

Notification of Summary of Submissions

This report contains:

- **The Summary of Decisions Requested in order of Provision.**
 - The order is Volume then Provision within the applicable Volume.
- **Tables containing the names and contact details of Submitters who supported other specific Submitters, and sought the same decision requested as those Submitters.**
 - Submitters who lodged a submission solely in support of the Submission of the Marine Farming Association.
 - Submitters who lodged a submission solely in support of the Submission of Aquaculture New Zealand.
- **A table containing the Submitters who supported other specific Submitters, and sought the same decision requested as those Submitters.**
 - Submitters who, within their personal submission, also supported the Submission of another Submitter in the manner described above.

Summary of decisions requested - by provision

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
15	William Scholefield	1	All	All		Oppose
Decision Requested	Compensation be payable by the MDC to landowners where MDC decisions devalue landowners land assets					
16	William Scholefield	1	All	All		Oppose
Decision Requested	Remove all proposals that devalue ratepayers land value . Pay compensation where landowners land devalued .					
43	Tony Mortiboy	4	All	All		Oppose
Decision Requested	<p>Establish a review board consisting of:</p> <ul style="list-style-type: none"> • Marlborough's most senior agency after Council itself. • Serviced by a non-Council volunteer administrator. • Tasked with reviewing annually the environmental plan. • Empowered to register it's views directly with the Mayor and Chief Executive. <p>It's membership should be voluntary and drawn from permanent residents and could include:</p> <ul style="list-style-type: none"> • The highest polling unsuccessful candidate at the most recent Council election. • A senior graduate structural engineer with current career experience of Marlborough or , if retired, within the last five years. • A primary or secondary school teacher within five years of retirement. • A senior tourism industry chief executive residing in Marlborough. • A representative from youth leadership training organisations (e.g., Outward Bound). 					
141	Hall Family Farms Ltd	9	All	All		Support
Decision Requested	We full support all of federation farmers submission					
185	George Robert Shallgrass	1	All	All		Oppose
Decision Requested	Make it simple and remove some parts.					
210	Kevin Wilson	1	All	All		Oppose
Decision Requested	A change of emphasis in the MEP to enabling activities.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
210	Kevin Wilson	2	All	All		Oppose
Decision Requested	<p>Either:</p> <p>a) have an over-arching statement at the start of the documents requiring the beneficial effects of any activity to be part of the consideration of every policy and rule or</p> <p>(b) include the requirement in every policy and rule concerned with avoiding, prohibiting, managing, activities and environmental impacts.</p> <p>With a preference for a) to be adopted.</p>					
216	Khalid Suleiman	1	All	All		Oppose
Decision Requested	More permitted activity scope					
218	Salvador Delgado Oro Laprida	15	All	All		Support
Decision Requested	<p>I want the Plan to Recognise that aquaculture, farming, forestry and vineyards and tourism are regionally significant sectors in Marlborough's economy that sustains our communities (Add a new Issue to Vol 1, page 2-1). Acknowledge that aquaculture, farming, forestry and vineyards employ people and spread wealth. Council needs to find ways to enable these sectors to grow, while recognising and protecting the special qualities of Marlborough (Amend Issue 4B and Objective 4.2 to recognise that regionally significant sectors are at risk if unable to operate efficiently and effectively (Vol. 1, page 4-5).</p> <p>Provide an opportunity for local businesses to have certainty so as to invest with confidence in their and my future (Add to Policy 4.2.1 a list of areas of significant aquaculture and wine development). Ensure that developments like marine farms, once consented, are allowed to stay, as long as their owner does a good job and obeys the rules (Add a new rule to this effect in Vol 2).</p> <p>Create ways that encourage people and businesses to strive to be more sustainable (Add a wider range of non-regulatory methods to the plan aimed at building awareness). Grow our region while also caring for the environment, our landscapes and protecting natural character (Amend Issue 4C, Objective 4.3, Issue 6A, Objective 6.1 and flow on policies by recognising and providing for the existing and changing land and seascapes of use of agriculture, aquaculture, cattle farming, dairy, vineyards and tourism.</p>					
220	Jessica Bagge	1	All	All		Oppose
Decision Requested	<p>That there is some reference and directive in Volume One around Cell Phone Towers and that is backed up by some rules in Volume Two.</p> <p>I do not accept this is a Central Government issue that MDC is powerless to influence.</p>					
243	Marguerete Osborne	1	All	All		Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<ul style="list-style-type: none"> - That there is scientific evidence to back up many of the claims made, beyond the opinion of staff and Councilors. - Further action for agrichemicals. - That terms be further defined. 					
243	Marguerete Osborne	3	All	All		Oppose
Decision Requested	That there is scientific evidence to back up many of the claims made, beyond the opinion of staff and Councilors.					
257	Gary Barnett	1	All	All		Support in Part
Decision Requested	Federated Farmers opinions be considered					
261	Lynette and Kevin Oldham	1	All	All		Oppose
Decision Requested	That the MEP is put on hold until the aquaculture section is published and brought onto the same timetable as the remainder of the MEP.					
261	Lynette and Kevin Oldham	9	All	All		Support in Part
Decision Requested	We seek the same decisions from Council as is sought for each matter raised in the above submissions.					
280	Nelson Marlborough District Health Board	1	All	All		Support in Part
Decision Requested	Please see attached submission.					
282	Warren Forestry Ltd	1	All	All		Oppose
Decision Requested	Follow NES-PF and make all rules positive to encourage best practice while still encouraging forestry as one of the best land uses in Marlborough. Do not discourage existing uses by requiring consents. If you establish good rules that are supported, then you only need to enforce them against the cowboys. The majority of users will be on your side.					
283	Craig Basham	1	All	All		Support in Part
Decision Requested	Specific decision requested on notified provisions is not clear in the Submission.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
313	Dale Hulburt	1	All	All		Support in Part
Decision Requested	Acceptance of my earlier submissions and those of Keith Adams and Federated Farmers.					
316	McGuinness Institute	1	All	All		Support in Part
Decision Requested	To meet with the committee.					
401	Aquaculture New Zealand	183	All	All		Oppose
Decision Requested	Oppose the title "Marlborough Environment Plan." Change the title to "The Sustainable Management Plan for Marlborough."					
426	Marine Farming Association Incorporated	191	All	All		Oppose
Decision Requested	Oppose the title "Marlborough Environment Plan." Change the title to "The Sustainable Management Plan for Marlborough."					
426	Marine Farming Association Incorporated	192	All	All		Support
Decision Requested	Enable primary production in Marlborough, as set out in the submission of Federated Farmers of New Zealand, save for where the submission or intended outcomes are inconsistent with the MFA's submission.					
433	Port Marlborough New Zealand Limited	1	All	All		Support in Part
Decision Requested	In summary PMNZ: a) Opposes, opposes in part, supports and supports in part the MEP as set out in this submission and in greater detail (but without detracting from this submission in any way) in the specific relief sought in Tables 1, 2 and 3 and the amendments to the zone maps and overlay maps (refer Annexures A, B and C).					
459	Beef and Lamb New Zealand	1	All	All		Support
Decision Requested	<ul style="list-style-type: none"> Ensure all rules within the MEP are effects based, rather than regulating actual farming activities. Consequential restructuring or amendments to the Plan and other provisions such as the definitions, objectives and policies, or parts thereof, arising from the material amendments sought. 					
459	Beef and Lamb New Zealand	2	All	All		Support in Part
Decision						

Requested • Include an alternative pathway in the MEP to encourage proactive on-farm behaviour through the adoption of Farm Environment Plans.

- The alternative pathway could be to the effect of:

Farming (except intensive farming) undertaken in accordance with a council approved Farm Environment Plan template is a permitted activity, provided the Farm Environment Plan is prepared and implemented in accordance with (schedule X or to like effect), and provided to Marlborough District Council on request.

OR

- introduce a method that allows farmers to develop a farm environment plan that enables them to demonstrate compliance with permitted activity rules

- Schedule X could be to the effect of:

A map or aerial photograph showing:

- The boundaries of the property or within the farm enterprise;
- The boundaries of land management units on the property or within the farm enterprise
- The location of permanent and intermittent rivers, streams, lakes, drains or ponds;
- The location of riparian vegetation and fences adjacent to water bodies;
- The location of any areas within the property that are identified in a District Plan as "significant indigenous biodiversity;" and
- The location of any known and recorded heritage sites.

- A description of the Good Management Practices that will be implemented to target the following management areas, where relevant:

- Nutrient Management;
- Irrigation Management;

	<ul style="list-style-type: none"> - Soils Management; - Waterbody Management; and/or - Point sources (e.g. offal pits). 					
459	Beef and Lamb New Zealand	3	All	All		Support in Part
Decision Requested	Delete reference to specific species within the rules, standards, and appendices; Amend rules relating to pest species so that they refer back to the Marlborough Regional Pest Management Strategy for direction on management/ control actions.					
459	Beef and Lamb New Zealand	11	All	All		Oppose
Decision Requested	Amend the MEP rules so that any measurements used are practical, part of the everyday vernacular, and can be interpreted by the community.					
462	Blind River Irrigation Limited	43	All	All		Support
Decision Requested	The MEP should include as a method the ongoing commitment of Council toward the further refining of the Soils Sensitive Areas and boundaries.					
464	Chorus New Zealand limited	1	All	All		Oppose
Decision Requested	Amend entire plan, to provide consistency in the use of terms, and inclusion of a specific section detailing objectives and policies relevant to the provision of infrastructure. The structure of the Auckland Unitary Plan is a good example. A list of suggested objectives and policies is attached as an addendum to this submission point (see original submission for addendum).					
464	Chorus New Zealand limited	2	All	All		Oppose
Decision Requested	Replace the term 'regionally significant infrastructure' at each instance it is used in the plan with the word 'infrastructure'.					
473	Delegat Limited	75	All	All		Support in Part
Decision Requested	<i>Delegats submit that the MEP should include as a method the ongoing commitment of Council toward the further refining of the Soils Sensitive Areas and boundaries.</i>

Decision Requested	This information is included to complete the submission database only. As set out in MFA and AQNZ submission.					
527	Anne Greig	1	All	All		Oppose
Decision Requested	<ul style="list-style-type: none"> - recognize Aquaculture as an important component of economic growth both locally and Internationally - provide Marine farmers certainty of a future by making relicensing less bureaucratic if all requirements are met. Existing owners should not have to compete for space they have already been licensed for and waste money in court trying to justify this - work with the Aquaculture Industry regarding environmental issues which is highly desirable for both parties. It is in the best interest of Marine farmers to protect their product by ensuring the environment is of the highest standard for growing so both parties have here a common interest - recognize that the Industry is significant in providing long-term employment to the people of the Marlborough area. - recognize that New Zealand has a unique opportunity (in the Marlborough Sounds) to provide a top quality sea food. We should all be proud of this and own it! The demand worldwide for safe, quality sea food is something that New Zealand recognizes and can produce, this the Councils should support the industry and help in a positive way that makes it possible to get on with the job for both the people of the area and Industry.

Summary of decisions requested - by provision

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
233	Totaranui Limited	35	Volume 1	All		Support in Part
Decision Requested	Add a new policy (<i>the Chapter, Issue and Objective under which the policy should be placed have not been identified in the Submission</i>) as follows - " Recognise that adverse effects are generally defined in the RMA environment as either less than minor, minor, more than minor or significant and that policy relating to adverse effects should be written in such a manner as recognizes and provides for this variation. " (<i>Inferred</i>)					
233	Totaranui Limited	36	Volume 1	All		Support in Part
Decision Requested	Add a new policy (<i>the Chapter, Issue and Objective under which the policy should be placed have not been identified in the Submission</i>) as follows - " Policies using the word 'Avoid' should also be in a manner that includes recognition that adverse effects may be not be avoided but that any such adverse effects might be remedied. " (<i>Inferred</i>)					
280	Nelson Marlborough District Health Board	2	Volume 1	All		Support
Decision Requested	It is considered that the MEP would be more workable and user-friendly through merging and simplifying a large number of objectives and policies which seek overlapping outcomes, both within and between chapters. In achieving this, the style of the earlier part of Chapter 15 (relating to water) whereby Objectives are grouped together with a suite of policies below to collectively achieve those aims may be a good option. This section of the chapter avoided duplication and was found to be well set out and easy to follow.					
425	Federated Farmers of New Zealand	150	Volume 1	All		Support in Part
Decision Requested	That any issues, objectives, and policies relating specifically to coastal issues are included in Chapter 13: Use of the Coastal Environment. (<i>Submitter has not identified the specific changes sought to the provisions of this Volume</i>)					
505	Ernslaw One Limited	1	Volume 1	All		Oppose
Decision Requested	We request that the Plan be withdrawn and rewritten to confer Permitted Activity status on all forestry activities where the plantation forest was lawfully established under the RMA by way of Resource consent or previous Permitted Activity plan provision to Plant. In environmentally sensitive areas the Plan should only default to Controlled Activity status for harvest and is only appropriate for afforestation except for areas where the land under the plantation forest has subsequently been designated an Outstanding Landscape that were activities

717	Fulton Hogan Limited	1	Volume 1	All		Oppose
Decision Requested	Review the proposed plan with the aim of reducing the size of the plan. This should be achieved by reducing the number of objectives and policies where there is overlap. In addition, review all objectives and policies and re-draft these so as to ensure that the purpose and intent of all objectives and policies is clear without relying on extensive explanatory text. Then delete superfluous explanatory text.					
717	Fulton Hogan Limited	2	Volume 1	All		Oppose
Decision Requested	Ensure the plan provides objectives, policies and rules addressing all activities, not just the primary production and tourism sector.

Decision Requested

The Marlborough Environment Centre SEEKS consideration of the following issues and inclusion in the MEP:

1. Consideration of the location and distribution of proposals involving Genetically Modified Organisms (GMOs) on a district basis, together with protection of rural resources for organic or biodynamic farming, are important resource management matters for consideration by territorial authorities in carrying out their functions under the RMA.

Potential Adverse Effects

2. The outdoor use of GMOs has a potential to cause significant adverse effects on the environment. Adverse effects could include (inter alia):

(a) biological or ecosystem harm;

(b) harm to other existing or potential forms of land use including:

(i) organic farming (including organic certification and the requirement to be GMO free); and

(ii) agricultural activities dependent on an uncontaminated environmental brand.

3. GMOs have the potential to adversely affect ecological, economic, and resource management values, and the social and cultural well-being of people, communities and tangata whenua.

4. Application of integrated management and a precautionary approach to GMOs under the RMA is the best available technique for managing the potential adverse effects posed by GMOs to other land uses within the district.

Sustainable Management and Part II

5. It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions (e.g. issues, objectives, policies, rules and methods) that manage the release, location and management of GMOs where they have the potential to adversely affect other land use activities.

That the following policies to be adopted by the Council under the Proposed Plan:

a. To adopt a precautionary approach to the management of GMOs by prohibiting the field-testing or release of a GMO.

b. To adopt a resource management framework for the management of GMO that is District specific taking into account environmental, economic and social well-being considerations.

To review the Plan provisions relating to GMOs, particularly if there is new information that becomes available on the benefits/adverse effects of a Genetically Modified Organism activity.

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
698	Environmental Defence Society Incorporated	1	Volume 1	1 Introduction	1.	Support in Part
Decision Requested	<p>Amend page 1-2 paragraphs 3 and 4 to read:</p> <p><u>More specific national direction is given through national policy statements, such as the New Zealand Coastal Policy Statement 2010 and the National Policy Statement for Freshwater Management 2014, and through national environmental standards. Regional and district level plans must implement these documents.</u></p> <p>To achieve the purpose of the RMA, the Council is required to prepare a hierarchy range of documents, some of which are mandatory, while others are optional. A regional policy statement, regional coastal plan and district plan are mandatory documents, whereas other regional plans are optional. As the Council is a unitary authority, that is, it has the roles of both a district and a regional council, it is responsible for preparing all of the required RMA policies and plans.</p> <p>The purpose of regional policy statements is set out in Section 59 of the RMA and it is "to achieve the purpose of the Act by providing an overview of the resource management issues of the region and policies and methods to achieve integrated management of the natural and physical resources of the whole region". The purpose of regional and district plans is to assist the Council in carrying out its functions in order to achieve the purpose of the RMA and specifically for a regional coastal plan, to achieve the purpose of the RMA in relation to the coastal marine area.</p> <p><u>Each planning document must give effect to the documents that are above it in the hierarchy. This applies even if all or a number of the different planning documents are incorporated into one.</u></p>					
1089	Rarangi District Residents Association	1	Volume 1	1 Introduction	1.	Support
Decision Requested	Retain Chapter 1 Introduction.					
43	Tony Mortiboy	1	Volume 1	1 Introduction	Guiding principles	Oppose
Decision Requested	Delete guiding principles. (inferred)					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
401	Aquaculture New Zealand	2	Volume 1	1 Introduction	Guiding principles	Support in Part
Decision Requested	It is an omission not to include a guiding principle to promote economic development. The approach taken does not reflect the RMA, and does not reflect the views of the Marlborough community. A guiding principle to that effect should be added, along with consequential changes to the commentary.					
401	Aquaculture New Zealand	3	Volume 1	1 Introduction	Guiding principles	Support in Part
Decision Requested	The guiding principles should recognise that the Sounds has a diverse range of uses. Its values include economic values. A set of guiding principles that make no reference to that has failed to properly capture the needs of Marlborough. The guiding principles should be amended to reflect this. The clique "jewel in the crown" should be deleted, and replaced with something more reflective of Marlborough and the discussion above.					
401	Aquaculture New Zealand	4	Volume 1	1 Introduction	Guiding principles	Support in Part
Decision Requested	Support the guiding principle "Providing the community with a streamlined and simplified resource management framework to make it easier for resource users and other interested parties to use." Submit that this philosophy should extend to the application of the MEP provisions, not simply to integrating the regional policy statement with the regional coastal, regional and district plan provisions.					
425	Federated Farmers of New Zealand	2	Volume 1	1 Introduction	Guiding principles	Support
Decision Requested	That the guiding principles are retained as notified.					
426	Marine Farming Association Incorporated	2	Volume 1	1 Introduction	Guiding principles	Oppose
Decision Requested	<p>There is a statement under "A healthy Marlborough economy requires a healthy environment" that it is not the role of the MEP to directly address economic matters. That is incorrect. The definition in s2(1) of the RMA of "environment" includes the economic conditions that affect people and communities. Sustainable management includes enabling people to provide for their economic and social wellbeing (s 5(2) RMA).</p> <p>The guiding principles seem to ignore the fact that the farming, viticulture, aquaculture, forestry and tourism sectors all rely on resource use.</p> <p>It is an omission not to include a guiding principle to promote economic development. The approach taken does not reflect the RMA, and does not reflect the views of the Marlborough community.</p> <p>A guiding principle to that effect should be added, along with consequential changes to the commentary.</p>

1198	Transpower New Zealand Limited	1	Volume 1	2 Background	Relationship of the MEP to other policy statements, standards and strategies	Support in Part
Decision Requested	<p>Amend the commentary in relation to national policy statements and national environmental standards in the 'Background' as follows:</p> <p><i>"Central government can also prepare national environmental standards: technical standards relating to the use, development and protection of natural and physical resources. Such national standards provide an opportunity to promote nationally the use of consistent standards, requirements or practices. National standards <u>prevails</u> override existing provisions in plans that require a lesser standard. A rule in a plan cannot duplicate or conflict with a provision in a <u>national standard</u>. National environmental standards for air quality, sources of human drinking water, telecommunications facilities, electricity transmission and managing contaminants in soil have effect.</i></p> <p><i><u>The National Policy Statement on Electricity Transmission 2008 (NPSET) and the National Environmental Standards for Electricity Transmission Activities 2009 (NESETA) only apply to the National Grid and do not apply to electricity distribution. The NPSET recognises the national significance of the National Grid in its entirety. The NPSET facilitates the operation, maintenance and upgrade of the existing transmission network and the establishment of new transmission assets. The NESETA sets out a national framework of permissions and consent requirements for activities on National Grid lines existing at 14 January 2010. Activities include the operation, maintenance and upgrading of existing lines but exclude the development of new lines (post 14 January 2010) and substations.</u></i>"</p>					
716	Friends of Nelson Haven and Tasman Bay Incorporated	3	Volume 1	2 Background	Issues that cross local authority boundaries	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the following amendments (strike-through and bold) are made to the wording of the third paragraph page 2-9: <i>Under the RMA the mean high water spring boundary separates the primary management responsibilities for the land and coastal water between agencies. The Council, in conjunction with the Minister of Conservation, is responsible for the management of the coastal marine area the Minister of Conservation's responsibility to approve regional coastal plan only applies to the coastal marine area, the landward boundary of which is mean high water springs. In the coastal marine area, the Council has joint responsibility for promoting integrated management of natural and physical resources. The Minister has the responsibility for the final approval of regional coastal plans prepared by a regional council. Landward of mean high water springs the relationship is different and the Council has these responsibilities fall on Council alone responsibility for sustainably managing Marlborough's natural and physical resources.</i>					
504	Queen Charlotte Sound Residents Association	3	Volume 1	2 Background	Monitoring the efficiency and effectiveness of the policies or methods	Support in Part
Decision Requested	Add a new bullet point (bold) to the list at the bottom of page 2-10 (<i>inferred</i>): Compliance monitoring of resource consents granted will take place, at the consent holders cost at least once.					
509	Nelson Marlborough Fish and Game	10	Volume 1	2 Background	How to use the MEP	Oppose
Decision Requested	This section of the Plan needs to be amended to better reflect the full range of policy settings and stances available under the RMA, from protection through to enabling. The RMA is not only about enabling. While Section 5 of the RMA enables people and communities to provide for their social, economic and cultural well-being this enabling is undertaken in the context of sustaining the potential of natural and physical resources, safeguarding the life-supporting capacity of air, water, soil and ecosystems and avoiding, remedying or mitigating any adverse effects on the environment. For freshwater matters, an environmental bottom line approach applies, in order to give effect to the National Policy Statement on Freshwater Management 2014 Clarification should be made that the "Sections 12, 13, 14 and 15" referred to are in fact sections of the Resource Management Act and not sections of the PMEP.					
509	Nelson Marlborough Fish and Game	11	Volume 1	2 Background	How to use the MEP	Oppose
Decision Requested	Amend the description of what it means to "avoid" adverse effects to reflect the meaning of "not allow" or "prevent the occurrence of" clarified through the King Salmon Supreme Court decision. Consequently, those policies using the term 'avoid' should be amended and interpreted to reflect this same meaning and not remediation or mitigation as suggested in the existing explanation.					
509	Nelson Marlborough Fish and Game	12	Volume 1	2 Background	How to use the MEP	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend the description of what it means to "protect" to reflect the meaning that the adverse effects to be avoided, and what is inappropriate should be assessed with reference to what is being 'protected' clarified through the King Salmon Supreme Court decision. Consequently, those policies using the term 'protect' should be amended and interpreted to reflect this same meaning and not in the "number of ways" as the Plan suggests.					
698	Environmental Defence Society Incorporated	5	Volume 1	2 Background	How to use the MEP	Oppose
Decision Requested	<p>Amend the section on page 2-13 under the heading "Enable" to read:</p> <p>Enable</p> <p>The RMA <u>was intended to install a regulatory regime based on bio-physical bottom lines set to provide for development within the capacity of the environment and the ecosystems that supported. Beyond those bottom lines use and development is enabled for people and communities to provide for their wellbeing. This is reflected in the wording of s5(2) RMA. The RMA has been described as an enabling piece of legislation. The reason for this can be found in the purpose of the RMA at Section 5(2), where it is stated: "</u>sustainable management" means managing the use, development, and protection of natural and physical resources in a way, or at a rate, which enables people and communities to provide for their social, economic, and cultural wellbeing and for their health and safety while ...':</p> <p><u>(a) Sustaining the potential of natural and physical resources (excluding minerals) to meet the reasonably foreseeable needs of future generations; and</u></p> <p><u>(b) Safeguarding the life-supporting capacity of air, water, soil, and ecosystems; and</u></p> <p><u>(c) Avoiding, remedying, or mitigating any adverse effects of activities on the environment.</u></p> <p>Additionally, in drafting rules, different approaches are needed for different activities. In general, Section 9 of the RMA states that no person may use land (including the surface of water in any river or lake) in a way that contravenes a rule in a district plan or regional plan. In other words, if there is no rule in a plan, then there is no need for restriction on the activity under Section 9 or any need to obtain resource consent.</p> <p>Sections 12, 13, 14 and 15 adopt the opposite approach. These sections place restrictions on the use of the coastal marine area, on certain uses of the beds of lakes and rivers, on the taking, use, damming or diversion of water and on discharging contaminants into the environment. Essentially, the restrictions mean that there must be a national environmental standard, resource consent or rule in a plan that allows activities of the nature described in Sections 12-15 to occur. This includes permitted activity rules for an activity or effect of a minor nature, which are considered to be enabling rules. Therefore, where the word 'enable' appears within a provision in the MEP, there will be a related rules method.</p>					
698	Environmental Defence Society Incorporated	6	Volume 1	2 Background	How to use the MEP	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend page 2-13 paragraph entitled "Avoid" to read: Avoid <u>The word avoid is to be given its plain, ordinary mean: to "not allow" or "prevent the occurrence of". Use of the word 'avoid' may or may not have the same meaning as prevent.</u> In some cases the method used to implement an <u>avoidance</u> policy is a rule that will 'prohibit' something from occurring. In this case the word 'prohibit' is used within the rules method. There are other policies that use 'avoid' though this is not implemented through a prohibited activity rule. <u>This will be the case when the avoidance directive is focused on a specific effect or effects as opposed to a specific activity.</u> In these policies 'avoiding' an effect can be achieved through undertaking an activity in such a way that the effect does not occur or is significantly reduced. Where this is the case, policies clearly identify that remediation and/or mitigation is an option. It will be important that the explanations and methods accompanying the policies are read to help inform decision makers of the intent of the word 'avoid' where it is used.					
698	Environmental Defence Society Incorporated	7	Volume 1	2 Background	How to use the MEP	Oppose
Decision Requested	Amend page 2-14 - paragraph entitled "Protect" to read: <u>'Protect' means to keep safe from harm, injury, or damage. Protection can be achieved in a variety of ways. How protection is achieved in each instance will depend on what is sought to be protected and what it is to be protected from. Similar to other words in this section, 'protect' can be interpreted in a number of ways. It can be interpreted in a narrow way that may effectively In some situations protection might limit or prevent future use and development of some of Marlborough's natural and physical resources. However, 'protect' essentially means to keep safe from harm and this can be achieved in a variety of ways. For example, the protection of areas of indigenous biodiversity In others it might be achieved through allowing use and development subject to specific controls such as height, location and color, or within specific parameters such as the amount of vegetation that can be removed. Sometimes a combination of approaches will be used. could be achieved through rules in a plan, legal protection of land, fencing, active pest control and/or improved land management practices, or a combination of these approaches.</u> <u>It is therefore important that decision makers or those using the MEP provisions read the explanation of the relevant provision, as this will inform how 'protection' is to occur. Unless there is a clear direction within a protection policy or its explanation or associated method that an activity/effect is to be prevented from occurring, a policy is open to be interpreted more broadly.</u> <u>In summary, the 'protection' anticipated by Sections 6(a) and (b) is not an absolute protection: rather, it is protection from inappropriate subdivision, use and development. Identifying what is inappropriate is informed through other policies of the MEP.</u>

Decision Requested	Despite a small change (sub point 1186.37), this chapter should remain intact.					
1187	Te Runanga a Rangitane o Wairau	1	Volume 1	3 Marlborough's tangata whenua iwi	3.	Oppose
Decision Requested	The decision we seek from Council is: <ul style="list-style-type: none"> • More monitoring of the Wairau Lagoon, putting systems in place to replenish this important resource. • A more sustainable approach to fresh water systems. • Alternatives to the current sewage output, work on this needs to start now for a cleaner greener way for sewage disposal, promoting the health of the Wairau river is paramount, producing water to world health standards for gathering of Kai, swimming and recreational activities on the Wairau River especially the mouth of the Wairau is of utmost importance. • Water quality standards need to be higher set my MEP, new ideas need to be looked at so the treated sewage does not continue to flow into the Wairau, if the outflow pipe has to remain, there needs to be a new implementation put in place to assure the quality of outgoing flow is clean/pure enough to enhance the river into becoming a river suitable for food gathering and recreational activities. • Keeping the Marlborough Bar area clean and green, having a stance on no Commercial Buildings to be consented for around the Wairau Bar area. • Keeping in line with Report 2741 State of the Environmental Monitoring of Wairau Estuary-August 2015 and recommendations of that report to MDC. • Keeping updated monitoring on the waterways, drains/creeks that flow into the Wairau Lagoons and Wairau River so any potential contamination from these creeks is quickly averted. • Water Quality needs to be a priority for MDC, our rivers have a mauri, mana and tapu of their own; our rivers are our taonga and are an indicator of environmental health we want more emphasis on this and more effective outcomes from our Council.

21	Keith M J Adams	1	Volume 1	4 Use of Natural and Physical Resources		Oppose
Decision Requested	I therefore stand strongly <u>against</u> the current wording of Section 5, and the Council should amend the MEP Section 4 (and related sections) to recognise the necessity of a moratorium or the complete cessation of issuing new Water Resource Consents to areas not traditionally water and unable to provide at least a reasonable portion of their own water supplies or are in the business of redeveloping land otherwise unable to support Industrial Crop-Production if not naturally watered; and "Claw-back" should first be aimed at those institutional properties. Prior Use (to include Natural Watering and Traditional Use) should be explicit in the wording, not just implied to protect businesses and family farms. Lastly, are cognition that much of the responsibility regarding Water Resource fragility lays at the feet of District Council (and their predecessors) for past interventions and more recent issuances of water rights to areas that should have been zoned ineligible.					
36	Keith M.J. Adams	1	Volume 1	4 Use of Natural and Physical Resources	4.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>I request that Council either re-write entire portions of the MEP, or add Amendments to Section 4. Council should acknowledge Rapaura has preeminent rights to unrestricted water from the aquifer immediately beneath our land.</p> <p>Recognise the unique position farming families hold in the heritage of our district, that these are the families that founded Marlborough. Return Water Allocations to their original descriptions that recognise "Prior Use" if that purpose is still practicable.</p> <p>The INCLUSION of text from MEP Chapter 32 - Policy 4.1.1 into the <u>main body</u> of Section 4 of Volume 1 (as there is no other similar acknowledgement elsewhere)</p> <p>Benefits: <i>"The policy acknowledges private property rights and the inherent freedom that comes with this. Recongnition of these private property rights was identified during consultation through the reviews process as being of considerable importance for those involved in primary production activities on land. There is a benefit for land owners/users in having this expressly recognised through policy."</i></p> <p>Change the autocrat liberating phrase "wider public interest" to a more constrictive "greater public good" (in Policy4.1.1), as it should compel a greater contemplation on the displacement of rights and freedoms of individuals.</p> <p>Lastly, I want my full water rights returned to the hereditary land my family has farmed generation after generation.</p>

Decision Requested	Maintain but note importance of diversity and capacity for adaptation. Recognising that business as usual with respect to water may not continue into the future and likewise Tourism (international) can involve high carbon based energy demands and may not be the same in the future as it is today. Flexibility is key					
314	Dale Hulburt	1	Volume 1	4 Use of Natural and Physical Resources	Issue 4A	Oppose
Decision Requested	Council should provide wording that puts greater emphasis on phasing back of water consents to those Large Corporate Vineyards in drier arid lands that are more greatly responsible for our current Water Resource conditions.					
401	Aquaculture New Zealand	9	Volume 1	4 Use of Natural and Physical Resources	Issue 4A	Support
Decision Requested	Retain Issue 4A. (<i>Inferred</i>)					
425	Federated Farmers of New Zealand	8	Volume 1	4 Use of Natural and Physical Resources	Issue 4A	Support in Part
Decision Requested	<p>That the explanatory text accompanying the issue is amended so that it better reflects the value of the primary sector to Marlborough's social and economic wellbeing, included but not limited to inclusion of the following paragraphs inserted after paragraph 2 (bold):</p> <p>" Primary production makes a considerable contribution to Marlborough's economy. In 2015, agriculture, fishery and forestry directly contributed \$254 million to the region's economy; 11.7% of the total GDP, and second only to manufacturing, through which many of the region's primary produce is processed. Agriculture, fishery and forestry also made the largest contribution to overall growth in the region in the year to 2015, growing by over 6.9% over the year, and employing 19.4% of the Marlborough workforce with 4,897 people employed.</p> <p>Sheep and beef production is extensive in Marlborough, with 397,030ha of land considered pastoral land, and 545,580 sheep and 59,970 beef animals run in Marlborough. Marlborough is a small dairying region, with only 56 herds and a total of 16,661 cows across 5,700 effective hectares. There are over 8000 deer in the Marlborough region.</p> <p>In addition to pastoral agriculture, the Marlborough Sounds provide 62% of New Zealand's aquaculture production by tonnes, including 62% of greenshell mussels and 61% of salmon production, and contributes almost 6%, or \$162 million, to Marlborough's regional GDP. The Marlborough region is also the largest grape producing region in New Zealand, with 23,203ha in vineyards, and exports representing 74.6% of national production in 2015. Forestry covers 57,500 ha."</p>

688	Judy and John Hellstrom	1	Volume 1	4 Use of Natural and Physical Resources	Issue 4A	Oppose
Decision Requested	<p>Page 4-2, Paragraph 5</p> <p>That the claim that the value of the conservation estate, e.g., the Queen Charlotte Track as having significant economic value to Marlborough (with \$10 million given as the contribution to Marlborough's economy) is properly validated through a reliable economic reference, given that over the life of the MEP this figure could go either up or down markedly.</p>					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	2	Volume 1	4 Use of Natural and Physical Resources	Issue 4A	Oppose
Decision Requested	Delete Issue 4A.					
716	Friends of Nelson Haven and Tasman Bay Incorporated	28	Volume 1	4 Use of Natural and Physical Resources	Issue 4A	Support in Part
Decision Requested	<p>1. That reference to ecosystem services provided by natural ecosystems associated with freshwater, air, coastal waters and soils is included in the issue's explanatory paragraph.</p> <p>2. That the following amendments (bold) to the wording in the first paragraph, second line on page 4-2:</p> <p><i>Generally, Marlborough has adequate natural resources of sufficient quality to meet the needs of the primary sector. However, the reliance on natural resources also creates an inherent vulnerability to environmental change. The loss of access to natural resources or the environment or a reduction in the quality of the resources or the environment would have a significant impact on the primary sector. The implications would be felt far beyond the farm gate or vineyard, as Marlborough's townships act as service centres to rural land uses and the marine farming industry. Many businesses in Blenheim and other townships are sustained, either directly or indirectly, by the primary sector.</i></p>					
717	Fulton Hogan Limited	11	Volume 1	4 Use of Natural and Physical Resources	Issue 4A	Support in Part
Decision Requested	<p>Include within Issue 4A a discussion of other resource uses that Marlborough relies on for its social and economic wellbeing. For example:</p> <p>There are a number of other resource uses that play an important role in providing for Marlborough's social and economic wellbeing. These include the use of the aggregate resource from either land or river based sources. Aggregates are a vital if under recognised component of everyday life. Without them there would be none of the infrastructure on which modern society relies. Challenges for the efficient and cost effective extraction and delivery of aggregates includes: transportation (distance between source and market); a lack recognition of the importance of the resource including in planning documents and the establishment of incompatible land use activities on or adjacent to aggregate resources.</p>					
738	Glenda Vera Robb	4	Volume 1	4 Use of Natural and Physical Resources	Issue 4A	Support

401	Aquaculture New Zealand	18	Volume 1	4 Use of Natural and Physical Resources	Objective 4.1	Support in Part
Decision Requested	Add new Policy 4.1.2B - Allow for development where it will achieve a net improvement in sustainability or efficiency by: Offsetting effects; Compensating for effects; or Substituting one use for another.					
425	Federated Farmers of New Zealand	10	Volume 1	4 Use of Natural and Physical Resources	Objective 4.1	Support
Decision Requested	That the Objective is retained as notified. <i>(Inferred)</i>					
426	Marine Farming Association Incorporated	12	Volume 1	4 Use of Natural and Physical Resources	Objective 4.1	Support in Part
Decision Requested	There needs to be express reference to related servicing and processing industries in objective 4.1. The tourism and primary production sectors cannot operate in the absence of related services. The commentary of objective 4.1 should refer to aquaculture's need for water space, and high quality water. Recognition should be given to the fact that different water space and site characteristics are necessary for different forms of aquaculture. For example, cool fast flowing water is required for salmon farming, whereas access to high nutrient laden water is necessary for effectively farming mussels. Logistical considerations are important for all types of aquaculture. a) Amend objective 4.1 to include express reference to related servicing and processing industries; and b) Amend commentary as suggested.					
426	Marine Farming Association Incorporated	15	Volume 1	4 Use of Natural and Physical Resources	Objective 4.1	Support in Part
Decision Requested	Add new Policy 4.1.1A to recognise existing uses of natural and physical resources.					
426	Marine Farming Association Incorporated	17	Volume 1	4 Use of Natural and Physical Resources	Objective 4.1	Support in Part
Decision Requested	Insert new Policy 4.1.2A - allow for experimentation and innovation where there are sufficient controls to appropriately manage adverse effects.					
426	Marine Farming Association Incorporated	18	Volume 1	4 Use of Natural and Physical Resources	Objective 4.1	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Add new Policy 4.1.2B - Allow for development where it will achieve a net improvement in sustainability or efficiency by:					
	a) Offsetting effects;					
	b) Compensating for effects; or					
	c) Substituting one use for another.

Decision Requested	Retain issue and discussion.					
464	Chorus New Zealand limited	4	Volume 1	4 Use of Natural and Physical Resources	Issue 4B	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend paragraph 1 beneath Issue 4B as follows: <i>We rely on a range of physical resources to allow our communities function on a day-by-day basis. These resources include the water, stormwater and waste disposal services provided to townships and small settlements; the transport links within Marlborough and connecting Marlborough to the remainder of the country; the provision of electricity and telecommunications; and, on the Lower Wairau Plain, the drainage of land. Collectively, this infrastructure is regionally significant due to the contribution it makes to our social and economic wellbeing, health and safety. Some of infrastructure is also nationally important, such as the Other infrastructure in (e.g. RNZAF Base Woodbourne,) or running through Marlborough (e.g. the National Grid, the telecommunications network and state highways) also has national importance. It is important that this strategic all infrastructure is able to operate efficiently, effectively and safely on an ongoing basis for community wellbeing. The ability to maintain, upgrade and replace existing infrastructure without significant constraint is important in this respect. Occasionally, new infrastructure may be required to provide for growth within the district.</i>					
477	John Malcolm McKee	2	Volume 1	4 Use of Natural and Physical Resources	Issue 4B	Support in Part
Decision Requested	Amend the Issue as follows (bold) - " <i>The social and economic wellbeing, health and safety of the Marlborough community and regionally significant sectors are at risk if community infrastructure is not able to operate efficiently, effectively and safely.</i> " <i>(Inferred)</i>

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend the first paragraph of the explanatory text to Issue 4B as follows: <i>"We rely on a range of physical resources to allow our communities function on a day-by-day basis. These resources include the water, stormwater and waste disposal services provided to townships and small settlements; the transport links within Marlborough and connecting Marlborough to the remainder of the country; the provision of electricity and telecommunications; and, on the Lower Wairau Plain, the drainage of land. Collectively, this infrastructure is regionally significant due to the contribution it makes to our social and economic wellbeing, health and safety. <u>Central government has recognised the importance of electricity transmission through the National Policy Statement on Electricity Transmission (NPSET), which came into effect in 2008. The NPSET establishes that the need to operate, maintain, develop and upgrade the National Grid is a matter of national significance. The Objective of the NPSET is to recognise the national significance of the National Grid by facilitating its operation, maintenance, upgrade and development while managing adverse effects of, and on, it. Other infrastructure in (e.g. RNZAF Base Woodbourne) or running through Marlborough (e.g. the National Grid and state highways) also has national importance. It is important that this strategic infrastructure is able to operate, <u>upgrade and develop</u> efficiently, effectively and safely on an ongoing basis for community wellbeing. The ability to maintain, upgrade and replace existing infrastructure without significant constraint is important in this respect. Occasionally, <u>New</u> infrastructure may be required to provide for growth within the district."</u></i>

Decision Requested	Amend the Objective and Policies that respond to Issue 4B to as follows: “[RPS, R, C, D] Objective 4.x Efficient and effective development and operation of emergency services “Support and protect the health, safety and wellbeing of the Marlborough community by enabling efficient and effective emergency services’. Policy 4.x.1 Recognise the essential nature of emergency services by: (a) providing for the development and on-going use of emergency service facilities; (b) requiring adequate property access for emergency vehicles and appropriate access to, and supplies of, firefighting water; and (c) enabling emergency services training activities. The policy recognises that emergency service facilities; emergency services training; and the need for adequate access and water supply for emergency response purposes is essential for the health, safety and wellbeing of people and communities. The policy provides for emergency services, and associated activities, throughout Marlborough.”

Decision Requested	Amend the policy to provide for future facilities.					
	Suggested amendments to wording are provided below (text struck through and underlined):					
	<i>Recognise the social, economic, environmental, health and safety benefits from the following infrastructure, either existing or consented at the time the Marlborough Environment Plan became operative, as regionally significant:</i>					
	<i>(a) reticulated sewerage systems (including the pipe network, treatment plants and associated infrastructure) operated by the Marlborough District Council;</i>					
	<i>(b) reticulated community stormwater networks;</i>					
	<i>(c) reticulated community water supply networks and water treatment plants operated by the Marlborough District Council;</i>					
	<i>(d) regional landfill, transfer stations and the resource recovery centre;</i>					
	<i>(e) National Grid (the assets used or owned by Transpower NZ Limited);</i>					
	<i>(f) local electricity supply network owned and operated by Marlborough Lines;</i>					
	<i>(g) facilities for the generation of electricity, where the electricity generated is supplied to the National Grid or the local electricity supply network (including infrastructure for the transmission of the electricity into the National Grid or local electricity supply network);</i>					
	<i>(h) strategic telecommunications facilities, as defined in Section 5 of the Telecommunications Act 2001, and strategic radiocommunications facilities, as defined in Section 2(1) of the Radiocommunications Act 1989;</i>					
	<i>(i) Blenheim, Omaka and Koromiko Airports;</i>					
	<i>(j) main truck railway line;</i>

698	Environmental Defence Society Incorporated	8	Volume 1	4 Use of Natural and Physical Resources	Issue 4C	Support in Part
Decision Requested	Chapter 4 should identify that use and development should only occur within the capacity of the environment, within established non-negotiable environmental bottom lines set (in the regional context) to provide for development within the capacity of the environment and the ecosystems it supports. Beyond those bottom lines resource users would be left to make their own decisions with limited restrictions.					
698	Environmental Defence Society Incorporated	9	Volume 1	4 Use of Natural and Physical Resources	Issue 4C	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Insert new Objective 4.3.1 and supporting policy as follows:. Objective 4.3 – The maintenance and enhancement of the visual, ecological and physical qualities that contribute to the character of the Marlborough Sounds. <u>Objective 4.3.1 – Use and development occurs within the ability of the environment to sustain its life-supporting capacity</u> The Marlborough Sounds is a truly exceptional place – it is considered to be our “jewel in the crown” in terms of natural assets. The landscapes and seascapes within the Marlborough Sounds and the ecology and natural processes that occur within them are unique and highly valued. This objective seeks to maintain and enhance these qualities to ensure that the community and visitors to the district can continue to enjoy this environment now and into the future. This does not mean that use and development of natural and physical resources cannot occur within the Marlborough Sounds, but an element of precaution needs to be exercised to ensure that resource use is complimentary to the visual, ecological and physical qualities that give the Marlborough Sounds its iconic character. <u>Policy 4.3.X – Set clear and non-derogable environmental limits for each resource that ensure use and development only occurs within the ability of the environment to sustain its life-supporting capacity.</u>

Decision Requested	<p>That the following amendment (bold) is made to the explanation for Policy 4.3.5:</p> <p><i>As described in the issue above, the Marlborough Sounds has already undergone considerable change as a result of the past use of natural and physical resources, the most dramatic possibly being the clearance of indigenous vegetation to allow agriculture to occur and, as agriculture has become economically marginal, the regeneration of indigenous vegetation. As a principle, it is important to recognise that the Marlborough Sounds environment is dynamic and will continue to change with or without human intervention. This means there is a capacity to absorb change within the environment without necessarily affecting the qualities of this unique and iconic environment. Indeed, some changes may actually enhance the qualities and improve the Marlborough Sounds environment. Regard should be had to this policy when considering new and existing activities involving the use, development and protection of the Marlborough Sounds environment. And in recognition of this ability to change, there needs to be caution in assigning long term resource consents.</i></p>

717	Fulton Hogan Limited	18	Volume 1	4 Use of Natural and Physical Resources	4.AER.1	Oppose
Decision Requested	Amend the objective and policy framework to recognise and provide for the sustainable use of natural resources for all activities.					
869	Kenepuru and Central Sounds Residents Association Incorporated	8	Volume 1	4 Use of Natural and Physical Resources	4.AER.1	Support in Part
Decision Requested	Amend wording to include a statement that surveys will be both independently prepared and implemented and most importantly those members of the public surveyed have been given in advance adequate information to make informed responses.					
17	Keith M.J. Adams	1	Volume 1	5 Allocation of Public Resources		Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	I request that Council either re-write entire portions of the MEP, or add Amendments to Volumes 1, 2, and Section 32 to repair not only this mammoth document, but our confidence in our District Council as well. While Council cannot undo much of the historical harm done, it can begin working with farmers and vineyard owner who have a special connection to the land. Stop issuing water rights to areas that are unsustainable and require special transporting of water to alter landscapes. Council should acknowledge Rapaura has preeminent rights to unrestricted water from the aquifer immediately beneath our land. Regions using various Water Schemes to fleece water from the Wairau River and Aquifer should be made to fulfill their part of the original negotiations by paying immediately for the dams and catchments promised. End land-grabs done with the sole intention of acquiring Water to transfer to other arid grounds, circumventing the system for financial gain. Recognise the unique position farming families hold in the heritage of our district, that these are the families that founded Marlborough. Return Water Allocations to their original descriptions that recognise "Prior Use" if that purpose is still practicable. District Council will hold the big Corporate Industrial grape-producers responsible for actions and behaviors that risk our natural resources and demand greater investment into the community from which they continue to harvest their profits. Lastly, I want my full water rights returned to the hereditary land my family has farmed generation after generation.					
35	Dale Hulburt	1	Volume 1	5 Allocation of Public Resources		Oppose
Decision Requested	I therefore stand strongly against the current wording of Section 5, and it should be re-worded to include recognition of "<i>Prior tempore potior iure</i>" and that "<u>Fair & Just</u>" should take precedent over "equitable" in protecting businesses and farming families that have built our community.					
91	Marlborough District Council	79	Volume 1	5 Allocation of Public Resources		Support
Decision Requested	Add the following new Anticipated Environmental Result - " <i>No occurrence of sea water intrusion into aquifers.</i> "; and the following associated new Indicator " <i>Conductivity levels as measured by Council's sentinel wells.</i> "					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
293	Keith M J Adams	1	Volume 1	5 Allocation of Public Resources		Support in Part
Decision Requested	<p>Relief Sought:</p> <p>My intent with this Submission is to enter into the record a historic reference to the effects of damming and draining and the resulting water issues we now face in the district.</p> <p>It is imperative to know how we got to this place, if we are to successfully improve our situation.</p> <p>I request that an amendment to the MEP be inserted to explore alternatives to slashing existing Water User permits, and feasibility studies to recharge the aquifers at risk while maintaining responsible use of our water-resources. There are alternatives to Draconian Water Resource cuts, but without District Council leadership they will never see the light of day.</p>					
548	Awatere Water Users Group Incorporated	11	Volume 1	5 Allocation of Public Resources	Objective 5.2?	Support

Decision Requested	Specific decision requested is not clear in the Submission.					
404	Eric Jorgensen	3	Volume 1	5 Allocation of Public Resources	5.	Support in Part
Decision Requested	Retain the issue definition and supporting objectives and policies with amendments requested in submissions related to Policy 5.10.4 (submission points #4), Policy 5.10.5 (submission points #5), Policy 5.10.6 (submission points #6) and Policy 5.10.7 (submission points #7).					
425	Federated Farmers of New Zealand	147	Volume 1	5 Allocation of Public Resources	5.	Support in Part
Decision Requested	That the objectives and policies in this Chapter are redrafted to appropriately recognise the importance of reliable and adequate freshwater supplies to the Marlborough region. <i>(Submitter has not identified the specific changes sought to the provisions of this Chapter)</i> That Chapters 5 (Allocation of Public Resources) & Chapter 15 (Resource Quality (Water section)) are combined and redrafted to remove inconsistencies and superfluous policies. <i>(Submitter has not identified the specific changes sought to the provisions of these Chapters)</i>					
509	Nelson Marlborough Fish and Game	26	Volume 1	5 Allocation of Public Resources	5.	Support
Decision Requested	Amend the introduction to better reflect Objective B1 of the NPSFM and the protection of the habitat of trout and salmon and safeguarding the life-supporting capacity of water and ecosystems as required in section 5 of the RMA.					
688	Judy and John Hellstrom	10	Volume 1	5 Allocation of Public Resources	5.	Support
Decision Requested	Retain content of Introduction.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
698	Environmental Defence Society Incorporated	10	Volume 1	5 Allocation of Public Resources	5.	Support in Part
Decision Requested	Amend the introduction so that it identifies that allocation of natural resources for use should only occur above non-derogable environmental bottom lines set to safeguard the life-supporting capacity of the resource in question. The introduction should better reflect s5 RMA and, in the case of freshwater, to reflect Objective B1 NPSFM.					
712	Flaxbourne Settlers Association	36	Volume 1	5 Allocation of Public Resources	5.	Support
Decision Requested	Retain [<i>inferred</i>]					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	5	Volume 1	5 Allocation of Public Resources	5.	Oppose
Decision Requested	Rename the chapter: "Freshwater Use and Allocation" Amend the introduction to align with the content of the chapter and how fresh water provides for the social and economic welfare of the community as well as life supporting capacity for the natural environment. Explain that marine water issues are addressed in the Coastal Environment Chapter. Move Issue 5J, Objective 5.1 and Policies and methods to the Coastal Environment Chapter. Merge and combine with provisions within the coastal environment chapter where possible to improve clarity and reduce repetition.					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	6	Volume 1	5 Allocation of Public Resources	5.	Support in Part
Decision Requested	Amend the introduction to recognise that further flow assessments are needed to ensure any future allocation retains necessary instream flows for indigenous vegetation and habitat of indigenous species. Amend the policies and methods to set out a process for council to review the flows of all major streams and rivers in Marlborough in order to understand what water can be subsequently allocated and to stay within those limits.					
716	Friends of Nelson Haven and Tasman Bay Incorporated	41	Volume 1	5 Allocation of Public Resources	5.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>That the following amendment (strike-through) is made to the third sentence of the second paragraph of the Introduction: Another significant contributor to the economy is the marine farming industry, which is reliant on being able to occupy coastal space in order to develop.</p> <p>That the following amendments (strike-through and bold) are made to the second and third sentences of the third paragraph of the Introduction: Allocation of resource use will reflect sustainable management. Any significant reduction or change in approach to resource use could Climate change can have significant implications for Marlborough's economic, cultural and social wellbeing and for the sustainable management of these natural and physical resources. The two main areas where allocation of public resources is considered to be an issue are rights to occupy space in the coastal marine area, and rights to take and use freshwater. Limitations on access to resources may well be different compared to how that has been achieved today.</p>					
769	Horticulture New Zealand	38	Volume 1	5 Allocation of Public Resources	5.	Support in Part
Decision Requested	<p>Include a new method: 5.M.1A Identification of values supported by freshwater, groundwater resources. To identify, the values that the community places on freshwater bodies. These values will be used as the basis for establishing freshwater objectives and policy responses to manage the waterbodies</p>					
811	Jo Kerry	2	Volume 1	5 Allocation of Public Resources	5.	Oppose
Decision Requested	<p>That:</p> <p>The MEP includes new policy to safeguard our water resource from being drawn and exported out of the region.</p> <p>Industry is charge more for water.</p> <p>More controls around water than presently exist, growth and land development should not be at the expense of the viability of our long-term water security.</p> <p>There is greater diversification in land use.</p> <p>The plan is amended to ensure the water rights of individual are given priority over industry.</p> <p>The plan is amended to allow for the residents of Marlborough to override any decision regarding fluoride that the Nelson Marlborough DHB might make regarding fluoride.</p>					
909	Longfield Farm Limited	83	Volume 1	5 Allocation of Public Resources	5.	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Longfield submit the following policy be inserted as Policy 5.8.4 with a subsequent amendment to the numbering of the following existing policies. <u>Policy 5.8.4 Aquifer water may be abstracted to storage to provide water users with greater flexibility to manage water use on-site and to ensure that in the event of aquifer minimum levels being reached an alternate supply of water may be available.</u>					
961	Marlborough Chamber of Commerce	1	Volume 1	5 Allocation of Public Resources	5.	Support
Decision Requested	No decision requested - none able to be inferred from submission.					
962	Marlborough Forest Industry Association Incorporated	31	Volume 1	5 Allocation of Public Resources	5.	Oppose
Decision Requested	Equally state that hill country is best suited to commercial forestry.					
990	Nelson Forests Limited	166	Volume 1	5 Allocation of Public Resources	5.	Oppose
Decision Requested	Delete the reference to viticulture – it infers that the council has picked this industry as being more important than others.					
994	New Zealand Fish Passage Advisory Group	6	Volume 1	5 Allocation of Public Resources	5.	Support in Part
Decision Requested	There needs to be Anticipated Environmental Results and Monitoring Effectiveness Requirements to back up these policies. This should include: AER: Maintenance of fish passage. Monitoring: All structures in waterways shall be assessed for their ability to provide for fish passage.					
995	New Zealand Forest Products Holdings Limited	9	Volume 1	5 Allocation of Public Resources	5.	Support in Part
Decision Requested	Retain Volume 1 Chapter issues, objectives, policies and rules except for the decision requested for Policies 5.10.1 and 5.10.6 - see submission points 995.10 and 995.11					
1186	Te Atiawa o Te Waka-a-Maui	19	Volume 1	5 Allocation of Public Resources	5.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	If the MDC is to apply a charge on coastal users, then a similar charge should be imposed on those that use public resources for private gain. Examples of this are takers and users of water for commercial gain, and discharges of pollutants to air.					
1186	Te Atiawa o Te Waka-a-Maui	20	Volume 1	5 Allocation of Public Resources	5.	Support in Part
Decision Requested	The Trustees of Te Atiawa seek that cultural indicators are incorporated into the water allocation regime, the air shed management, and management of the coast.					
1186	Te Atiawa o Te Waka-a-Maui	50	Volume 1	5 Allocation of Public Resources	5.	Support in Part
Decision Requested	Create AER for the coastal allocation and cultural values.					
1188	Te Runanga o Ngati Rarua	4	Volume 1	5 Allocation of Public Resources	5.	Oppose
Decision Requested	Formal engagement with Iwi and the removal of the offending clauses from the plan.					
1189	Te Runanga o Kaikoura and Te Runanga o Ngai Tahu	32	Volume 1	5 Allocation of Public Resources	5.	Support in Part
Decision Requested	<p>Accept with amendments: <u>Water is a taonga and is essential to all as a life-source. Water is also essential for mahinga kai, and holds particular significance to Tangata Whenua Iwi.</u> The Council frequently allocates or authorises the use of these natural resources for private benefit, especially resources in the coastal marine area, rivers, riverbeds and aquifers.</p> <p>[...]Any significant reduction or change in approach to resource use could have significant implications for Marlborough's economic, cultural and social wellbeing. <u>However, a healthy economy which relies on the environment, must be premised on a healthy environment.</u> The three main [...]</p>					
1189	Te Runanga o Kaikoura and Te Runanga o Ngai Tahu	34	Volume 1	5 Allocation of Public Resources	5.	Oppose
Decision Requested	Reject, or accept with amendments: Include a new policy to identify the natural and human use values in the district.					
425	Federated Farmers of New Zealand	24	Volume 1	5 Allocation of Public Resources	Issue 5A	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the issue is retained as notified.					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	7	Volume 1	5 Allocation of Public Resources	Issue 5A	Support
Decision Requested	Retain Issue 5A.					
425	Federated Farmers of New Zealand	26	Volume 1	5 Allocation of Public Resources	Objective 5.1	Support in Part
Decision Requested	That the objective is amended to read as follows (bold) - " <i>Water allocation and water use management regimes reflect hydrological and environmental conditions, and social and economic values, within each water resource.</i> "					
479	Department of Conservation	7	Volume 1	5 Allocation of Public Resources	Objective 5.1	Support
Decision Requested	Retain as notified.					
509	Nelson Marlborough Fish and Game	27	Volume 1	5 Allocation of Public Resources	Objective 5.1	Support
Decision Requested	Retain as proposed					
548	Awatere Water Users Group Incorporated	8	Volume 1	5 Allocation of Public Resources	Objective 5.1	Support
Decision Requested	Retain Objective 5.1.					
688	Judy and John Hellstrom	11	Volume 1	5 Allocation of Public Resources	Objective 5.1	Support
Decision Requested	Retain Objective 5.1.					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	8	Volume 1	5 Allocation of Public Resources	Objective 5.1	Support
Decision Requested	Retain Objective 5.1.					
716	Friends of Nelson Haven and Tasman Bay Incorporated	44	Volume 1	5 Allocation of Public Resources	Objective 5.1	Oppose
Decision Requested	That a new policy is added that addresses the cumulative effects of discharges of contaminants into enclosed coastal waters, in particular the Kaituna/Pelorus and Wairau Lagoon estuaries.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
769	Horticulture New Zealand	8	Volume 1	5 Allocation of Public Resources	Objective 5.1	Oppose
Decision Requested	Amend Objective 5.1 as follows: Water allocation and water use management regimes will reflect the values identified for the water resource. Amend the Explanation to be consistent with the objective.					
908	Lion - Beer, Spirits and Wine (NZ) Limited	1	Volume 1	5 Allocation of Public Resources	Objective 5.1	Support
Decision Requested	Retain Objective 5.1 and supporting policies, subject to any consequential amendments required as a result of Lion's other submissions and relief.					
962	Marlborough Forest Industry Association Incorporated	32	Volume 1	5 Allocation of Public Resources	Objective 5.1	Support in Part
Decision Requested	Ensure that there is equitable allocation of the water resource, recognising passive and abstractive use.					
990	Nelson Forests Limited	167	Volume 1	5 Allocation of Public Resources	Objective 5.1	Support
Decision Requested	Delete the provisions in the MEP controlling commercial forest planting and replanting in an afforestation flow sensitive site.					
1039	Pernod Ricard Winemakers New Zealand Limited	4	Volume 1	5 Allocation of Public Resources	Objective 5.1	Support in Part
Decision Requested	Retain Objective 5.1, and ensure that the approach throughout the subsidiary objectives and policies gives effect to it, including by allowing finer grained assessment at the resource stage.					
1201	Trustpower Limited	15	Volume 1	5 Allocation of Public Resources	Objective 5.1	Support in Part
Decision Requested	Trustpower seeks the following relief from the Marlborough District Council: 1. Amend Objective 5.1 as follows: <i>"Water allocation and water use management regimes reflect hydrological and environmental conditions within each water resource <u>freshwater management unit</u>."</i> 2. Amend the explanation to Objective 5.1 as follows: <i>"If the management applied to the taking and use of water does not reflect the hydrological, <u>physical</u> and environmental conditions that exist in each water resource, one of two things may happen: ..."</i> 3. Any similar or consequential amendments to the PMP that stem from the submission and relief sought.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
425	Federated Farmers of New Zealand	30	Volume 1	5 Allocation of Public Resources	Policy 5.1.1	Support in Part
Decision Requested	That the policy is retained as notified; and The explanation to the policy is amended to include further information with regards to the identification of Freshwater Management Units and the manner in which they are intended to be utilised going forward. <i>(Inferred)</i>					
479	Department of Conservation	8	Volume 1	5 Allocation of Public Resources	Policy 5.1.1	Support
Decision Requested	Retain as notified.					
509	Nelson Marlborough Fish and Game	28	Volume 1	5 Allocation of Public Resources	Policy 5.1.1	Support in Part
Decision Requested	Fish and Game support the policy in its direction to establish freshwater management units but seeks amendment to provide greater clarity of the relationship between freshwater management units and water resource units.					
548	Awatere Water Users Group Incorporated	9	Volume 1	5 Allocation of Public Resources	Policy 5.1.1	Support

Decision
Requested

Add to these policies so they apply more broadly to include all structures in waterways. Add to these policies with respect to consent renewal and delaying the legal effect of the rules to allow time to remediate the in-stream structures:

Policy (a): To assess the need to provide for the passage of fish at existing structures when renewing consents or when setting priorities for remedial or enforcement action, by taking into account:

- (a) quantity of habitat upstream of the barrier;
- (b) whether the stream is continuously flowing or ephemeral, and the extent to which the barrier affects fish passage at a range of stream flows;
- (c) significance and quality of the habitat, including presence of threatened species or effects of predator species on indigenous species;
- (d) proximity of barrier to the sea;
- (e) costs associated with any works required to provide fish passage at a site or several sites on the same river and including any likely adverse effects of the retrofit on adjacent landowners and any adverse effects on hydraulic efficiency;
- (f) proximity and effects of other fish barriers, including natural barriers in the same stream;
- (g) whether the structure is still used or the time until any programmed replacement;
- (h) whether there are alternative methods of providing for the passage of fish.

Policy (b): To delay the legal effect of the rules regulating culverts, fords and tidal flood gates existing as at [plan notification date] until five years from the operative date and to:

- (a) require resource consents or
- (b) take enforcement action for structures that do not provide for fish passage at that time unless:
 - (i) the structure has been assessed against policy (a) as not requiring provision of fish passage or
 - (ii) a plan is prepared which includes:
 - (-) a description of the works required to provide for fish passage;
 - (-) a target completion date for the required work.
- (e) the works have been completed by the specified date.

509	Nelson Marlborough Fish and Game	37	Volume 1	5 Allocation of Public Resources	Policy 5.2.6	Oppose
Decision Requested	<p>Fish and Game seek that 24-hour averaging is replaced with "on an instantaneous basis by way of a hydrological model."</p> <p>The use of 24-hour daily flow averaging to assess when irrigation restrictions are triggered is problematic due to fluctuations in flow, sometimes large, over a 24 hour period, due to natural variance, abstraction and/or hydro generation. This is particularly problematic during periods of low flow and when large volumes of water have been allocated for abstraction. Using a 24 hour average flow can enable abstractive use to manipulate flows substantially below the minimum for significant periods of time.</p> <p>An instantaneous minimum flow can be implemented as a synthetic flow at particular points on the river through the adoption of a hydrological model that filters out the effect of fluctuating inputs into the main stem Wairau from the Branch River hydro scheme, taking into account transit time, inputs from higher catchment recorders, and the existing recorder. The rules for this model should be written into the MEP by way of an Appendix, to ensure clarity, transparency, and consistency for all users.</p>

425	Federated Farmers of New Zealand	39	Volume 1	5 Allocation of Public Resources	Policy 5.2.9	Support in Part
Decision Requested	That the policy is adopted as notified but amended as follows (bold) - " <i>Have regard to the adverse effects of the proposed instantaneous rate of take from any river, except an ephemerally flowing river, if that rate of take exceeds or is likely to exceed 5% of river flow at any time, unless the take is for domestic or stock drinking water.</i> " (Inferred)					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
479	Department of Conservation	17	Volume 1	5 Allocation of Public Resources	Policy 5.2.9	Support in Part
Decision Requested	<p>Replace Policy 5.2.9 as follows: Where a minimum flow has not been set for a tributary in Appendix 6, then either: a) a residual flow shall be set for that tributary at 90% of 7dMALF if there is not a robust relationship between the flow record in the mainstem of a river; or, b) if there is a robust relationship between the tributary and a minimum flow site listed in Appendix 6, then the take will be required to comply with that site's minimum flow.</p>					
509	Nelson Marlborough Fish and Game	40	Volume 1	5 Allocation of Public Resources	Policy 5.2.9	Support in Part
Decision Requested	<p>Having regard to adverse effects does not provide any protection or mitigation to waterbodies from the instantaneous rate of take. The policy does not provide sufficient direction for decision makers. It also potentially sets up two classes of river, permanently flowing rivers and those that are ephemeral, and creates the risk of a more lax environmental management regime for those rivers. Fish and Game seek to retain the policy with amendments that avoid adverse effects on any waterbody from an instantaneous rate of take.</p>

676	Dairy NZ	21	Volume 1	5 Allocation of Public Resources	Policy 5.2.9	Support
Decision Requested	Retain Policy 5.2.9.					
698	Environmental Defence Society Incorporated	18	Volume 1	5 Allocation of Public Resources	Policy 5.2.9	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Amend Policy 5.2.9 to read:</p> <p>Policy 5.2.9 – When considering a water take application Have regard to decision-makers must consider the adverse effects of the proposed instantaneous rate of take from any river, except an ephemerally flowing river, if that rate of take exceeds or is likely to exceed 5% of river flow at any time .</p> <p>The minimum flows set for rivers manage the cumulative effects of taking water on natural and human use values. However, it remains possible for a take at a discrete location to have a significant adverse effect on flow immediately downstream of the point of abstraction. The risk is probably greatest in the upper part of a catchment due to lower flow that tends to occur in those reaches. This policy allows decision makers to have regard to the adverse effects of an individual take in certain circumstances irrespective of the minimum flows established in the MEP. The proposed rate of abstraction must be calculated to exceed 5% of the river flow at the point of abstraction. Flows in excess of this threshold are considered to have the potential to adversely affect natural and human use values.</p> <p>The policy only applies if the river is perennially or intermittently flowing.</p>					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	21	Volume 1	5 Allocation of Public Resources	Policy 5.2.9	Support

Decision Requested	Retain Policy 5.2.21.					
994	New Zealand Fish Passage Advisory Group	2	Volume 1	5 Allocation of Public Resources	Policy 5.2.21	Support in Part

Decision Requested

Add to these policies so they apply more broadly to include all structures in waterways. Add to these policies with respect to consent renewal and delaying the legal effect of the rules to allow time to remediate the in-stream structures:

Policy (a): To assess the need to provide for the passage of fish at existing structures when renewing consents or when setting priorities for remedial or enforcement action, by taking into account:

- (a) quantity of habitat upstream of the barrier;
- (b) whether the stream is continuously flowing or ephemeral, and the extent to which the barrier affects fish passage at a range of stream flows;
- (c) significance and quality of the habitat, including presence of threatened species or effects of predator species on indigenous species;
- (d) proximity of barrier to the sea;
- (e) costs associated with any works required to provide fish passage at a site or several sites on the same river and including any likely adverse effects of the retrofit on adjacent landowners and any adverse effects on hydraulic efficiency;
- (f) proximity and effects of other fish barriers, including natural barriers in the same stream;
- (g) whether the structure is still used or the time until any programmed replacement;
- (h) whether there are alternative methods of providing for the passage of fish.

Policy (b): To delay the legal effect of the rules regulating culverts, fords and tidal flood gates existing as at [plan notification date] until five years from the operative date and to:

- (a) require resource consents or
- (b) take enforcement action for structures that do not provide for fish passage at that time unless:
 - (i) the structure has been assessed against policy (a) as not requiring provision of fish passage or
 - (ii) a plan is prepared which includes:
 - (-) a description of the works required to provide for fish passage;
 - (-) a target completion date for the required work.
- (e) the works have been completed by the specified date.

907	Levide Capital Limited	1	Volume 1	5 Allocation of Public Resources	Objective 5.3	Support in Part
Decision Requested	<p>The submission does not provide a clear <i>Decision Requested</i> for Objective 5.3. There are general comments about adding policies and rules, which have been included under Objective 5.3. It is <i>inferred</i> that these are relevant to this objective.</p> <p>Introduce policies (and rules) to provide for a grandfathering provision to recognise contracts for the full period of the water allocation consent; and which provides for further renewals taking into account commitments and dependence of particular users and industries.</p> <p>Introduce policies/rules/methods relating to water conservation measures and supply integration where feasible to maximise resource use efficiency.</p> <p>Add policies and rules stating that new Industrial subdivisions in water restricted areas (i.e. Riverlands), should be supported and encouraged to supply potable and nonpotable (grey or river water) water connections in order to reduce the use of limited potable water for activities such as watering landscapes, washing down trucks etc.).</p> <p>Add policies and rules which reward sustainable and wise use of Municipal water. Rewards could include giving responsible water users priority to Municipal water in the event that there are water restrictions due to availability issues. This type of tangible incentive would encourage businesses to invest in more expensive water conservation practices on their properties.</p> <p>Ensure that in managing the freshwater resource, the Council properly separates its RMA functions from its service delivery functions, and that the allocations of water take and water use is based on RMA principles and appropriate objectives and policies.</p>					
908	Lion - Beer, Spirits and Wine (NZ) Limited	3	Volume 1	5 Allocation of Public Resources	Objective 5.3	Support in Part
Decision Requested	Retain Objective 5.3 and supporting policies, other than Policy 5.3.7, which should be deleted.					
909	Longfield Farm Limited	6	Volume 1	5 Allocation of Public Resources	Objective 5.3	Support
Decision Requested	Retain as notified. (Inferred)

Decision Requested	Retain Policy 5.3.8 with amendments addressing the situation where the FMU is over allocated so as to provide for these activities where there is like for like replacement or a decrease in the amount of water taken and the activity continues to reflect reasonable demand for that use. For example:					
	Policy 5.3.8 - Approve water permit applications to continue taking and using surface water when:					
	(a) a specific minimum flow and allocation limit for the source Freshwater Management Unit is established in the Marlborough Environment Plan;					
	(ab) the Freshwater Management Unit is not over-allocated in terms of the limits set in the Marlborough Environment Plan;					
	(bc) there is to be no change to the intended use of water, or if there is a change in use, this results in a decrease in the rate of take of water; and					
	(ed) the application is made at least three months prior to the expiry of the existing water permit; or					
	(e) the Freshwater Management Unit is over-allocated in terms of the limits set in the Marlborough Environment Plan and there is no change to the intended use of water, no change to the rate and volume of water taken or there is a decrease in the rate and volume of water taken, and the water allocated reflects the reasonable demand given the intended use.

Decision Requested	Remove this policy.					
973	Ministry for Primary Industries	6	Volume 1	5 Allocation of Public Resources	Policy 5.3.16	Support in Part
Decision Requested	<p>1. MPI recommends that Policy 5.3.16 be clarified by citing the supporting council research on the threshold calculations and indicating what the threshold would translate to (in forestry planting) for the respective sensitive areas. This information could be placed in the Policy or in one of the meta data fields for the map layer.</p> <p>2. MPI recommends that Policy 5.3.16 be clarified by indicating whether the Council would consider that the threshold has been reached in these sensitive areas through a small number of applications for larger- scale commercial forestry (i.e. whole property planting), or whether they will be looking to have only a proportion of each property planted (i.e. woodlot planting).</p>

Decision Requested	Fish and Game seek to retain the objective with amendments to ensure that it refers specifically to use of water within the limits set.					
676	Dairy NZ	40	Volume 1	5 Allocation of Public Resources	Objective 5.4	Support in Part
Decision Requested	<p>That the following amendments (strike-through and bold) are made to Objective 5.4 explanation:</p> <p><i>In a state of full allocation of water resources, and given the implications of full allocation for potential users under the NPSFM, it is essential that an alternative method to better utilise scarce water resources gain access to water is found to meet future demand.</i></p>					
698	Environmental Defence Society Incorporated	28	Volume 1	5 Allocation of Public Resources	Objective 5.4	Support in Part
Decision Requested	<p>Include provisions under Objective 5.4 that enable the use of common review clauses to assess how and if authorized takes are being used efficiently. An efficiency assessment should occur against clear and specified criteria applicable to the specific use. If a take is not being efficiently used then the quantum should be reduced so that it can be accessed by new users. This tool is also important in ensuring that water takes are not 'banked'. A holder of a water permit should be able to transfer water only if they have a take that is efficient for their given activity and have taken action to reduce consumption even further. It should not be available to those who seek a take greater than is required for their specific use specifically to trade the excess.</p> <p>Efficiency reviews should also be provided for on termination of a water permit for the same reasons.</p>					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	57	Volume 1	5 Allocation of Public Resources	Objective 5.4	Support
Decision Requested	Amen the explanation to make it clear what the implications are.					
907	Levide Capital Limited	6	Volume 1	5 Allocation of Public Resources	Objective 5.4	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>The submission does not provide a clear <i>Decision Requested</i> for Objective 5.4. There are general comments about adding policies and rules, which have been included under Objective 5.4. It is <i>inferred</i> that these are relevant to this objective.</p> <p>Introduce policies (and rules) to provide for a grandfathering provision to recognise contracts for the full period of the water allocation consent; and which provides for further renewals taking into account commitments and dependence of particular users and industries.</p> <p>Introduce policies/rules/methods relating to water conservation measures and supply integration where feasible to maximise resource use efficiency.</p> <p>Add policies and rules stating that new Industrial subdivisions in water restricted areas (i.e. Riverlands), should be supported and encouraged to supply potable and nonpotable (grey or river water) water connections in order to reduce the use of limited potable water for activities such as watering landscapes, washing down trucks etc.).</p> <p>Add policies and rules which reward sustainable and wise use of Municipal water. rewards could include giving responsible water users priority to Municipal water in the event that there are water restrictions due to availability issues. This type of tangible incentive would encourage businesses to invest in more expensive water conservation practices on their properties.</p> <p>Ensure that in managing the freshwater resource, the Council properly separates its RMA functions from its service delivery functions, and that the allocations of water take and water use is based on RMA principles and appropriate objectives and policies.</p>					
908	Lion - Beer, Spirits and Wine (NZ) Limited	5	Volume 1	5 Allocation of Public Resources	Objective 5.4	Support
Decision Requested	Retain Objective 5.4 and supporting policies, subject to any consequential amendments required as a result of Lion's other submissions and relief.

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Trustpower seeks the following relief from the Marlborough District Council: 1. Amend Policy 5.4.1 as follows: <i>"The lapse period for water permits to take water shall be no more than two years, unless a longer lapsing period is justified for significant infrastructure or due to the scale or complexity of the activity."</i> 2. Any similar or consequential amendments to the PMP that stem from the submission and relief sought.					
1251	Fonterra Co-operative Group Limited	16	Volume 1	5 Allocation of Public Resources	Policy 5.4.1	Support in Part
Decision Requested	Amend Policy 5.4.1 as follows: The lapse period for water permits to take water shall <i>generally</i> be no more than two years, <i>however, a longer lapse period may be agreed where Council is satisfied that a longer period would be appropriate in the circumstances.</i>					
425	Federated Farmers of New Zealand	59	Volume 1	5 Allocation of Public Resources	Policy 5.4.2	Support in Part
Decision Requested	The explanatory text for this Policy is amend as follows (bold) - " <i>Section 125(1A)(a) specifies that a resource consent does not lapse if the consent is "given effect to."</i> There was uncertainty during the administration of the previous resource management plans as to what this term meant in the context of a water permit. To avoid confusion in the future, this policy clearly describes that a water permit is given effect to when, in conjunction with Policy 7.4, water is taken from the freshwater resource, the take is measured via an appropriate meter and the water is used for the purpose in which it was granted. Giving effect to in the case of a staged development is as when water is taken for the first stage. "					
509	Nelson Marlborough Fish and Game	75	Volume 1	5 Allocation of Public Resources	Policy 5.4.2	Support in Part
Decision Requested	Amend the policy to ensure that any water taken is used for the use authorised and not wasted.

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Relief Sought:</p> <p>That Section 5 be amended to include three passages regarding the "Portability/Transferability" of Water User rights(allocations).</p> <ul style="list-style-type: none"> • There should be TWO classifications of Water Users:One termed specifically as "Portable/Transferable" to allow it to be removed to another location off the original property; the other as"Non-Removable/Non-Transferable", which cannot be removed from the property it sits on. • Unless a special "portable" classification of Resource Consent is sought; a Lessee of Land who seeks Resource Consent for the taking of Water, be classified as a Custodian of the Consent, with the ownership transferred automatically to the Land-Owner at the termination or scheduled end of the Lease Agreement. • As part of the approval process, the Land-Owner(Lessor) should be required to sign-off on the application, and sign an acknowledgement form if the Resource Consent application is for a"Portable/Transferable" Water Use permit. <p>My choice of wording("portable" / "transferable") is designed to confine any rule change to the REMOVAL of water-usage from a property without the expressed consent of the Land-Owner. It is NOT the intent of the author to prevent a well from being bored elsewhere on the same property under the same Resource Consent, which is a reasonable modification to a Water Take/Use permit. In forwarding this amendment recommendation, I think it is important to state that we are looking to improve the protections of all that benefit from our natural resources, we are not looking for any personal gain or business advantage for ourselves.</p>					
425	Federated Farmers of New Zealand	61	Volume 1	5 Allocation of Public Resources	Policy 5.4.4	Support in Part
Decision Requested	<p>That the policy is amended as follows (strike out and bold) - "Enable access to water that has been allocated but is not currently being utilised by individual water permit holders through the transfer of water permits. Enable the transferring of water between water users either within the same FMU or catchment or groundwater aquifer provided the effects of the transfer upon existing users of the water resource is adequately mitigated."</p>

Decision Requested	Retain as notified.					
509	Nelson Marlborough Fish and Game	86	Volume 1	5 Allocation of Public Resources	Policy 5.5.5	Support in Part
Decision Requested	Retain the policy with amendments that ensure that the total of all water allocated does not exceed the limit set by 2030.					
676	Dairy NZ	48	Volume 1	5 Allocation of Public Resources	Policy 5.5.5	Support in Part
Decision Requested	<p>That the following amendments (bold) are made to Policy 5.5.5:</p> <p><i>Policy 5.5.5 – Resolve over-allocation of the Benmorven, Brancott and Omaka Aquifer Freshwater Management Units by reducing individual resource consent allocations on a proportional basis, based on the total allocation available relative to each individual's irrigated land area, and the type of intended use, or equivalent for non-irrigation water uses (excluding domestic and stock water). The reductions will be achieved by reviewing the conditions of the relevant water permits to reallocate the available allocation fairly across all relevant users.</i></p> <p>Explanation</p> <p>This policy sets out the means by which the over-allocation of groundwater from the Benmorven, Brancott and Omaka Aquifer FMUs will be resolved. A reduction in the allocation that has been granted resource consent, based on reallocating the total allocation available relative to each individual's irrigated land area and current use and reasonable water requirements, is considered to be the most equitable means of reducing total allocation of water from these FMUs. This recognises already established land use reasonable water use needs and associated significant investment that may accompany this existing land use. Where water use is for non-irrigation purposes, such as winery or commercial use, the proportion of the reallocation will be calculated to be relative to irrigation water permit holders.</p>

479	Department of Conservation	43	Volume 1	5 Allocation of Public Resources	Objective 5.6	Support
Decision Requested	Retain as notified.					
509	Nelson Marlborough Fish and Game	88	Volume 1	5 Allocation of Public Resources	Objective 5.6	Support in Part
Decision Requested	Retain the policy with amendments that ensure that it reflects that the taking of groundwater does not cause limits to be breached.					
688	Judy and John Hellstrom	23	Volume 1	5 Allocation of Public Resources	Objective 5.6	Support
Decision Requested	Retain Objective 5.6 and associated policies.					
698	Environmental Defence Society Incorporated	32	Volume 1	5 Allocation of Public Resources	Objective 5.6	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Objective 5.6 to read: Objective 5.6 – Ensure that the taking of groundwater does not cause significant adverse effects on river flow limits to be breached . (inferred)					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	72	Volume 1	5 Allocation of Public Resources	Objective 5.6	Support in Part
Decision Requested	Retain this objective and add another objective to set out expectations for effects of groundwater abstraction on instream flows where this may where the change in flow is less than significant.					
908	Lion - Beer, Spirits and Wine (NZ) Limited	7	Volume 1	5 Allocation of Public Resources	Objective 5.6	Support in Part
Decision Requested	Amend Objective 5.6 and supporting policies to provide a more appropriate and considered method for managing significant adverse effects on river flows.					
1039	Pernod Ricard Winemakers New Zealand Limited	52	Volume 1	5 Allocation of Public Resources	Objective 5.6	Support in Part
Decision Requested	Retain Objective 5.6, subject to amendments to policies and rules to address PR's concerns.					
1189	Te Runanga o Kaikoura and Te Runanga o Ngai Tahu	58	Volume 1	5 Allocation of Public Resources	Objective 5.6	Support
Decision Requested	Accept					
425	Federated Farmers of New Zealand	65	Volume 1	5 Allocation of Public Resources	Policy 5.6.1	Support in Part
Decision Requested	Amend the policy as follows (bold) - " <i>Unless there is an identified aquifer dominant Freshwater Management Unit, all water within a catchment will be managed as a surface water resource. This means that the minimum flow, management flow and allocation limit established for the river dominant Freshwater Management Unit will also apply to groundwater takes. A transition period (the Submitter has not provided any specific duration for the period) is provided so that those with existing groundwater takes can organise alternative sources.</i> "					
479	Department of Conservation	44	Volume 1	5 Allocation of Public Resources	Policy 5.6.1	Support
Decision Requested	Retain as notified.					
509	Nelson Marlborough Fish and Game	89	Volume 1	5 Allocation of Public Resources	Policy 5.6.1	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Retain the policy but amend the titles of tables in Appendix 5 to assist plan users in identifying surface water and aquifer dominated FMUs.

871	Kerseley Vineyard Trust	3	Volume 1	5 Allocation of Public Resources	Objective 5.7	Support in Part
Decision Requested	That an additional policy be added stating that resource consent to abstract and use irrigation water includes all reasonable associated machinery and land uses (that is, associated non-irrigation purposes).					
907	Levide Capital Limited	11	Volume 1	5 Allocation of Public Resources	Objective 5.7	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>The submission does not provide a clear <i>Decision Requested</i> for Objective 5.7. There are general comments about adding policies and rules, which have been included under Objective 5.7. It is <i>inferred</i> that these are relevant to this objective.</p> <p>Introduce policies (and rules) to provide for a grandfathering provision to recognise contracts for the full period of the water allocation consent; and which provides for further renewals taking into account commitments and dependence of particular users and industries.</p> <p>Introduce policies/rules/methods relating to water conservation measures and supply integration where feasible to maximise resource use efficiency.</p> <p>Add policies and rules stating that new Industrial subdivisions in water restricted areas (i.e. Riverlands), should be supported and encouraged to supply potable and nonpotable (grey or river water) water connections in order to reduce the use of limited potable water for activities such as watering landscapes, washing down trucks etc.).</p> <p>Add policies and rules which reward sustainable and wise use of Municipal water. rewards could include giving responsible water users priority to Municipal water in the event that there are water restrictions due to availability issues. This type of tangible incentive would encourage businesses to invest in more expensive water conservation practices on their properties.</p> <p>Ensure that in managing the freshwater resource, the Council properly separates its RMA functions from its service delivery functions, and that the allocations of water take and water use is based on RMA principles and appropriate objectives and policies.</p>					
908	Lion - Beer, Spirits and Wine (NZ) Limited	8	Volume 1	5 Allocation of Public Resources	Objective 5.7	Support in Part
Decision Requested	Amend Objective 5.7 and supporting policies to provide more appropriate and considered method for allocating water for given uses.					
909	Longfield Farm Limited	22	Volume 1	5 Allocation of Public Resources	Objective 5.7	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Policy 5.7.3 and all other sections where IrriCalc is referred to be amended (bold) to ensure that: (a) The methodology for determining reasonable water use rates for water "take" under Policy 5.7.2 and water "use" under Policy 5.7.3 are commensurate. (b) IrriCalc not be specified as the sole tool upon which reasonable water use is determined but reference be made in the respective policies to "validated model(s), tools or methods identified, approved and promulgated from time to time by the Council". (c) Property specific information including historical irrigation and soil moisture data may be considered in determining reasonable water use instead of the modelling tool. (d) Where property specific information substantiates that an allocation of water higher than that determined by the modelling tool is required, then such allocation may be approved. (e) In these circumstances the property specific information will be deemed to override the modelling result.					
509	Nelson Marlborough Fish and Game	95	Volume 1	5 Allocation of Public Resources	Policy 5.7.3	Support in Part
Decision Requested	Retain the policy with amendments that remove the words "except where the applicant can demonstrate that they require more water based on property specific information"

Decision Requested	<p>That (<i>inferred</i>):</p> <ul style="list-style-type: none"> • Council should adopt a more open view to the storage of water this has to be done with the required safety issues of course but more flexibility needs to be displayed, i.e., no Resource Consent for smaller damming propositions as long as they are professionally engineered, perhaps 10000m3 and below. • Properties with Southern Valley connections and water take are urged to use this facility especially in regard to original commitment. This would take the pressure off ground water reserves and aquifer. • Those that actively and publicly opposed the scheme should be last on as this has caused a lot of friction between neighbours. • New Resource Consent applications for water either from ground water, run off or river take should be tied to storage, storage pertinent to the land use option chosen.

Decision Requested	<p>Amend Policy 5.8.1 to read:</p> <p>Policy 5.8.1 – Encourage the storage of water as an effective response to seasonal water availability issues <u>where storage is consistent with safeguarding ecosystem health.</u></p> <p>Given Marlborough’s dry climate, especially over the summer months, storage of water has been utilised as a common strategy to offset temporary shortages of water for irrigation purposes. Storage has involved the interception of runoff by damming ephemeral water bodies, the damming of intermittently or permanently flowing water bodies and the placement of abstracted water in purpose-built reservoirs. There may also be the potential to augment river flow from the stored water. All of these approaches provide a back-up supply of water that increases water user resilience. For this reason the storage of water is strongly supported.</p> <p><u>Storage can have significant adverse effects on ecosystem health either through changes in flow or as a result of the increased use that storage provides for and the effects of that use on water quality. Water storage should not be encouraged unless it is consistent with safeguarding ecosystem health and achieving water quality targets.</u></p> <p>In some cases, activity status will assist to encourage the storage of water by providing for activities involved in storing water as a permitted activity or controlled activity.</p> <p>Damming of intermittently or permanently flowing waterbodies can create the potential for adverse effects. These effects will be considered through Policies 5.2.21 and 5.2.22.</p>

Decision Requested	<p>Make the following amendments (strikethrough and bold) to Policy 5.9.1:</p> <p><i>Policy 5.9.1 – Once an allocation limit is reached and that part of the water resource is fully allocated, any water that subsequently becomes free to allocate to other users will only be made available to those users through a system of ballottender.</i></p> <p>This policy sets out in principle that any water that becomes available to re-allocate shall be allocated via ballottender. A ballottender is considered by water users to be the most equitable way to determine who should receive the water given the likely competition for the water amongst existing users. It avoids the situation of a person gaining access to water in preference to other potential users based on the nature of the use or because they were first to make an application.</p>

Decision Requested	That Policy 5.9.2 be deleted in entirety.					
484	Clintondale Trust, Whyte Trustee Company Limited	33	Volume 1	5 Allocation of Public Resources	Policy 5.9.2	Support in Part
Decision Requested	<p>Make the following amendments (strikethrough and bold) to Policy 5.9.2: <i>Policy 5.9.2 – On securing the ballottender, the successful ballottertenderer must apply for the necessary water permits to authorise the taking and (if relevant) use of water. Until the successful ballotter(s)tenderer(s) secures the necessary water permits, the water resource is considered fully allocated.</i></p> <p>The policy sets out what the successful ballottertenderer must do to secure the allocation gained through a ballottender. As existing water permits define the spatial extent and rate of use, any proposed additional use would exceed existing allocations expressed in consents to take and use water. This means that a separate water permit would be required to authorise the taking and use of water. This policy secures the ability to make such an application without predetermining the outcome. While this process is underway, the water resource is considered to remain fully allocated to prevent a third party making an application for a water permit that would effectively nullify the result of the ballottender.</p>

This will result in more responsive and efficient use of water.</i></p>					
100	East Bay Conservation Society	8	Volume 1	5 Allocation of Public Resources	Issue 5J	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>EBCS strongly supports the introduction of coastal occupation charges by the Marlborough District Council.</p> <p>EBCS also supports the starting point for determining fees from “the actual expenditure considered necessary to promote sustainable management of the coastal marine area” (Policy 5.10.7).</p> <p>The EBCS recommends, however, that the MDC considers further the way in which coastal occupancy charges will be determined. There is a need for an effective, transparent, workable, understandable charging regime linked to a long term plan for sustainable management of the coastal marine area.</p> <p>We recommend the following changes to 5J.</p> <ol style="list-style-type: none"> 1. That MDC develops a long term, co-ordinated management plan as the basis for setting the priorities and determining the expenditure necessary to achieve sustainable management of the coastal marine area. This would be a dynamic plan, reviewed and implemented progressively and with possibilities for involvement by interested community organisations and businesses. 2. That coastal occupancy charges should be set for a minimum of 4 years ahead, so that those paying can forward manage their marine projects and those implementing the plan have continuity. 3. That the directive in s64A RMA - to consider the public benefits lost or gained, and the private benefit gained - should be a criterion for determining the level of coastal occupancy charges in <i>Policy 5.10.7</i>. We suggest this wording is substituted for the wording currently in <i>Policy 5.10.7(c)</i> so that the basis for assessment is clearly understandable. 4. That the proportion of public/private benefit is reflected in the coastal occupancy charges for shared use infrastructures, such as substantial public use of jetties, by way of discount or other MDC contribution to private maintenance costs. 5. That the public/private assessment methodology should reflect the difference between use of public space for commercial ventures and for residential necessity. We do not support Policy 5.10.4 because it excludes the associated activity from consideration in assessing fees. 6. That the community has an opportunity for consultation on the methodology for setting the fees and the actual proposed fees before these are finalised, possibly at the time of release of the Aquaculture Policies and Marine Farms Management Provisions. 7. We commend to MDC the simple methodology we proposed previously - <i>“the actual charge should be based on a fixed administrative cost per structure, plus a per square metre charge, divided by a factor reflecting the utility provided to the general public”</i>. We consider this captures the practical issues relevant to any methodology, and has the benefit of being explicit and understandable.

Decision Requested	Retain Policy 5.10.3.					
1186	Te Atiawa o Te Waka-a-Maui	47	Volume 1	5 Allocation of Public Resources	Policy 5.10.3	Oppose
Decision Requested	Amend the Policy to include at the end of the Policy the words, 'cultural and environmental values'.					
7	Barry William Blackley	1	Volume 1	5 Allocation of Public Resources	Policy 5.10.4	Oppose
Decision Requested	That the policy be amended so that it only applies to occupation associated with marine farming. (inferred)					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
258	Brent Yardley	1	Volume 1	5 Allocation of Public Resources	Policy 5.10.4	Support in Part
Decision Requested	Policy 5.10.4 is supported without amendment provided that the equitability and transparency issues of policies 5.10.5, 5.10.7 are addressed and policy 5.10.8 is clarified.					
270	Cameron Lawes	1	Volume 1	5 Allocation of Public Resources	Policy 5.10.4	Oppose
Decision Requested	Remove coastal occupancy charges for jetties (inferred).					
337	CP and LE Womersley	1	Volume 1	5 Allocation of Public Resources	Policy 5.10.4	Oppose
Decision Requested	The decision I seek from Council is that no further charges (<i>Coastal Occupancy Charges</i>) be added to our means of legal access to our property (<i>Lot 1 DP 18488, Lot 1 DP 311518 and Lot 1 DP 18196</i>). (<i>It has been inferred that this submission relates to Policy 5.10.4.</i>)					
401	Aquaculture New Zealand	38	Volume 1	5 Allocation of Public Resources	Policy 5.10.4	Support in Part
Decision Requested	(a) The imposition of charges is fair, efficient and equitable; (b) Appropriate provision is made for aquaculture in the MEP policy and mapping provisions (given that the aquaculture rules are not part of the MEP); and (c) The formula for determining charges is written into the MEP, rather than the Council's Annual Plan. The level of charges should reflect earlier work in the Coastal Occupancy Charges report prepared by Executive Finesse Ltd (January 2013). The MFA provisionally supports policy 5.10.4 if the above relief is granted.					
404	Eric Jorgensen	4	Volume 1	5 Allocation of Public Resources	Policy 5.10.4	Support in Part
Decision Requested	I submit that there must be consideration in Policy 5.10.4 (inferred) regards the strategic vision of what world class management of the coastal marine zone would be, how this would be implemented and what that would cost.					
424	Michael and Kristen Gerard	9	Volume 1	5 Allocation of Public Resources	Policy 5.10.4	Support

Decision Requested	To review the policy and agree it is inappropriate to levy such charges. If this is not agreed to at least provide the full reports outlining how the changing regime will be imposed. To modify the charges in circumstances where little or no public benefit is being jeopardised.					
960	Marlborough Berth and Mooring Association Incorporated	2	Volume 1	5 Allocation of Public Resources	Policy 5.10.7	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the following amendments (bold) are made to the explanation of Policy 5.10.7: <i>Policy 5.10.7 – The manner in which the level of coastal occupancy charges has been determined is as follows:</i> <i>In deciding how to set charges, the Council has used as its starting point the actual expenditure considered necessary to promote the sustainable management of the coastal marine area in as much as it may be affected by the identified effects of coastal occupiers. The budgeted expenditure for this is described year to year in the Council's Annual Plan for the Environmental Science and Monitoring Group, Environmental Policy Group and Environmental Compliance and Education Group.</i> <i>In determining who should meet the cost of sustainably managing the coastal marine environment, an allocation of costs needs to occur between beneficiaries. The Council has considered that a contribution towards the costs should be made by ratepayers (25%) as well as those benefiting from the occupation of public space (75%). The balance of funding required to promote the sustainable management of the coastal marine area in the wider sense will be sourced from elsewhere. The Council has also given consideration to anticipated waivers that may be granted and the number and size of the various occupations. From this assessment, a schedule of charges has been derived and is set out in the Council's Annual Plan.</i>					
1140	Sanford Limited	8	Volume 1	5 Allocation of Public Resources	Policy 5.10.7	Support in Part
Decision Requested	(i) Farms incurring coastal occupancy charges should have controlled status (ii) Include in the plan a formula for determining the coastal occupation charge (iii) provide for coastal occupation charges to be offset by other contributions such as provision of water quality information to council, surveying information, community contributions towards infrastructure (iv) ensure money raised from coastal environment to where the occupation takes place (v) add a provision that gives transparency as to how.

698	Environmental Defence Society Incorporated	37	Volume 1	6 Natural Character	6.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Amend the Chapter 6 introduction to read:</p> <p>Natural character includes the natural elements, patterns, processes and experiential qualities of an environment. The natural character of the coastal environment, and freshwater bodies and their margins, is comprised of a number of key components which include :</p> <ul style="list-style-type: none"> ● <u>coastal or freshwater landforms and landscapes (including seascape);</u> ● <u>coastal or freshwater physical processes (including the movement of water and sediments);</u> ● <u>biodiversity (including individual indigenous species, their habitats and communities they form);</u> ● <u>biological processes and patterns;</u> ● <u>water flows and levels, and water quality; and</u> ● <u>the ways in which people experience the natural elements, patterns and processes.</u> <p>Collectively, t These combine to create the overall natural character of the environment. Provisions included elsewhere in the Marlborough Environment Plan (MEP) target the individual components of natural character and provide direction on how adverse effects on particular values can be managed. These include:</p> <ul style="list-style-type: none"> • Chapter 5 - Allocation of Public Resources • Chapter 7 - Landscape • Chapter 8 - Indigenous Biodiversity • Chapter 9 - Public Access and Open Space • Chapter 13 - Use of the Coastal Environment • Chapter 15 - Resource Quality (Water, Air, Soil) <p>However, there is a need for this m Management needs to be integrated in order to preserve natural character in coastal and freshwater environments. This ensures that the management of the individual components of natural character is co-ordinated to achieve a common end in the context of Section 6(a) of the Resource Management Act 1991 (RMA), of the New Zealand Coastal Policy Statement 2010 (NZCPS) and of the National Policy Statement for Freshwater Management 2014 (NPSFM).</p>					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	120	Volume 1	6 Natural Character	6.	Support in Part
Decision Requested	<p>Amend the introduction to provide clear outline and expectation of what is addressed in the chapter, for example by including the following: “This chapter provides for the identification and protection of natural character to recognise and give effect to s6(a) of the RMA and Policy 13 and 14 of the NZCPS. For this reason the chapter includes policies and methods to guide activities within both the coastal and freshwater environments. The natural character areas identified under this chapter are included in Appendix 2 (coastal), Appendix 5 (freshwater) in Volume 3 and Riparian Natural Character Management Areas in Volume 4 (see the overlays).”</p>

Decision Requested	Limitations to only apply to a set of identified rivers - not <u>all</u> rivers.					
990	Nelson Forests Limited	179	Volume 1	6 Natural Character	Objective 6.2	Oppose
Decision Requested	Amend this Objective to apply to rivers that have natural character, not all rivers, as well as the coastal environment and lakes.					
995	New Zealand Forest Products Holdings Limited	12	Volume 1	6 Natural Character	Objective 6.2	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>It is considered some primary production activities may serve to enhance the natural character of an area. It is anticipated that this may occur when an area of pastoral farming is planted in forest. Commercial forestry should be enabled in these circumstances.</p> <p>Without limiting the generality of the foregoing, to address matters the Submitter also seeks the following relief:</p> <p>(a) Include new policies which recognise that where land containing commercial forestry is identified as having natural character, the effects of forestry and the intensification and development of forestry is not an adverse effect, but is inherent to the character of the area, otherwise areas of land which are currently commercial forestry should not be recognised as having natural character;</p> <p>(b) The objectives and policies, particularly (but not limited to) Policy 6.13 and 6.15 which recognise 'human induced modification' affects the 'natural character' of an area be retained;</p> <p>(c) The objectives and policies, particularly (but not limited to) Policy 6.2.5 should be retained and amended to enable the ongoing use of existing primary production activities in such locations;</p> <p>(d) The objectives and policies, particularly (but without limitation) Policies 6.2.1 to 6.2.3 which require that adverse effects only be 'avoided' should be amended to include 'remedied or mitigated';</p> <p>(e) Recognise that primary production activities such as commercial forestry have the potential to enhance the natural character in an area. To that extent Policy 6.2.6 is supported subject to specific amendments being made to recognise commercial forestry; and</p> <p>(f) Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.</p>					
1041	Port Clifford Limited	10	Volume 1	6 Natural Character	Objective 6.2	Support in Part
Decision Requested	Retain Objective 6.2, subject to amending to reflect that some essential activities need to be located in the coastal environment by necessity.					
1140	Sanford Limited	16	Volume 1	6 Natural Character	Objective 6.2	Oppose
Decision Requested	(i) Amend both the Objective and Policy so that intent is to 'Preserve <u>the values</u> in the natural character rather than avoiding changes to the character', and (ii) 'Recognise ongoing use and developments that are lawfully established'.					
1201	Trustpower Limited	59	Volume 1	6 Natural Character	Objective 6.2	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Trustpower seeks the following relief from the Marlborough District Council: 1. Amend Objective 6.2 as follows: <i>"Preserve the characteristics and qualities that contribute to the natural character of the coastal environment, and lakes and rivers and their margins, and protect them from inappropriate subdivision, use and development."</i> 2. Any similar or consequential amendments to the PMP that stem from the submission and relief sought.					
401	Aquaculture New Zealand	51	Volume 1	6 Natural Character	Policy 6.2.1	Oppose
Decision Requested	Delete Policy 6.2.1 and replace with: New Policy 6.2.1 - In the coastal environment: "Avoid adverse effects of subdivision use, and development on the characteristics and qualities which make up the outstanding values of areas of outstanding natural character." Where (a) does not apply, avoid significant adverse effects and avoid, remedy or mitigate other adverse effects of subdivision, use and development on natural character. Methods which may achieve this include: Ensuring the location, intensity, scale and form of subdivision and built development is appropriate having regard to natural elements, landforms and processes, including vegetation patterns, ridgelines, headlands, peninsulas, dune systems, reefs and freshwater bodies and their margins; and In areas of high natural character, minimising to the extent practicable indigenous vegetation clearance and modification (including earthworks / disturbance, structures, discharges and extraction of water) to natural wetlands, the beds of lakes, rivers and the coastal marine area and their margins; and Encouraging any new subdivision and built development to consolidate within and around existing settlements or where natural character has already been compromised.					
425	Federated Farmers of New Zealand	86	Volume 1	6 Natural Character	Policy 6.2.1	Support
Decision Requested	That the policy is amended to read as follows (strike out and bold) - "Avoid the adverse effects of Enable subdivision, use or development on areas of the coastal environment with outstanding natural character values where the activity is consistent with underlying zoning and existing land uses, and on lakes and rivers and their margins with high and very high natural character values and where significant adverse effects of inappropriate activities can be avoided, remedied or mitigated. "					
426	Marine Farming Association Incorporated	51	Volume 1	6 Natural Character	Policy 6.2.1	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Delete the Policy and replace as follows - New Policy 6.2.1 - In the coastal environment: <i>"a) Avoid adverse effects of subdivision use, and development on the characteristics and qualities which make up the outstanding values of areas of outstanding natural character.</i> <i>b) Where (a) does not apply, avoid significant adverse effects and void, remedy or mitigate other adverse effects of subdivision use and development on natural character. Methods which may achieve this include:</i> <i>(i) Ensuring the location, intensity, scale and form of subdivision and built development is appropriate having regard to natural elements, landforms and processes, including vegetation patterns, ridgelines, headlands, peninsulas, dune systems, reefs and freshwater bodies and their margins; and</i> <i>(ii) In areas of high natural character, minimising to the extent practicable indigenous vegetation clearance and modification (including earthworks/ disturbance, structures, discharges and extraction of water) to natural wetlands, the beds of lakes, rivers and the coastal marine area and their margins; and</i> <i>(iii) Encouraging any new subdivision and built development to consolidate within and around existing settlements or where natural character has already been compromised."</i>					
433	Port Marlborough New Zealand Limited	16	Volume 1	6 Natural Character	Policy 6.2.1	Support in Part
Decision Requested	Amend as follows: Avoid the adverse effects of <u>inappropriate</u> subdivision, use or development on areas of the coastal environment with outstanding natural character values and on lakes and rivers and their margins with high and very high natural character values.					
479	Department of Conservation	59	Volume 1	6 Natural Character	Policy 6.2.1	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
990	Nelson Forests Limited	180	Volume 1	6 Natural Character	Policy 6.2.1	Oppose
Decision Requested	Reword the policy explanation to reflect how "avoid" is to be applied to rivers with high or very high natural character values where they are part of a working rural environment. Avoid in this context should still provide for access, crossings and minor adverse effects associated with these uses and adjacent land use activities.					
1002	New Zealand Transport Agency	22	Volume 1	6 Natural Character	Policy 6.2.1	Support in Part
Decision Requested	Amend Policy 6.2.1 as follows: <i>Avoid the adverse effects of subdivision, use or development on areas of the coastal environment with outstanding natural character values and on lakes and rivers and their margins with high and very high natural character values, <u>except where it is necessary to enable the maintenance, construction, operation and upgrade of regionally significant infrastructure.</u></i>					
1039	Pernod Ricard Winemakers New Zealand Limited	75	Volume 1	6 Natural Character	Policy 6.2.1	Oppose
Decision Requested	Council consider re-wording to address these drafting issues, for example by changing the wording to: <i>"... and <u>avoid significant effects</u> on lakes and rivers and their margins with high and very high natural character values".</i>					
1041	Port Clifford Limited	11	Volume 1	6 Natural Character	Policy 6.2.1	Oppose
Decision Requested	Amend Policy 6.2.1 to reflect that some essential activities need to be located in the coastal environment by necessity, and that avoidance of adverse effects is not always possible.					
1198	Transpower New Zealand Limited	13	Volume 1	6 Natural Character	Policy 6.2.1	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Amend Policy 6.2.1 as follows:</p> <p><i>"Policy 6.2.1 – Avoid the adverse effects of <u>inappropriate</u> subdivision, use or development on areas of the coastal environment with outstanding natural character values and on lakes and rivers and their margins with high and very high natural character values.</i> <i>Where the natural character of the coastal environment is outstanding, Section 6(a) of the RMA indicates that this level of preservation should be retained, particularly when coupled with the similar direction in Policy 13 of the NZCPS. This means that <u>the any</u> adverse effects of <u>inappropriate activities</u> on natural character values should be avoided. That is not to say that no subdivision, use or development can occur within the coastal environment - activities may not adversely affect the natural character of the surrounding environment, or may include features or benefits that maintain the existing levels of natural character. <u>In addition there are some activities, for instance National Grid assets, which have a technical, functional or operational need to locate in the coastal environment. This is recognised by Policy 6 of the NZCPS.</u></i> <i>For freshwater bodies there is also a requirement in Section 6(a) to preserve the natural character of wetlands, lakes and rivers and their margins and to protect this natural character from inappropriate subdivision, use and development. Having regard to Policy 6.1.5, the Council has assessed the values of rivers and lakes and their level of significance in order to give effect to Section 6(a). In undertaking this assessment, the Council has determined that where the freshwater values are high or very high, then adverse effects on these values should be avoided, <u>except where the avoidance of adverse effects is not possible due to the technical, functional or operational requirements of nationally significant infrastructure.</u>"</i></p>					
1201	Trustpower Limited	60	Volume 1	6 Natural Character	Policy 6.2.1	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Amend Policy 6.2.2 as follows:</p> <p><i>"Policy 6.2.2 – Avoid significant adverse effects of <u>inappropriate</u> subdivision, use or development on coastal natural character, having regard to the significance criteria in Appendix 4.</i></p> <p><i>The degree of adverse effects on coastal natural character is an important consideration under Policy 13(1)(b) of the NZCPS. Where the extent of change in the coastal environment from subdivision, use or development causes significant adverse effects on natural character, the NZCPS states those effects should be avoided. There is therefore a threshold beyond which remediation and/or mitigation of those adverse effects is not an appropriate management option. It is acknowledged that there are some activities that have a technical, functional and operational need to be located in areas identified as having natural character, such as the linear infrastructure that is nationally significant. The adverse effects of such activities cannot be avoided in all cases. That threshold will be determined on a case-by-case basis through the resource consent or plan change process. The significance of the adverse effect will depend on the nature of the proposal, the natural character context within which the activity is proposed to occur and the degree of change to the attributes that contribute to natural character in that context.</i></p> <p>..."</p>					
152	Clova Bay Residents Association Inc	19	Volume 1	6 Natural Character	Policy 6.2.3	Oppose
Decision Requested	That Policy 6.2.3 apply to the coastal marine area irrespective of existing classification of natural character.

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend the Policy as follows (strike through and bold) - "Where resource consent is required to undertake an activity, excluding plantation forestry , within coastal or freshwater environments with high , very high or outstanding natural character, regard will be had to the potential adverse effects of the proposal on the elements, patterns, processes and experiential qualities that contribute to natural character."					
698	Environmental Defence Society Incorporated	44	Volume 1	6 Natural Character	Policy 6.2.4	Support in Part
Decision Requested	Amend Policy 6.2.4 to read: Policy 6.2.4 – Where resource consent is required to undertake an activity within coastal or freshwater environments with high, very high or outstanding natural character, the application must address: (a) the potential adverse effects on the characteristics and qualities that contribute to the natural character values of the area. (b) How policies 6.2.1 or 6.2.2 will be achieved (using Appendix 4 if applicable) and taking into account: (i) The location, scale and design of the proposed activity. (j) The extent of anthropogenic changes. (k) The presence or absence of structures, buildings or infrastructure. (l) The temporary or permanent nature of adverse effects. (m) The physical and visual integrity of the area, and the natural processes of the location. (n) The intactness of any areas of significant vegetation and vegetative patterns. (o) The physical, visual and experiential values that contribute significantly to the wilderness and scenic value of the area. (p) The integrity of landforms, geological features and associated natural processes. (q) The natural characters and qualities that exist or operate across land and water and between freshwater bodies and coastal water bodies. regard will be had to the potential adverse effects of the proposal on the elements, patterns, processes and experiential qualities that contribute to natural character .

152	Clova Bay Residents Association Inc	17	Volume 1	6 Natural Character	Policy 6.2.6	Support in Part
Decision Requested	That it should be made clearer in Policy 6.2.6 that opportunities for restoration or rehabilitation of natural character include the declining of applications for resource consent renewals in localities such as Clova Bay where significant adverse cumulative effects on natural character exist (as per Policies 6.2.3 and 6.2.7). That at a minimum Policy 6.2.6 prescribe that 'consent renewal attrition' (through the decline of renewal applications as they arise) may be applied as a default method of addressing adverse natural character cumulative effects where there are multiple contributing consented activities of similar effect on natural character. Our comments on Policy 6.2.7 elaborate on this further.

Decision Requested	Retain Policy 6.2.7.					
698	Environmental Defence Society Incorporated	45	Volume 1	6 Natural Character	Policy 6.2.7	Support in Part
Decision Requested	<p>Amend Policy 6.2.7 to read:</p> <p>Policy 6.2.7 – In assessing the cumulative effects of activities on the natural character of the coastal environment, or in or near lakes or rivers, consideration shall be given to:</p> <p>(a) the effect of allowing more of the same or similar activity;</p> <p>(b) the result of allowing more of a particular effect, whether from the same activity or from other activities causing the same or similar effect; and</p> <p>(c) the combined effects from all activities in the coastal or freshwater environment in the locality.</p> <p>Although individual activities may not adversely affect the natural character of the coastal environment or freshwater bodies, when combined with the effects of similar activities or other activities with similar effects, the activities may collectively have cumulative adverse effects on natural character. This policy describes how the cumulative effects of activities on the natural character of the coastal environment or freshwater bodies will be considered. For the coastal environment specifically, any consideration of cumulative effects should take into account scale and may need to include consideration of the intactness of the coastal terrestrial and coastal marine natural character areas.</p>					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	137	Volume 1	6 Natural Character	Policy 6.2.7	Support
Decision Requested	Retain and amend to include wetlands.					
868	Kenepuru and Central Sounds Residents Association Incorporated	10	Volume 1	6 Natural Character	Policy 6.2.7	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>The following paragraphs should also be added to meet the requirements of NZCPS 7: <i>"Acceptable limits of cumulative effects will be determined by reference to the threshold s specified in a particular policy and by reference to best practice and international assessment standards.</i> <i>Where a retraction of consented activities is required to meet acceptable cumulative effect threshold s then this may occur by re-consenting attrition until acceptable levels of cumulative effects are reached or through the application of activity retraction guidelines developed and agreed with stakeholders"</i></p> <p>For clarity, we note that there is no basis for differentiating cumulative environmental effect assessments for new activities over those for renewal applications. This is not least because there are various areas where there have been significant historical failures to consider appropriate thresholds of development or cumulative effects when granting existing consents. It should thus be made clear that policy 6.2.7 applies to the re- consenting of activities in the coastal environment as well as to the consenting of new activities in the coastal environment.</p>

Decision Requested	<p>The decision we seek from Council is:</p> <ul style="list-style-type: none"> • More monitoring of the Wairau Lagoon, putting systems in place to replenish this important resource. • A more sustainable approach to fresh water systems. • Alternatives to the current sewage output, work on this needs to start now for a cleaner greener way for sewage disposal, promoting the health of the Wairau river is paramount, producing water to world health standards for gathering of Kai, swimming and recreational activities on the Wairau River especially the mouth of the Wairau is of utmost importance. • Water quality standards need to be higher set my MEP, new ideas need to be looked at so the treated sewage does not continue to flow into the Wairau, if the outflow pipe has to remain, there needs to be a new implementation put in place to assure the quality of outgoing flow is clean/pure enough to enhance the river into becoming a river suitable for food gathering and recreational activities. • Keeping the Marlborough Bar area clean and green, having a stance on no Commercial Buildings to be consented for around the Wairau Bar area. • Keeping in line with Report 2741 State of the Environmental Monitoring of Wairau Estuary-August 2015 and recommendations of that report to MDC. • Keeping updated monitoring on the waterways, drains/creeks that flow into the Wairau Lagoons and Wairau River so any potential contamination from these creeks is quickly averted. • Water Quality needs to be a priority for MDC, our rivers have a mauri, mana and tapu of their own; our rivers are our taonga and are an indicator of environmental health we want more emphasis on this and more effective outcomes from our Council.

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
698	Environmental Defence Society Incorporated	46	Volume 1	7 Landscape	7.	Support in Part
Decision Requested	<p>Reword the Chapter 7 introduction to read:</p> <p>Introduction</p> <p>Our landscapes provide us with a Marlborough identity and are an integral part of the Marlborough environment. Landscapes are distinct spatial areas influenced by location-specific processes within the environment. These processes can be natural or human-induced (e.g. land use change). Natural features within the landscape can also help to define a landscape. The resulting landscape characteristics are expressed visually, but can be valued for their ecological significance or for intrinsic reasons (e.g. by providing a sense of place).</p> <p>The Resource Management Act 1991 (RMA) identifies the protection of outstanding natural features and landscapes from inappropriate subdivision, use and development as a matter of national importance (Section 6(b)). Those landscapes that do not meet the threshold of being considered 'outstanding' may still make a contribution to the visual appreciation or amenity values of Marlborough. The RMA seeks to maintain and enhance these landscapes with visual amenity value (Section 7(c)). For the purposes of this chapter, landscapes that are identified for Section 6(b) or 7(c) reasons are referred to as "significant landscapes." in provisions that apply to both outstanding natural landscapes and to amenity landscapes[N1] .</p> <p>There are five broad landscape areas in Marlborough: the Richmond Range and associated mountain ranges; the Wairau and Awatere River Valleys; the mountainous interior; the Marlborough Sounds; and the remainder of the coastal environment on the East Coast. The MEP identifies these landscape areas and then identifies outstanding natural landscapes and amenity landscapes within each.</p>					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	142	Volume 1	7 Landscape	7.	Support
Decision Requested	<p>Amend the introduction to include an explanation of how the natural character values/criteria contribute to identification of ONL/Fs and how the provisions of the plan address any overlap in terms of identifying specific areas or features.</p> <p>Include guidance on the relationship between the provisions in this chapter and the Coastal Environment chapter.</p>

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Without limiting the generality of the foregoing, to address matters the Submitter also seeks the following relief:</p> <p>(a) The objectives and policies particularly (but not limited to) Objective 7.1. and Policies 7.1.1 to 7.1.4 should be amended so that land subject to commercial forestry is excluded from being classified as an Outstanding Natural Features/Landscapes. Additionally, land with existing commercial forestry should be excluded from areas of Outstanding Natural Features/Landscapes. Much of that land comprises commercial forestry. It is inappropriate for land comprising commercial forestry to be Identified as part of an Outstanding Natural Feature I Landscape when it is well known that is was planted for commercial purposes and would be cleared at some time in the future, with consequent visual effects arising from clearing. The Submitter seeks the exclusion of the areas of Outstanding Natural Feature/Landscape insofar as it consists of commercial forestry. The significant problems with including commercial forestry in Outstanding Natural Features/Landscapes are addressed below by reference to a particular policy that applies to the Coastal Environment Zone.</p> <p>In the alternative, if the land with existing commercial forestry is not excluded from areas of Outstanding Natural Features/Landscapes then the following relief is sought:</p> <p>(a) the objectives and policies, particularly (but not limited to) the Introduction, Policy 7.2.3, Policy 7.2.6, Policy 7.2.7 and Policy 7.2.8 should be amended to recognise that commercial forestry forms, contributes to and is part of the identifiable Marlborough Sounds landscape and should be enabled (including its development, optimisation and expansion) within the rules that seek to protect landscape values; and</p> <p>In addition to the relief sought above:</p> <p>(a) New objectives and policies are required to recognise the importance of primary industry (specifically commercial forestry), rural industry and transport infrastructure, to the region, even within the Marlborough Sounds landscape;</p> <p>(b) The objectives and policies particularly (but not limited to) the Introduction, Policy 7.2.3, Policy 7.2.6, Policy 7.2.7 and Policy 7.2.8 be amended to:</p> <p>(i) Enable minor expansion of existing forestry without resource consent</p> <p>(ii) Enable the intensification of commercial forestry in those areas where it is already established and In areas adjacent existing commercial forestry, particularly where such a use may be anticipated by the underlying zoning; and</p> <p>(iii) Recognise commercial forestry activities in areas not identified as outstanding, only require controlled or restricted discretionary consent.</p> <p>(c) Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.</p>

Decision Requested	Amend: <p>"The Council will continue to make <u>has made</u> available information on Marlborough's diverse landscape character and the results of any evaluations of landscapes significance (following consultation with relevant landowners). This <u>information</u> will be a useful reference document generally, but can also be used by <u>made available to</u> resource consent applicants to assist in any assessment of adverse effects on landscape values."</p>					
152	Clova Bay Residents Association Inc	12	Volume 1	7 Landscape	Objective 7.2	Oppose
Decision Requested	<p>We submit that a cumulative effects landscape values policy must be included in MEP to meet the requirements of NZCPS Policy 7 – in a similar vein to that as has been included in Chapter 6 for natural character effects. Such a policy should prescribe:</p> <ul style="list-style-type: none"> • The positive identification of areas such as Clova Bay where coastal landscape values are under threat from adverse cumulative effects; and • That for all activities requiring a resource consent in the coastal marine environment, an assessment of cumulative adverse landscape effects be undertaken considering: <ul style="list-style-type: none"> (a) the effects of the existing level of activity; (b) the result of re-consenting or allowing more of a particular effect, whether from the same activity or from other activities causing the same or similar effect; and (c) the combined effects from all activities in the coastal marine environment in the locality. • That acceptable limits of cumulative effects will be determined by reference to the thresholds specified in a particular policy, or by effects not reducing landscape value to a lower level on a seven point scale, or through guidelines developed with stakeholders with reference to best practice and international assessment standards. • That where a retraction of consented activities is required to meet acceptable cumulative effect thresholds then this may occur by default through re-consenting attrition until acceptable levels of adverse cumulative effects are reached, or through the application of activity retraction guidelines developed and agreed with effected stakeholders.

424	Michael and Kristen Gerard	20	Volume 1	7 Landscape	Policy 7.2.1	Support
Decision Requested	Retain Policy 7.2.1					
425	Federated Farmers of New Zealand	103	Volume 1	7 Landscape	Policy 7.2.1	Support in Part
Decision Requested	That Policy 7.2.1 is amended to read as follows (strike out and bold) - " Control Manage activities that have the potential to degrade affect those values contributing to outstanding natural features and landscapes by requiring activities and structures to be subject to a comprehensive assessment of effects on landscape values through the resource consent process through permitted activity standards that ensure activities avoid, remedy or mitigate adverse effects. "					
426	Marine Farming Association Incorporated	78	Volume 1	7 Landscape	Policy 7.2.1	Oppose
Decision Requested	Delete 7.2.1 7.2.4 and 7.2.5 and replace with: New Policy 7.2.5 - in the Coastal Environment: a) Avoid adverse effects of subdivision use and development on the characteristics and qualities which make up the outstanding values of areas of outstanding natural features and outstanding natural landscapes. b) Where a) does not apply, avoid significant adverse effects and avoid, remedy or mitigate other adverse effects of subdivision, use and development on natural features and natural landscapes. Methods which may achieve this include:					

- (i) Ensuring the location, intensity, scale and form of subdivision and built development is appropriate having regard to natural elements, landforms and processes, including vegetation patterns, ridgelines, headlands, peninsulas, dune systems, reefs and freshwater bodies and their margins; and
- (ii) Encouraging any new subdivision and built development to consolidate within and around existing settlements or where natural landscape has already been compromised.

New Policy 7.2.5A - Outside the coastal environment avoid significant adverse effects and avoid, remedy or mitigate other adverse effects (including cumulative adverse effects) of subdivision, use and development on the characteristics and qualities of outstanding natural features and outstanding natural landscapes. Methods which may achieve this include:

- a) In outstanding natural landscapes, requiring that the location and intensity of subdivision, use and built development is appropriate having regard to, natural elements, landforms and processes, including vegetation patterns, ridgelines and freshwater bodies and their margins; and
- b) In outstanding natural features, requiring that the scale and intensity of earthworks and built development is appropriate taking into account the scale, form and vulnerability to modification of the feature.

New Policy 7.2.5B - When considering whether there are any adverse effects on the characteristics and qualities of the natural features and landscape values in terms of 7.2.5(a), whether there are any significant adverse effects and the scale of any adverse effects in terms of 7.2.5(b) and 7.2.5A, and in determining the character, intensity and scale of the adverse effects:

- a) Recognise that a minor or transitory effect may not be an adverse effect;
- b) Recognise that many areas contain on-going use and development that:
 - (i) Were present when the area was identified as high or outstanding or have subsequently been lawfully established
 - (ii) May be dynamic, diverse or seasonal;
- c) Recognise that there may be more than minor cumulative adverse effects from minor or transitory adverse effects;
- d) Have regard to any restoration and enhancement of the characteristics and qualities of that area of natural features and/or natural landscape;
- e) Recognise it may be appropriate to offset significant residual adverse effects on a landscape or feature to result in no net loss or preferably a net landscape gain;
- f) Recognise that where adverse effects cannot be practicably avoided, adverse effects could be minimised; and
- g) Acknowledge that a future adverse effect may be avoided where the effect is temporary and is authorised for a finite term.

Decision Requested	Retain Policy 7.2.3					
504	Queen Charlotte Sound Residents Association	23	Volume 1	7 Landscape	Policy 7.2.3	Support in Part
Decision Requested	<p>Make the following amendments (strike-through and bold) to Policy 7.2.3 (inferred):</p> <p><i>Policy 7.2.3 – Control activities that have the potential to degrade the amenity values that contribute to those areas of the Marlborough Sounds Coastal Landscape not identified as being an outstanding natural feature and landscape by:</i></p> <p>(a) using a non-regulatory approach as the means of maintaining and enhancing landscape values in areas of this landscape zoned as Coastal Living;</p> <p>(ba) setting standards/conditions that are consistent with the existing landscape values and that will require greater assessment where proposed activities and structures exceed those standards; and</p> <p>(eb) requiring resource consent for commercial forestry activities.</p>					
648	D C Hemphill	33	Volume 1	7 Landscape	Policy 7.2.3	Oppose
Decision Requested	<p>Delete Policy and replace with a new policy and method that reflects the following -</p> <p>Develop a completely different compliance regime that will achieve real environmental improvement. Such a regime should be developed jointly between the Council and the forest industry. In concept, it would consist of a fast track to Resource Consent approval for landowners, operators, and managers approved by the Council for their past satisfactory environmental performance, having regard also to the internal regime of each organization for achieving environmental protection . Those landowners, operators, and managers without such a history (or with past inferior environmental performance) would be held to a higher standard.</p> <p><i>(Inferred)</i></p>					
688	Judy and John Hellstrom	178	Volume 1	7 Landscape	Policy 7.2.3	Support in Part
Decision Requested	<p>That the following amendments (strike-through and bold) are made to Policy 7.2.3(c):</p> <p><i>Policy 7.2.3 – Control activities that have the potential to degrade the amenity values that contribute to those areas of the Marlborough Sounds Coastal Landscape not identified as being an outstanding natural feature and landscape by:</i></p> <p>(a) using a non-regulatory approach as the means of maintaining and enhancing landscape values in areas of this landscape zoned as Coastal Living; and</p> <p>(b) setting standards/conditions that are consistent with the existing landscape values and that will require greater assessment where proposed activities and structures exceed those standards; and</p> <p>(e) requiring resource consent for commercial forestry activities.</p>

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>That the policy is deleted; or</p> <p>That the Policy 7.2.4 is amended to read as follows (strike through and bold):</p> <p><i>"Where resource consent is required to undertake an activity within an outstanding natural feature and landscape or a landscape with high amenity value, regard will be had to the potential adverse effects consistency of the proposal on with the values that contribute to the landscape.";</i> and,</p> <p>that farming and rural activities are recognised in Appendix 1 as positively contributing to the values and attributes of ONFLs where they occur, and are provided for as permitted. <i>(The Submitter has not advised the locations where an ONFL is identified over rural or farmland for which they seek the addition of the value, therefore specific changes to Appendix 1 have not been able to be recorded in the submission.)</i></p>					
426	Marine Farming Association Incorporated	77	Volume 1	7 Landscape	Policy 7.2.4	Oppose
Decision Requested	Delete Policy.					
426	Marine Farming Association Incorporated	79	Volume 1	7 Landscape	Policy 7.2.4	Oppose
Decision Requested	<p>Delete 7.2.1 7.2.4 and 7.2.5 and replace with: New Policy 7.2.5 - in the Coastal Environment:</p> <p>a) Avoid adverse effects of subdivision use and development on the characteristics and qualities which make up the outstanding values of areas of outstanding natural features and outstanding natural landscapes.</p> <p>b) Where a) does not apply, avoid significant adverse effects and avoid, remedy or mitigate other adverse effects of subdivision, use and development on natural features and natural landscapes. Methods which may achieve this include:</p> <p>(i) Ensuring the location, intensity, scale and form of subdivision and built development is appropriate having regard to natural elements, landforms and processes, including vegetation patterns ridgelines, headlands, peninsulas, dune systems, reefs and freshwater bodies and their margins; and</p> <p>(ii) Encouraging any new subdivision and built development to consolidate within and around existing settlements or where natural landscape has already been compromised.</p> <p>New Policy 7.2.5A - Outside the coastal environment avoid significant adverse effects and avoid, remedy or mitigate other adverse effects (including cumulative adverse effects) of subdivision, use and development on the characteristics and qualities of outstanding natural features and outstanding natural landscapes. Methods which may achieve this include:</p> <p>a) In outstanding natural landscapes, requiring that the location and intensity of subdivision, use and built development is appropriate having regard to, natural elements, landforms and processes, including vegetation patterns, ridgelines and freshwater bodies and their margins; and</p>					

b) In outstanding natural features, requiring that the scale and intensity of earthworks and built development is appropriate taking into account the scale, form and vulnerability to modification of the feature.

New Policy 7.2.5B - When considering whether there are any adverse effects on the characteristics and qualities of the natural features and landscape values in terms of 7.2.5(a), whether there are any significant adverse effects and the scale of any adverse effects in terms of 7.2.5(b) and 7.2.5A, and in determining the character, intensity and scale of the adverse effects:

- a) Recognise that a minor or transitory effect may not be an adverse effect;
- b) Recognise that many areas contain on-going use and development that:
 - (i) Were present when the area was identified as high or outstanding or have subsequently been lawfully established
 - (ii) May be dynamic, diverse or seasonal;
- c) Recognise that there may be more than minor cumulative adverse effects from minor or transitory adverse effects;
- d) Have regard to any restoration and enhancement of the characteristics and qualities of that area of natural features and/or natural landscape;
- e) Recognise it may be appropriate to offset significant residual adverse effects on a landscape or feature to result in no net loss or preferably a net landscape gain;
- f) Recognise that where adverse effects cannot be practicably avoided, adverse effects could be minimised; and
- g) Acknowledge that a future adverse effect may be avoided where the effect is temporary and is authorised for a finite term.

688	Judy and John Hellstrom	180	Volume 1	7 Landscape	Policy 7.2.10	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Make the following amendments (strike-through and bold) to Policy 7.2.10 (<i>inferred</i>):</p> <p><i>Policy 7.2.10 – Reduce the impact of wilding pines spread of exotic tree species on the landscape by:</i></p> <p><i>(a) supporting initiatives to control existing wilding pines spread and limit their further spread; and</i></p> <p><i>(b) controlling the planting of commercial wood species that are prone to wilding pine spread.</i></p> <p>The ability of exotic tree species pine trees to spread from commercial plantations, soil conservation plantings, rural shelterbelts and isolated plantings is well documented in Marlborough. As pines these tree species spread, they alter the landscape due to their visual dominance and colour contrast. In addition, where forests have been harvested but not replanted there is the potential for rapid growth of wilding seedlings, creating more unmanaged sources of wilding pine spread. Many in the community believe that these landscape changes are unacceptable and some locals have initiated control programmes in an effort to reduce the presence of wilding pines tree species in the landscape and limit their spread to other areas. These efforts are to be supported as a means of effective landscape protection. Additionally, there are certain species of tree grown for commercial wood production that are more prone to wilding pine spread. Controls on planting certain species will assist to reduce the risk of wilding pine spread and therefore reduce impacts on landscape values.</p>					
698	Environmental Defence Society Incorporated	56	Volume 1	7 Landscape	Policy 7.2.10	Support
Decision Requested	<p>Amend Policy 7.2.10 to read:</p> <p>Policy 7.2.10 – Reduce the impact of wilding pines on the landscape by:</p> <p>(a) supporting initiatives to control existing wilding pines and limit their further spread; and</p> <p>(b) controlling the planting of commercial wood species that are prone to wilding pine spread.</p> <p><u>(c) Use consent conditions to require forestry operations to remove wilding pines within 1km of the designated forestry boundary and to cover the cost of removing wilding pines at a greater distance that have emanated from that operation.</u></p> <p><u>(b)(d) Using consent conditions to require wilding removal as part of subdivision.</u></p>

Decision Requested	<p>Make the following amendments (strike-through and bold) to Policy 7.2.11 (<i>inferred</i>):</p> <p><i>Policy 7.2.11 – Liaise with the Department of Conservation regarding any landscape issues on land administered by the Department and identified as having outstanding natural features and landscapes (including within the Marlborough Sounds Coastal Landscape).</i></p> <p>A significant proportion of outstanding natural features and landscapes occur on Crown land administered by the Department of Conservation. Because this land is managed for conservation purposes and is not likely to attract development, there are fewer threats to the biophysical, sensory and associative values in these landscapes compared to those areas with outstanding natural features and landscapes on privately owned land. However, that is not to say that potential threats do not exist. For example, applications can be made to operate concessions within areas administered by the Department and vegetation change can occur as a result of pest plant incursions (including wilding pines exotic tree species, broom and gorse). The Council will liaise with the Department on an ongoing basis to discuss landscape issues as they arise and to develop and implement appropriate management responses.</p>

Decision Requested	<p>Include new Appendix XX Biodiversity Offsetting</p> <p><u>The following sets out a framework for the use of biodiversity offsets. It should be read in conjunction with the NZ Government Guidance on Good Practice Biodiversity Offsetting in New Zealand. August 2014 (or any successor Central Government guidance and standards):</u></p> <p><u>1. Restoration, enhancement and protection actions will only be considered a biodiversity offset where they are used to offset the anticipated residual effects of activities after appropriate avoidance, minimisation, remediation and mitigation actions have occurred as per new policy XX, i.e. not in situations where they are used to mitigate the adverse effects of activities.</u></p> <p><u>2. A proposed biodiversity offset should contain an explicit loss and gain calculation and should demonstrate the manner in which no net loss or preferably a net gain in biodiversity can be achieved on the ground.</u></p> <p><u>3. A biodiversity offset should recognise the limits to offsets due to irreplaceable and vulnerable biodiversity and its design and implementation should include provisions for addressing sources of uncertainty and risk of failure the delivery of no net loss.</u></p> <p><u>4. Restoration, enhancement and protection actions undertaken as a biodiversity offset are demonstrably additional to what otherwise would occur, including that they are additional to any remediation or mitigation undertaken in relation to the adverse effects of the activity.</u></p> <p><u>5. Offset actions should be undertaken close to the location of development, where this will result in the best ecological outcome.</u></p> <p><u>6. The values to be lost through the activity to which the offset applies are counterbalanced by the proposed offsetting activity which is at least commensurate with the adverse effects on indigenous biodiversity, so that the overall result is no net loss, and preferably a net gain in ecological values.</u></p> <p><u>7. The offset is applied so that the ecological values being achieved through the offset are the same or similar to those being lost. 8. As far as practicable, the positive ecological outcomes of the offset last at least as long as the impact of the activity, and preferably in perpetuity. Adaptive management responses should be incorporated into the design of the offset, as required to ensure that the positive ecological outcomes are maintained over time.</u></p> <p><u>9. The biodiversity offset should be designed and implemented in a landscape context – i.e. with an understanding of both the donor and recipient sites role, or potential role in the ecological context of the area.</u></p> <p><u>10. The consent application identifies the intention to utilise an offset, and includes a biodiversity offset management plan that:</u></p> <p><u>i. sets out baseline information on indigenous biodiversity that is potentially impacted by the proposal at both the donor and recipient sites.</u></p> <p><u>ii. demonstrates how the requirements set out in this appendix will be addressed.</u></p> <p><u>iii. identifies the monitoring approach that will be used to demonstrate how the matters set out in this appendix have been addressed, over an appropriate timeframe.</u></p>

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Amend the Chapte 8 introduction to read:</p> <p>New Zealand's biodiversity gives our country a unique character and is internationally important. A large proportion of our species are endemic to New Zealand and if they become extinct they are lost to the world. About 90 percent of New Zealand insects, 80 percent of trees, ferns and flowering plants, 25 percent of bird species, all 60 reptile species, four frog species and two species of bat are endemic.</p> <p>New Zealand's biodiversity has helped shape our national identity, with our distinctive flora and fauna contributing to our sense of belonging. The koru and kiwi are internationally recognised. Biodiversity also provides social and economic benefits through recreational opportunities, tourism, research, education, provision of ecosystem services and natural resources for primary industry and customary and medical uses.</p> <p>The Resource Management Act 1991 (RMA) requires the Council to recognise and provide for as a matter of national importance the protection of areas of significant indigenous vegetation and significant habitats of indigenous fauna (Section 6(c)). The protection of these values, whether on land, in freshwater or coastal environments, also helps to achieve other matters of national importance, including landscape and natural character values and historic heritage. However, biodiversity values are also important components of amenity, kaitiakitanga, quality of the environment and ecosystem values, matters to which regard shall be had in terms of Section 7 of the RMA. For this reason there are important links between the provisions of this chapter and others in the Marlborough Environment Plan (MEP).</p> <p>In addition, there are specific roles and functions in relation to protecting significant natural areas and habitats and maintaining indigenous biological diversity. These functions enable the Council to:</p> <ul style="list-style-type: none"> - establish, implement and review objectives, policies and methods for maintaining indigenous biological diversity [Section 30(1)(ga)]; and - control any actual or potential effects of the use, development or protection of land for the purpose of maintaining indigenous biological diversity [Section 31(1)(b)(iii)]. <p><u>The New Zealand Coastal Policy Statement 2010 gives specific direction on how protection and management of indigenous biodiversity is to be achieved in the coastal and marine environments .</u></p> <p>Marlborough's central location within New Zealand and its varied landforms, climate and rich human history combine to form an interesting and diverse area. The District has a range of important and unusual natural features, native plants and animals, a number of which are at their southern or northern limits of distribution. Part of south Marlborough has been identified as one of five areas of high biodiversity concentration within New Zealand.</p> <p>....</p>

994	New Zealand Fish Passage Advisory Group	7	Volume 1	8 Indigenous Biodiversity	8.	Support in Part
Decision Requested	<p>There needs to be Anticipated Environmental Results and Monitoring Effectiveness Requirements to back up these policies. This should include:</p> <p>AER: Maintenance of fish passage.</p> <p>Monitoring: All structures in waterways shall be assessed for their ability to provide for fish passage.</p>					
995	New Zealand Forest Products Holdings Limited	14	Volume 1	8 Indigenous Biodiversity	8.	Support in Part
Decision Requested	<p>Without limiting the generality of the foregoing, to address matters the Submitter also seeks the following relief:</p> <p>(a) The objectives and policies, particularly (but not limited to) Objective 8.1 and Policy 8.1.2 should be amended to make it clear that appropriate (not absolute) protection of significant indigenous biodiversity is to be achieved. The current provisions suggest that the protection of significant indigenous biodiversity is too absolute;</p> <p>(b) The objectives and policies, particularly (but not limited to) Policy 8.1.1 should be amended to provide that even where an area has been assessed as having significant indigenous biodiversity value, it may not be mapped as "significant" where doing so would be inconsistent with the other objectives and policies of the plan;</p> <p>(c) The objectives and policies, particularly (but not limited to) Policy 8.2.9 overreaches by seeking to maintain, enhance or restore all ecosystems, irrespective of whether they are significant. It is not clear that the Council properly understood the impact of this policy. Policy 8.2.9 should be amended so that it is not directive and instead uses wording similar to Policy 8.2.5 - by seeking to encourage the positive outcomes identified. The objectives and policies, particularly (but not limited to) Policies 8.3.1, 8.3.2 and 8.3.8 fail to make appropriate provision for development (rural industry) and infrastructure that has a locational need to be in a particular location and where there are no reasonably practical alternatives. The objectives and policies should be amended to provide a limited exemption in this circumstance and expressly provide for effects to be remedied, mitigated or off-set in such circumstances. This is significant in Marlborough where there are large areas of land devoted to primary produce, significant roading constraints and emphasis on greater use of the CMA as a transport option; and</p> <p>(d) Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.</p>

Decision Requested	Retain Issue 8A					
456	George Mehlhopt	55	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support in Part
Decision Requested	The inclusion of policy recognition of the potential positive benefits to indigenous biodiversity from subdivision, use and development.					
509	Nelson Marlborough Fish and Game	120	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support
Decision Requested	Retain as proposed					
630	Combined Clubs of Marlborough Underwater Section	3	Volume 1	8 Indigenous Biodiversity	Issue 8A	Oppose
Decision Requested	<p>That commercial scallop dredging has had a catastrophe effect on the sounds underwater environment. This has been more noticeable in Queen Charlotte due to the fact that these beds are wild (no seeding is done), and have been on the decline for years.</p> <p>That commercial is banned, or not allowed to be restarted to protect the unique underwater habitats, the possibility of recreational dredging only in these areas could be considered. These dredges are much, smaller and lighter.</p> <p>Not all recreational people take scallops with dredges our club gathers by hand therefore causes little damage; but do see the result of siltation in bays.</p>					
693	Edward Ross Beech	1	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support
Decision Requested	Support Issue 8A.					
698	Environmental Defence Society Incorporated	60	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support in Part
Decision Requested	Amend Issue 8A so that it includes loss of diversity as a key issue.					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	170	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support in Part
Decision Requested	Retain and amend the explanation to state why this is of concern.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
716	Friends of Nelson Haven and Tasman Bay Incorporated	93	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support
Decision Requested	Retain Issue 8A and explanation. The submission makes particular reference to retaining the reference to the importance of feeding areas, in particular of threatened species as king shag (first sentence of the second paragraph on page 8-3) and retaining the fourth sentence of the fourth paragraph on page 8-3.					
845	Kenneth R and Sara M Roush	3	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support in Part
Decision Requested	That the following amendments (strike through and bold) are made to the 4th paragraph of the explanation under the heading Marine environments in Issue 8A: <i>The condition and state of marine biodiversity can be affected by land or water based activities. Adverse impacts can arise from sedimentation, contamination, and habitat disturbance, and changes in water flow. Effects can be temporary, but in particular circumstances can result in permanent loss or damage. Long term or cumulative smaller scale, localised effects from impacts such as contamination and physical disturbance can also have significant effects on the functioning of marine systems including nutrient, phytoplankton and zooplankton depletion. Many activities, such as recreational swimming, do not affect or have an impact on marine biodiversity; however, other activities, including shipping (especially large and/or fast ships), reclamations or other coastal structures, marine farming and physical disturbance from certain fishing techniques can affect marine biodiversity.</i>					
873	KiwiRail Holdings Limited	23	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support in Part
Decision Requested	Insert New Policy as follows: <u><i>Policy 8.3.x – Where activities associated with regionally significant infrastructure are proposed to take place in an area, habitat or ecosystem with significant indigenous biodiversity values, any adverse effects on the values of that area, habitat or ecosystem shall be remedied or mitigated, in order to retain the overall qualities and integrity of the area, habitat or ecosystem.</i></u>					
962	Marlborough Forest Industry Association Incorporated	63	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support in Part
Decision Requested	Recognise the role plantation forests have in maintaining indigenous biodiversity.					
994	New Zealand Fish Passage Advisory Group	10	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support in Part
Decision Requested	Add a statement highlighting the issue of fish passage with respect to all structures in waterways.					
1002	New Zealand Transport Agency	32	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Retain Issue 8A.					
1042	Port Underwood Association	5	Volume 1	8 Indigenous Biodiversity	Issue 8A	Support in Part
Decision Requested	Amend Issue 8A, Marine Environments, Paragraph 4 as follows (bold and strike through): <i>The condition and state of marine biodiversity can be affected by land or water based activities. Adverse impacts can arise from sedimentation, contamination, and habitat disturbance, and changes in water flow. Effects can be temporary, but in particular circumstances can result in permanent loss or damage. Long term or cumulative smaller scale, localised effects from impacts such as contamination and physical disturbance can also have significant effects on the functioning of marine systems including nutrient, phytoplankton and zooplankton depletion. Many activities, such as recreational swimming, do not affect or have an impact on marine biodiversity; however, other activities, including shipping (especially large and/or fast ships), reclamations or other coastal structures, marine farming and physical disturbance from certain fishing techniques can affect marine biodiversity.</i>					
364	Ian Balfour Mitchell	18	Volume 1	8 Indigenous Biodiversity	Objective 8.1	Support
Decision Requested	Retain Objective 8.1					
401	Aquaculture New Zealand	88	Volume 1	8 Indigenous Biodiversity	Objective 8.1	Support in Part
Decision Requested	Amend objective 8.1 to read: "Marlborough's remaining areas of significant indigenous biodiversity in terrestrial, freshwater and coastal environments are protected."					
404	Eric Jorgensen	11	Volume 1	8 Indigenous Biodiversity	Objective 8.1	Support in Part
Decision Requested	I submit that there should be a corresponding policy for Marlborough Sounds marine environment. This policy should also be supported by rules in the Coastal Marine Zone to ease such restoration projects such that, for example, resource consents might not be required for agreed projects that aim to restore benthic habitats or reef environments. This goes further than simply waiving of the resource application fee as suggested in Method of Implementation 8.M.6 Support.					
425	Federated Farmers of New Zealand	121	Volume 1	8 Indigenous Biodiversity	Objective 8.1	Oppose
Decision Requested	That the Objective is amended to read as follows (strike through and bold) - " <i>Marlborough's remaining significant indigenous biodiversity in terrestrial, freshwater and coastal environments is protected.</i> "

Decision Requested	Retain Policy 8.1.2.					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	174	Volume 1	8 Indigenous Biodiversity	Policy 8.1.2	Support
Decision Requested	This policy needs to be identified as RPS and District Plan Add reference in the policy explanation to where in the plan these areas are identified. Amend the plan to provide policy directions and methods to provide for further wetland and marine sites to be identified for protection.					
716	Friends of Nelson Haven and Tasman Bay Incorporated	98	Volume 1	8 Indigenous Biodiversity	Policy 8.1.2	Support
Decision Requested	<p>That the following amendments (strike-through and bold) are made to Policy 8.1.2 (<i>inferred</i>):</p> <p><i>Policy 8.1.2 While it is acknowledged that there are significant gaps in knowledge of the Districts' ecological values, in particular within the marine environment, Ssites in the coastal marine area and natural wetlands assessed as having significant indigenous biodiversity value will be specifically identified in the Marlborough Environment Plan.</i></p> <p><i>Significant wetlands have been identified in the MEP because these small and fragmented areas are all that remain of the once vast areas of wetland that covered lowland Marlborough. Restoration and protection of wetland systems depends on maintenance and stability of the water tables. As such the scale of all wetlands, independent of their existing significance play a role for restoration projects. It is important to ensure the values of the significant all wetlands are protected to meet Policy 14 of the NZCPS 2010. Areas that meet the RMA's definition of a wetland but do not have significant values in terms of the criteria in Policy 8.1.1 have not been identified in the MEP and therefore are not subject to wetland rules.</i></p> <p><i>Areas or habitats assessed as having significant ecological values and areas that fulfil ecosystem services to maintain healthy ecosystem functionality within the coastal marine area have been specifically identified in the MEP and are referred to as 'ecologically significant marine sites'. This is because the coastal marine area is comprised of resources in public ownership, with the Council having a more direct role in managing these resources including in relation to areas with significant biodiversity value in terms of Section 6(c) of the RMA. Regulation and education will be the Council's main approach in protecting, restoring and enhancing marine biodiversity.</i></p>					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
868	Kenepuru and Central Sounds Residents Association Incorporated	26	Volume 1	8 Indigenous Biodiversity	Policy 8.1.2	Support in Part
Decision Requested	Amend policy to make it clear that marine sites not specifically identified by the MEP, but which nonetheless meet the criteria for ecologically significant marine sites, are to be treated under the MEP in the same way as if they had been identified as ecologically significant marine sites under Policy 8.1.2.					
921	Matthew David Oliver	2	Volume 1	8 Indigenous Biodiversity	Policy 8.1.2	Support in Part
Decision Requested	Amend the Policy as follows (bold) - <i>"Sites in the coastal marine area and natural wetlands assessed as having significant indigenous biodiversity value will be specifically identified in the Marlborough Environment Plan, including a Peripheral Management Area around each Ecologically Significant Marine Site."</i> <i>(Inferred)</i>					
962	Marlborough Forest Industry Association Incorporated	67	Volume 1	8 Indigenous Biodiversity	Policy 8.1.2	Oppose
Decision Requested	Remove any identified wetlands that have not been verified and included without landowner consultation.					
990	Nelson Forests Limited	199	Volume 1	8 Indigenous Biodiversity	Policy 8.1.2	Oppose
Decision Requested	Remove the following SNA wetlands from the MEP: <ul style="list-style-type: none"> • W203 • W777 • W87 • W779 • W1369 • W1368 • W92 • W989 • W972 • W377 (Refer submission points 990.200 to 900.209)

Decision Requested	Reword the policy so that it is restricted to specific and identified sites.					
990	Nelson Forests Limited	212	Volume 1	8 Indigenous Biodiversity	Policy 8.3.5	Oppose
Decision Requested	Review and rewrite this Policy to be a policy. The assessment criteria should be attached as matters for control or discretion for resource consent applications.					
994	New Zealand Fish Passage Advisory Group	3	Volume 1	8 Indigenous Biodiversity	Policy 8.3.5	Support in Part

Decision Requested

Add to these policies so they apply more broadly to include all structures in waterways. Add to these policies with respect to consent renewal and delaying the legal effect of the rules to allow time to remediate the in-stream structures:

Policy (a): To assess the need to provide for the passage of fish at existing structures when renewing consents or when setting priorities for remedial or enforcement action, by taking into account:

- (a) quantity of habitat upstream of the barrier;
- (b) whether the stream is continuously flowing or ephemeral, and the extent to which the barrier affects fish passage at a range of stream flows;
- (c) significance and quality of the habitat, including presence of threatened species or effects of predator species on indigenous species;
- (d) proximity of barrier to the sea;
- (e) costs associated with any works required to provide fish passage at a site or several sites on the same river and including any likely adverse effects of the retrofit on adjacent landowners and any adverse effects on hydraulic efficiency;
- (f) proximity and effects of other fish barriers, including natural barriers in the same stream;
- (g) whether the structure is still used or the time until any programmed replacement;
- (h) whether there are alternative methods of providing for the passage of fish.

Policy (b): To delay the legal effect of the rules regulating culverts, fords and tidal flood gates existing as at [plan notification date] until five years from the operative date and to:

- (a) require resource consents or
- (b) take enforcement action for structures that do not provide for fish passage at that time unless:
 - (i) the structure has been assessed against policy (a) as not requiring provision of fish passage or
 - (ii) a plan is prepared which includes:
 - (-) a description of the works required to provide for fish passage;
 - (-) a target completion date for the required work.
- (e) the works have been completed by the specified date.

Decision Requested	<p>That Policy 8.3.7 be rewritten to clarify that commercial potting, long lining, drop lining and set netting do not constitute bottom impacting methods.</p> <p>That all references as to what constitutes 'seabed disturbance' be positively defined so as not to impact on industry operators fishing by potting, long lining, drop lining, set netting methods, hand harvest or any other methods employed by the fishing industry.</p> <p>Should bottom impacting fishing methods be considered to include prohibition of potting, long lining, drop lining, set netting methods and hand harvest then I have identified the following sites of significance as identified in the MEP will cause a particular problem for my business and also for the sustainability of some surrounding fisheries:</p> <ol style="list-style-type: none"> a. Glasgow Island (Sites of Significance Map 14) b. West Head Site - Tory Channel (Sites of Significance Maps 11 and 15) c. The Brothers and Awash Rock (Sites of Significance Map 11) d. Cape Campbell (Sites of Significance Map 16) e. Marine Mammal whale and Marine Mammal Dolphin (Sites of Significance Maps 17 and 18) <ul style="list-style-type: none"> • If any of the areas listed above are prohibited to the use of potting, long lining, drop lining or set netting fishing methods this will affect our ability to fish these areas and will create areas of closed fishery for the target species. This in turn will move fishing effort into neighboring areas within the fishery, impacting on the sustainable balance of the remaining fishery. • In creating this situation, the Council may well, even if inadvertently, upset the sustainable biodiversity of the species populating the surrounding closed areas. Any change made to the space allocated to a fishery, such as by closing a portion of productive area within that fishery, will impact on the management and performance of that fishery. This is because existing commercial, recreational and customary catch allocations are set on many years of scientific reporting and monitoring taken across the full fishing area. • If the Council's decision is that the rocky outcrops listed in the 129 Sites of Significance should be protected from all trawling and dredging I recommend these Sites be kept open to potting, long lining, drop lining or set netting fishing methods as these methods do not have an adverse bottom impact effect, nor do they adversely affect biodiversity values. However, the impact of closing many of these areas will have an adverse effect on the sustainability of the remaining fishery and so on biodiversity values of balanced and managed fish populations. 					
973	Ministry for Primary Industries	1	Volume 1	8 Indigenous Biodiversity	Policy 8.3.7	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>MPI would like to work with MDC to ensure that we can jointly pursue a more integrated approach to biodiversity protection, and to protect areas from the impacts of fishing under the Fisheries Act. MPI already has various projects underway (including within the Marlborough Sounds) looking at fishing activities that adversely impact the benthos.</p> <p>MPI therefore asks that MDC conduct additional section 32 analysis on proposed Rule 16.7.5 to address the matters raised in this submission.</p> <p>MPI asks that MDC, pending outcome of the additional Section 32 analysis, either:</p> <ol style="list-style-type: none"> Does not proceed with Rule 16.7.5 (and associated policies at this time), or Includes a new policy for Rule 16.7.5, as follows: <p><i>Within 5 years of the Regional Coastal Plan component of the Marlborough Environment Plan becoming operative undertake a review of the effectiveness of other mechanisms (including other legislative regimes) for achieving sustainable management of ecologically significant marine sites.</i></p> <p>MPI would prefer to work with MDC to protect areas from the impacts of fishing under the Fisheries Act. Alternatively, and if a new Marine Protected Areas Act is passed by Parliament, Council objectives in future could potentially be achieved under that legislative framework . Protected areas created in this way would contribute to a representative MPA network and New Zealand's commitments for marine protection under the Convention on Biological Diversity (CBD).</p> <p>The Fisheries Act provides a range of tools to achieve a balance between use and sustainability, and decisions on dealing with environmental impacts must be made while regarding relevant costs, benefits and risks. It ensures that potential environmental impacts of fishing are weighed up against benefits derived from fishing, leading to good fisheries management decisions.</p> <p>Aligning the different pieces of legislation will avoid duplication and result in an integrated, efficient and strategic way to manage marine protection in New Zealand.</p> <p>At a regional level, MPI would prefer to work in partnership with respective authorities to understand key environmental issues and to manage the impacts of fishing utilising the Fisheries Act.</p>

424	Michael and Kristen Gerard	34	Volume 1	8 Indigenous Biodiversity	8.M.3	Support
Decision Requested	<p>Retain Methods of Implementation 8.M.3 <i>The Council's Marlborough Significant Natural Areas programme involves the collection of information about natural ecosystems on private land, with the aim of working with landowners to help protect significant sites. An ecological survey is undertaken with property reports prepared that summarise the ecological values found and suggest management options to ensure their long term survival.</i></p> <p><i>The Department of Conservation has also identified significant sites on private land through its Protected Natural Areas survey programme. There is no duplication in effort as the Council and Department programmes have surveyed different areas of Marlborough.</i></p> <p><i>Although a good proportion of private land in Marlborough has been surveyed, some landowners have not allowed the Council onto their property, therefore the programme of identifying sites is incomplete and ongoing. If a landowner changes their mind or a property changes ownership and a new landowner wishes to have their property surveyed, then the Council will undertake the survey work.</i></p>

425	Federated Farmers of New Zealand	162	Volume 1	9 Public Access and Open Space	Policy 9.1.12	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the Policy is amended to read as follows (strike through and bold): <p><i>" In considering whether to waive the requirement for, or to reduce/increase the width of an esplanade reserve or esplanade strip of 20 metres in width, the Marlborough District Council shall have regard to:</i></p> <p><i>(a) whether the application is in an area identified as having a high degree of importance for public access, as set out in Policy 9.1.1; and</i></p> <p><i>(b) the width required to effectively provide physical access along the waterbody;</i></p> <p><i>while taking into account the following special circumstances:</i></p> <p><i>(c) whether significant ecological, conservation or cultural values exist that may be incompatible if general public access to the site is allowed;</i></p> <p><i>(d) whether significant ecological or conservation values warrant a wider esplanade reserve or esplanade strip;</i></p> <p><i>(e) whether topography renders the 20 metre width inadequate or excessive for public access;</i></p> <p><i>(f) whether the site is in an urban zone, where a reduced width of esplanade reserves/strips to 8 metres is generally considered sufficient;</i></p> <p><i>(g) whether the provision of public access along the esplanade reserve or esplanade strip would result in health or safety risks to the public using the reserve or strip or landowner or facility involved, for example, where there are defence lands, existing road reserve, sensitive machinery, network utilities or works; and</i></p> <p><i>(h) taking an esplanade reserve or esplanade strip would not enhance public access to or along the waterbody over time;</i></p> <p><i>(i) the subdivision involves only a minor boundary adjustment; and</i></p> <p><i>(j) where the land is protected in perpetuity, provided that public access is secured along the margins of the coast, river or lake concerned."</i></p>					
504	Queen Charlotte Sound Residents Association	45	Volume 1	9 Public Access and Open Space	Policy 9.1.12	Oppose
Decision Requested	No specific decision has been requested in the submission. It is inferred that the policy explanation should be amended so that possible effects from climate change/sea level, subsequent events and the potential financial effects on all ratepayers are addressed for all zones.					
233	Totaranui Limited	27	Volume 1	9 Public Access and Open Space	Policy 9.1.13	Support in Part
Decision Requested	<i>Specific decision requested on the Policy wording is not clear in the Submission.</i>					
425	Federated Farmers of New Zealand	163	Volume 1	9 Public Access and Open Space	Policy 9.1.13	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the policy is amended to read as follows (strike through and bold): "When considering resource consent applications for activities, subdivision or structures in or adjacent to the coastal marine area, lakes or rivers, the impact on public access shall be assessed against the following: (a) whether the application is in an area identified as having a high degree of importance for public access, as set out in Policy 9.1.1; (b) the need for the activity/structure to be located in the coastal marine area and why it cannot be located elsewhere; (c) the need for the activity/structure to be located in a river bed and why it cannot be located elsewhere; (d) the extent to which the activity/subdivision/structure would benefit or adversely affect public access, customary access and recreational use, irrespective of its intended purpose; (e) in the coastal marine area, whether exclusive rights of occupation are being sought as part of the application; (f) for the Marlborough Sounds, whether there is practical road access to the site of the application; (g) how public access around or over any structure sought as part of an application is to be provided for; (h) whether the impact on public access is temporary or permanent and whether there is any alternative public access available; and (i) whether public access is able to be restricted in accordance with Policies 9.2.1 and 9.2.2; and (j) the positive impacts of the activity, subdivision or structure from locating the development in that location."					
479	Department of Conservation	99	Volume 1	9 Public Access and Open Space	Policy 9.1.13	Support
Decision Requested	Retain as notified.					
504	Queen Charlotte Sound Residents Association	46	Volume 1	9 Public Access and Open Space	Policy 9.1.13	Oppose
Decision Requested	It is not clear in the submission what decision is requested.					
509	Nelson Marlborough Fish and Game	145	Volume 1	9 Public Access and Open Space	Policy 9.1.13	Support in Part
Decision Requested	Fish and Game seek that the policy be amended to ensure that: <ul style="list-style-type: none"> there is no reduction in public access to rivers unless this is unavoidable the criteria are amended to reflect its application to areas adjacent to rivers and not just to the riverbed

Decision Requested	Retain as proposed.					
112	Herb Thomson	1	Volume 1	9 Public Access and Open Space	9.M.9	Support
Decision Requested	Council to also include liasing with adacent land owners and public where the use of vehicles on the foreshore and seabed frontages. Areas of concern Needles rocks to Cape Cambell.					
454	Kevin Francis Loe	21	Volume 1	9 Public Access and Open Space	9.M.9	Support in Part
Decision Requested	Amend the Method as follows (bold) - "The Council and coastal landowners will liaise with the Department of Conservation to identify areas along Marlborough's coastline where the use of vehicles on the foreshore and seabed is not appropriate. The Council will liaise with the Department of Conservation and coastal landowners to assess the need for additional or upgraded public facilities for areas identified in Policy 9.1.1 as having a high degree of importance for public access." <i>(Inferred)</i>					
504	Queen Charlotte Sound Residents Association	49	Volume 1	9 Public Access and Open Space	9.M.9	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	9.M.9 must include consultation with the community in the Admin Area in the Marlborough Sounds via the Sounds Advisory Group, etc.					
712	Flaxbourne Settlers Association	32	Volume 1	9 Public Access and Open Space	9.M.9	Support in Part
Decision Requested	That the Council liaise with DOC as well as coastal landowners to find practical and co-ordinated solutions the issues of access to inappropriate parts of the coastline resulting in environmental degradation of the coastline and/or unintended trespass into private land. Method 9.M.9 should be amended to include liaison with coastal landowners as well as DOC.					
91	Marlborough District Council	77	Volume 1	9 Public Access and Open Space	9.AER.1	Support
Decision Requested	Amend the Indicators as follows (strike through and bold) - " <i>The areas identified as having a high priority for enhanced public access have an improved level of access as measured against a 2011 2016 baseline.</i> "; and " <i>The number of esplanade reserves/strips available for access purposes is increased as measured against a baseline of esplanade reserves/strips available for access existing as in 2011 2016.</i> "					
319	Clive Tozer	9	Volume 1	9 Public Access and Open Space	9.AER.1	Oppose
Decision Requested	Amend the wording to focus on improving appropriateness and quality of public access and open space reserves/strips rather than focusing on numbers of reserves/strips.					
504	Queen Charlotte Sound Residents Association	50	Volume 1	9 Public Access and Open Space	9.AER.3	Support in Part
Decision Requested	9.AER.3 should not suggest that it is the obligation of the ratepayers to use the MDC website as per the "democratic process" (<i>inferred</i>).					
218	Salvador Delgado Oro Laprida	11	Volume 1	10 Heritage Resources and Notable Trees	10.	Support
Decision Requested	Include the coastal building and watershed as part of Marlborough heritage: Picton & Havelock all stores, river and shre rowing clubs buildings and marinas.					
348	Murray Chapman	8	Volume 1	10 Heritage Resources and Notable Trees	10.	Support in Part
Decision Requested	Amend provisions so that indigenous biodiversity, as a heritage resource, is only protected on publicly owned reserves and conservation estate.					
348	Murray Chapman	9	Volume 1	10 Heritage Resources and Notable Trees	10.	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	The provisions to be amended so indigenous biodiversity protection provisions apply to publicly owned reserves/conservation estate but not to private land owners, or monetary compensation is paid on an annual basis for public good. <i>(Inferred)</i>					
351	Helen Mary Ballinger	42	Volume 1	10 Heritage Resources and Notable Trees	10.	Support in Part
Decision Requested	<p>DECISION I SEEK rewording of paragraph 1 in Chapter 10 to say something like "Trees which are not heritage or notable trees are also important to our district. The ongoing planting and management of all trees in both private and public areas is important for the ongoing maintenance and replenishment of our district's tree population."</p> <p>ANOTHER DECISION I SEEK a reassessment of the resources the Council has to monitor and manage the rules around Notable Trees and the Resource Consents related to them. I fear that unless the rules are monitored, then there will be a disregard for them by developers and contractors, as well as private property owners.</p>					
501	Te Runanga O Ngati Kuia	42	Volume 1	10 Heritage Resources and Notable Trees	10.	Oppose
Decision Requested	<p>Add an Issue or Objective to this chapter to protect undiscovered or unregistered sites of significance to iwi, and to protect the majority of Maori heritage in Marlborough, by restricting land disturbance on, near, or affecting the coastal environment and waterways and their margins and requiring iwi consultation.</p> <p><i>(Inferred - specific wording of Issue or Objective not provided in Submission)</i></p>					
688	Judy and John Hellstrom	191	Volume 1	10 Heritage Resources and Notable Trees	10.	Support
Decision Requested	Retain Chapter 10.					
715	Royal Forest and Bird Protection Society NZ (Forest and Bird)	211	Volume 1	10 Heritage Resources and Notable Trees	10.	Support in Part
Decision Requested	Amend to refer to historic heritage					
768	Heritage New Zealand Pouhere Taonga	24	Volume 1	10 Heritage Resources and Notable Trees	10.	Support in Part
Decision Requested	It is also important to note that Heritage New Zealand retains regulatory responsibilities regarding archaeological sites. Any modification or destruction of a known or unknown recorded or unrecorded archaeological site requires an archaeological authority under the Heritage New Zealand Pouhere Taonga Act 2014 and Heritage New Zealand processes applications for such authorities.					
869	Kenepuru and Central Sounds Residents Association Incorporated	47	Volume 1	10 Heritage Resources and Notable Trees	10.	Support in Part

1189	Te Runanga o Kaikoura and Te Runanga o Ngai Tahu	91	Volume 1	10 Heritage Resources and Notable Trees	10.	Support in Part
Decision Requested	Add a new policy (and explanation) <u>Policy 10.X.X Wahi Tapu and Wahi Taonga</u> <u>a. Avoid any disturbance of known urupa - except for activities associated with the identification and protection of such sites which are undertaken by the relevant Tangata Whenua Iwi or their authorised agent.</u> <u>b. Protect known Wahi Tapu and Wahi Taonga sites from inappropriate development, disturbance, damage or destruction; and ensure activities adjoining these sites do not adversely affect them.</u> <u>c. The Council will encourage early consultation with Tangata Whenua iwi regarding applications on known or suspected areas or wahi tapu or wahi taonga.</u> <u>d. The relevant Tangata Whenua iwi will be consulted on applications on known or suspected areas of wahi tapu or wahi taonga.</u>					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
1189	Te Runanga o Kaikoura and Te Runanga o Ngai Tahu	92	Volume 1	10 Heritage Resources and Notable Trees	10.	Support in Part
Decision Requested	Add a new policy (and explanation) <u>Policy 10.X.X Sites of Significance to Tangata Whenua Iwi</u> <u>Work with Ngai Tahu [or, if this is of interest to others - Marlborough's Tangata Whenua iwi] to identify sites of significance to iwi within the Marlborough District, using identification methods that respect the sensitive nature of the sites, and for the purposes of a plan change including objectives, policies, methods and rules before the next review of this plan to protect significant Maori heritage in the District.</u>					
348	Murray Chapman	10	Volume 1	10 Heritage Resources and Notable Trees	Issue 10A	Support in Part
Decision Requested	Amend provisions responding to Issue 10A to state that the whole community pays for care and maintenance of heritage resources. <i>(Inferred)</i>					
768	Heritage New Zealand Pouhere Taonga	25	Volume 1	10 Heritage Resources and Notable Trees	Issue 10A	Support in Part
Decision Requested	Marlborough's historic heritage is vulnerable to the inappropriate use and development of natural and physical resources. Archaeological sites are particularly vulnerable to land disturbance, as they tend to be buried and excavation at, or in close proximity to, the site can <u>unearth</u> disturb the object of significance and its archaeological context. If appropriate action is not taken, the heritage resource that was previously buried can potentially be damaged modified or destroyed. For archaeological sites that have a connection to Marlborough's tangata whenua iwi, such adverse effects can also cause a serious cultural affront to the mana of an iwi. <u>One of the threats to historic heritage is that there are many unknown areas of heritage significance. A lack of knowledge about the location, extent and values of historic heritage creates risks that require management.</u> For example, although past archaeological studies have revealed a little of the Maori and early European settlement patterns and culture, much more remains to be identified, researched and recorded. There will also be forgotten sites. The lack of awareness of the existence of a heritage resource makes the resource vulnerable to irreparable damage as a result of land use change.					
1002	New Zealand Transport Agency	39	Volume 1	10 Heritage Resources and Notable Trees	Issue 10A	Support
Decision Requested	Retain Issue 10A.					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
425	Federated Farmers of New Zealand	170	Volume 1	10 Heritage Resources and Notable Trees	Objective 10.1	Oppose
Decision Requested	<p>The Objective is rewritten to read as follows (strike through and bold) -</p> <p><i>"Retain and protect heritage resources that contribute to the character of Marlborough. To recognise and where appropriate, protect archaeological, historic and cultural sites, buildings, places of historic and cultural heritage of the district from inappropriate subdivision, use and development."</i></p>					
425	Federated Farmers of New Zealand	182	Volume 1	10 Heritage Resources and Notable Trees	Objective 10.1	Support in Part
Decision Requested	<p>That a new policy is added under Objective 10.1 (<i>inferred</i>) which reads as follows -</p> <p>"Recognise and encourage the role of public and private landowners in the ongoing management and protection of Heritage resources."</p>

Decision Requested	<p>That the Policy is rewritten and combined with Policy 10.1.6 as follows (strike through and bold) -</p> <p>Policy 10.1.5 - "Avoid adverse effects on the historic heritage values of Category I heritage resources."</p> <p>Policy 10.1.6 - "Where modifications are proposed to Category I heritage resources and other heritage resources, the adverse effects of the modifications on the values of the resources should be avoided, remedied or mitigated."</p> <p>Rewritten policy -</p> <p>"Conserve the values of scheduled heritage resources via permitted activity standards. Where resource consent is required for proposed modifications are proposed to Category I heritage resources and other heritage resources, the adverse effects of the modifications on the values of the resources should be avoided, remedied or mitigated while achieving sustainable management."</p>					
768	Heritage New Zealand Pouhere Taonga	31	Volume 1	10 Heritage Resources and Notable Trees	Policy 10.1.5	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend Policy 10.1.5 to read: Policy 10.1.5 – Avoid adverse effects on the historic heritage values from the destruction, demolition, partial demolition or relocation of Category A I heritage resources identified in Schedule 1 and from the destruction of sites of significance to Maori identified in Schedule X of Appendix 13. <u>Schedule 3 sites of significance to Maori, including wahi tapu, while Schedule 1 contains Category A historic buildings and structures (or parts of buildings or structures), places, sites, monuments and plaques. Category A means they are of special or outstanding significance. This is the same meaning as Category 1 historic places in the New Zealand Heritage List / Rarangi Korero. Heritage resources sourced from the New Zealand Heritage List/Rarangi Korero are assigned either a Category I or Category II status. Heritage resources classified as Category I are nationally significant.</u> Any loss or damage of or significant change to a Category I heritage resource an item contained in Schedule 1 or X would result in a significant and potentially irreversible loss of historic heritage that is important in a national context. For this reason, any significant adverse effects on the historic heritage values of resources in Schedule 1 and X Category I resources must be avoided. This will see a prohibited activity rule that forbids the loss or destruction, relocation, demolition, or partial demolition of a Category I resource in Schedule 1 and the destruction of a resource in Schedule X.					
1198	Transpower New Zealand Limited	23	Volume 1	10 Heritage Resources and Notable Trees	Policy 10.1.5	Oppose

425	Federated Farmers of New Zealand	201	Volume 1	11 Natural Hazards	Objective 11.1	Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the Objective is amended to read as follows (strike through and bold) - <i>"Reduce the risks to life, property habitable buildings and regionally significant infrastructure from natural hazards."</i>					
464	Chorus New Zealand limited	15	Volume 1	11 Natural Hazards	Objective 11.1	Support in Part
Decision Requested	Amend Objective 11.1 as follows: <i>Objective 11.1 – Reduce the risks to life, and property and regionally significant infrastructure from natural hazards. Natural hazards can have significant adverse effects on individuals and the community, including loss of life, personal injury, damage to property and disruption of day-to-day life, business and the provision of community infrastructure. For this reason, the objective seeks to reduce the risks and consequences of natural hazards. This objective also implements direction from the CDEMP, which signals that resource management provisions have an important role to play in risk reduction.</i>					
873	KiwiRail Holdings Limited	31	Volume 1	11 Natural Hazards	Objective 11.1	Support
Decision Requested	Retain as notified.					
907	Levide Capital Limited	13	Volume 1	11 Natural Hazards	Objective 11.1	Oppose
Decision Requested	A review of all objectives policies and rules that may impact future land use and create, amend or delete the objectives, policies and rules such that when viewed holistically the objectives, policies and rules apply restrictions, if any, proportional to the risks to life and property associated with the identified natural hazards.					
993	New Zealand Fire Service Commission	8	Volume 1	11 Natural Hazards	Objective 11.1	Support
Decision Requested	Retain Objective 11.1 as notified.					
1002	New Zealand Transport Agency	47	Volume 1	11 Natural Hazards	Objective 11.1	Support
Decision Requested	Retain Objective 11.1.					
1158	Spark New Zealand Trading Limited	13	Volume 1	11 Natural Hazards	Objective 11.1	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type

Decision Requested	Amend the Policy to explicitly state the following (or with words of similar effect) (bold) - <i>"Locate new structures and works to:</i> <i>(a) avoid them being damaged from the adverse effects of land instability both from within and external to the site; and</i> <i>(b) avoid any increase in the adverse effects of slope instability that the structure or work may cause."</i>					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
1198	Transpower New Zealand Limited	25	Volume 1	11 Natural Hazards	Policy 11.1.21	Oppose
Decision Requested	<p>Amend Policy 11.1.21 as follows:</p> <p><i>"Policy 11.1.21 – Locate new structures and works (except regionally significant infrastructure, where its location is constrained by technical and operational requirements) to:</i></p> <p><i>(a) avoid them being damaged from the adverse effects of land instability; and</i></p> <p><i>(b) avoid any increase in the adverse effects of slope instability that the structure or work may cause.</i></p> <p><i>Marlborough is characterised by steep terrain and in some locations, unstable geology. Combined with the potential for intense rainfall events, these factors create the potential for slope instability. Examples historically include rock/debris slumps, debris slides or flows, coastal erosion and tunnel gully erosion in various parts of the District. Establishing residential, commercial or industrial development or infrastructure supporting that development or linking our communities in locations prone to land instability will lead to unsustainable outcomes. This policy requires new structures and works to be located in environments that avoid adverse effects caused by land instability. It also addresses the situation of a structure or work exacerbating those adverse effects. The policy will primarily be implemented through the zoning of land and the scale/intensity of activity that the zone rules enable. However, the policy can also be applied in a resource consent context when an assessment of environmental effects for the structure or work identifies a risk of land instability. This includes subdivision undertaken to enable more intensive use of the land. A safe and stable building platform will have to be established for the subdivision of land in certain environments."</i></p>

Decision Requested	Add new Issue 12B - A loss in the vitality, viability and/or identity of Marlborough's business environments may result either where inappropriate activities are located within these environments or where fragmentation of business area occurs (no comment)					
994	New Zealand Fish Passage Advisory Group	4	Volume 1	12 Urban Environments	12.	Support in Part

Decision Requested

Add to these policies so they apply more broadly to include all structures in waterways. Add to these policies with respect to consent renewal and delaying the legal effect of the rules to allow time to remediate the in-stream structures:

Policy (a): To assess the need to provide for the passage of fish at existing structures when renewing consents or when setting priorities for remedial or enforcement action, by taking into account:

- (a) quantity of habitat upstream of the barrier;
- (b) whether the stream is continuously flowing or ephemeral, and the extent to which the barrier affects fish passage at a range of stream flows;
- (c) significance and quality of the habitat, including presence of threatened species or effects of predator species on indigenous species;
- (d) proximity of barrier to the sea;
- (e) costs associated with any works required to provide fish passage at a site or several sites on the same river and including any likely adverse effects of the retrofit on adjacent landowners and any adverse effects on hydraulic efficiency;
- (f) proximity and effects of other fish barriers, including natural barriers in the same stream;
- (g) whether the structure is still used or the time until any programmed replacement;
- (h) whether there are alternative methods of providing for the passage of fish.

Policy (b): To delay the legal effect of the rules regulating culverts, fords and tidal flood gates existing as at [plan notification date] until five years from the operative date and to:

- (a) require resource consents or
- (b) take enforcement action for structures that do not provide for fish passage at that time unless:
 - (i) the structure has been assessed against policy (a) as not requiring provision of fish passage or
 - (ii) a plan is prepared which includes:
 - (-) a description of the works required to provide for fish passage;
 - (-) a target completion date for the required work.
- (e) the works have been completed by the specified date.

278	Mark Batchelor	1	Volume 1	12 Urban Environments	Issue 12B	Oppose
Decision Requested	<p>Additional Objectives and policies shall be added to Chapter 12 of the objectives and policies Volume 1 requiring the following or words to similar effect;</p> <p><i>Objective 12.....</i></p> <p>To provide opportunity for business development within Business zones adjoining residential areas while protecting the amenities of residential properties and zones adjoining, facing, opposite to and adjacent to areas of Business Zone or on sites that Business activities may be permitted to be established on within an Urban Residential zone.</p> <p><i>Policy 12.....</i></p> <p><i>Consideration of the design and appearance, scale, intensity and character of any business development and activity shall be concerned with protecting the existing amenities and amenities that may be expected from the Permitted Activity standards of the surrounding Urban Residential zone.</i></p>					

Policy

Combination of the development and performance standards of the surrounding Urban Residential zone and existing development in the immediately surrounding area shall be used to determine the appropriateness of the scale, intensity and character of building and site development for the business activity.

Policy

The scale, intensity and character of buildings and site development and effects shall be similar or be designed to appear similar to and have effects similar to the scale, intensity and character of development that may be expected from the Permitted Activity standards applicable to the surrounding Urban Residential zone or alternatively that exist in the immediate locality.

Policy

Operational effects will comply with the performance standards applicable to the surrounding Urban Residential Area. In circumstances where the ambient conditions applicable to those matters in regard to which performance standards are prescribed are less than the maximums prescribed by those standards or have variable characteristics resulting from the residential nature of the locality, the operational effects of the business activity in these regards shall be no greater than those ambient levels and characteristics.

996	New Zealand Institute of Surveyors	3	Volume 1	12 Urban Environments	Issue 12B	Support in Part
Decision Requested	The issue seems to remain silent on the many of the other activities in the Urban Environment such as: <ul style="list-style-type: none">• retirement villages• seasonal worker accommodation• higher low level density housing• affordable accommodation across all age groups. It is <i>inferred</i> from the above that the decision requested is to specifically include retirement villages, seasonal worker accommodation, higher low level density housing and affordable accommodation across all age groups in the explanation of Issue 12B.					
425	Federated Farmers of New Zealand	209	Volume 1	12 Urban Environments	Objective 12.4	Support
Decision Requested	Retain Objective.

1193	The Marlborough Environment Centre Incorporated	14	Volume 1	13 Use of the Coastal Environment		Support

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	That the following amendments are made for the Coastal Environment Zone: <ul style="list-style-type: none"> • A new policy and rules aimed at preventing wilding pines spreading beyond the borders of commercial forestry. • A requirement to assess the risk of tree spread for a site using the industry Wilding Spread Risk Calculator, before planting takes place. • Where there is wilding pine spread that is obviously from a plantation area (ie "tree rain" out of a planted area) the control of them should be the responsibility of the forestry owner. This and other wilding pine control could be met by an industry levy on logs harvested. At the moment the cost of wilding pine control is being met by affected landowners and a voluntary trust through community sponsorship and grants. It is not fair or sustainable for the community, rather than the industry, to pay for this. 					
13	Rob Mounsey	1	Volume 1	13 Use of the Coastal Environment	13.	Support in Part
Decision Requested	In accordance with Council's policy and objectives I proposed that a Marlborough Sounds Land Management Plan be established. The reclassification of the Marlborough Sounds land together with Council's obligations under Part XII of the RMA 1991 would redefine permitted uses. Detailed management plans for each permitted and other land based activities would be established. This would bring about current and up-to-date management practices to commence the path to sustainability and deal with sedimentation issues.					
233	Totaranui Limited	29	Volume 1	13 Use of the Coastal Environment	13.	Support in Part
Decision Requested	<i>Specific decision requested on the Policy wording is not clear in the Submission. Inferred relates to Chapter 13.</i>

Decision Requested	Retain and amend to address submission					
716	Friends of Nelson Haven and Tasman Bay Incorporated	141	Volume 1	13 Use of the Coastal Environment	13.	Support in Part
Decision Requested	That reference to Tasman Bay is added to the introduction and to the characteristics of this bay that are different to the Sounds and South Marlborough coasts.					
716	Friends of Nelson Haven and Tasman Bay Incorporated	159	Volume 1	13 Use of the Coastal Environment	13.	Oppose
Decision Requested	That a new Issue, Objectives, and Policies: <i>Marine Protected Areas</i> are added. The submission does not provided details for the new Issue, Objectives, and Policies.					
869	Kenepuru and Central Sounds Residents Association Incorporated	9	Volume 1	13 Use of the Coastal Environment	13.	Support
Decision Requested	Retain the definition of the Coastal Environment Zone [<i>inferred</i>].					
961	Marlborough Chamber of Commerce	31	Volume 1	13 Use of the Coastal Environment	13.	Oppose
Decision Requested	<p>The negative emphasis of this chapter like many others in this plan is discouraging and does not reflect the desire of the community to develop within reasonable guidelines and resource restrictions.</p> <p>We recommend a full review and rewrite of this Chapter to ensure balance and proactive language is used to ensure participation.</p>					
990	Nelson Forests Limited	222	Volume 1	13 Use of the Coastal Environment	13.	Oppose
Decision Requested	<p>Amend paragraph 3 of the introduction as follows ((or with words of similar effect) (bold) -</p> <p><i>"The deep water port of Picton, which includes Shakespeare Bay, plays a critical national role in the transportation of people and goods between the North and South Islands and internationally. The passage of vehicles and people through the port is closely related to the economic activity of the town's commercial and accommodation activities. Picton is an export/import port that acts as a base for commercial fishing vessels, marine farming and fishing activities. It provides facilities that enable people to access the Marlborough Sounds. Shakespeare Bay is Marlborough's hub for the export of forestry products – predominantly logs, but also lumber. Recently it has also become a popular port of call for cruise ships."</i></p>					

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
995	New Zealand Forest Products Holdings Limited	17	Volume 1	13 Use of the Coastal Environment	13.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	<p>Without limiting the generality of the foregoing, to address matters the Submitter also seeks the following relief:</p> <p>(a) New objectives and policies will need to be inserted into the Coastal Environment chapter that enable and provide for commercial forestry and associated activities that are the same as or similar to those used in the Rural Environment Zone. However specific objectives and policies may also be required and could include for example (but without limitation):</p> <p>(i) A new objective under Issue 13A to enable the ongoing use, optimisation and development of commercial forests in the Coastal Environment Zone. The associated policies will need to:</p> <p>A. Enable the harvesting and replanting of commercial forests along with associated land use and stormwater diversion activities;</p> <p>B. Enable the expansion of commercial forests within existing titles by up to 10%; and</p> <p>C. Enable increased intensification of commercial forests (including increased stocking rates and rotation rates).</p> <p>(ii) A new objective to enable rural industry to be located in the Coastal Environment Zone where it supports an existing primary industry In that zone. Associated policies will need to:</p> <p>A. Enable rural industry to support primary industry;</p> <p>B. Recognise that rural industry often has a functional need to establish in certain locations;</p> <p>C. Recognise that the topography of Marlborough means that there are limited sites suitable for rural industry;</p> <p>D. Allow rural industry to establish, notwithstanding potentially significant local effects, where there are limited alternatives.</p> <p>(iii) A new objective will need to be Inserted that enables transport infrastructure that supports the use and development of primary industry. Associated policies will need to:</p> <p>A. Enable the development and construction of new roads, the widening of existing roads, and the establishment and operation of forestry roads;</p> <p>B. Enable the use of existing roads by vehicles associated with primary production activities;</p> <p>C. Enable the development and construction of water based transport infrastructure within the Coastal Environment Zone and Coastal Marine Zone.</p> <p>(b) Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.</p>

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend the introduction as follows (bold and strike through): <i>The waters of the Marlborough sounds are important for fisheries for a number of reasons, including:</i> <ul style="list-style-type: none"> • <i>an ongoing source of traditional food for Marlborough's tangata whenua iwi;</i> • an on going source of food for full time and part time residents; • <i>providing a livelihood for commercial fishers;</i> • <i>being a significant factor in many recreational and tourism activities; and</i> • <i>contributing to a range of species present in the sounds and therefore the health of marine ecosystems.</i> 					
1112	Sarah Cumming	6	Volume 1	13 Use of the Coastal Environment	13.	Support in Part
Decision Requested	Add a new Policy as follows - " Ensure that developments like marine farms, once consented, are allowed to stay as long as their owner does a good job and obeys the rules. " <i>(Inferred)</i>					
1186	Te Atiawa o Te Waka-a-Maui	21	Volume 1	13 Use of the Coastal Environment	13.	Support in Part
Decision Requested	The Trustees of Te Atiawa seek that cultural indicators are incorporated into the water allocation regime, the air shed management, and management of the coast.					
1186	Te Atiawa o Te Waka-a-Maui	30	Volume 1	13 Use of the Coastal Environment	13.	Support in Part
Decision Requested	The Trustees seek the inclusion of objectives, policies, methods, rules, standards, matters of control and discretion relating to the disturbance of the seabed by structures and activities, with the purpose of ensuring a reduction in the associated adverse effects yet providing for mahinga kai and customary practices.					
1186	Te Atiawa o Te Waka-a-Maui	83	Volume 1	13 Use of the Coastal Environment	13.	Support in Part
Decision Requested	Amend the AER to include specific goals and monitoring criteria for cultural values.					
1187	Te Runanga a Rangitane o Wairau	5	Volume 1	13 Use of the Coastal Environment	13.	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	The decision we seek from Council is:					
	<ul style="list-style-type: none"> • More monitoring of the Wairau Lagoon, putting systems in place to replenish this important resource. • A more sustainable approach to fresh water systems. • Alternatives to the current sewage output, work on this needs to start now for a cleaner greener way for sewage disposal, promoting the health of the Wairau river is paramount, producing water to world health standards for gathering of Kai, swimming and recreational activities on the Wairau River especially the mouth of the Wairau is of utmost importance. • Water quality standards need to be higher set my MEP, new ideas need to be looked at so the treated sewage does not continue to flow into the Wairau, if the outflow pipe has to remain, there needs to be a new implementation put in place to assure the quality of outgoing flow is clean/pure enough to enhance the river into becoming a river suitable for food gathering and recreational activities. • Keeping the Marlborough Bar area clean and green, having a stance on no Commercial Buildings to be consented for around the Wairau Bar area. • Keeping in line with Report 2741 State of the Environmental Monitoring of Wairau Estuary-August 2015 and recommendations of that report to MDC. • Keeping updated monitoring on the waterways, drains/creeks that flow into the Wairau Lagoons and Wairau River so any potential contamination from these creeks is quickly averted. • Water Quality needs to be a priority for MDC, our rivers have a mauri, mana and tapu of their own; our rivers are our taonga and are an indicator of environmental health we want more emphasis on this and more effective outcomes from our Council.

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Amend this policy or add another policy to give effect to Policy 11(a) in terms of terrestrial coastal biodiversity.					
716	Friends of Nelson Haven and Tasman Bay Incorporated	143	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Support
Decision Requested	Retain Policy 13.1.1 but add a further policy requiring protection of natural character from the effects of inappropriate subdivision, use and development.					
868	Kenepuru and Central Sounds Residents Association Incorporated	39	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Support in Part
Decision Requested	We submit that it be made clear that policy 13.3.1 applies to areas identified on the balance of evidence as being outstanding areas or areas of significant value irrespective of whether or not they are yet specifically identified as such in the MEP.					
868	Kenepuru and Central Sounds Residents Association Incorporated	46	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Support
Decision Requested	Retain policy [<i>inferred</i>].					
869	Kenepuru and Central Sounds Residents Association Incorporated	12	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Support in Part
Decision Requested	Clarify Policy 13.1.1 by inserting in line 3 after the words "... in areas with..." the phrase ", or in proximity to,...".					
906	Legacy Fishing Limited	7	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Support in Part
Decision Requested	That Policy 13.1.1 is amended to require explicit consideration of impacts on fisheries resources, fisheries habitat and/or fishing activity (as appropriate).					
995	New Zealand Forest Products Holdings Limited	18	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Oppose

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Without limiting the generality of the foregoing, to address matters the Submitter also seeks the following relief: (a) The objectives and policies, particularly (but not limited to) Policy 13.1.1, need to be amended and land with commercial forestry therefore needs to be removed from the Outstanding Natural Feature, Natural Character and Landscape maps, otherwise it is difficult, if not impossible, to see how commercial forestry could ever be cleared in light of Policies 13(1)(a) and 15(a) of the New Zealand Coastal Policy Statement and the decision of the Supreme Court in the King Salmon (2014 NZSC 38) case that, in terms of those policies, "avoid" means "avoid." Moreover, where the land is felled in accordance with resource consent or existing use rights it will not have outstanding character and therefore should not be classified as such; (b) In the alternative, provide an exemption to Policy 13.1.1 for areas of existing commercial forestry to operate, develop, expand and intensify and / or change the policy to avoid, remedy or mitigate adverse effects; and (c) Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.					
1002	New Zealand Transport Agency	54	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Support in Part
Decision Requested	Amend Policy 13.1.1 as follows: <i>Avoid adverse effects from subdivision, use and development activities on areas identified as having:</i> ... <i>except where the activity is necessary to enable the maintenance, construction, operation and upgrade of regionally significant infrastructure.</i>					
1038	PauaMAC 7 Industry Association Incorporated	6	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Oppose
Decision Requested	That Policy 13.1.1 is amended to require explicit consideration of impacts on fisheries resources, fisheries habitat and/or fishing activity (as appropriate).					
1041	Port Clifford Limited	20	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Support in Part
Decision Requested	That the following amendment (bold) is made to Policy 13.1.1: <i>Policy 13.1.1 Avoid or mitigate adverse effects from subdivision, use and development activities on areas identified as having:</i>					
1189	Te Runanga o Kaikoura and Te Runanga o Ngai Tahu	95	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Support in Part

Sub No	Submitter	Point	Volume	Chapter	Provision	Type
Decision Requested	Policy 13.1.1 – Avoid adverse effects from subdivision, use and development activities on areas identified as having: (a) outstanding natural character; (b) outstanding natural features and/or outstanding natural landscapes; (c) significant marine biodiversity value and/or are a significant wetland; or (d) significant historic heritage value. (e) essential to the relationship between Maori and their ancestral lands, water, sites, wahi tapu and wahi taonga.					
1198	Transpower New Zealand Limited	26	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Oppose
Decision Requested	<p>Amend Policy 13.1.1 as follows:</p> <p><i>“ Policy 13.1.1 – Avoid adverse effects from <u>inappropriate</u> subdivision, use and development activities on areas identified as having: (a) outstanding natural character; (b) outstanding natural features and/or outstanding natural landscapes; (c) significant marine biodiversity value and/or are a significant wetland; or (d) significant historic heritage value.</i></p> <p><i>Policy 13.1.1 identifies four significant matters upon which the adverse effects of <u>inappropriate</u> activities are to be avoided. These matters are given particular direction through the principles of the RMA (Sections 6(a), (b), (c) and (f)) and through direction provided by Policies 11, 13, 15 and 17 of the NZCPS. However, it is important to acknowledge that implementing the policy does not mean that all activities are prohibited from occurring in the areas with the identified values; it simply makes clear that any adverse effects of <u>inappropriate</u> activities must be avoided in those areas, rather than being mitigated or remedied. <u>Some activities, for instance National Grid assets such as the Cook Strait Submarine Cables and connection to them, have a technical, functional or operational need to locate in the coastal environment. This is recognised by Policy 6 of the NZCPS.</u>”</i></p>					
1244	Z Energy Limited	26	Volume 1	13 Use of the Coastal Environment	Policy 13.1.1	Support in Part
Decision Requested	<p>Amend Policy 13.1.1, including the explanation, relating to outstanding and significant areas by including reference to the values for which the areas are scheduled as follows:</p> <p>Policy 13.1.1 – Avoid adverse effects from subdivision, use and development activities on the values of areas identified as having: (a) outstanding natural character (b) outstanding natural features and/or outstanding natural landscapes; (c) significant marine biodiversity value and/or are a significant wetland; or (d) significant historic heritage value.</p> <p>Policy 13.1.1 identifies four significant matters upon which the adverse effects of activities are to be avoided. These matters are given particular direction through the principles of the RMA (Sections 6(a), (b), (c) and (f)) and through direction provided by Policies 11, 13, 15 and 17 of the NZCPS. However, it is important to acknowledge that implementing the policy does not mean that all activities are prohibited from occurring in the areas with the identified values; it simply makes clear that any adverse effects of activities on those values must be avoided in those areas, rather than being mitigated or remedied.</p>
