Sounds where settlement and associated infrastructure (especially means of access, such as jetties and access tracks) tend to be located in the coastal environment and near the water edge."</i></p>					
89	Peter Deacon	12	Volume 1	19 Climate Change	Objective 19.2	Support in Part
Decision Requested	<p><u>Page 19-5 Objective 19.2 - Avoid and mitigate the adverse effects of natural hazards influenced by climate change</u></p> <p>Paragraphs 1 and 2</p> <p>Council should add another Objective here to investigate where and how the effects of sea level rise will be felt in Marlborough, and into what measures are needed to future-proof communities and create resilience to sea level rise.</p>					
351	Helen Mary Ballinger	60	Volume 1	19 Climate Change	Objective 19.2	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend the wording in paragraphs 1 and 2 of Objective 19.2 to acknowledge the need to support investigations of where and how these effects will be felt, and into future-proofing communities to create resilience to sea level rise.					
425	Federated Farmers of New Zealand	345	Volume 1	19 Climate Change	Objective 19.2	Support in Part
Decision Requested	That the Objective is amended to read as follows (bold) - <i>"Avoid and mitigate the adverse effects of natural hazards influenced by climate change on human communities."</i>					
716	Friends of Nelson Haven and Tasman Bay Incorporated	184	Volume 1	19 Climate Change	Objective 19.2	Support
Decision Requested	The submission states to add to Objective 19.2 the following words: <i>that the adverse effects of hazard mitigation structures are managed consistent with the purpose of the RMA</i> but does not specifically indicate where this to be added.					
716	Friends of Nelson Haven and Tasman Bay Incorporated	186	Volume 1	19 Climate Change	Objective 19.2	Oppose
Decision Requested	New policy required. The submission does not include details of the new policy.					
990	Nelson Forests Limited	258	Volume 1	19 Climate Change	Objective 19.2	Support
Decision Requested	Retain this Objective. <i>(Inferred)</i>

Decision Requested	Add the following (<i>italics</i>) to 19.M.8 Advisory Group: Establish an advisory group of science, industry, business and community representatives to work with Council in a collaborative way on identifying climate change threats in Marlborough and on devising appropriate responses.					
504	Queen Charlotte Sound Residents Association	77	Volume 1	19 Climate Change	19.M.8	Support
Decision Requested	Retain 19.M.8.					
351	Helen Mary Ballinger	64	Volume 1	19 Climate Change	19.AER.1	Support in Part
Decision Requested	Retain 19.AER.1 The community's understanding of the effects of climate change and sea level rise improves over time.					
351	Helen Mary Ballinger	65	Volume 1	19 Climate Change	19.AER.2	Support in Part
Decision Requested	Retain 19.AER.2 Primary producers are able to adapt to the effects of climate change.					
89	Peter Deacon	13	Volume 1	19 Climate Change	19.AER.3	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Council should retain the 3 Anticipated Environmental Results and add a fourth:- 19.AER.4 " <i>There is a significant reduction in the carbon footprint of the Marlborough District</i> ".					
351	Helen Mary Ballinger	66	Volume 1	19 Climate Change	19.AER.3	Support in Part
Decision Requested	Retain 19.AER.3 Buildings and infrastructure established after the notification of the MEP are not inundated by the sea.					
504	Queen Charlotte Sound Residents Association	78	Volume 1	19 Climate Change	19.AER.3	Support
Decision Requested	Retain 19.AER.3 (<i>inferred</i>).					

Summary of decisions requested - by provision

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
75	Girl Guiding New Zealand	1	Volume 2	All		Support in Part
Decision Requested	<p>It is therefore requested that provision be made in the Marlborough Environment Plan for organised Guiding camp fires to be an authorised activity in all zones where fires are permitted for any other purpose. Its is appreciated that this must be a Restricted Activity.</p> <p>Girl Guiding is a responsible organisation and is very open to suggestions of additional training or administration deemed appropriate to allow this activity to go ahead and hence train our girls in both fire safety and environmental responsibility in a fun, supportive and structured environment.</p>					
222	Jessica Bagge	1	Volume 2	All		Oppose
Decision Requested	<p>I would like to see some amendments/alternatives to the LRV concept.</p> <p>I will present some options to the Hearing Committee.</p>					
263	Mark Batchelor	2	Volume 2	All		Oppose
Decision Requested	<p>Add the following rules to the rules in each zone.</p> <p><i>Existing trees within roads shall be retained unless they are replaced within 1 month of their removal.</i></p> <p><i>Any new subdivisions shall include trees planted within the road reserves and the applications for consent to subdivide shall include a landscape planting and land shaping plan including street trees at a minimum of one tree located within the area of the road reserve that is adjacent to each lot within the subdivision.</i></p> <p><i>Pruning or removal of any trees within street, reserves and other areas of public thoroughfare shall require resource consent.</i></p> <p><i>Any trees removed for the purpose of protecting existing lines shall be replaced by new trees.</i></p> <p><i>Where any telecommunication or lines for similar purpose and electricity lines are being installed or replaced these shall be installed underground.</i></p> <p><i>Equipment, structures and containers associated with services and utilities located within roadways shall be screened by vegetation and coloured in low reflectivity colours [these will need to be specified in the rule].</i></p>					
280	Nelson Marlborough District Health Board	94	Volume 2	All		Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Allow the provision in part and amend as follows: AND CONSEQUENTIALLY AMEND THROUGHOUT VOLUMES 2 AND 3 OF THE PLAN</p> <p>Replace in all rules occurrences of the term "dBA LAeq" with "(dB LAeq)"</p> <p>Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.</p>					
290	David Wilson	10	Volume 2	All		Oppose
Decision Requested	<p>there should be rules regarding this activity especially for urban areas where runoff can contain fecal coliforms</p>					
425	Federated Farmers of New Zealand	347	Volume 2	All		Oppose
Decision Requested	<p>That the layout of the rules is simplified so that the permitted activity standards are provided alongside the name of the permitted activity in the first instance.</p>					
425	Federated Farmers of New Zealand	348	Volume 2	All		Oppose
Decision Requested	<p>That a graduated approach to activity status is used, including utilisation of the six activity classes: permitted, controlled, restricted discretionary, discretionary, non-complying and prohibited.</p> <p>That all rules, relating to rural activities (<i>inferred</i>), currently classed as discretionary status or defaulting to discretionary status are amended to controlled or restricted discretionary status, unless otherwise specified. (<i>The Submitter has not specified the specific provisions and changes sought.</i>)</p>					
425	Federated Farmers of New Zealand	349	Volume 2	All		Oppose
Decision Requested	<p>That the permitted activity standards are revised and simplified so that they focus on the key areas that may cause adverse effects. (<i>The Submitter has not specified the specific provisions and changes sought.</i>)</p>					
425	Federated Farmers of New Zealand	350	Volume 2	All		Oppose
Decision Requested	<p>That prohibited activity status is only used when an activity must be avoided, and has been through a robust Section 32 analysis to determine the costs and benefits of such an approach. (<i>The Submitter has not specified any specific provisions to be added, deleted or amended.</i>)</p>					
425	Federated Farmers of New Zealand	351	Volume 2	All		Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the rules are amended so that any activity not listed, where it is a land use, the activity defaults to a permitted activity status.					
425	Federated Farmers of New Zealand	352	Volume 2	All		Oppose
Decision Requested	That the rules specify the policies that need to be referred to in the preparation of a consent application for activities listed as discretionary activities, and the list of assessment criteria for all controlled, restricted discretionary and discretionary activities.					
425	Federated Farmers of New Zealand	353	Volume 2	All		Oppose
Decision Requested	That all reference to the Munsell Scale is deleted from the Plan.					
425	Federated Farmers of New Zealand	375	Volume 2	All		Support in Part
Decision Requested	That every time a defined word appears in the text of a provision it is italicised, so the reader is aware that there is an associated definition.					
479	Department of Conservation	150	Volume 2	All		Oppose
Decision Requested	Amend the rules Chapters to avoid repetition and duplication of the rules within and across the zone rules chapters.					
510	Anne Allison	5	Volume 2	All		Oppose
Decision Requested	Add a new rule to Volume 2 to ensure that developments like marine farms, once consented, are allowed to stay as long as their owner does a good job and obeys the rules.

Decision Requested	<p>Add the following rules to the rules in each zone.</p> <ul style="list-style-type: none"> Existing trees within roads shall be retained unless they are replaced within 1 month of their removal. Any new subdivisions shall include trees planted within the road reserves and the applications for consent to subdivide shall include a landscape planting and land shaping plan including street trees at a minimum of one tree located within the area of the road reserve that is adjacent to each lot within the subdivision. Pruning or removal of any trees within street, reserves and other areas of public thoroughfare shall require resource consent. Any trees removed for the purpose of protecting existing lines shall be replaced by new trees. Where any telecommunication or lines for similar purpose and electricity lines are being installed or replaced these shall be installed underground. Rules making these requirements shall be included within each of the zones within the Plan. Equipment, structures and containers associated with services and utilities located within roadways shall be screened by vegetation and coloured in low reflectivity colours [these will need to be specified in the rule]. <p>Note, the above rules deal with road reserve, which is un-zoned in the proposed MEP. Therefore, it is more appropriate to include them in the General Rules.</p>					
425	Federated Farmers of New Zealand	446	Volume 2	2 General Rules	2.	Support in Part

Decision Requested	To have the minor excavation of the river bed to form a jet boat giant slalom course be considered a permitted activity.					
90	Tony Hewitt	1	Volume 2	2 General Rules	2.2.	Support
Decision Requested	I seek an additional provision along lines of 2.2.10 but for surface flow testing. Take water for purposes of completing a stream depletion test to determine effects on downstream users and/or values. At no time shall testing remove more than 10% of the flow or be carried out for more than 14 days in any one year. Water can only be pumped to land using approved irrigation methods.					
172	Davidson Group Ltd	2	Volume 2	2 General Rules	2.2.	Oppose
Decision Requested	That a Permitted Activity be added under Provision 2.2 for the taking of water for dust control. We suggest an allowance of 50 cubic metres per site per day for up to 50 days per year would be sufficient for sports, most construction sites, haul roads and the like. Larger-scale construction operations would still need a water permit for large volume and/or longer duration takes. We anticipate that conditions to be added under Provision 2.3 would include aspects such as a maximum proportion of take of surface flow and restrictions in resource areas that are over-allocated or under restriction. It may also be desirable for records to be kept and for those to be provided to Council upon request.					
267	Marlborough Motor-Cycle Club Inc	1	Volume 2	2 General Rules	2.2.	Oppose

Decision Requested	Retain Standard 2.3.11.1.					
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	26	Volume 2	2 General Rules	2.3.11.1.	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>2.3 Standards applying to specific permitted activities Amend the standards that apply to specific permitted activities to ensure that dewatering activities associated with maintenance upgrading or installation of underground tanks at service stations, utilities and infrastructure is a permitted activity. This could be achieved by making the following changes: Amend the heading of Rule 2.3.11 in accordance with the relief sought to Rule 2.2.12 or the definition of trench (see sub-point 1004.25)</p> <p>AND</p> <p>C. Amend Rule 2.3.11.1. to exempt short term, shallow, non-consumptive takes relating to the maintenance, upgrading (including replacement) or installation of existing infrastructure within a Groundwater Protection Area. This could be achieved by making the following change: <i>The take must not be within a Groundwater Protection Area unless the take is being carried out for maintenance or upgrading or installation of existing utilities, infrastructure or fuel storage tanks, is non consumptive, is from an excavation not exceeding 5m in depth and will not exceed a total of 10 days.</i></p>					
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	27	Volume 2	2 General Rules	2.3.11.2.	Support in Part
Decision Requested	Amend Rule 2.3.11.2. to delete the reference to "trench excavated" and replace it with a reference to "excavations", and to refer to upgrading, as well as installation and maintenance. <i>The take must relate to a temporary trench excavated excavation for the purposes of the installation or maintenance or upgrade of infrastructure.</i>					
1198	Transpower New Zealand Limited	41	Volume 2	2 General Rules	2.3.11.2.	Support in Part
Decision Requested	<p>Amend Standard 2.3.11.2 as follows:</p> <p><i>"2.3.11.2. The take must relate to a temporary trench excavated for the purposes of the installation or maintenance, upgrade or development of utilities or infrastructure."</i></p>					
228	Rainbow Sports Club Incorporated	1	Volume 2	2 General Rules	2.3.12.1.	Oppose
Decision Requested	Amend clause 2.3.12.1 to – The take and use of water for skifield facilities may occur all year round as required by skifield operations, and the take of water for snowmaking may only occur in the period 1 May to 30September as required for snowmaking.					
91	Marlborough District Council	253	Volume 2	2 General Rules	2.3.12.3.	Support in Part
Decision Requested	Amend Standard 2.3.12.3 as follows (strike through and bold) - <p><i>" The instantaneous rate of the take must not exceed 20l/s 100l/s."</i></p>

326	Steven and Sarah Leov	1	Volume 2	2 General Rules	2.9.9.	Support in Part
Decision Requested	<p>We recommend removing the term river from the listed policies and replacing it with Fonterra's definition of an active bed. This is a standard that dairy farmers have been working with for many years. It means animals are excluded from all major rivers and streams but allows farmers to continue to use their land productively. This is a definition that supports sustainability and allows primary production to continue to operate as per Objective 14.1 "Rural environments are maintained as a resource for primary production activities, enabling these activities to continue contributing to economic well being whilst ensuring the adverse effects of these activities are appropriately managed."</p> <p>Livestock entering onto, or passing across <u>an active bed</u> of a river <u>waterway</u>.</p> <p>Definition of <i>active bed</i>:</p> <p>"The bed of a river (including any modified river) or artificial watercourse that is permanently flowing and where the bed is more than a metre wide, permanently un-vegetated and comprises sand, gravel, boulders or similar material.</p> <p>We also recommend extending the period of time allowed for compliance with 2.9.9, 3.3.21 and 4.3.20.1 to <u>9 June 2022</u>. This is to allow farmers to recover from the financial pressure put on their businesses during recent years when the milk price has been below the cost of production. While fencing materials may seem an insignificant cost, the accumulation of these materials plus concrete and culverts for river crossings, the necessary consents for these crossings and the labour required to complete the work will make compliance a significant expense.</p>					
340	B L and C F Leov Bulford	1	Volume 2	2 General Rules	2.9.9.	Oppose
Decision Requested	<p>Must not involve intensively farmed <u>adult dairy livestock</u>.</p> <p>We suggest that there needs to be some distinction between ages of cattle recognised, as young stock have a much smaller impact on the environment than aged cows.</p>					
459	Beef and Lamb New Zealand	13	Volume 2	2 General Rules	2.9.9.	Support in Part
Decision Requested	<p>Include a provision in Policy 4.1.1 that recognises Farm Environment Planning as a valid tool to deliver on positive environmental outcomes while maintaining land use flexibility.</p> <p>Re-write activity focused rules in Volume 2 to allow Farm Environment Planning as an alternate pathway so that the MEP better achieves the intent outlined in Policy 4.1.1. In particular rewrite rules associated with:</p> <ul style="list-style-type: none"> • Livestock entering onto, or passing across, the bed of a river (2.9.9; 3.3.21; 4.3.20; 21.3.16.3); • Vegetation clearance (3.3.11; 3.3.12); • Cultivation (3.3.13; 4.3.12); and • Application of fertiliser or lime into or onto land (3.3.23; 4.3.22; 17.3.8; 18.3.9; 19.3.17; 23.3.5).

Decision Requested	Trustpower seeks the following relief from the Marlborough District Council: 1. Amend Rule 2.11.2 as follows: <i>"Construction or alteration of a bore, excluding bores constructed for the purposes of geotechnical investigation or installation of piezometers, within the bed of the following lakes and rivers, including tributaries: ..."</i> 2. Any similar or consequential amendments to the PMEP that stem from the submission and relief sought. Alternatively, Trustpower seeks the deletion of <i>(b) Branch River</i> from Rule 2.11.2.

717	Fulton Hogan Limited	68	Volume 2	2 General Rules	2.16.	Support in Part
Decision Requested	Include a new rule permitting discharges of sediment associated with undertaking permitted works within waterways. For example: <u>Rule 2.16.X</u> <u>Any discharge of sediment generated as a result of an activity in, on, over or under the bed of a lake that is permitted by this plan, is a permitted activity.</u>					
990	Nelson Forests Limited	33	Volume 2	2 General Rules	2.16.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Add a new permitted activity as follows (or with words of similar effect): " <i>Discharge of contaminants to water, or to land where it may enter water.</i> " and have the standards as per 2.17.1.1 – 2.17.1.3.					
1004	Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited	37	Volume 2	2 General Rules	2.16.	Support
Decision Requested	<p>Adopt new rules that permit the discharge of dewatering water from dewatering activities associated with maintenance, upgrading or installation of underground tanks at service stations, utilities and infrastructure and permit investigations in relation to sites with possible historic contamination and that provide for passive discharges associated with this ensuring that the framework enables a better understanding of the nature and characteristics of the discharge over time, facilitates the appropriate management of contaminants in ground over time and permits active management to cease when that is appropriate. These outcomes could be achieved by inserting a new section providing for the use of land and discharge of contaminants onto or into land where it may enter water as follows:</p> <p><u>2.## The following activities shall be permitted without resource consent where they comply with the applicable standards in 2.##</u> <u>2.## Permitted Activities</u> <u>2.##.1 The discharge of contaminants from dewatering activities associated with maintenance, upgrading or installation of underground tanks at service stations, utilities and infrastructure into water or onto or into land where the discharge may enter water.</u> <u>2.##.2 The use of land to assess the concentration of hazardous substances that may be present in the soil/groundwater and any associated discharge to air.</u> <u>2.##.3 The discharge of contaminants from contaminated land into water, or onto or into land where the discharge may enter water.</u></p> <p>AND</p> <p><u>Discharge of Contaminants Provided for In Rules 2.##.1 and 2.##.3</u> <u>2.## Standards that apply to specific permitted activities</u> <u>2.##.1 Where the discharge may enter groundwater, the discharge is not located within 50m of a bore used for water abstraction for potable supply or stock water.</u> <u>2.##.2 If the discharge is from dewatering, the discharge is not from contaminated land, except where it is from land where the contaminant is petroleum hydrocarbons and the discharge contains no more than 15mg/l TPH.</u> <u>2.##.3 The discharge shall not cause any erosion of the channel or banks of the receiving waterbody or the coastal marine area.</u> <u>2.##.4 The discharge shall not give rise to the following effects after the zone of reasonable mixing:</u> <u>a) a change in the pH of ±0.5pH unit, or</u> <u>b) the production of conspicuous oil or grease films, scums or foams, or floatable or suspended materials, or</u> <u>c) any conspicuous change in the colour or visual clarity, or</u> <u>d) any emission of objectionable odour, or</u> <u>e) the fresh water is unsuitable for consumption by farm animals, or</u> <u>f) any significant adverse effects on aquatic life.</u></p> <p>AND</p> <p>Introduce a rule to permit investigations and assessments of potentially contaminated land as a permitted activity along the following lines:</p>					

The use of land to assess the concentration of hazardous substances that may be present in the soil/groundwater and any associated discharge to air.

2.## Standards that apply to specific permitted activities:

2.##.1 The assessment is undertaken in accordance with Contaminated Land Management Guidelines No. 5: Site Investigation and Analysis of Soils (2011).

2.##.2 The assessment is reported in accordance with the Contaminated Land Management Guidelines No. 1: Reporting on Contaminated Land (2011).

2.##.3 A copy of the report is provided to the Marlborough District Council within two months of the completion of the assessment

AND

Introduce a consenting framework for passive discharges from contaminated land that provides certainty through establishment of an appropriate permitted threshold and a consent requirement (preferably a controlled activity) if the permitted threshold is exceeded. This could be achieved as follows:

The (passive) discharge of contaminants from contaminated land into water, or onto or into land where the discharge may enter water.

2.## Standards that apply to specific permitted activities

2.##.1 There has been a detailed site investigation report supplied to Marlborough District Council in accordance with Rule 2.##.3 that:

(a) finds that the discharge of contaminants is highly unlikely to be a risk to human health or the environment at present or in the future;

or

(b) determines that the concentration of contaminants in groundwater:

(i) either 50 metres from the source (i.e. the notional boundary) or at the property boundary (whichever is the lesser distance); and

(ii) anywhere a surface water or bore used for abstraction of water (excluding monitoring bores) intersects or lies within (b)(i)

Does not breach the following standard:

• Where the discharge is to groundwater identified on the planning maps as a freshwater management unit or groundwater protection area used for water supply purposes; either the Drinking Water Standards of New Zealand 2005 (Revised 2008) or, where ambient water quality is naturally less than this standard it is not being degraded; or

• Where the discharge is to a groundwater not identified on the planning maps as a freshwater management unit or groundwater protection area for water supply or as a sensitive aquifer: the Australia and New Zealand Guidelines for Fresh and Marine Water Quality (ANZECC) Guidelines (2000) at the level of protection for 80% of species, except for benzene where the level of protection is 90% of species (i.e. 1mg/l).

2.##.2 The passive discharge of contaminants onto or into land that has previously held resource consent for discharges and where the risk has been assessed and found to be within acceptable levels without control mechanisms and that all the consent conditions have been met to the satisfaction of Council.

2.##. Controlled Activities

Application must be made for a Controlled Activity for the following:

2.##.1 The (passive) discharge of contaminants from contaminated land into water, or onto or into land where the discharge may enter water not meeting the permitted activity standards shall be a controlled activity.

Matters over which the Council has reserved control:

2.##.1.1 the adequacy of the detailed site investigation report including:

(i) site sampling;

(ii) laboratory analysis; and

(iii) risk assessment.

2.##.1.2 the need for and adequacy of a site management plan (contaminated land);

- 2.##.1.3 the need for and adequacy of a remedial action plan (contaminated land);**
- 2.##.1.4 how the discharge is to be:**
 - (a) managed;**
 - (b) monitored, including frequency and location of monitoring; and**
 - (c) reported on.**
- 2.##.1.5 the physical constraints of the site and operational practicalities;**
- 2.##.1.6 the transport, disposal and tracking of soil and other materials taken away in the course of the activity;**
- 2.##.1.7 the effect on potable water supplies;**
- 2.##.1.8 methods to identify contaminant risks prior to works commencing such as qualitative assessments of risk;**
- 2.##.1.9 protocols around notifying the Council of contaminant risks;**
- 2.##.1.10 how stormwater is to be managed;**
- 2.##.1.11 soil management during work and at the completion of the works;**
- 2.##.1.12 odour control;**
- 2.##.1.13 vapour control;**
- 2.##.1.14 groundwater management;**
- 2.##.1.15 contingency plans;**
- 2.##.1.16 remediation or ongoing management of the site, its timing and standard;**
- 2.##.1.17 the nature and type of close out criteria if proposed;**
- 2.##.1.18 the need for a financial bond;**
- 2.##.1.19 the need for any review conditions in the event that standards to be achieved are not achieved;**
- 2.##.1.20 the timing and nature of the review conditions;**
- 2.##.1.21 the duration of resource consent.**

Decision Requested	<p>That the following rules 3.3.1.2 to 3.3.1.16 inclusive are added to the permitted activity of "Farming" in the Rural Environment Zone:</p> <p>3.3.1.2 Farming on land between 20 and 35 degrees is a discretionary activity for which consent must be applied for.</p> <p>3.3.1.3 Notification must be given to Council for discretionary Farming. This will take the form of an annual Farming Plan that addresses all of the matters set out in Appendix 22b.</p> <p>Appendix 22b Notification items:</p> <ol style="list-style-type: none"> 1. The name and contact details of the landowner, the owner of the stock on the land and the manager of the farming operation. 2. The location on a map of all rivers, lakes or significant wetlands within or adjacent to the area to be Farmed. 3. The location on a map of the coastal marine area if it is within 50 metres of the area to be farmed. 4. The location on a map of all existing and new farming roads, tracks and stock water-points to be used, created or maintained. 5. Any erosion and sediment control methods to be used. 6. The location on a map of any stock bridges. 7. A plan showing the intended stocking of farm animals and the rotational stocking plan. 8. A feed budgeting plan for the year. 					

9. A soil analysis report showing the current nutrient status of the farmed land as at the beginning of the annual Farming Plan.

3.3.1.4. No farming must occur on any land with a slope greater than 35°.

3.3.1.5. Any material change to the annual Farm Plan must be notified to Council at least 20 working days before the change is implemented.

3.3.1.6. Farming must not be in, or within:

(a) 8m of a river (except an ephemeral river when not flowing) or lake

(b) 8m of a Significant Wetland or 30m of a river within a Water Resource Unit with a Natural State classification;

(c) 200m of the coastal marine area.

3.3.1.7. Farming must not be within such proximity to any abstraction point for a drinking water supply registered under section 69J of the Health Act 1956 as to cause contamination of that water supply.

3.3.1.8. Water control measures and sediment control measures must be constructed & maintained in:

(a) All areas disturbed by any excavation or filling undertaken on the land;

(b) All farming roads, tracks or stock water sites on the land (including existing farming roads, tracks or stock water sites);

(c) Such that the areas, roads, tracks and sites are stable.

3.3.1.9. No animal must be mustered through the bed of a river (except an ephemeral river or intermittently flowing river, when not flowing), lake or Significant Wetland or through the coastal marine area.

3.3.1.10. Stock, farmed animal faeces and soil debris must:

(a) Not be within 8m of, or deposited in, a river (except an ephemeral river or intermittently flowing river when not flowing), lake, Significant Wetland or the coastal marine area;

(b) Not be left in a position where it can enter, or be carried into, a river (except an ephemeral river), lake, Significant Wetland or the coastal marine area;

(c) Be placed on stable ground;

(d) Be managed to avoid accumulation to levels that could cause erosion or instability of the land.

3.3.1.11. Wheeled or tracked machinery must not be operated in or within 8m of a river (except an ephemeral river or intermittently flowing river, when not flowing) or lake except where:

(a) Access is essential to muster stock away from the river or lake;

(b) Crossing the bed of a river to enable access;

(c) Stock, farmed animal faeces or soil debris must be removed from the river or lake so as to comply with other Standards for Farming.

In all cases, the Council must be notified at least 2 working days prior to the use of the machinery.

3.3.1.12. Wheeled or tracked machinery must not be operated in or within 8m of a Significant Wetland or the coastal marine area.

3.3.1.13. Stock must be bridged when being mustered across a river (except an ephemeral river or intermittently flowing river, when not flowing).

3.3.1.14. Farming must not cause any conspicuous change in the colour or visual clarity of a flowing river after reasonable mixing or the water in a Significant Wetland, lake or the coastal marine area, as measured as follows:

(a) Hue must not be changed by more than 10 points on the Munsell scale.

(b) The natural clarity must not be conspicuously changed due to sediment or sediment laden discharge originating from the Farming site.

(c) The change in reflectance must be <50%.

3.3.1.15. All significant Farming road failures and slope failures must be reported to Council within 2 working days of the land owner or farm manager (including any employee or contractor of the owner or farm manager) becoming aware of the failures.

3.3.1.16. Water control measures must be designed and implemented to ensure they remain effective at all times.

Decision Requested	Delete Standard.					
351	Helen Mary Ballinger	22	Volume 2	3 Rural Environment Zone	3.3.11.5.	Oppose
Decision Requested	Submitter does not believe any indigenous forest in south Marlborough should be able to be cleared as a permitted activity. However, no decision requested has been included in the submission. <i>It is inferred that the status of this activity should be discretionary activity.</i>					
423	Chris Shaw	22	Volume 2	3 Rural Environment Zone	3.3.11.5.	Oppose
Decision Requested	Delete Standard.					
425	Federated Farmers of New Zealand	534	Volume 2	3 Rural Environment Zone	3.3.11.5.	Support in Part
Decision Requested	That the indigenous vegetation clearance limits are increased to more appropriately allow for farming in the rural environment. <i>(The Submission did not identify the specific relief sought.)</i>					
429	Tempello Partnership	1	Volume 2	3 Rural Environment Zone	3.3.11.5.	Oppose
Decision Requested	Change the per ha to a % based restriction (e.g. maximum 5% of land area over five years or 2% of existing indigenous cover). Change it to a more whole-farm view.					
496	Royal Forest and Bird Protection Society NZ (Forest & Bird)	97	Volume 2	3 Rural Environment Zone	3.3.11.5.	Oppose
Decision Requested	Delete Standard 3.3.11.5 <i>Standard 3.3.11.5 Clearance of indigenous forest must not exceed 1,000m² per Computer Register in any 5 year period.</i>					
688	Judy and John Hellstrom	58	Volume 2	3 Rural Environment Zone	3.3.11.5.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That any area of original native forest, particularly lowland forest in the Marlborough Sounds and in South Marlborough should not be able to be cleared as a permitted activity. That there should be no clearance allowed at all if it has already been assessed as being an outstanding natural feature or landscape.					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	388	Volume 2	3 Rural Environment Zone	3.3.11.5.	Oppose
Decision Requested	Opposed – threshold is too high and will not maintain indigenous biodiversity as required under s 30 and 31. Permitted clearance of indigenous forest should only be allowed for clearly defined reasons: for a single dwelling on a site, for maintenance of existing infrastructure, roads and fence lines. Amend to address submissions.					
973	Ministry for Primary Industries	7	Volume 2	3 Rural Environment Zone	3.3.11.5.	Oppose
Decision Requested	<p>1. MPI seeks changes to the environment plan (section 3.3.11) that recognizes sustainable indigenous forest management as an activity distinct from vegetation clearance resulting in total forest removal.</p> <p>2. MPI seeks clarity on the interpretation of the vegetation clearance area rule as it pertains to the harvesting of single trees and/or groups of trees from intact indigenous forest. This will assist landowners in more accurately identifying what forest management activities, including indigenous timber harvesting under approvals issued pursuant to Part 3A of the Forests Act 1949, require a discretionary resource consent. The current rules and in fact the proposed rule do not provide clear guidance.</p> <p>3. MPI seeks a review of the amended rule for indigenous forest clearance over 6 metres in height as it applies to the Marlborough Sounds area, which by Council's own admission (Policy 8.3.2), does not have extent of habitat loss evidenced in southern Marlborough.</p> <p>4. Sustainable indigenous forest management should be permitted on forests that lie outside those areas recognised as Significant Natural Areas.</p>					
1016	Philip Erwin Hunnisett	4	Volume 2	3 Rural Environment Zone	3.3.11.5.	Oppose
Decision Requested	That the clearance of indigenous forest in the Rural Environment Zone is not a permitted activity. The submission does not include what status this type of activity should be.					
1121	Sally Jane and Timothy John Wadworth	1	Volume 2	3 Rural Environment Zone	3.3.11.5.	Oppose
Decision Requested	Change it to a more whole-farm view.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
1179	Thomas Robert Stein	23	Volume 2	3 Rural Environment Zone	3.3.11.5.	Oppose
Decision Requested	I oppose rule 3.3.11.5. There is so little indigenous forest taller than 6 metres remaining that all clearance of this forest should require a consent.					
1193	The Marlborough Environment Centre Incorporated	134	Volume 2	3 Rural Environment Zone	3.3.11.5.	Oppose
Decision Requested	That the clearance of more than 1,000m2 of indigenous forest (over 6 metres) per Computer Register in any 5 year period is changed from a permitted activity to a discretionary activity.					
246	James (Jim) Rudd	1	Volume 2	3 Rural Environment Zone	3.3.11.6.	Oppose
Decision Requested	The decision I seek from council is an amendment alteration from (10.000 Square metres) clearance over a 5 year period to No limitation to clearance of indigenous vegetation up to the point where 20 % of cover remains including indigenous forest per computer register and then at reaching that demonstratable point then the area then revert to 10,000 Square metres of allowable clearance in any 12 month period.

326	Steven and Sarah Leov	9	Volume 2	3 Rural Environment Zone	3.3.13.2.	Support in Part
Decision Requested	Definition of <i>active bed</i> : "The bed of a river (including any modified river) or artificial watercourse that is permanently flowing and where the bed is more than a metre wide, permanently un-vegetated and comprises sand, gravel, boulders or similar material." We also recommend the 8m buffer zone be reduced to 5m for cultivation of slopes above 10 degrees. We believe a 5m buffer zone will be sufficient to retain clarity of waterways while allowing more effective use of productive land. On all slopes greater than 10° cultivation must not be within 8m 5m of a river (except an ephemeral river, or intermittently flowing river when not flowing), and Active Bed, lake or coastal marine area.

Decision Requested	<p>We recommend removing the term river from the listed policies and replacing it with Fonterra's definition of an active bed. This is a standard that dairy farmers have been working with for many years. It means animals are excluded from all major rivers and streams but allows farmers to continue to use their land productively. This is a definition that supports sustainability and allows primary production to continue to operate as per Objective 14.1 "Rural environments are maintained as a resource for primary production activities, enabling these activities to continue contributing to economic well being whilst ensuring the adverse effects of these activities are appropriately managed."</p> <p>Livestock entering onto, or passing across <u>an active bed</u> of a river <u>waterway</u>.</p> <p>Definition of <i>active bed</i>:</p> <p>"The bed of a river (including any modified river) or artificial watercourse that is permanently flowing and where the bed is more than a metre wide, permanently un-vegetated and comprises sand, gravel, boulders or similar material.</p> <p>We also recommend extending the period of time allowed for compliance with 2.9.9, 3.3.21 and 4.3.20.1 to <u>9 June 2022</u>. This is to allow farmers to recover from the financial pressure put on their businesses during recent years when the milk price has been below the cost of production. While fencing materials may seem an insignificant cost, the accumulation of these materials plus concrete and culverts for river crossings, the necessary consents for these crossings and the labour required to complete the work will make compliance a significant expense.</p>

Decision Requested	The decision I SEEK is that: <ul style="list-style-type: none"> Livestock should be excluded from the beds of lakes, and Significant Wetlands and suitable setbacks to avoid adverse effects, a minimum of 1 metre from the bank of rivers and a minimum of 3 metres when break feeding practices are in place. All cattle, pigs and deer should all be required to be excluded from rivers, lakes and the coastal marine area on all paddock blocks with an average slope of less than 15 degrees. Sheep should also be excluded where they are being break fed or otherwise very intensively grazed. Exclusion could be through permanent or temporary electric fencing as appropriate. This would capture most of the more intensively farmed lowland areas while not capturing the less intensively farmed hill country areas. Anyone wanting to apply for consent to allow livestock access to waterways could then be required to monitor upstream and downstream of this activity to ensure it is not having adverse effects on water quality, thereby putting the onus for monitoring onto the landowner. Another way to clarify requirements would be to exclude stock from the rivers listed in Volume 1 Chapter 15 as degraded and at risk of degradation (<i>inferred Tables 15.1 and 15.2</i>). This is based on long-term monitoring information and most of these rivers are in areas where livestock access is clearly a contributing factor to the poorer water quality.

Decision Requested

For clarity amend Rule 3.3.28 as follows:

3.3.28.1. The discharge must not occur into or onto a Soil Sensitive Area without demonstrating appropriate controls with a Nutrient Management Plan or Farm Management Plan.

3.3.28.2. The discharge must not occur within:

(a) 50m of a bore unless the bore intercepts the confined layer of Riverlands FMU or the confined layer of the Wairau Aquifer FMU,

(b) 20m of a river, lake, Significant Wetland, drainage channel or Drainage Channel Network;

(c) 10m of the boundary of any adjacent land in different ownership.

3.3.28.3. A High rate discharge system must not be used to discharge onto land with an average slope of 7° or greater, and the slope must not exceed 11.3° (1:5) at any point.

3.3.28.4. The discharge must not occur when the soil moisture exceeds field capacity.

3.3.28.5. Ponding must not be detectable beyond 24 hours after the discharge.

3.3.28.6. The discharge must not result in anaerobic soil conditions.

3.3.28.7. The total cumulative nitrogen (N) loading from all discharges on the areal extent of the land to be used for the discharge must not exceed 200kg N/hectare/year (excluding N from direct animal inputs) unless there is provision to manage nutrient discharges demonstrating appropriate controls with a Farm or Nutrient Management Plan to be provided to the Council.

3.3.28.8. For a new dairy farm established after 9 June 2016 and from 9 June 2019, for a dairy farm existing at 9 June 2016, the following standards apply:

3.3.28.1 there must be an on-site storage system with a minimum of 3 months storage or, if less than 3 months, the storage capacity must be certified by a recognised professional as being sufficient to allow for discharges to be deferred so that standards 3.3.28.4, 3.3.28.5 and 3.3.28.6 are not breached. The certification must be provided to the Council prior to effluent entering the storage system.

~~3.3.28.9.2. For a new dairy farm established after 9 June 2016,~~ the storage system must be sealed with an impermeable material certified by a recognised professional.

~~3.3.28.10.8.3. For a new dairy farm established after 9 June 2016,~~ the storage system must not be located within:

(a) 20m of a river, lake, Significant Wetland, drainage channel or Drainage Channel Network;

(b) 20m of the boundary of any adjacent land in different ownership;

(c) a Flood Hazard Area.

~~3.3.28.11. From 9 June 2019, Standards 3.3.28.8, 3.3.28.9 and 3.3.28.10 apply to a dairy farm existing at 9 June 2016 and a new dairy farm established after 9 June 2016.~~

Decision Requested	<p>That:</p> <ol style="list-style-type: none"> 1. MDC in conjunction with the local viticulture industry should research methods of disposal of cca treated vineyard (and other) posts and timber. At present, my understanding is that high temperature pyrolysis is the only safe way of disposing of such treated timber. To the best of my knowledge, no such facility exists in New Zealand or Australia, where the disposal problem is more acute. 2. Ban the use of such vineyard posts in Marlborough unless a safe way of disposal of the stockpiles of such broken and discarded posts can be found. 3. Until such time as a safe disposal method is created by MDC, ensure that the requirements of RMA and NES are met by vineyard owners and operators and monitor, record and manage such sites as contaminated under the existing HAIL protocol. EPA of South Australia has written rules for the intermediate storage of such treated timber until such time as safe disposal is available. The rules are aimed at minimising air, water and soil contamination.

satisfactory sound

levels AS/NZS

2107:2000

(nearest specified equivalent)

(Refer to hard copy submission for table format of the above)

Where it is necessary to have windows closed to achieve the acoustic design requirements, an alternative ventilation system shall be provided.

A ventilation system installed shall comply with the following:

- Consist of an air conditioning unit(s) provided that the noise level generated by the unit(s) must not exceed 40dB Laeq(30s) in the largest habitable room (excluding bedrooms) and 35dB Laeq(30s) in all other habitable rooms, when measured 1 metre away from any grille or diffuser; or
- A system capable of providing at least 15 air changes per hour (ACH) in the largest habitable room (excluding bedrooms) and at least 5 air changes per hour (ACH) in all other habitable rooms; and
- The noise level generated by the system must not exceed 40dB Laeq(30s) in the largest habitable room (excluding bedrooms) and 35dB Laeq(30s) in all other habitable rooms, when measured 1 metre away from any grille or diffuser; and
- The internal air pressure must be no more than 10 Pa above ambient air pressure due to the mechanical ventilation; and
- Where a high air flow rate setting is provided, the system shall be controllable by the occupants to be able to alter the ventilation rate with at least three equal progressive stages up to the high setting.

Y Sensitive Activities within 60m of a Rail Network – Ground-borne Noise: Annoyance

New, relocated, or altered sensitive activities/buildings within 60 metres of the rail corridor shall be designed and constructed to ensure the following levels of vibration from trains shall not be exceeded based on the procedures specified in the Norwegian Standard NS 8176E: 2nd edition September 2005

Vibration and Shock Measurement of Vibration in Buildings from Land Based Transport and Guidance to Evaluation of its Effects on Human Beings.

Receiving Environment

(New, relocated or altered)

Class C criterion:Maximum Weighted Velocity.

1017	Peter Gilford Gilbert	5	Volume 2	4 Coastal Environment Zone	4.1.1.	Oppose
Decision Requested	That the following rules 4.3.1.2 to 4.3.1.16 inclusive are added to the permitted activity of "Farming" in the Coastal Environment Zone: 4.3.1.2 Farming on land between 20 and 35 degrees is a discretionary activity for which consent must be applied for. 4.3.1.3 Notification must be given to Council for discretionary Farming. This will take the form of an annual Farming Plan that addresses all of the matters set out in Appendix 22b. Appendix 22b Notification items: 1. The name and contact details of the landowner, the owner of the stock on the land and the manager of the farming operation.					

2. The location on a map of all rivers, lakes or significant wetlands within or adjacent to the area to be Farmed.
 3. The location on a map of the coastal marine area if it is within 50 metres of the area to be farmed.
 4. The location on a map of all existing and new farming roads, tracks and stock water-points to be used, created or maintained.
 5. Any erosion and sediment control methods to be used.
 6. The location on a map of any stock bridges.
 7. A plan showing the intended stocking of farm animals and the rotational stocking plan.
 8. A feed budgeting plan for the year.
 9. A soil analysis report showing the current nutrient status of the farmed land as at the beginning of the annual Farming Plan.
- 4.3.1.4. No farming must occur on any land with a slope greater than 35°.
 - 4.3.1.5. Any material change to the annual Farm Plan must be notified to Council at least 20 working days before the change is implemented.
 - 4.3.1.6. Farming must not be in, or within:
 - (a) 8m of a river (except an ephemeral river when not flowing) or lake
 - (b) 8m of a Significant Wetland or 30m of a river within a Water Resource Unit with a Natural State classification;
 - (c) 200m of the coastal marine area.
 - 4.3.1.7. Farming must not be within such proximity to any abstraction point for a drinking water supply registered under section 69J of the Health Act 1956 as to cause contamination of that water supply.
 - 4.3.1.8. Water control measures and sediment control measures must be constructed & maintained in:
 - (a) All areas disturbed by any excavation or filling undertaken on the land;
 - (b) All farming roads, tracks or stock water sites on the land (including existing farming roads, tracks or stock water sites);
 - (c) Such that the areas, roads, tracks and sites are stable.
 - 4.3.1.9. No animal must be mustered through the bed of a river (except an ephemeral river or intermittently flowing river, when not flowing), lake or Significant Wetland or through the coastal marine area.
 - 4.3.1.10. Stock, farmed animal faeces and soil debris must:
 - (a) Not be within 8m of, or deposited in, a river (except an ephemeral river or intermittently flowing river when not flowing), lake, Significant Wetland or the coastal marine area;
 - (b) Not be left in a position where it can enter, or be carried into, a river (except an ephemeral river), lake, Significant Wetland or the coastal marine area;
 - (c) Be placed on stable ground;
 - (d) Be managed to avoid accumulation to levels that could cause erosion or instability of the land.
 - 4.3.1.11. Wheeled or tracked machinery must not be operated in or within 8m of a river (except an ephemeral river or intermittently flowing river, when not flowing) or lake except where:
 - (a) Access is essential to muster stock away from the river or lake;
 - (b) Crossing the bed of a river to enable access;
 - (c) Stock, farmed animal faeces or soil debris must be removed from the river or lake so as to comply with other Standards for Farming.

In all cases, the Council must be notified at least 2 working days prior to the use of the machinery.

4.3.1.12. Wheeled or tracked machinery must not be operated in or within 8m of a Significant Wetland or the coastal marine area.

4.3.1.13. Stock must be bridged when being mustered across a river (except an ephemeral river or intermittently flowing river, when not flowing).

4.3.1.14. Farming must not cause any conspicuous change in the colour or visual clarity of a flowing river after reasonable mixing of the water in a Significant Wetland, lake or the coastal marine area, as measured as follows:

(a) Hue must not be changed by more than 10 points on the Munsell scale.

(b) The natural clarity must not be conspicuously changed due to sediment or sediment laden discharge originating from the Farming site.

(c) The change in reflectance must be <50%.

4.3.1.15. All significant Farming road failures and slope failures must be reported to Council within 2 working days of the land owner or farm manager (including any employee or contractor of the owner or farm manager) becoming aware of the failures.

4.3.1.16. Water control measures must be designed and implemented to ensure they remain effective at all times.

Decision Requested	<p>Allow the provision in part and amend as follows:</p> <p>In 4.2.2.1. and 16.2.3.1 insert at the beginning, "Except as provided elsewhere in this section,"</p> <p>In 4.2.2.1 replace "at the Zone boundary or within the Zone" with "at point beyond the Zone"</p> <p>In 16.2.3.1. replace "measured at the boundary of, or within" with "assessed at any point outside the Zone, or on another site within the Zone"</p> <p>In 4.2.2.1, .2 and .4 replace "dBA LAeq" with "dB LAeq" here and THROUGHOUT THE PLAN.</p> <p>Add additional sub-clause " Except as provided in Rule 3.2.3.2"</p> <p>Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.</p>					
280	Nelson Marlborough District Health Board	149	Volume 2	4 Coastal Environment Zone	4.2.2.2.	Support in Part
Decision Requested	<p>Allow the provision in part and amend as follows:</p> <p>In 4.2.2.2. insert at the beginning, "Except as provided elsewhere in this section,"</p> <p>Replace "at or within" and "within the" with "at any point within"</p> <p>In 4.2.2.2 replace "dBA LAeq" with "dB LAeq" here and THROUGHOUT THE PLAN.</p> <p>Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.</p>					
716	Friends of Nelson Haven and Tasman Bay Incorporated	188	Volume 2	4 Coastal Environment Zone	4.2.2.2.	Support in Part
Decision Requested	<p>That the following amendment (bold) is made to Standard 4.2.2.2:</p> <p><i>Standard 4.2.2.2 An activity undertaken within the Coastal Environment Zone must be conducted to ensure that noise arising at or within the boundary of any land zoned Urban Residential 1, Urban Residential 2 (including Greenfields), Urban Residential 3 or within the notional boundary of any dwelling on land zoned Rural Living, Coastal Living or Coastal Environment and all the ecologically significant marine sites the whale and dolphin sites shown on Maps 17 and 18, anchorages, mooring management areas, marine reserves (the placement of this statement is inferred) does not exceed the following noise limits:</i></p>					
91	Marlborough District Council	3	Volume 2	4 Coastal Environment Zone	4.2.2.3.	Oppose
Decision Requested	<p>Delete Standard 4.2.2.3(b) - "(b) any fixed motors or equipment, frost fans or gas guns, milling or processing forestry activities, static irrigation pumps, motorbikes that are being used for recreational purposes."</p>					
91	Marlborough District Council	197	Volume 2	4 Coastal Environment Zone	4.2.2.3.	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Standard 4.2.2.3(a) as follows (strike through and bold) - " <i>(a) mobile machinery used for a limited duration as part of agricultural, or horticultural or forestry activities occurring in the Coastal Environment Zone;</i> "					
149	PF Olsen Ltd	47	Volume 2	4 Coastal Environment Zone	4.2.2.3.	Support in Part
Decision Requested	include temporary forestry activity noise					
167	Killearnan Limited	25	Volume 2	4 Coastal Environment Zone	4.2.2.3.	Oppose
Decision Requested	Include general forestry activities, e.g. chainsaw use, within standard (inferred).					
280	Nelson Marlborough District Health Board	150	Volume 2	4 Coastal Environment Zone	4.2.2.3.	Support in Part
Decision Requested	Allow the provision in part and amend as follows: Replace in (b) "recreational" with "primary industries" Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.					
425	Federated Farmers of New Zealand	637	Volume 2	4 Coastal Environment Zone	4.2.2.3.	Support in Part
Decision Requested	That the Standard is amended to read as follows (strike through and bold) - " <i>The following activities are excluded from having to comply with the noise limits:</i> <i>(a) mobile machinery used for a limited duration as part of agricultural or horticultural activities occurring in the Coastal Environment Zone;</i> <i>Mobile sources associated with primary production activities; temporary activities required by normal agricultural and horticulture practice, such as cropping and harvesting; and noise from rural livestock;</i> <i>(b) any fixed motors or equipment, frost fans or gas guns, milling or processing forestry activities, static irrigation pumps; motorbikes that are being used for recreational purposes."</i>					
962	Marlborough Forest Industry Association Incorporated	191	Volume 2	4 Coastal Environment Zone	4.2.2.3.	Support in Part
Decision Requested	Amend to include forestry activities.					
990	Nelson Forests Limited	124	Volume 2	4 Coastal Environment Zone	4.2.2.3.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend (a) of the Standard as follows (bold) - " (a) mobile machinery used for a limited duration as part of agricultural, forestry or horticultural activities occurring in the Coastal Environment Zone;"					
280	Nelson Marlborough District Health Board	151	Volume 2	4 Coastal Environment Zone	4.2.2.4.	Support in Part
Decision Requested	<p>Allow the provision in part and amend as follows:.</p> <p>Add sub-headings for two sub-clauses" Electrical generators" and "Wind turbines."</p> <p>Replace 3.2.3.3 with "3.2.3.3 (a) Electrical generators Noise emissions from any generator used for electricity generation must be operated so that noise emissions at any point within the notional boundary of any dwelling in any zone must not at any time exceed 55 dB LAeq(15 min) when measured and assessed in accordance with Rule 3.2.3.5. (b) Wind turbines Wind turbine sound must be measured and assessed in accordance with NZS 6808:2010 Acoustics - Wind Farm Noise and the noise at any point within the notional boundary of any residential Dwelling must not exceed 40 dB LA90(10min) or the background sound level LA90(10 min) plus 5dB, whichever is higher." Consequentially add a new definition to the plan as submitted above in 0 "Wind turbine" a device used to extract kinetic energy from the wind for electrical generation and includes any wind farm. Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.</p>					
280	Nelson Marlborough District Health Board	152	Volume 2	4 Coastal Environment Zone	4.2.2.5.	Support in Part
Decision Requested	<p>Allow the provision in part and amend as follows:.</p> <p>Insert at the beginning of clause 3.2.3.5. "Except as provided elsewhere," Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.</p>					
280	Nelson Marlborough District Health Board	153	Volume 2	4 Coastal Environment Zone	4.2.2.6.	Support
Decision Requested	<p>Allow the provision..</p> <p>Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.</p>					
280	Nelson Marlborough District Health Board	128	Volume 2	4 Coastal Environment Zone	4.2.3.	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Allow the provision in part and amend (3.2.4) as follows: AND ELSEWHERE IN THE PLAN in 4.2.3. and 8.2.3. Amend section headings to "Noise sensitive activity and frost fans" Note: The scope of relief sought is intended to include amendments to the like effect arising from consolidation, re-ordering or expansion of like provisions in this section or elsewhere in the plan, or consequential amendments to this proposed section, as a result of decisions about other parts of the plan.					
1284	Port Marlborough New Zealand Limited	10	Volume 2	4 Coastal Environment Zone	4.2.3.	Support in Part
Decision Requested	That the following new standards are included under 4.2.3 Noise sensitive activity: <i>4.2.3.x. Any new noise-sensitive activity, or alteration or addition to an existing building used for a noise sensitive activity between the Inner and Outer Noise Control Boundaries at the port in Picton and Shakespeare Bay and at Havelock shall be adequately insulated from port noise.</i> <i>4.2.3.x. Adequate sound insulation must be achieved by constructing the building to achieve a spatial average indoor design sound level of 40 dBA Ldn in all new habitable spaces and buildings for noise sensitive activities. The indoor design level must be achieved with all windows and doors open unless adequate alternative ventilation means is provided, used and maintained in operating order. The sound insulation design must be certified by an acoustic engineer. The completed construction must be certified by the builder as built in accordance with the design.</i>					
149	PF Olsen Ltd	48	Volume 2	4 Coastal Environment Zone	4.2.3.1.	Support in Part
Decision Requested	Adjust as requested
